Hilltoppers, Blue Baron Here For Concert, Monday Night

The popular recording artists, the Hilltoppers will present a concert in Parker Hall, Monday night along with Blue Baron and his orchestra. Prof. Lloyd of the Humanities Dept., who is in charge of general lectures, announced earlier this week that arrangements have been made and the Hilltoppers with Blue Baron's Orchestra will appear in two shows Monday evening, April 23, at Parker Hall. In order to accommodate the anticipated overflow crowd there will be two performances given, one at 7:00, the other following at 9:00. Professor Lloyd has asked that all students attending the 7:00 performance please not stay for the second show but leave so that other students will have an opportunity to see these popular stars. Admission will be by activity card for students and one dollar for others.

"The New Tops in Singing Stars," the Hilltoppers have a success story that reads like a Hollywood movie script. Their sudden "Cinderella" rise to fame and fortune began just four and a half years ago on the campus of Western Kentucky State College.

One of the boys had an idea that his newly completed song was professional enough to warrant publication, and asked the others to record, on a home tape recorder, an arrangement which he had also written. With Jimmy Sacca as the vocal "star" and the others providing the vocal background, they recorded one quiet Saturday morning on the stage of empty Van Meter Hall, the college Auditorium. A test record was sent to Randy Woods, the president of Dot Records. The song was "Trying."

When Woods heard the song he saw promise of a tremendous appeal and said it had the "strongest set of lyrics since Star Dust." He offered to produce the record for the boys. Within two months, 30,000 records were sold and the tune remained on top of the hit parade for 42 consecutive days.

Since then, the Hilltoppers have been in demand to appear in nightclubs, theatres, and on television. Their first major TV show was their debut on Ed Sullivan's "Toast of the Town" on the CBS-TV network from coast to coast. They have also appeared on television with Perry Como, Sammy Kaye, Kate Smith, and Patti Page.

Some of the Hilltoppers' outstanding engagements have been Ben Maksik's Town 'n' Country in Brooklyn, Skyway Lounge in Cleveland, Casa Loma Ballroom in St. Louis, Copa Club in Pittsburgh, and the Totem Pole in Boston.

Appearing with the Hilltoppers is the well known Blue Baron and his fine orchestra. Blue Baron has been featured at many of the top places throughout the country. His music and characteristic style make him an excellent orchestra for a concert, both alone and, as he will be Monday night, as an accompaniment to a choral group.

So Monday night come up to Parker Hall for two hours of some of the best music you'll ever hear; the Hilltoppers and Blue Baron's Orchestra in two performances, 7:00 and 9:00. Admission on activity card for students and a dollar for others.

WESLEY FOUNDATION

Wesley Foundation met Sunday for the evening meal and a period of fellowship and worship.

Don Statler and Robert Fuller led a group discussion concerning U. S. foreign policy. Several important aspects of our nation's relations with other countries were discussed among the group. Basic facts of foreign policy which are of importance to us all were presented.

We were served a delicious dinner by Mrs. Mann, Mrs. Butler, and Mrs. Eshbaugh. We would like to thank these ladies for preparing the evening meal for us.

THE HILLTOPPERS

Honor Awards To Be Presented

The Seventh Annual Honors Convocation at the Missouri School of Mines will be presented in Parker Hall Auditorium at 10:00 a.m. on Thursday, April 26.

A large number of Honor Awards in the form of scholarships, fellowships, cash prizes, certificates of recognition, honor society memberships, athletic awards, student council, glee club, fraternity awards, etc. will be presented at the Convocation. Student leaders will participate in a large part of the program.

The printed program to be distributed at the assembly will constitute a record of all awards made during the year between April 1, 1955 and April 1, 1956.

The Faculty has authorized dismissal of all classes during the 10:00 to 11:00 a.m. class period on this date for attendance at the Convocation.

William J. Jensen
for the Faculty Committee
on Assemblies.

