NOTICE

There will be a Pep Rally and Torchlight Parade tonight at 7 p.m. starting at the Kappa Alpha house. Dean Wilson will give a short talk.

Let's show our school spirit by having a large crowd.

VOLUME 40

THE MISSOURI MINER

Missouri School of Mines & Metallurgy

ROLLA, MO., FRIDAY, OCT. 9, 1953

NOTICE

As in the past, Theta Tau will sell Mums, the traditional Homecoming flower, at the gate before the game. The Mums are 75 cents apiece.

NUMBER 3

WELCOME, RETURNING ALUMNI

1953 Homecoming Program

OCTOBER 9

10:00 — Board of Directors Meeting in Rolla.
6:30 p.m. — Dutch Treat Dinner, Pine Room, Greyhound Bus Depot.
9:00 p.m. — 12:00 p.m. — Pine Room will be open for alumni and friends.

OCTOBER 10

9:00 a.m. — Registration, Parker Hall.
10:45 — Homecoming Convocation, Auditorium, Parker Hall - Address of Welcome - Dean Curtis L. Wilson. Convocation Address H. S. Pence, '23.
12:30 p.m. — St. Louis Section Cocktail Party Meeting, Hotel Edwin Long.
2:30 — Football, Miner vs. Warrensburg State College.
7:00 — Homecoming Dinner, Hotel Edwin Long.
9:00 — Homecoming Dance, Jackling Gym.
9:30 p.m. — Ark-La-Tex Subsection Cocktail Party, Pine Room, Greyhound Bus Depot.
12:30 p.m. — (All Alumni Welcome).

MONKEY STOVE GOES BUT SUMP PUMP STAYS AT THETA KAPPA PHI

By Jerry Spann

The Theta Kaps can look back on last week as one of many accomplishments. The hustling football team emerged victorious twice, beating Theta Xi 25-0 and Tech Club 37-0. The team is scheduled to meet Sigma Nu Friday, and is hoping to make it three in a row! The boys also got another big item out of the way in the form of putting the finishing touches on the new house. The spacious front porch was finally painted, along with a refinishing job on a few of the study room floors. Bros. Bieser and Yallaly were the chief contractors.

With Homecoming weekend just about here, the Theta Kaps are ready to welcome back the old grads to the "new" Cow House. There will be much to talk about when the Alumni re-see the many alterations which have transpired during the past year. Many will be struck with nostalgia when they recall their experiences with the late "monkey stove" (may it rest in peace), and the old hand-fired furnace. Ah, but we still have ye olde Sump Pump, which is rumored to be the only bottomless pit in this area, and this should serve as a living proof of our beliefs in the old school. Seriously though, we are looking forward to seeing the men again, and hearing about the "good old times." Welcome home!

INTERN'L FELLOWSHIP AT MSM ELECTS OFFICERS

The International Fellowship at the School of Mines inaugurated another eventful semester with its most popular program last Friday night. Over sixty members took part in the Fellowship's program held in the Mining Building.

On opening the meeting, Mr. Mohanty, president of the Fellowship, extended a hearty welcome to the guests and members present in the meeting, after which different committees such as Radio, Public Relations, Publicity and Social Committees were appointed to carry on the Fellowship's program for this semester.

K. Tangri then explained to the audience the ideals and hopes of the organization.

The program was given to Dean Curtis L. Wilson who presented his views on "The Internationality of Science and Engineering" in a very interesting manner.

The officers of the Fellowship for this Fall, 1953 include:

G. N. Mohanty (India) President; Bruno Hake (Germany) Vice-President; Clint Neumann (U. S. A.) Treasurer; Theodore Nagy (Hungary) Secretary.

Triangles to Begin Weekend With Dance And Hayride Friday

The members of Triangle held their first social event of the year after the Washington University football game at the home of alumni Warren Kaiser. Alumni, pledges, actives and dates attended the informal gathering which was also attended by the Field Secretary of the National Council, Mr. Fred W. Neubauer. A subsequent number of actives attended the mixer at Lindenwood College. Some of the make-out artists (Brothers Paladin and Dombrosky) were successful in obtaining dates for homecoming.

During the last week the actives were hard at work preparing the house while the pledges gazed in amazement at the efficiency of the actives' endeavors. The big week-end will start with a hayride Friday night and dancing immediately following at the chapter house. A banquet will be held at the house preceding the football game. Most members are planning to attend the dance at the gym, after which they will return to the house for dancing, singing, etc.

May we congratulate Brother Larry Murphy on pinning Miss Marilyn Schroeder of Robinson, Illinois and Brother Morton Mullins on becoming engaged to Miss Peg Jansen of Kirkwood, Mo.

It is the actives' expectation that the pledges have the largest torches for the pep rally Friday evening.

We would like to welcome Brother Ruch back to the Rock House after spending nine months in industry.

Because of the great vitality shown by the pledges, it is believed that they need a little cooling off. They have been boasting that they could decisively trounce Pi Kappa Alpha's pledges in a water fight at any time and anywhere.

KA's Make Ready for Homecoming Alumni By Working on House

If you happen to be passing 1311 State Street this week you probably saw what appeared to be on first sight a colony of beavers. It was, in reality, only the K. A.s making like carpenters to get the house ready for the annual Homecoming celebration. A large turnout of alumni is expected this year from all parts of the United States. Festivities will begin on Friday night with a banquet at Malo's. Maybe the strangest part of the sight was that the Rebels were working to the melodic strains of such renditions as 'The Dark Town Strutter's Ball' and 'St. Louis Blues', which were donated by a light fingered maestro whose piano had been deported from the house proper and is now abiding in the garage.

