# THE MISSOURI MINER

Missouri School of  Mines & Metallurgy

ROLLA, MO., FRIDAY, OCTOBER 16, 1953

### Notice

Students wishing to attend the Springfield dance Oct. 31, after the Miner Springfield game, see the E. E. Dept. bulletin board. Music by Hal McIntyre. This is a closed dance, tickets only available thru AIEE-IRE. Arrangements for blind dates!

NUMBER 4

## Hundreds Attend Annual Homecoming Celebration

### Stepped Up Program Outlined for Alumni

#### Program Outlined by President-Elect Pence at Banquet Dinner

Another big Homecoming celebration at the School of Mines has come and gone with the usual large delegation of returning alumni in attendance. Highlights of the three-day event were the Alumni Banquet Saturday night in the College Inn of the Edwin Long Hotel, the Homecoming Dance later that evening at Jackling gymnasium, and the football game against Warrensburg that afternoon.

As is usual during this event, many prominent and wealthy alumni, who made their place in the world after graduating from MSM, were in town and on the campus for Homecoming. Outstanding among these, if only a partial list, were:

George A. Easley, '09, of New York City, a multi-millionaire and prominent engineer; James L. Head, '16, vice-president of Anaconda Copper Co., of New York City, the largest copper company in the world; Harry Pence of St. Louis, a consulting engineer; John R. Kenney, '12, of Chicago, a consulting mining engineer; and Carl G. Stifel, '16, of St. Louis, millionaire real estate dealer and candidate for mayor of St. Louis last fall.

Other highlights of the Homecoming were:

Harry S. Pence, '23, executive vice-president of the Alumni Association, was named president succeeding James L. Head of New York City.

#### Board Hires Secretary

The Board of Directors of the Alumni Association hired a full-time secretary to handle the ever-increasing activities of the organization. He is "Ike" Edwards of St. Louis, who has been connected with the Red Cross in the St. Louis area for the past 11 years.

Edwards is a native of Macon, Mo., and graduated from Kirksville Teachers College. Married and the parent of a daughter, Edwards will make his office in Rolla on the MSM campus.

The officers and board of directors of the Alumni Association met during Homecoming and conducted considerable business in connection with the organization. Among those in attendance were President Head; Pence; Barney Nuell, '21, Los Angeles; Charles J. Potter, '29, Indiana, Pa.; Melvin Nickel, '38, Chicago; Claude Valerius, '25, Shreveport, La.; S. Alan Stone, '30, Fort Wayne, Ind.; W. P. Ruemmler, '38, East Chicago, Ind.; P. T. Dowling, '40, St. Louis; H. E. Zoller, '23, Wichita, Kan.; S. H. Lloyd III, '47, Houston, Tex.; Dave P. Hale, '34, Denver; Jim Stevens, Sedalia; and Rex Z. Williams, Rolla.

The Class of 1923 held a special 30th anniversary reunion during the weekend. In attendance were 12 or 15 prominent men of that class. Arrangements were made by Neal Ham of St. Louis, district manager of Ingersoll-Rand Co.

### REMODELED COW HOUSE ADMIRER BY THETA KAP ALUMNI AND OLD GRADS

By Jerry Spann

The boys at the Cow House have just about recuperated from the Homecoming activities, and are just about set for Parent's Day. It looks as if the Theta Kaps will be pretty busy on the weekends for the rest of the semester.

There was a large turnout of Alumni for the Homecoming weekend, and the House was really packed with the old grads. All the men seem to be (Continued on Page 2)

### COMMON SENSE RULES FOR VETERANS LISTED BY VETERANS ADMIN.

Veterans Administration today listed some common-sense rules that Korean GI Bill veteran-trainees and their schools and establishments can follow, in order to prevent delays in veteran's monthly GI allowance checks.

First, both veterans and their schools should take a careful look at the monthly certification of training they are required to send to VA after the end of every month of training completed.

They should make sure it has been completely filled out, and signed and dated both by the veteran and a representative of his school. If VA gets an incomplete form, it has no choice but to return it — causing needless delays.

The law requires that VA receive these certifications, properly filled out, before a veteran may be paid his monthly allowance.

VA also urged that the certifications be sent in as soon after the end of the month as possible. If a certification arrives too late, the chances are that the veteran's check will be late.

Second, any changes in a veteran's training status should be reported to VA. Such a change, for example, would be his dropping courses so that he changes from a full-time to a part-time student.

Third, VA warned it cannot make any allowance payments, under the law, unless the training program a veteran is taking is the same as has been approved by his State Approving Agency. This provision has been placed in the law for the veteran's protection against training that does not come up to standard.

If there is any change from what has been approved by the State, the school or training establishment should lose no time getting in touch with the State agency, so that new approval may be obtained for the revised program.

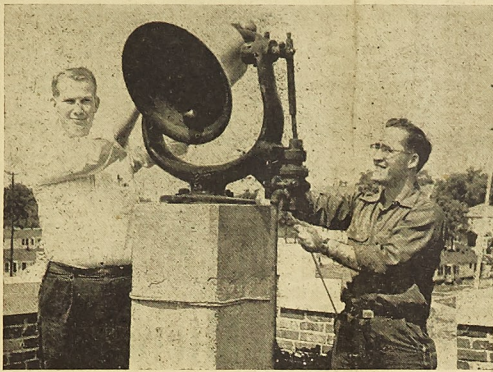

VA explained why close cooperation between the veteran and his school or establishment is such an important factor in keeping GI checks coming on time.

Machinery for certifying GI checks in VA regional offices is geared to handling large numbers of records in a short time. This is necessary because each regional office has hundreds, if not thousands, of checks to process each month.