Delta Sigma Phi Steadily Growing

A steady and solid increase of pledges may be seen in the Delta Sigma Phi club for at each meeting the number of interested individuals is increasing. Those who are interested in joining a fraternity and who have attended our meetings usually decide that we have an organization with which they would like to associate themselves as charter members.

The meetings are held every Monday evening at 7:30 P.M. in the Episcopal Parish House at 10th and Main Streets.

At our last meeting it was decided to hold an election of officers at our April 30th meeting to serve for the remaining portion of this semester and for the fall semester of next year.

Our Board of Control and advisors have been active and found a house which is available for use as a chapter house. It is their desire, though, to obtain a house situated nearer the campus when our membership has grown larger. If enough men are pledged this spring it is very likely that we will have a nice house near the campus next fall.

Our Constitution has been written and printed for the Student Council and Faculty to read so that at their next meeting they may vote to recognize us as an organized body on the campus of the Missouri School of Mines.

Don E. Modesitt

ETA KAPPA NU HOLDS SPRING INITIATION

Gamma-Theta Chapter of Eta Kappa Nu, Electrical Engineering Honor Society, held its Spring Initiation Saturday, April 14. Undergraduate initiates were James L. Taylor, John P. Dever, Jerry D. Long, David M. Morrison, and Donald F. Snook. Five men were initiated as professional members. They were Mr. Jack T. Wilson, Chief Physicist, The Louis Allis Company; Mr. Charles E. Boulson, General Manager, Sho-Me Power Corporation; Mr. C. M. Lovell, Vice-President and Chief Engineer, Maloney Electric Company; Mr. Wayne J. Bennetsen, Program Manager, Emerson Electric; and Mr. Donald E. Spackler, Vice-President, Maloney Electric Company.

Following the formal initiation ceremonies, the newly inducted members were guests of honor at a banquet held at the Pine Room. The speaker for the evening was Mr. Jack Wilson, who gave a very interesting talk on "Power from the Atom, Power from the Sun." Mr. Wilson supplemented his talk with movies.

Donald Snook was chosen as the outstanding pledge for the spring semester and was given a fountain pen as an award.

SGE Initiates New Pledges

Missouri School of Mines' Eta Chapter of Sigma Gamma Epsilon, earth science honorary society held its spring initiation ceremony at 1:30 afternoon on April 1st. The ceremony took place in a colorful and impressive manner in the school mine. The following pledges and associated members were initiated:

Pledges

B. Curtis Leach, Billy Lester, Guy Wiggs, James Borgerding, Jose, Stoll, Louis Mothersbaugh, Tommy McKellar.

Associate Members

Prof. Denny Bonner, Prof. Phillip Bethke, Mr. William Baity.

The initiation banquet was held at Houston House, Newburg at 7:30 p.m. on April 8. After the banquet, Dr. T. M. Morris, professor in the Metallurgy Department, gave an instructive talk about his experience last summer as a consultant to a manganese smelter in Nevada.

After Dr. Morris' talk, Charles Edwards chapter secretary, presented a geologic hammer to James Borgerding, the winner of the best pledge plaque.

S.A.E. To Conduct Check On Autos

Rolla, Missouri is making an all-out effort this month to see that every car on the city's streets is in safe operating condition.

Rusty Fowlkes, of the student branch of the Society of Automotive Engineers who are sponsoring this Safety Check, said that during last year's Safety-Check 1506 Rolla vehicles went through the safety lanes. This year's goal is 100 per cent of the vehicles registered, and all official and unofficial groups are cooperating to realize this goal.

"It should not be necessary to urge any intelligent driver to have his car safety-checked," Sgt. Brummel of the State Highway Patrol told the SAE. "His own safety and the safety of everyone he meets in traffic depend on the safe operating condition of his vehicle. Even a small neglect of any item needing attention can lead to a serious accident."