(Continued on page 4)

KAPPA SIGS TO HOLD 50TH ANNIVERSARY ON HOMECOMING WEEKEND

Bob and Wally

With the coming of Homecoming there is lots of work. As this is our 50th Anniversary, we are expecting many illustrious alumni and we hope to make this a homecoming they'll never forget.

Two of our liveliest pledges are heading the activities. They are Bill Demzik and Chuck Warneke. Along with them are Kurt Plache and Tom McBrayer as idea men. With these four men working, we are sure to obtain the most enjoyable homecoming weekend ever.

Wha Hoppin! ! ! That's the question going around the house about the football game the 28th. We lost a thriller to Sig Ep 26 to 21 with the last half played in utter darkness. One of the bright spots of the game was Goose's three straight extra points along with some strong line play. Although we didn't win the game we had the largest crowd and the loudest cheering section which we hope to see at all our sporting events.

Strange happenings the 26th as McDuff's car was mysteriously found two blocks away from the house and a note was found signed the GREEN HAND. Also on the 2nd, two third floor residents were locked on the roof. Victims were Calhoun and Andersen. Wonder who did it. GREEN HAND maybe!

Beta Sig Pinochle Tourney Underway; Little Dry Fork Wet

By Ray Peters

Bunch of tired faces around here Monday morning. Les Brockmann's was tired, but happy. Les encountered a cute little fluff of femininity from C. M. S. C. last Sunday evening. Guess they'll be throwing rocks at each other for a while next Saturday afternoon. After the game, however, the bond (between the schools, that is) should be as strong as ever. I understand she's writing a takeoff from Mickey Spillane. She gets her material from "Tales of Brockmann." Get all that stuff substantiated by me before you use it, Betty.

The Little Dry Fork was the stage set for a drama last Saturday afternoon. Some of the guys found out that the Dry Fork isn't so dry after all. It seems that after Sergeant Wolf had completed his instructions to the platoon on the Manual of Arms, the Privates mutinied and attempted to hurl him into the drink. The only character who didn't get wet, I think, was the good Sergeant. This episode will go down in history as "The Battle of the Little Dry Fork." Hollywood wanted to make a 3D out of it, but T. V. objected. T. V. retaliated by using the West Lounge for a pasture, and the aforementioned mutineers punished themselves by trucking the stuff outside. Operation Juicy.

In turning to Sports, we see that the recent football battle with Sigma Nu was chalked up as a loss. Too bad. The indoor sports showed a brighter side, however, as Jack Weber battered his way to victory in his first two ping pong intramural games. The doubles team, Paul Egan and Trev Thornton, also came out on top in their first two games. The annual Beta Sig Local Pinochle Tournament is now also under way, but at this early date it is pretty hard to pick any favorites.

NOTICE

Freshman and Transfer Basketball Tryouts — Monday Night, 7:30, Oct. 12. Varsity, 7:30, Oct. 15.

NEXT WEEK'S INTERVIEWS

Monday, Oct. 12, North American Aviation will interview January graduates in the Electrical and Mechanical fields.

Tuesday, Oct. 13, The Texas Company (Louisiana Division) will interview Mining, Chemical and Mechanical Engineering students graduating this year.

Wednesday, Oct. 14, Boeing Aircraft Company will hold a meeting and show a film in the auditorium of Parker Hall to students in Electrical, Civil, and Mechanical Engineering and Physicists at 4:00 p.m. Cities Service Oil Company will hold a meeting to interview Chemical, Electrical, Mechanical, Mining (Petroleum), and Civil Engineering students graduating this year.

Thursday, Oct. 15, Boeing Aircraft Company will interview Civil, Mechanical and Electrical Engineers and Physicists.

Thursday, Oct. 15, Boeing Aircraft Company will interview Civil, Mechanical and Electrical Engineers and Physicists.

Friday, Oct. 16, Boeing Aircraft will continue interviews.

CONSTRUCTIVE PROGRAM UNDERTAKEN BY PLEDGE POWER AT SIGMA PI

By Moe Ashley

The ambitious pledges of Sigma Pi have embarked on a very constructive program, which will carry throughout the semester. This constructive program is under the capable direction of Ray Williamson, elected pledge trainer for the term. Ray has started the boys at re-decorating the dining room, which has already been painted a becoming sunshine yellow, to be followed by an inlaid tile floor. All of this should be completed before the Homecoming activities get underway this weekend. These improvements in addition to the chairs and tables acquired last spring will make the dining room one of the beauty spots of the house.

Another huge undertaking for this semester's pledge class will be to replant the grass in the front yard. This plot has been refused to yield anything but weeds for the past several years, so here's wishing them luck at what seems to be a hopeless undertaking.

The partying ways of most of the fellows in the house are gradually being postponed from during the week to the forthcoming weekends because the first quizzes in many courses have been announced for this week. We all want to make good grades and obey the "Laws of the Administration."

ASME, SAE to Hold Joint Meeting Wed.

The A.S.M.E. and the S.A.E. are having a joint meeting this Wed. Oct. 14. An invitation is extended to all mechanical engineering students. Especially freshman mechanical engineering and unclassified students. The fellowship will be enjoyed by refreshments.