If everything is in order, a veteran's check goes out on time, along with all the others. If not, his records must be removed from the regular operation, so that they can be handled individually. Meanwhile, the other checks go through while his is delayed.

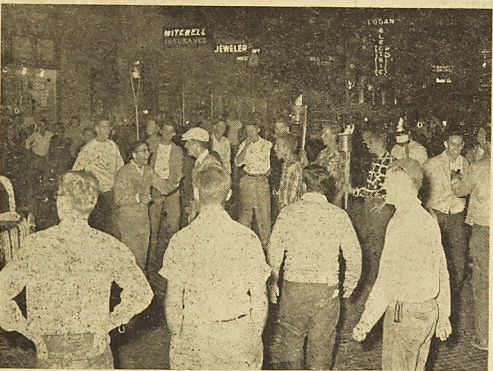

Cooperation by the veteran and his school can prevent many of these instances that require special handling, VA said.

### Highlights of the Big Weekend

On the left, Fred Burns and Conrad Neal are shown ringing the Victory Bell which the AIEE-IRE organization on the campus presented to the school last Spring. The reason for ringing? Miners 20 - Mules 0.

The first place Homecoming decoration of Kappa Alpha Fraternity is shown at the right. Their theme, a movie theater showing a 3-D production, was good enough to take first prize for their second win in two years.

On the left, part of the rather enthusiastic crowd that attended the Pep rally before the game last Friday night. About the only action in the picture is being furnished by the cheerleaders.

### Professor Scofield Represents School Of Mines at Seminar

For the second consecutive year the American Society for Engineering Education and the General Electric Company jointly sponsored a Teaching Methods Seminar.

Professor Gordon L. Scofield of the Mechanical Engineering Department of the School of Mines and Metallurgy, attended the seminar. Approximately 130 accredited engineering colleges were asked to nominate members for the seminar from their staffs. From the group which replied, 26 young college professors were invited, and Professor Scofield was invited from the School of Mines and Metallurgy.

This seminar was held on the campus of Union College, June 15, to June 20, 1953. The objectives of this seminar were to present the teaching techniques as found in the General Electric Advanced and Creative Engineering programs, and to demonstrate the application of these techniques to academic undergraduate teaching.

Professor Scofield and the other members of the group led the role of the student, which included an entrance examination, a smoker, and a graduation banquet. Graduation certificates were presented to the members of the group. The "students" had a strenuous 14-hour day, which included technical sessions, discussion of techniques, and working of problems.

### NEXT WEEK'S INTERVIEWS

Tuesday, October 20

The Pet Milk Company will interview all M. E., and E. E. June graduates.

Black Sivals and Bryson Incorporated will hold interviews for January graduates in the fields Ch. E., M. E., and petroleum engineering.

Wednesday, October 21

The Haynes Stellite Company will interview graduating students in Ch. E. and Metallurgical Engineering.

Thursday, October 22

Dowell Incorporated will interview students in M. E., Petroleum, and Geological Engineering.

Friday, October 23

The Shell Oil Company, the Manufacturing Department and the Production Department, will interview C.E., E.E., Met., and Min. Engineers.

The Mallinckrodt Chemical Works will interview M.E., E.E., and Ch.E. students.

The General Electric Company will hold interviews for students graduating this year in M.E., E.E., Met., and Physics.

Saturday, October 24

The General Electric Company will continue interviews.

### Lambda Chi Neighbor Still Friendly After Tracked up Terraces

By Fred Janesky

Seems Lambda Chi has so many cars, we don't exactly know where to park them all. Some are parked a block from the house. Driveways get blocked, lawns get backed onto once in a while, but the neighbors go along with it pretty well.

This past week we have added a new pledge to our organization. He is George Tapp. Welcome, George. John Victor was selected as president of the pledge class and Don Crissup was selected secretary-treasurer. Congratulations and I'm sure you'll both do a fine job.

Homecoming really proved to be a successful and enjoyable week-end. All of the make-outs are dazed and will be for the next week over their gals from Lindenwood. A big party was held each night with many alumni attending.

We won a thrilling football game from Kappa Sig on the afternoon of the 7th by a score of 19 to 7. We came through in the last quarter to score two touchdowns after trailing 7 to 6. It was a well played game by both teams.

Alumni Bud Topel was up from Fort Leonard Wood last weekend. He doesn't look bad without any hair. He claims he can think of better places to be than at the Fort.

### Banquet, Dance, And Game Highlight Event

#### Many Prominent Alumni Return

Harry S. Pence, President-elect of the Alumni Association of the School of Mines and Metallurgy outlined a program of activities for the next three years in the convocation address of Homecoming celebration on October 10. Listing the objectives of the Association, Pence said its primary purpose should be to cause the School of Mines to prosper.

### 50TH ANNIVERSARY AT KAPPA SIG CELEBRATED BY RETURNING ALUMNI

The big white house on State Street has slowed down considerably after a hilarious weekend with the old grads. As this was Kappa Sigma's 50th anniversary, the grads came from far and wide to meet once again and reminisce about the good old days. These men, who now are top men in their fields, reverted back to the good old days and really showed us a good time.

One of the social highlights of the weekend was the banquet held at the Hotel Edwin Long. An excellent dinner and an enjoyable address by K. Sig.'s National Worthy Grand Master of Ceremonies, Mr. Allen Whitfield.

Of course the football game was of great delight to all with MSM defeating Warrensburg. Kappa Sig's homecoming queen (whose home did she come from) this year was Bob Nelson. Perhaps one of the factors which swung the game our way was the way our queen showered her loving kisses on the referees.