Check lanes are located at Pine Street between 12th and 14th streets. These lanes are located at the East edge of the campus. The hours of operation are from 8:30 AM to 11:30 AM and from 1:00 to 3:00 PM.

The points covered in the safety-check are those recommended by the national sponsors of the Vehicle Safety-Check for Communities. These points are: brakes, headlights, rear and stop lights, tires, steering, exhaust system and muffler, windshield wipers, windshield and windows, horn, and rear-view mirror.

Those passing the test will be given a sticker. It has been found in the past that 10 to 15 percent of the cars tested have defects, usually unknown to the owner. However, there will be no fines, arrests, or soliciting of business.

Last year a special group of 422 cities participated in the National Vehicle Safety-Check. A much larger participation is expected this year. Awards may be earned by communities making the best showing in 3 population groups in each state.

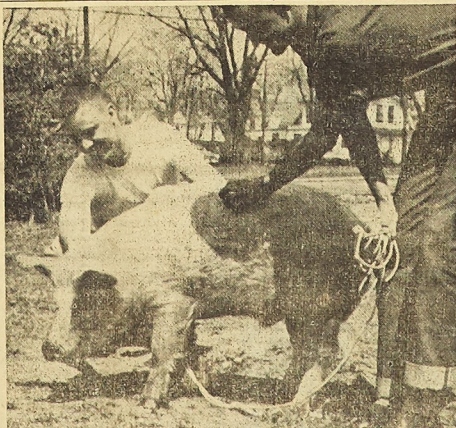

The project, was inaugurated in Rolla last year. It is sponsored nationally by the Inter Industry Highway Safety Committee, the National Safety Council and Look Magazine, and locally by the Missouri State Highway Patrol and local authorities.

Any members of the S.A.E. interested in participating are requested to fill out the forms available in the Mechanical Engineering Building.

It is up to every student driver to accept his responsibility for the public safety and to do his part by having his vehicle safety-checked. The success of this whole program depends upon the response of each individual driver.

BAPTIST STUDENT UNION

The BSU has elected its officers for next year. David Bunch has been chosen as the new president. An installation service will be held next Monday at the First Baptist Church. Being lazy, this reporter will let the new officer report on the full slate of officers and the installation service.

CLARENCE, A 210 pound walking slab of bacon and hams, appeared on the MSM campus for a short visit two weeks ago. Belonging to Triangle Fraternity the pig was brought to Rolla by Triangle's chapter at Kansas University. The following weekend the pig was transported to the University of Louisville after an attempted plot, by two other fraternities on the campus to dye the pig orange.

FOUNDRY SCHOLARSHIPS NOW AVAILABLE TO ALL INTERESTED STUDENTS

The Committee on the Foundry Educational Foundation Scholarships will meet early in May to award scholarships for the coming fall semester. Any students wishing to be considered for these awards, please write a letter to the Committee, C/o Department of Metallurgical Engineering, before May 1, 1956. This letter should contain complete information concerning the student's academic position as to curriculum, year, and grade point. In addition, the committee should be informed as to the work experience of the applicant, and other general data concerning background, need, source of funds for education, and all such matters that will assist in arriving at a decision.

These awards are made primarily to students in the Departments of Mechanical Engineering and Metallurgical Engineering, but they are open to any individual who is genuinely interested in foundry work, who will take at least one course in foundry instruction at this school, and who will consider the possibilities of working in the foundry industry.

A. W. Schlechten

PI TAU SIGMA

Pi Tau Sigma had the privilege of initiating Dr. Leon E. Woodman and Professor Gordon L. Scofield as honorary members at a ceremony conducted early Sunday evening, April 15, 1956, in Room 107 of the Mining Building. After the initiation of the honorary members, the following men were brought into the brotherhood of Pi Tau Sigma:

Danny E. Barbato
David W. Bates
Henry W. Buschman
Duane E. Crofts
William W. Jennings
Tom Kalin
Brace C. Smith
Robert N. Warren
Gerald L. Wright

A banquet in honor of the occasion was held later that evening in the Pine Room of the Greyhound Bus Station. Dr. A. W. Schlechten gave a very interesting talk concerning the role of metals as engineering materials. A short business meeting was held after the banquet at which time a man was selected as the outstanding sophomore mechanical engineering student for the current year. The man chosen for this honor, which will be presented annually, has to be active in campus activities and organizations as well as attain a high scholastic average. Congratulations are in order for Donald G. Guetersloh who has been chosen as the first man to receive this honor.