This is a good chance to become acquainted with the laboratory, faculty, and fellow students.

The purpose of the meeting is to finish the preparation for parents day, which is the 17th of Oct.

THE ANNUAL STUDENT CONTEST IN PORCELAIN ENAMELING ANNOUNCED

The Annual Student Contest in Porcelain Enameling is again announced for the current school year. Prizes totalling \$1,000 will be awarded for the best papers on Porcelain Enameling technology, with awards being made at the Annual Convention of The American Ceramic Society next Spring.

The contest is open to all students, both graduate and undergraduate, who are registered in Ceramics or Ceramic Engineering, and who are majoring in those subjects. Contest rules are available from the Department Head of the Ceramic Engineering Dept., or from the sponsor, who is Ferro Corporation of Cleveland, Ohio, manufacturers of Porcelain Enamel and Clayware frits.

Entry blanks must be mailed to the sponsor by November 23, 1953. Papers must be submitted on or before February 26, 1954. The judges are C. S. Pearce, Secretary, American Ceramic Society, Edw. Mackasek, Managing Director, Porcelain Enamel Institute and B. J. Sweo, Ceramic Research Director, Ferro Corporation.

Tekes Bring Pledge Total to Twenty One; Select Pledge Pres.

This weekend will mark the first test of the '53-'54 Tekes, that being, of course, the annual Homecoming celebration. (?) All have dates except the usual few, I am told, so the weekend should be as big a success as can be expected. Our decoration idea is a good one, and should more than make up for our last year's display.

In case any Miner notices the new look on the light in front of our house, I'll say that is the work of Handyman Heinrich. It is a part of our remodeling plan, which, this week, consists of painting the stairs and chow hall. More of his work can be seen by examining the collar of that overgrown dog usually seen in front of the coffee shop at night.

We have a new pledge in our organization, bringing our total to twenty-one. He is Bill Habersaat of Lockwood, Missouri. Welcome, Bill.

I'll mention this week, since I forgot it before, that the president of our pledge class is Dick Merz, and that the secretary is Jim Pinkstaff. Congratulations to you two men on your new positions.

A.S.C.E. Holds Second Meeting of Semester

The American Society of Civil Engineers held its second meeting of the year last Wednesday evening in Harris Hall. Colonel Suhre, our A. S. C. E. senior contact member, delivered a very interesting and most informative discussion on "Civil Engineering as Modified by the Military." This was the first of many planned programs this semester. May we, as members, urge you new students to come out and take advantage of what A. S. C. E. offers you.

As a newcomer you may ask, "What does A. S. C. E. offer me?" Briefly A. S. C. E. membership assures that contacts can be made with the technical and professional progress of civil engineering and with the leaders who are responsible for such progress. Even more important, membership, offers the chance to take part in the constructive activities carried on by future leaders of the profession. So let this be your invitation to our next A. S. C. E. meeting. Start your association with the professional field now.

Football Game, Dance, Highlight Weekend

By Joe Lesyna

This weekend will be the scene of the old grads descending upon our campus in their annual trek back to Rolla, commonly called Homecoming. The Homecoming celebration has always been one of the highlights of the school year here at M.S.M., and from all indication this year's celebration should prove no exception.

Homecoming officially begins Friday morning at 10:00 with a Board of Directors meeting. Friday evening at 6:30 witnesses the annual Dutch Treat Dinner in the Pine Room at the Greyhound Bus Depot, and from 9:00 until 12:00 p.m. the Pine Room will be open for the Alumni and their friends.

Registration for Homecoming will begin at 9:00 Saturday morning at Parker Hall. The Homecoming Convocation, which will be held in the Auditorium of Parker Hall starts at 10:45, with the Welcoming Address given by Dean Wilson and the Convocation speech by H. S. Pence, '23. At 12:30, the St. Louis Section of the Alumni Association will have a Cocktail Party Meeting at the Hotel Edwin Long. Following this meeting, the Miners will tangle with Warrensburg's Eleven at Jackling Field, the game starting at 2:30.

The Hotel Edwin Long will be the scene of the Homecoming Dinner beginning at 7:00 p.m. followed by the Homecoming Dance at 9:00 in Jackling Gym. At 9:30 p.m. the Arkansas-Louisiana-Texas Section of the Alumni Association will hold a cocktail party in the Pine Room at the Greyhound Bus Depot.

PHYSICS DEPARTMENT INTRODUCES NEW MEN ON STAFF THIS TERM

By Robert Fuller

The news first on the agenda from the Physics department is the introduction of the new instructors and assistants.

Malcom Cole, a recent addition to the Physics staff as an instructor, received his B.S. and Masters Degree in Physics from the University of Wisconsin. He has done some work towards his Ph.D. Mr. Cole has had considerable training in Electrical Engineering and Astronomy. He has had previous teaching experience at Know College, Minnesota State Teachers at Mankato, Edgewood College, and The University of Wisconsin. Attention baseball fans - he is known to be a Milwaukee Brave fan and is also interested in other sports. Mr. Cole, also an amateur astronomer, is residing at 1107 Rolla Street.

Robert Choate, also an instructor, is a graduate from dear old M.S.M. He got both his B.S. and his Masters here in Rolla. Getting his B.S. in Electrical Engineering and his Masters in Physics. He comes here from the previous employment of both McDonnell Aircraft and Bell Aircraft. He is married, has two daughters, and is living at 2 Nagogami Courts.