During halftime at the game, there was a cross country race run with Kappa Sigma's Terry Macalady finishing sixth. Ralph Jones of the house led the field leaving the stadium but couldn't keep it up at the end. He did show a good kick in the stretch which might prove well in sprinting come intramural track.

We came out well in our homecoming decorations winning second place due to the hard work of Bill Demzik, Chuck Warneke, Kurt Otto Plache and Tom McBrayer.

All in all, it was a wonderful weekend with anywhere from 40 to 50 alumni attending.

As for news in general, we've elected pledge officers. They are Bill Demzik, President; Wally Saunders, Secretary; and Terry Macalady, Sergeant-at-arms.

A new added distinction for Kappa Sig. pledges is a button stating "I am a Holsum Bread Booster." Each week a pledge is selected by his scholastic record, leadership qualities and athletic prowess. This week's award goes to Dick Baruch.

By Bob Nelson and Wally Saunders

### BETA SIGMA PSI HAS SUCCESSFUL WEEK WITH PARTIES AND FOOTBALL

By Ray Peters

The girls have all finally been taken home, the debris swept out the doors, and now the books are being taken from their resting places once again. The tumultuous Homecoming Weekend is all over now, and all that is left are fond memories. Thank goodness. There's only one bad thing about just having had Homecoming. It'll be another year before it happens again.

Dan Haber was seen limping around the campus last week. He claims he dropped a dresser drawer on his toe. I know better, because I got the facts. A garbage truck ran over his foot while he was sleeping in (Continued on Page 2)

Also, the Association should be a medium of assistance between the Alumni and undergraduates, be a common link between industry and science, safeguard national ideologies, and preserve and renew friendships enjoyed through the years.

To cause the college to improve and prosper, Pence said that the alumni must develop more skill in public relations. "We must acquaint more thinking people in this state with the role this school plays in furnishing qualified engineers to assist in the economic development, beneficence, and preservation of the resources of the state, and the development and operation of industry within its borders. Efforts of Rolla men bring to the state in payroll and taxes many times the yearly cost of operation of the School of Mines."

#### Failure to Attract

Pence also said that, in his opinion, the greatest failure of the Association has been in its failure to attract the younger graduates into the organization. He remarked, "Perhaps we have not slanted our efforts their way, or perhaps the recent seller's market has not caused our graduates to feel the need of support from the older alumni. Recent trends, however, indicate increasing interest on the part of the newer graduates, and we believe that by planning carefully we can capture the active interest and participation of a very high degree of this group in alumni affairs. This we must do, for certainly in the younger graduate lies our strength for the future. Let us give this great heed."

Speaking of the relationship between science and industry, Pence said that no better medium exists for an interchange of Philosophy and logic between science are represented in the ranks of the organization and can and should be a source of information as to trends in industry and research — a source the faculty can rely upon. The organization should provide an opportunity for summer employment for the student, as well as the faculty, if they so desire. Likewise, Pence suggested that the Alumni remember of sufficient size and shape that would justify a fellowship.

The Alumni should provide an excellent reservoir for speakers for the various student chapters of the engineering and scientific societies and for senior and graduate seminars, Pence stated.

#### Endowment Fund

With regard to the matter of endowments, Pence stated that the constitution of the Alumni Association has set up the mechanics to receive special gifts and administer an endowment fund for the purpose of providing scholarships, fellowships and research work, and special instruction at Rolla. By this means, the Association can properly receive special gifts from the bequests of wills, cash grants, or from insurance beneficiary accounts which name the Alumni Association. He promised greater efforts along this line during the next few years than have existed in the past. In Closing, Pence expressed the hope that they would soon be able to employ a full-time administrative secretary to carry on the work of the Association in a more aggressive manner than in the past.

## QUIET HOMECOMING AT PIKA CLIMAXES WORK DONE IN PAST WEEKS

A quiet homecoming was the climax of several weeks work on the house. Sigma Nu's jam session was the center of attraction Saturday night with half the school there. A goodly number of alumni made their appearance, especially the graduates of latter years.

The Piker's view of the football trophy is brightening after Triangle suffered a 65-2 defeat Friday night. I wonder out of where is Pierre pulling those passes? The game with Sigma Nu Wednesday is the next step.

F. R. Gollhofer is adding to his list of faux pas. He was hit and caught for speeding in the same weekend. He can't pass a full gravy bowl. This weekend he got stuck twice in the Little Piker with his shot-rod. When will these kids quit handling their cars like amphibians.

News Flash: by William L. McMorris.

Now it can happen to you. H. E. Schulte dropped his pin to Miss Elinor Summers from Drury college Saturday. The present consensus is — if Harv can do it, anyone can. Still and all, congrats to Ellie and Harv. HINT - Gollhofer.

A married couple was sleeping peacefully when the wife suddenly shouted out in her sleep: "Good Lord, my husband."

Hubby jumped out the window.

Miner: "You're not going to let that redhead steal your boy friend are you?"

Coed: "I'll dye first."

## Saturday Night Jam Session Draws Large Crowd at Sigma Nu

With the close of the weekend, Homecoming at Sigma Nu was determined a success with few exceptions. To get the house in the mood was a 20-0 victory over Theta Kap Friday afternoon. The play and score was outstanding. After a battle between the hard charging lines and punters, the "Snakes" led at halftime 6-0 on a touchdown pass from Gray to Dowell. The team rolled back in the second half, as they scored another flip, this time from Gray to Hallet. T. R. Fuller's conversion made it 13-0. The determination of the team could not be denied and neither could Jim Holman as he bulldozed through the Theta Kap line for the final T.D. Fuller again converted and it was all over but the shouting.