The members of Pi Tau Sigma warmly welcome the new initiates and extend to them the chapter's best wishes for future success in the fraternity and in their chosen field.

Record Crowd Attends For Engineer's Day

Needing A Date For Greek Day

On Friday, April 20, the Inter Fraternity Council will sponsor its second annual Greek Day Celebration. The IFC would like, at this time, to extend a cordial invitation to all students and townspeople to attend.

This year's celebration will take place on State Street directly opposite the campus. The curtain will rise on this year's Greek Day at 8:30 p. m., with a street dance. The music for this dance will be furnished by a combo from Lebanon.

The nature of this year's celebration will be charitable as well as social. The theme will be a carnival midway with each of the fraternities sponsoring a booth. All of the proceeds from these booths will go to the Cerebral Palsy Brace Fund. It is the desire of the IFC to instill a better spirit of friendship between the students and the townspeople, and at the same time promote the interest of this noteworthy charity.

MSM RADIO BROADCAST DOING EXCELLENT JOB COVERING CAMPUS NEWS

The "MSM Radio Series," 1955-56 version, is styled to keep MS students and citizens of Rolla informed as to recent happenings on campus. This program, directed by Professor John M. Brewer of the Humanities Department, was originated by the faculty's Radio-Television Committee, which is composed of Professor G. G. Skitek, chairman; Professor D. S. Eppelsheimer; Professor T. J. M. Planje; Professor W. J. Murphy; and Professor Brewer.

The fifteen-minute program, direct from Parker Hall, is presented at 6:30 p. m. every Wednesday evening over KTTR, the local radio station in Rolla. The time for the broadcast is donated by the owners of KTTR, Mr. Luther Martin and Mr. Martin Mitchum.

Many purposes have been accomplished by the radio program. Up-to-the-minute campus news is provided for the students who may have missed reading the daily bulletin. The broadcast helps to maintain better public relations between the Miners and the people of Rolla—their comments prove that they do listen regularly. The program also gives numerous students experience in presentation and technical operation of a radio program. Planning and presenting the program is carried out by students enrolled in English 170 and their advisors. Every student has a chance to participate and offer suggestions.

The typical schedule for a program includes: weekly calendar, announcements, sport news, general news, and special news. Interesting panel discussions and piano solos by Mr. Morris E. Suhre, Jr., have also been featured in the past few months.

"The Showcase," a television program featuring the different departments at MSM, is shown about every two months over KOMU-TV in Columbia, Missouri. Plans are also being considered for a closed-circuit television system at MSM which would be used for educational purposes.

Professor Brewer states that constructive criticism of the radio program will be welcomed at any time.

Gerald L. Stevenson

NEXT WEEKS INTERVIEW

A representative from Armour and Company will be on campus interviewing Mining Engineers, Engineers, who are interested in representing Armour as an outlet for chemicals to be used in the mining industry.

Engineer's Day 1956 was held on the School of Mines campus on the 12th of April. This annual event is co-sponsored by the school and a number of industrial concerns.

A record number of 1300 students, interested in the various fields of engineering and science, were present on the MSM campus as guests of the school. Professor Leon Hershkowitz was in charge of this year's Engineer's Day. He was ably supported by a number of different organizations on the campus whose members served as guides to show the future engineers around the various departments and places of interest.