The recently employed graduate assistants are: Howard Brown, who did his undergraduate work at James Milliken University at Decatur, Illinois, Charles Hewett, and Paul Blackmon both from the Missouri School of Mines.

These men joined the capable Physics Department headed by Professor H. Q. Fuller and made up of associate professors Dr. Bessey, Dr. Lund, Mr. Jensen, and Professor Woodman. Mack Brezeale is the only other graduate assistant besides the new men.

A seminar is held every Thursday on the first floor of Woodward Hall and all persons who are interested in hearing the (Continued on Page 4)

THE MISSOURI MINER

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla Mo., every Friday during the school year. Entered as second class matter February 8, 1945 at the Post Office at Rolla, Mo. under the Act of March 3, 1879.

Subscription Price \$1.00 per Semester. (Featuring Activities of Students and Faculty of M.S.M.)

The voice from the Mine Shaft will discuss this week a subject, which at the moment, is dear to the heart of every good, clean, American, young, athletic, youthful, rope-jumping, decent, and upstanding Miner. In addition to these three it is also of interest to the other 1,167. The subject is a recreational program, introduced by our glorious institution, as a means by which the hard working Miner, who spends long hours sweating over hot bars, who pushes his overloaded brain to the breaking point, may, ever so often, tear loose from his inhuman burden, and burst forth into the life-giving sun to relieve his pent up emotions in a sporting game. We know this gift as Intramural sports.

In order to give a completely graphic description of the benefits which the Miners reap from this program, let us follow the activities of an average, run-of-the-mill, every day Miner, John Crossection.

A Dear John

John's friends were worried about him. Last week he had received a Dear John from his sweetheart, Elmira Sweatshirt. Near the cracking point, John received blow after blow; shotguns, quizzes, shafts of all kinds. Sad indeed was the plight of John Crossection. John's friends knew something must be done. His appetite was below par, he was dragging, listless, the bags below his eyes had bags. Then one bright September day the answer came. One of John's Fraternity Brothers, Zack Zilch, who was captain of the house's football team, needed an extra lineman. John was his man.

A Game of Skill

At this point a few words of description are in order concerning the intra-mural form of football. This game isn't at all like the crude, cruel, barbed game which comprises college football. All of the physical contact has been removed, leaving only a game of skill and agility.

Back to the John, I mean John. After hearing Zack's request, John accepted eagerly and spent the days previous to his first game in serious preparation. He did hundreds of push-ups, pull-downs, squats, jumps, stretches, bends, and various other forms

of self inflicted torture, until he was the picture of, well he, that is when he could move —. Well anyway, when game time arrived, John had done everything he could to convert himself from 90 lb. weakling to a 100 lb. weakling. He almost made it too! The one thing he forgot however, was to learn about the game.

Take That Man Out

The score was 97 to naught in favor of the opposition, the much feared I Tappa Keg nine, when Zack Zilch beckoned for John to enter the game. As he helped carry off the man he was to replace, he began to wonder if this game was all it was cut out to be. Zack showed John his position and pointed to the man opposite him. "Take that man out!" he said and take him out John did. At the snap of the ball John's opponent tripped and fell full length on the gridiron. John grasped the burly guard by the seat of his pants and dragged him off of the field. Some time later the score had mounted to 129 to naught and John, after his one play career, was warming the bench. Zack however, reconsidered, and again John entered the game. This time he was determined. I Tappa Keg had the ball and their unfoulable line opened a hole suitable to accommodate a battleship. Nothing stood between the ball carrier and another six points, with the exception of poor 'lil John. He was set on stopping the charging 280 lb., six foot, seven, fullback. He planted his feet in the rocky turf, narrowed his eyes on the onrushing charger, and prepared to relieve his foe of the small flags, which, unknown to John, were securely wired to the giants belt.

Once again the Intra-mural program has relieved a nervous, run down Miner of all his problems. In addition a mention of his athletic prowess was made in John's obituary.

A final word - have a jolly Homecoming. May all the blind dates be party girls (ones who believe children should be seen and not had).

Shaft of the week. There was a young man from France, who waited ten years for the chance. He muffed it.

AT A GLANCE

The hardest thing to find in this town is a good cup of coffee even tho it is probably the easiest thing to make, especially around Rolla. . . Miners lost a gain. Either the team is jinxed or else something else is wrong. It has been said that there is too much friction, on a petty basis, between men. Is this true Coach? . . . Sunken Gardens almost lived up to its name after that rain we had. . . Noticed that the Churches were full that Sunday; guess a lot of people had occasion to thank God for the rain. . . No Fraternity parties Saturday night. Guess this should be more of a Home going weekend. . . wonder if the ban is on because the School is afraid

the Alumni won't attend the banquet. . .

If all the tradition is taken away, this will end up being a suitcase college. You can't attract dogs without trees and hydrants; you also can't attract new students without a well rounded curriculum which includes some sort of relaxation. . . Remember, don't drink; Big Brother is watching. . . Want to welcome Bob Choate to the Institution. Bob is a Physics Instructor and from all reports is doing a good job of it. He used to be a student here. Must be a glutton for punishment to come back.

Funny world, some instructors got a raise in pay, while the Janitor staff has been cut

THE CAMPUS PHILOSOPHER

By G. V. Sancianco

College life is not of unceasing and relentless study - it never had been intended that way. It has been intended to build the individual academically as well as socially, with the ultimate aim of providing the nation with potential leaders. The emphasis is made that education is founded on this thesis and that academic or social achievement alone is not conclusively synonymous with education. A very important ramification of education is the development of the ability in the individual to assume a pattern of thinking, conforming with the accepted techniques and rules of logic.