Friday night was a welcoming evening as the love-forgotten Knights hailed the arrival of their dates and many returning alumni. At least 21 alumni with wives and sweethearts returned to watch the Miners down Warrensburg and to see Brothers Zacher and Haubold bring home a second place for Sigma Nu in the cross-country run, in Saturday's classics.

Saturday night's drop-in packed the house. In fact, there weren't enough dropping out. It was one of those eventful evenings of singing, "Sam Spade," jam session, and "epileptics." The drop-in musicians quite unexpectedly, kept the part yat a full tilt with their jazz interpretations, solos, etc.

Bob Nichols, St. Louis, left us with a box of cigars. "Big Nick" declared his engagement to Miss Charlene Schrock of St. Louis. Congratulations also

## CHESS TOURNAMENT TO AGAIN BE SPONSORED BY I.F.C. THIS YEAR

The Interfraternity Council held its second meeting of the year at Lambda Chi house on Oct. 6. Assistant Dean Gevecker was present and a discussion of social problems was held before the regular meeting. During the meeting the names of the judges for the Homecoming House Decorating Contest were announced. They were Mrs. Aaron J. Miles, Mrs. Albert W. Schlechten, and Mrs. Robert F. Davidson. The I.F.C. also awarded the trophy for the best homecoming decorations to Kappa Alpha Fraternity over the weekend.

After resounding vote from the fraternities, the I.F.C. also decided to sponsor a chess tournament this year. There was a slight mix-up, however, as last year's tournament had not been completed and will have to be played off before this year's tournament can begin. Trophies will be awarded to the winners of last year's and this year's Tournaments. The I.F.C. is also obtaining guides from the fraternities to show the visitors around the campus for engineers day. Plans are also being made to accommodate the girls from Stephens College when they come to MSM for their concert.

to our "papa," Pledge Jim Wright, whose wife presented him with a 5 pound plus baby boy.

Preparations for Parent's Day at the house are nearly completed and Nov. 13 has been set as the date of the Pledge Dance. This was quite controversial. Some complained that "the signs of the times" wouldn't be right, but with divinity the pledges didn't seem to be superstitious at all.

## Ten Easy Ways to Go Through College

10 ways to get through college, without even trying, as written in Pageant magazine, by professor Robert Tyson of Hunter College:

1. Bring the professor newspaper clippings dealing with his subject. If you don't find clippings dealing with his subject, bring in clipping at random — he thinks everything deals with his subject.
2. Look alert — take notes eagerly. If you look at your watch, don't stare at it unbelievably and shake it.
3. Nod frequently, and murmur "How true!"
4. Sit in front, near him (applies only if you intend to stay awake.)
5. Laugh at his jokes. You can tell. If he looks up from his notes and smiles expectantly, he has told a joke.
6. Ask for outside reading. You don't have to read it — just ask for it.
7. If you must sleep, arrange to be called at the end of the hour, it creates an unfavorable impression if the rest of the class has left and you sit there alone, dozing.
8. Be sure the book you read during the lecture looks like a book from the course. If you do math in psych class and psych in math class, match the books for size and color.
9. Ask any questions you think he can answer. Conversely, avoid announcing that you have found the answer in your little brother's 2nd reader to a question he couldn't answer.
10. Call attention to his writing. Produces an exquisitely pleasant experience connected with you. If you know he's written a book or an article, ask in class if he wrote it.

Three men were standing on a street corner in North Africa. They were an Englishman, an Arab and an American. Just then a beautiful dancing girl walked by. The Englishman said, "By jove!" The Arab said, "By the prophet!" The American said, "By tomorrow night."

## AIEE-IRE MAKES BIG PLANS FOR WEEKEND

By Campbell Barns

For the latter part of October the student chapter of American Institute of Electrical Engineers-Institute of Radio Engineers has two outstanding activities planned.

Word has been received that Mr. R. F. Danner, a national director of the AIEE, will speak at the joint student branch meeting October 22. The meeting will be open to everyone.

Plans are being made for a very interesting weekend for October 31st. An inspection trip to the Frisco Diesel shops and control point building in Springfield is planned for the morning of October 31st with the afternoon open so that the always highly contested "Miner-Bear" football game can be attended by all who make the journey. Also that the Bears celebrate their Homecoming with a dance. The weekend is open to all interested, just watch the bulletin boards for announcements.

"I think I'll put the motion before the house," said the chorus girl as she danced onto the stage.

## Microtomic

The preference of leading Engineers and Draftsmen

Microtomic—the finest example of research in drawing pencils. Designed to stand the most rigid drafting room comparisons. Test them today!

Only Microtomic offers you—

**HI-DENSITY LEADS**  
Lines are absolutely opaque to actinic rays.

**ABSOLUTELY UNIFORM**  
Every Microtomic of the same degree marking is identical.

**NEW DUSK GRAY**  
Professional men acclaim it the best color for a drawing pencil.

**BULL'S EYE DEGREE MARKING**  
Easier to read—easier to find—positive identification.

**ALSO**  
Choice of holders and Microtomic leads.

**EBERHARD FABER** since 1849

## THE DU PONT DIGEST

## Research

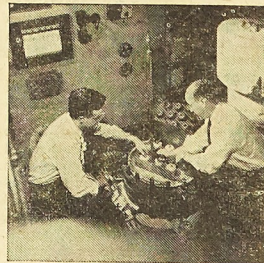

provides broad opportunities for chemists, physicists and engineers cooperating on many problems.

For one thing, much Du Pont research is fundamental, aimed at advancing scientific knowledge regardless of specific commercial objectives. However, such research often suggests new products... each with its own challenging technical problems which must be solved before commercial production can begin. Solving these problems offers another great field of work for teams of engineers and scientists.