I realize the responsibility of proving my contentions. For if they were left suspended, as they are, my efforts would be useless. I was told that the average Miner's comprehension of Philosophy is very limited or nil. But is it so? I doubt it. Maybe there is an entirely erroneous conception of the word.

Anything looks big when it is brought closely to one's sight, and I believe this is the case. The Miner "fiddles" with Philosophy everyday but he is unconscious of it. As a part of my proof, my task, therefore, is to make him conscious of this daily chore. For if he does, then I shall have proven my conclusion (that is, an important ramification of education is logical thinking).

In which ever manner I began my general statements above is really irrelevant - whether I stated the conclusion first or the main premise as it stands. Since I have my choice, I shall proceed in untangling the mess from the conclusion backwards. Caution is made at the onset that although the engineering graduate is equipped with the tools of logic, he is far from having all the tools. The responsibility, it seems, rests on the school to furnish him with the equipment in which he is deficient. But it is hoped that with his background he is able to handle other subjects such as sociology, politics and economics with the same or almost the same facility as his physical sciences.

(TO BE CONTINUED)

to the bone. Funny part is that a lot of instructors would make better janitors. . . Report from last Spring: The Faculty took and unofficial vote to have St. Pat's holiday done away with. The majority were in favor of it. Is this true and if it is does it mean that there possibly won't be a St. Pat's next semester? What do you think? . . .

Remember the words: United we stand, divided we fall. This applies particularly to the organizations around the campus. Friendly rivalry is fine, as long as it is just that: friendly. A demonstration of cooperation between organizations would do a lot to make this a better School. Should start on it right away tho, say even tomorrow. . . PEP RALLY this evening. Try and make it because we are never going to win if the team doesn't have some evidence of our confidence in them.

Solicitor: "And so he stole the money from your stocking?" Fair Client: "Yes." Solicitor: "And did you resist and call for help?" Fair Client: "But I didn't know then that he was after the money."

INTRODUCING B. M. O. C. BOB HOFFMAN

BOB HOFFMAN

Noel Hubbard, the Registrar, is probably the man responsible for Bob Hoffman's coming to M. S. M. It was in '51, at a high school's college day program in Litchfield, Ill., that Hubbard talked Bob into coming to M. S. M., because it was, as Hubbard said, "the best school for mining and geology." Bob says he chose engineering as a career because he has three brothers who are engineers.

While Bob was in high school he participated in football and band. When he graduated, he was fifth out of a hundred. He has still managed to maintain a good scholarship at M. S. M.

Lambda Chi Welcomes Pledges; Receives New Bridge Trophy

By Fred Janesky

Congratulations go to eleven fine men pledged by Lambda Chi this semester. They are Bud Alud, Duane Zook, Dan Crissup, Henry Atkinson, John Victor, Ron Roberts, Dave Fahy, Bill Gruenwald, Jim Beasley, Arnold Maddox, and Clarence Lentz.

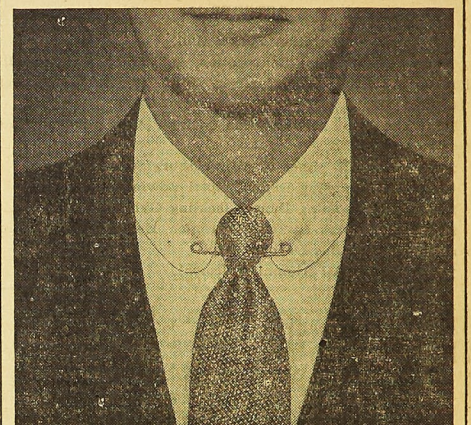

Congratulations also go to Forest Noll, Bob (Jock) Hazelwood, Dan Norman, Gil (Little one) Brown, Orvis Brown, Jerry Overton, and Lorenz Duerr upon being initiated last June.

Homecoming is coming up this week-end, but the Lambda Chi's aren't quite over the week-end spent in St. Louis at the time of the Washington-Rolla Miners game. This occasion should prove quite enjoyable since everyone is planning on a date. The question now is where are they going to stay since all of the cabins and hotels are full.

This semester we have acquired a new house manager. He really seems to keep the pledges hopping. Keep 'em going, G. O.

Since last June Lambda Chi has received a shiny new bridge trophy. It seems it was a little late getting to us. Congratulations Lee Hull.

"Great On Dates" Men Say Of Arrow Shirts in White and Tints

Campus Consensus: Arrows get top date-rating . . . because Arrows really keep a fellow looking his best. The new Fall and Winter line of Arrow shirts (said to be the "smoothest line on campus") can now be seen at all Arrow dealers.

For free booklet, "The What, When and Wear of Men's Clothing," write to: Cluett, Peabody and Co., Inc., 10 East 40 Street, New York 16, N. Y.

ARROW SHIRTS

TIES • UNDERWEAR • HANDKERCHIEFS • SPORTS SHIRTS

It took a lot of engineering to make a better "grasshopper"

Engineers at Western Electric's St. Paul Shops are well pleased with their new-style "grasshopper" fuse—a small fuse used in Bell telephone central office equipment. The former model—in production for years—had been gradually refined 'til it seemed almost beyond further improvement. It was simple, inexpensive, efficient, came off the line fast. But . . .

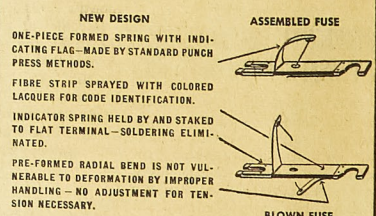

It's an old Western Electric engineering custom to keep trying to make Bell telephone equipment still better, at still lower cost. The "grasshopper" was studied by a young engineer out of the University of Minnesota, Class of '40, who joined the Company in 1946. His studies indicated the most effective way to improve efficiency and cut costs further was to change the design.

Pursuing this lead the engineer and his group saw their opportunity to make an important contribution. They investigated the latest tooling techniques, new metals, finishing materials and methods, all of which are constantly under study by engineers at Western Electric plants. A simplified design, which permitted the use of the most modern tooling methods, resulted in a better fuse at lower cost that is saving thousands of dollars a year for Bell telephone companies.

There's an endless stream of such challenging assignments at Western Electric. Engineers of varied skills—mechanical, electrical, civil, chemical, metallurgical—find real satisfaction in working together on the important job of providing equipment for the best telephone service on earth.

How the grasshopper fuse works

Small fuses like this are used by the millions to protect certain telephone central office circuits against current overloads. Odd in appearance, the fuse is called the "grasshopper" because of its spring which is released when the fuse blows, displaying an indicator "flag" in open view and tripping an alarm so the trouble can be spotted and corrected at once.

Miners Will Face Warrensburg in Homecoming Game

Miners Lose to Cats At Maryville; 12-7 Gribble Makes Only Score

By Ray Majesko

With the Bearcats winning 12 to 7, the Miners advanced to the Maryville 27. The clock showed 2 minutes remaining and the Miners had 3 downs to hit paydirt. Weitzel, calling the signals, chose to take to the air. All three passes were incomplete and the Bearcats took over the ball in the final seconds.

The Miners starting eleven were Gribble and Wright at ends; Gerard and Matteson at tackles; MacCarthy and Bennett at guards; Summers at center. The backfield was composed of Hampel at quarterback; K. Smith and Moeller at half; and Roerman at fullback.

Maryville started with Monashino and Rowley at ends; Lefingwell and Dillon at tackles; Palmer and Gillett at guards; Hutchings at center; Walker at quarterback; Black and Obregon at halfbacks; and Baldwin at fullback.

The Miners received the opening kickoff and Moeller, showing a burst of speed, carried it from the 5 yard line to his own 44.

Roerman, then, gained 3 yards on a smash through center. On the next play, Hampel pitched to Moeller, who was finally tackled on the Maryville 47 for a first down. The Miners seemed to be on their way, but they fumbled and the Bearcats recovered on their own 49.

Fumbles

Maryville could gain only 4 yards on three plays so they were forced to punt. Moeller received the ball on the 15 and ran it back to the 33, then fumbled and the Bearcats recovered. Obregon promptly skipped around end to the 30. D. Walker shot a pass into the end zone, but Hampel intercepted. The officials, although, called the miners offside. This gave the Bearcats a first down on the Miner 25; but two plays later they fumbled and M.S.M. took over on the 15. Hampel and Co. slashed their way to the 36, but were forced to punt. Obregon brought the ball to the 40 after receiving

INTRAMURAL Sports

By Bob Herron & Jim Greco

With intramural football in its second week now we find PiKA in the semi-finals, defending their title of last year. PiKA downed TKE 30 to 7 to win their second straight game. TKE scored late in the second half after being behind 30 to 0. TKE now with a one and one record moves into the losers bracket where they play the winner of the KA, Theta XI game. Triangle took their second game to move into the semi-finals by beating SigEp 52 to 20. They will meet PiKA in the semi-finals. This should be a great game with both teams being very powerful. Triangle has won both of their games by big scores. PiKA also won by big scores, so this should prove to be a game where power meets power. Lambda Chi beat Wesley 45 to 14 only to lose to Sig Nu 46 to 0. They will meet Kappa Sig in the losers bracket. Kappa Sig beat Eng Club 7 to 6. The Eng. Club now has lost two games and are out. The Tech Club started off with a close game by edging out KA 6 to 0. TKP beat Theta XI and then rolled over the Tech Club 37 to 0. TKP will meet Sig Nu in the semi-finals.

Loser Bracket

In the losers bracket, the Dorm, after taking a tremendous beating from PKA, came back to beat Sig Pi 29 to 18. The Dorm will now meet the Tech Club. Sig Pi has two losses now and are out.

This coming week should show some hard fought football with the teams shooting for the finals, in the winners bracket.

In the losers bracket every game will have to be fought extra hard so a team will be able to stay in the running.

out any sensational gains, the Miners slashed their way from their 35 to the Bearcat's 6 yard line, but Maryville's defense tightened and the Miners lost the ball on downs as the third quarter ended.

Last Quarter

The Bearcats started the fourth quarter off strong by carrying the ball to the Miner 46; but fumbled. The Miners managed to get the ball back to the 34 yard line of Maryville and lost out on downs. The Bearcats ran 3 plays, but got nowhere; and they were forced to kick. The Silver and gold proceeded with their final drive from their own 30 to the Maryville 27, but the last futile attempt failed as the Bearcats held. Three running plays by Maryville liquidated the remaining seconds.