"Teflon" tetrafluoroethylene resin is an example of this well integrated teamwork.

Howard E. Holmquist, Ph.D. in Org. Chem., Univ. of Minn., '51, is shown at work on a problem in synthetic organic chemistry.

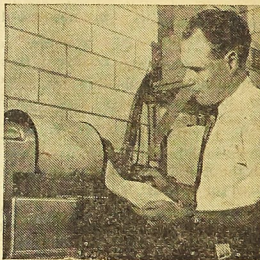

Doing chemical engineering research on a plate in a distillation tower are: C. M. Gamel, Jr., S.M.Ch.E., M.I.T., '48; and J. B. Jones, M.S.Ch.E., Univ. of Mich., '46.

During research on refrigerants, the polymer was discovered and work was begun to make it useful. The new plastic had a remarkable combination of properties; temperature resistance beyond the range of any previous plastic, excellent electrical characteristics, and the highest degree of chemical inertness of any commercial plastic.

In fact, "Teflon" was almost too unusual. Although it melts, it is too viscous to flow like other plastics. It does not dissolve—even in aqua regia. There was no method for molding it or for making it into thin coatings.

The problem of molding was solved with the help of techniques used in powder metallurgy. "Teflon" is now molded by cold pressing, followed by sintering or "fusing" at about 360°C.

Research workers have available modern apparatus, such as the infrared spectrometer being used here by Vaughan C. Chambers, Ph.D. Org. Chem., M.I.T., '50.

For coatings, previous research suggested dispersions—minute particles suspended in a liquid. After much study, a team of technical men learned how to suspend particles of "Teflon" about 1/125,000 of an inch in diameter. Then a commercial scale process was devised. This development made possible thin coatings of "Teflon" and also a process for extruding the material.

Meanwhile, another group discovered how to successfully formulate the new plastic into "Teflon" tetrafluoroethylene resin finishes and wire enamels.

The development of "Teflon" illustrates the close teamwork that is the basis of research at Du Pont. But this teamwork doesn't end with research. Bringing the product to commercial reality requires development and design work by chemists and both chemical and mechanical engineers. Next month's Digest will feature information on the opportunities Du Pont offers men interested in this phase of making "better things for better living... through chemistry."

ASK FOR "Chemical Engineers at Du Pont." New illustrated booklet describes initial assignments, training and paths of promotion. Just send post card to E. I. du Pont de Nemours & Co. (Inc.), 2521 Nemours Building, Wilmington, Delaware. Also available: Du Pont and the College Graduate and Mechanical Engineers at Du Pont.

## Miners Trounce Warrensburg Mules 20-0 For First Win

### Miners Face Cape Sat. In Last Home Game of Year

The Miners, after losing the first three games, trounced the Mules last week. The team showed great strength as they smashed thru Warrensburg's line and crossed the goal three times.

Cape Girardeau, on the other hand, was tied by the Mules in a rough and tough battle and lost last week to Kirksville, who is undefeated in conference play.

#### Cape Next

MSM will encounter Cape at Jackling field, where in 1951, they celebrated the annual homecoming event by beating the Indians 19 to 6. But last year, Cape continued their hex of never losing to the Silver and Gold on their home soil and beat the Miners 10 to 0.

The locals are very enthusiastic about the Cape game as they seek to avenge last year's defeat. The team seems to be well adjusted and highly spirited and showed a sense of determination in last week's tilt.

The Miners most noticeable weakness in their three defeats was the second half. The men from Rolla showed most of their strength in the first half, but couldn't hold their ground in the latter part of the game. Another conspicuous weakness was fumbles. MSM has not been able to hold on to the ball, and this proved to be advantageous in the hands of their opponents.

The Indians, no doubt, will have a bag of tricks in store for the Miners and you can bet that the Miners will have a few tricks of their own. The Silver and Gold, as you may have noticed, does not call all the

plays in the huddle, but calls significant numbers while at scrimmage.

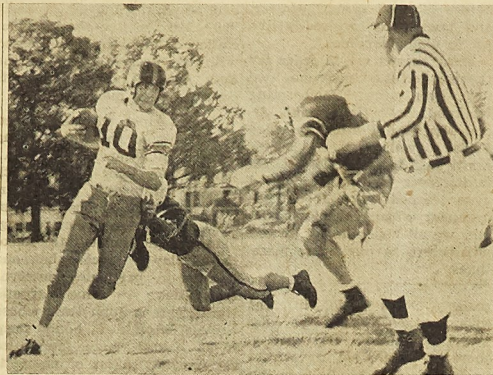

#### Fast Backs

Cape started as one of the best conference teams. Most of their lettermen of last year have returned to the gridiron. The Indians use a straight T-formation, with an occasional flanker, and a balanced line. They also seem to have the fastest backs of the conference; one such man to watch for is Hargens. Another player who received honors for Cape is Kenny Dement, a tackle. Coach Bulman says that the game should be a toss-up.

#### Parent's Day

This week will be another annual event; the occasion being Parents Day, which needs no explaining. It also terminates the home games in Rolla for the season. The Miners will, then, play Kirksville who is rated as one of the strongest conference opponents. Kirksville has not yet been defeated in a conference game. This will be one of the toughest games of the season for the Miners. But Coach Gale Bullman thinks that if anyone has a chance to beat Kirksville, the Miners have the best. The following game is at Springfield and the final game will be played at Carbondale, Illinois, against Southern Ill. University.

Since Cape Girardeau is the final home game of the season, let's really get out there and show our team spirit by making some noise. With our help from the sidelines, the boys will play a much better game and really scalp the Indians.