By Joel Cooksey

Well the World Series has come and gone and the Yankees have maintained their world's championship for the fifth straight year. This year the Nationals won the third and fourth games for their only two victories. Several records have been set in this series. Among them are: highest players pool - \$691,341.61, most series homers by a National League player in a lifetime - Duke Snider 5, total bases by two teams in one game - 47 (fifth game), and the most strikeouts in a single game - Carl Erskine 14 (third game). Micky Mantle hit the fourth grand slam home run in World Series history, after tying the record for the most consecutive strikeouts in a series game - 5. Reynolds got the record for the most series victories in a life-

time by winning 7. Martin broke the record for the most total bases in a six game series by getting 23, he also got the most hits in a six game series (12) and tied for the highest batting average for a six game series with a cool .500.

Turning to football again we notice that Notre Dame has rolled through two fine teams in the last two weeks by beating Oklahoma and Purdue in that order. Coach Frank Leahy, although he is a great believer in the two platoon system, seems to be doing quite well with only one group at a time. Leading the fighting Irish is John Lattner, last years All-American halfback. Also in the backfield is Joe Heap at left half, Neil Worden at fullback, and it is pretty near a toss up whether to put Tom Carey or Ralph Guglielmi at quarterback. It seems that Notre Dame is the team to beat. I believe they'll go all the way.

"You've read the quotation wrong, Miss Adams," said the professor. "All men are created equal," is the quotation, not 'All men are made the same way'."

Proprietor of an optical shop instructing his son on how to charge a customer: "After you have fitted the glasses, say, 'The charge is \$10.' Then pause to see if he flinches. If he doesn't flinch, you say, 'For the frames. The lens will be another \$10.' Then you pause again, this time only slightly. If he still doesn't flinch you say firmly, 'Each!'"

Bullman Looks to Mules For First Win of Season

Throughout this week, something new has been descending upon M.S.M. The "old-timers" are taking it all in stride and nothing much has been thought of it by them; but to the Freshmen, the whole campus has become a new world of bewilderment. Most of the fraternity houses now show an appreciable change and most of the pledges have been kept a bit busier than usual. Many new faces have been seen around the campus the last few days and simply everyone is talking about this first big event of the year — HOMECOMING! Homecoming at M.S.M. stands for many things. First, the old grads are coming back to their old stomping-grounds, and they are no doubt many happy and a few sad memories; second, many of the boys will be having their first campus dates, at least of this year; and third, the Miners will go into action this Saturday, Homecoming, against Warrensburg. This last element mentioned will certainly be one of the highest of the many highlights to mark the 1953 Homecoming and surely both graduates and students can hardly wait to see those rough and tough Miners in action against the Mules from Warrensburg.

This early in the stage of conference play, it cannot be said that either the Miners or the Mules are the better team, and Coach Bullman says that the game could easily go either way. This would seem to indicate that spectators Saturday should really get their money's worth and witness one of the better games to be held this year on Jackling Field.

Miner Comeback

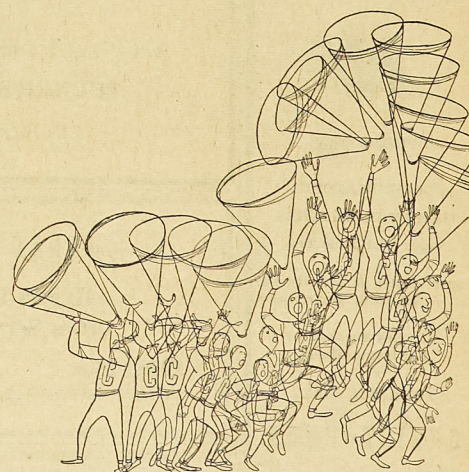

Warrensburg won their last conference game by whipping Springfield, just a little bit worse than anyone seemed to expect, but this definitely should not be taken as an indication that the Miners will come out on the low end Saturday. Really, it should make the boys from Rolla come back, make a new start in the conference race, and

thus balance the 12 to 7 loss to Maryville last Friday night. The Mules are expected to play from a T-formation with an unbalanced line. Maybe they will try something new this year, for in the past the boys from Warrensburg have been anything but successful against the Miners. As nearly as Coach Bullman could remember, the Miners have not been beaten by Warrensburg since at least 1937. He says that the boys will try not to change the general pattern of things this year.

Cape Next

The Miners' first game after Homecoming will be their last at Rolla this year. The occasion will be Parent's Day, and the opposing team will be Cape Girardeau. The Miners will have three more games after that, all away from the home field. They will go to Kirksville on October 24th for a game with the Bulldogs of K.S.T.C. This promises to be one of the better games of the year, as Kirksville is presently rated as one of the stronger teams in the conference, and an exciting game is virtually certain. The following Friday, the Miners will invade Springfield for a game against Springfield. Exactly one week and one day later the Miners will journey to Carbondale, Illinois, for a game against Southern Illinois University. This game will be played on November 7, and will be the final game of the season for MSM.

But, for the present, let us be concerned with tomorrow's game and let the prime intention of the Miners be to make Jackasses of the Mules.

STUDENT COUNCIL MINUTES

September 22, 1953

It was announced that the Student Council sponsored drinking fountains were installed on Jackling Field over the summer months.

President Bob Hoffman reported that arrangements are being made to bring the Powder Keg Trophy to MSM for display before the annual game between SMS and MSM, which is to be played at Springfield this year.