Keith Smith (10) breaks away along sidelines for one of his many important runs in the Miners 20-0 victory over Warrensburg last Saturday.

By Joel Cooksey

The Miners looked strong last Saturday in collecting their first win of the season. This gives them a 1-1 record in the conference as they prepare to face Cape tomorrow. Coach Bullman's reserve was greatly hurt by the loss of reserve quarterback Roger Feaster, who suffered a broken arm in the final minutes of the game. Also, big J. McCoy, reserve tackle, will be out one, or possibly two weeks with a sprained ankle. The loss of Feaster leaves Bullman with only one signal caller outside of starter Hampel. Congratulations to Roermann on making his 79 yard touchdown run; one of the longest Miner runs of the year. If the Miners play as they did against Warrensburg, they could easily win their three remaining conference games.

Turning to the outside world for a glance at the sports situation, we note that the Tigers of Missouri lost to S.M.U. Friday night by the unbalanced score of 20-7. The fighting Illini defied all predictions and upset favored Ohio State by the score of 41-20. Ohio State was favored by many to win the Western Conference championship, while the Illini was expected to end in the second division. Illinois coach Ray Eliot said only that he "didn't know they had it in them."—J. C. (The Blur)

Churchgoer: Parson, you delivered a damn fine sermon.  
Parson: Thank you, but you must not use such profane language.

Churchgoer: Well, it was such a damn fine sermon that I put \$10 in the plate.  
Parson: The hell you did!

### INTRAMURAL Sports

By Bob Herron &amp; Jim Greco

Intramural football is just about over for this season. This past week PiKA reached the finals by beating Triangle 25 to 2. Sig Nu beat TKP to also gain the finals with PiKA.

Meanwhile in the losers bracket Lambda Chi beat the Tech Club 27 to 26. Beta Sig beat TKE 28 to 13. Lambda Chi will play TKP in the semi-finals of the losers bracket. Beta Sig will play Triangle in the other half of the semi-finals. The winners of these semi-finals will play each other with that winner playing the loser of the finals in the winners bracket. After the losers bracket is determined they will play the winner of the finals in the winners bracket to find the over all champion.

#### Cross Country

In the cross-country run, between halves of the Homecoming football game, Guy Wiggs of the Tech Club came in first with a time of 5:51.6. Finishing a very strong and close second was John Patton of TKE. Third and fourth were captured by Gerald Zachel and Reiner Haubold both of Sig Nu. George Merk captured fifth for Tech Club.

When the team scores were totaled Tech Club came out on top with a total of 300 points. Second was Sig Nu with 275 points. Beta Sig came in third with 250 points. TKE and Lambda Chi tied for fourth and fifth with 212.5 points apiece.

#### Table Tennis

As the Intramural table tennis nears the finals, we find Beta Sig meeting Wesley in the finals of the winners bracket; in the singles, Beta Sig moved from the semi-finals by beating the Dorm.

In the singles of the Losers bracket, we find the Dorm meeting the Independents who beat TKE. TKE will meet the winner of the game between the Tech Club and TKP. The winners of the game and the TKP game will meet in the finals. The winner of the losers bracket will meet the winner of the winners bracket. Whoever wins this game will win the tournament in the singles.

In the doubles of the winners bracket we find Beta Sig and the Eng Club in the finals. Beta Sig moved to the finals by beating PiKA. The Eng Club enters the finals by beating KA. In the losers bracket, Triangle plays KA in the semi-final, PiKA plays LaChi. The winners of both the winner and losers bracket meet to see who wins the tournament doubles.

#### NOTICE

There is to be another Pep Rally tonight starting at the Kappa Alpha Fraternity House at 7:30. Everyone is urged to participate. Let's make this one rally that won't be forgotten. Remember - this is the last Home game...

### Better Ground Game Accounts for Victory

#### All Touchdowns Scored on Runs

By Dennis Mason

Jackling Field was the scene of some real excitement Saturday, as a grandstand full of people saw the Miners from MSM trounce the Mules from Warrensburg, by the score of 20-0. The starting lineup for the Miners consisted of Gribble and Wright at the ends; J. Gerard and Matteson, tackles; McCarthy and Bennett, guards; K. Smith and Moeller, halfbacks; Summers, center; Hampel, quarterback; and Roermann, fullback.

The opposition's lineup included Ford and Mullins, ends; Kidd and Lyons, tackles; Cornell and Michael, guards; Walz and Titus, halfbacks; Glore, center; Brooks, quarterback; and Loeb, fullback.

#### Kickoff

The Miners won the flip and Keith Smith took the kickoff 26 yards back up the field. The Miners couldn't seem to do much else with the ball just then, and after four plays Hampel kicked the ball 34 yards on up the field, and the Mules took possession on their own 27 yard line. The Mules gained a total of five yards on the next three plays and were forced to punt. On the first play for the Miners, Moeller made 4 yards, and on the next, Hampel connected to Moeller for a 15 yard pass that was good enough for a first down. Six yards more were gained on the next two plays and then the boys from MSM fumbled, whereupon Warrensburg took possession, but kept the ball just about as long as it took them to acquire it, for three plays netted them a one-yard loss and Kidd booted the ball to Keith Smith, who took the pigskin for a 14 yard runback. Roermann then made a sensational 25 yard run for the first down, but the next two plays netted nothing and Hampel again kicked to Warrensburg.

The Mules still seemed to be able to do nothing with the ball, so Kidd punted to MSM and Weitzel ran back the kick 25 yards. On the next two plays Cole and Weitzel made 5 more yards and then the Mules intercepted a pass by Weitzel. The Mules netted 18 yards on two plays but then fumbled and Weitzel then reinstated himself by recovering the fumble. Again the Miners could do nothing to speak of and they kicked back to Warrensburg.

#### First Score

This type of play highlighted nearly all of the first and second quarters, and it was not until just before the half that the Miners really got in gear and showed the Mules who was boss. After recovering a fumble and gaining a 15 yard penalty, the Miners ran a succession of plays that were good for a first down. Then came the note that

made for a very happy group in the stands—a five yard run by Keith Smith for the first T.D. F. Smith kicked the extra point, which was no good and the score stood at Miners 6—Mules 0. The rest of the first half was reasonably uneventful and at halftime the score stood as before—6 to 0.

#### Second Half

The first part of the second half made the six points on the scoreboard look pretty good, as both teams seemed to be fairly idle in that they did not lose or gain much yardage. However, when Brooks lost the ball on a fumble for Warrensburg, the Miners recovered and a remarkable series of plays began to unfold on the somewhat dry grass of the field. On the first play Hampel passed to K. Smith for a 19 yard gain. The next two plays netted 9 yards and on the third Roermann made the yard needed for the first-down. The next three plays plus a five-yard penalty against Warrensburg constituted another first-down and the Miners were really breathing on the goalposts then. Hampel took the ball first for an 8-yard gain and on the next play he lost one yard. Keith Smith then carried the ball and gained 2 much-needed yards. This placed the Miners on the one-yard line for the yard and touchdown. Roermann then converted for the extra point, which was good and then the score stood Miners 13-Mules 0.

#### Long Run

Roermann kicked off to Warrensburg and the Mules then gained two first downs in a row, the first on groundage plays and the second via the air on a 35-yard pass from Brooks to Gnagi. Two plays later another first down was made as Brooks passed to Titus for an eleven yard gain. Then, the Miner defense tightened and the Mules were stopped cold. The next few plays were the best of the day and were certainly a fitting climax to the great day enjoyed by the old grads. Moeller ran the ball for a 3-yard gain on the first play and then Roermann was halted quickly on the next play for no gain at all. Keith Smith took the ball next for a 12 yard gain, but there was a flag on the play and the Miners were set back 5 yards. Roermann took the ball on the next play and ran it 79 yards, escaping all the Mules on the way, for the longest T. D. by far of the year. F. Smith kicked the extra point—a good one and the Miners led 20-0. The remainder of the game constituted nothing at all sensational, each team gaining the ball twice and the clock ran out with the scoreboard still reading 20-0, thus a fitting climax to a very successful day in every way.

'Twas brilliant, and the slithy toves did gyre and gimble in the wabe. O frabjous week-end, Callooh, Callay, The Miners chorled in their joy.

Gad zooks, what a weekend! Of course, the conscientious observation of prohibition and lack of dance permits Saturday night threatened to dampen the festivities but the resourceful Miners came through and made the event successful with many lovely party games such as pin the tail on the Mules, Russian Roulette, and spin the beer keg (empty of course). A few houses spent the time reading poetry or quilting. A girl at the football game was overheard to comment "The Miners sure can't make passes!" Naturally, we didn't have a permit.

Some nasty rumors were floating around going so far as to suggest that a Miner or two became (oooo — I hate to even say it) a bit high. These were undoubtedly due to misunderstandings. That Miner under Mables' table wasn't drunk. He was just curious.

## Amazing New Offer

The voice from the Mine Shaft isn't too much in these days of high costs of drinking and sleeping so the Miners are being given first crack at an amazing new offer. The publishers of Saturday Evening Post and Life have made it possible for you to obtain these two pulps for the rest of your drunken days. The exact cost has not yet been determined but if you would be so good as to give our representative a signed, blank check, he will be very glad to fill out the amount at a later date. Just look under any rock on campus and you'll find one of our salesmen.

Students here and everywhere are complaining about the high cost of living. Every body is spending so much time griping and moaning, they'll soon forget how broke and hungry they are.

A noted economy expert was recently commenting on the

rising cost of food. Holding a can of prunes he exclaimed, "When I was a boy you could buy a can of prunes for a few cents. Now they clean you out!"

## Life of Luxury

Many lads (mostly B. M. O. C's) made enough during the summer that they are living the life of luxury. How do these summer shiesters make all this loot you ask? One answer is exemplified in the inter-office memos of a large industrial firm. Boss: "Smithers, you've been absent fifteen days out of the past two months. Production in your department has fallen off fifty per cent. Therefore I'm giving you a ten dollar a week raise." Smithers: "Thanks, Dad." The poor student (who isn't) isn't completely lost however. Just look around you in this glorious, flowering metropolis. You'll find college life is so arranged that life for the financially limited can be filled with the free fruits of life. There are free movies, free dances, lending libraries, the earth, the sun and sky, etc. The best in life. Take the advice of the weathered, 'ol Alums who wisely speculate in the real estate game: "Get lots while you're young!"

## Penny Pincher

On the other extreme of the campus spender is the also numerous penny pincher. He's exemplified by McIntosh on the day his wife presented him with offspring. He was seen in a drug store buying a baby bottle. "Man, that's scandalous extravagance," said a fellow countryman. "It's necessary though," sighed Mac. "The woman's gone and had trip-lets."

That's about all for this week kiddies, but it's only fair to warn — The Shaft is watching you, you never know when to expect its bloody, splintery strike, and then — it's too late. Next week, reprinted from another Shaft, a daring expose of college journalism; the life of Amos Copycrud entitled "I Used to Write for the Shaft." Don't miss it.