New Business:

A pep rally committee was formed to arrange for the bonfire rally to be held October 9. Members volunteering for this committee were Leonard Ellis, Frank Conci, Frank Paladin, and George Roe.

A motion was presented and passed to elect a member to fill the office of Executive Committee Member. Jerry Swearingen was elected.

It was brought to the attention of the Council that two faculty members had to be elected to serve on the Board of Trustees for Student Publications. Professors Brand, of the Chemical Engineering Department, and Steinmeyer, of the Humanities Department, were elected, pending their acceptance, by acclamation of the Council.

It was brought to the attention of the Council that it is a practice among some professors on the campus to store up cuts over a lengthy period of time before turning them in to the Registrar's Office. It is a school rule that cuts should be turned in weekly. Students inquiring at that office as to the number of cuts they have accumulated over a certain period are often given a false impression since all of their cuts have not been recorded. For this reason the Student Council has decided to look into this practice and see if it can be curtailed.

A General Lectures Committee was formed. The members chosen for this committee were Searles Anderson, Paul Brands, Andrew Pifer, and Dick Stevens.

Although much has already been accomplished as far as decorations go, the actives as well as the pledges aren't expected to have much leisure time for anything besides and intramural sports between now and the time of the celebration.

Speaking of intramural sports, the K. A. ping-pong doubles team is as yet undefeated after playing both Theta Xi and Lambda Chi. Our football team was defeated by the Tech Club, but this is expected to be remedied in our next game.

The K. A.s are going to have a new flag pole starting this week. There shall be a pledge detail each morning to hoist the "Stars and Bars." Colonel E. L. Black and his armored division have kindly volunteered their services to act as honor guard of this emblem. In a statement to the press last week Colonel Black proclaimed that anyone found tampering with this symbolic drapeau shall be found hanging at half mast in front of the Sigma Nu House.

The string section of the K. A. orchestra, the ukuleles, are in the process of forming a union (The Society for Prevention of Hiding Stringed Musical Instruments) to prevent the hatters of beautiful music from abducting their ukes. This act of self-preservation was deemed necessary after finding parts of their ukes strewn throughout the house.

Last Saturday night, when Chug-a-lug Bunky lost his state of equilibrium playing football on a neighboring lawn, he came

PHYSICS DEPARTMENT

(Continued From Page 1)

lectures are invited to attend. Thursday, October 2, Dr. Lund gave the lecture on the research he did this summer on this campus. The title was X-ray Defraction From a Free Volume Liquids and is to be published in the Journal of Chemical Physics, the November issue.

The physics honorary society Sigma Pi Sigma had a meeting last week at which President Paul Dixon presided. A vice-president was elected to replace Peter Kurtz who did not return to school this year. The vice-president is now Mack Brezeale. The other officers are Scott Johnson, Secretary, and Scott Porter, Treasurer, and Dr. Bessey is the faculty advisor.

A membership committee and a committee to study the presenting of the honorary prize which is given to the outstanding sophomore physics student of last year were appointed.

That's all the physics info' this week, but tune in next week same paper, same day.

A woman was buying a bed but couldn't decide between a mahogany or brass bed. "You can't go wrong on a brass bed," said the clerk. "O. K.," said the woman. "I'll take the mahogany one."

With the suggestion that the Golf Course Committee provide a better quality of refreshment for him.

With expectancy of a gala weekend ahead we reluctantly sign off from the Kastle.

Bob Beck

Pikers' Pledges Have Work Week Catch Them Early in Sem.

By H. E. Schulte

With all the grad's coming back, the House on the Highway is preparing to party. With a lot of guys having dates it should be a great weekend.

Last Wednesday the pledges were racked out of their sacks for the second time that night. Much to their horror they found workweek was upon them without warning. The prodigious list of fix-up jobs ahead of them seemed impossible to complete - it was. With little sleep they repainted the walls and ceilings of the entire first floor and the halls of the second and third floors. The newly replaced wood on the outside and the P. K. A. letters on the roof were painted. The letters should have been done in fluorescent paint then some of the boys might be able to find their way back to the house by the morning after the evening before. Try as they may

though, the pledges couldn't play it cool and wound up getting it in the end. To their equal amazement, workweek only lasted half a week.

A number of men took the second step on the road to chadom. Jim Gerard, last St. Pat, became engaged to Miss Nancy Doherty of Chicago on August 9th. Jim Bess, pledge, became engaged to Miss Theresa Chromoga of St. Louis on June 10th. On June 28th, Ted Friedlien, pledge, became engaged to Miss Esther Uhls of St. Louis. Alan Burgess pinned Miss Jackie Deuker of St. Louis sometime this summer. Congratulations guys. Looks like the pledges are getting ahead of us, let's get on the stick (or chain) men. Hint-Barnds.

The bride was very much concerned at seeing twin beds in their bridal suite.

"What's the matter, darling?" asked the attentive bridegroom. "Why, I certainly thought that we were going to get a room all to ourselves."

An overly-inquisitive motorist drew up beside a car parked on a lonely road. "Hey, you two in there! Got motor trouble?"

"Nope."

"Out of gasoline?"

"Nope."

"Tire down?"

"Didn't have to."

". . .

Perfume salesgirl to Blonde: "Just a word of advice. Don't use this stuff if you're only bluffing!"

". . .

"What's the Board of Student Publications?"

"Any group of people who can see three meanings in a college joke that has only two meanings."