## AT A GLANCE

Subtlety is the art of saying what you think and getting out of range before it is understood . . . but there isn't any way to be subtle about the Pep Rally Friday Nite . . . It STUNK . . . Most everyone agrees that there is little School Spirit here at MSM. After the "rally" it was known that there isn't ANY school spirit.

Alumni sure weren't impressed by what went on at the rally and showing such a lack of spirit isn't going to help get any of the alumni to endow this place. Seems as tho there was something said about cooperation between organizations on the campus . . . This lack of cooperation was quite evident during Homecoming when there was some misunderstanding about having parties Saturday Evening because the Alumni Association was against it . . . Homecoming preparations should be made not

only by the Alumni Association but also by the Fraternities and other social organizations working together with each other instead of against each other as has always been the case. The Interfraternity Council and Student Council should be invited to participate with the Alumni Association.

Some discussion has been made about there being a Student Union which would have a Student Lounge somewhere on the campus. This would be a wonderful idea, especially for the Independents who have no place to take their girls or parents after a game, or when they are here visiting. Most colleges have them and although the appropriations have been cut for the school some plan should be worked out. The football team should be congratulated on doing such a good job Saturday.

## Tekes Place Third in Homecoming Display; 2nd in Cross-Country

Homecoming has come and gone, and this Monday, the Tekes House was filled with moans. Of course, most of the groaning was from the effects of the big week-end. However, the week-end was a success on three counts. Firstly, the celebration turned out for the better, contrary to predictions. The second count was the success of pledge John Patton, who placed second in the annual Homecoming cross-country run. Therefore, we offer this week's congratulations to John. Lastly, we want to express our extreme gratitude to the judges of the Homecoming displays for so generously awarding us third place. Thanks, judges.

The other big reason for the groans was the football game Monday afternoon, our last of the season. It was a hard fought and bruising game with TKE coming out on the short end. Besides losing, half of our team was knocked out. Injuries included one dislocated elbow, several pulled muscles (in the same leg), one fouled up foot, and internal injuries. This is only October, though, and we have high hopes for the intramural sports to follow football.

## THETA KAP

(Continued from Page 1)

doing pretty well for themselves, and had a lot to talk about. Many of them hadn't seen their old classmates for twenty-five years. All were amazed at the extensive alterations in the House since their time, and really admired our new set-up. Conducted tours were given after a while!

Saturday afternoon everyone went over to the big football game to witness the Miner's victory over Warrensburg. The old grads proved to be in great form when it came to rooting for the Home Team!

Nearly everyone got a "kick" out of our Homecoming decorations, and especially McCarthy's date. It seems as if these

the alley. The Beta Sig football men left two victims writhing in their wake last week. They're shooting for the top, with plenty of good men and carloads of esprit de corps to assist them. "Bozo" Haertling makes quite a flashy showing out there on the gridiron. The only thing he lacks is a cigar stub. The house is going to pick one up for him before the next game, however, and then Bozo can really live up to that nickname.

Many thanks are in order for the wonderful chaperones we had over the Homecoming weekend. Prof. Grimm and Mr. and Mrs. Bill Phillips presided Friday evening, with Doctor Smith and Mr. and Mrs. Meska taking over Saturday night. I even learned a lot about bee husbandry. Many thanks again, and we all hope the lot of you will return to our house many times.

mules were a little different than most. Although the display didn't win any prizes, there is a tangible reward to be had — we should have no trouble growing grass in front of the house next spring!

## KA Alumni Return to Find House Flag on Top of Water Tower

There were big doings at the K. A. house this weekend. Thirty-four alumni were able to get back to the old Alma Mater and the Kappa Alpha house. Such prominent men as Mr. A. E. Barnard "27", J. R. Kenney "12", G. E. Dierking "24", P. K. Horner '06", M. P. Brazill "20", J. J. Brown "05", and of course Mr. G. A. Easley "09", head of the alumni association. They were all pleased with the present status of the Beta Alpha Chapter and its present active members.

Kappa Alpha was also named the winner of the Homecoming Decoration Award. The K. A., having won joint honors with another fraternity last year, will keep the trophy at least until next year's homecoming. Many people helped to make the display a success, but one member in particular deserves recognition for his artistic work. This is John Rose whose tireless efforts, (5 hours sleep in 48 hours), made the entire set possible. A lot of premeditation went into the idea for the extravaganza.

Our flag was abducted at the Friday night banquet. After an anxious night it was sighted atop the water tower and courageously retrieved by Elmer Black. Elmer made the tire-some climb and found that the flag had been carefully suspended to a beam by pieces of string. It was immediately folded and brought back to the K. A. House by an honor guard. There it was run out and flew till dusk in the evening breeze. Clues are now being sought in

the case and it has been stated that the culprits will soon be brought to justice.

We of the K.A. house sign off now with anticipation of a long hard week of study ahead.

Bob Beck

A beauty by the name of Henrietta Dearly loved a tight sweater. Three reasons she had: To keep warm wasn't bad, But the other two reasons were better.

## LATEST BULLETIN

## Brand-new national survey

## shows college students prefer Luckies

Last year a survey was made in leading colleges throughout the country which showed that smokers in those colleges preferred Luckies to any other cigarette. This year another nation-wide survey was made—a representative survey of *all* students in regular colleges coast to coast. Based on thousands of actual student interviews—this survey shows that, as last year, Luckies lead again—lead over all other brands, regular or king-size—and by a wide margin! The reason: Luckies taste better.

**P. S.** Once again we're buying student jingles! \$25.00 goes to every student whose Lucky Strike jingle is accepted for our advertising. So hurry! Send yours in right away to: Happy-Go-Lucky, P. O. Box 67, New York 46, N. Y.