From the St. Louis area came the largest number of interested students. Large congregations also came from Kansas City, Springfield and Sedalia, Missouri. Such far reaching places as Bartsville, Oklahoma, and Evansville, Indiana, Chicago, Illinois, Peoria, Illinois, were also represented. A total of 174 towns and cities in Missouri and 14 out of State places were represented. The general public in goodly number turned out in the evening between the hours of 7:00 to 9:00 to get their view of the various different exhibits.

At this time Professor Hershkowitz would like to thank all those connected with Engineer's Day, especially those students and members of the faculty who served as guides, without their co-operation the Engineer's Day could not have been the huge success that it was.

Dick Ross

Free Lunch Stand Also Big Success

Each year on Engineer's Day a lunch stand is located in the center of the campus and free pop and hot-dogs are given to the many visiting high school students. The purpose of this lunch stand is not only to provide refreshments for the prospective engineering students, but to make them aware of the existence of the extra-curricular organizations here at MSM.

This year the lunch stand was sponsored and financed by Chi Epsilon, Civil Engineering Honorary Fraternity; Pi Tau Sigma, Mechanical Engineering Honorary Fraternity; and Eta Kappa Nu, Electrical Engineering Honorary Society. In the past, Eta Kappa Nu has sponsored this project alone, but due to the increased cost and increased number of visiting high school students which visit the campus on Engineer's Day, Pi Tau Sigma and Chi Epsilon combined with Eta Kappa Nu to make this a joint project.

Sixteen members of the three organizations worked during the day at the lunch stand. This year there were 85 cases of pop and 1600 hot-dogs given to the visiting high school students. The MSM Cafeteria deserves a special thanks for furnishing the utensils and stove used to prepare the hot-dogs. Paul Gramlich was chairman of the committee which planned this project, purchased the necessary supplies, and operated the stand.

This project has met with such success in the past that it is sure to continue in the future.

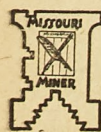

INTERNATIONAL FELLOWSHIP TO MEET FRIDAY

The International Fellowship of the Missouri School of Mines will meet Friday in Room 107 of the Mining Building.

Two films, "Iceland on the Prairies" and "Bronco Busters", will be shown. The first film is a visit to the Icelandic communities in western Canada, and the second film is the story of the Calgary Stampede, which is Canada's annual rodeo feature.

The annual spring picnic will also be discussed and all members and interested individuals are urged to attend.

THE MISSOURI MINER

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla, Mo., every Friday during the school year. Entered as second class matter February 8, 1945 at the Post Office at Rolla, Mo. under the Act of March 3, 1879.

Subscription Price \$1.00 per Semester. (Featuring Activities of Students and Faculty of M.S.M.)

NO NEWS IS GOOD NEWS

by Paul Richards

Plan to be in Rolla next week-end for the IFC sponsored Greek Day and all the activities that will accompany the two-day celebration. A carnival spirit will prevail Friday night on State Street and all students and townspeople are invited to attend. Proceeds will go to charity.

Congratulations to Beta Sig for a well-deserved volleyball championship. They had five great players and a guy named Bran-hof—the man with the steel fist.

Along those lines, a new picture is being made in Hollywood about a prosperous Kansas wheat grower. Its title, "The Man with the Golden Farm."

It's just a thought but I wonder if the University Dames ever considered presenting a play or talent show for the students. It could be a great morale booster for the entertainment-starved Miners.

Believe me a person has to be starved for entertainment to go to the Rollamo, and many do—especially on Thursday night. There's no cheaper way to waste time.

To the ex-patrons of Bear-tracks: Cheer up boys. The mug was well worth a dollar. Sad news to others: Ye Olde Rendez-vous may possibly be closed down for a spell. Let's hope not, Cookie. Where else can you get such atmosphere, except maybe inside a vacuum cleaner.

Outstanding farce of the year: The date of completion for the new MSM dorms.

Note to the school: I bet that neat little fence around the Old Chem Building will rot away before the building collapses. That is unless Dr. Schrenk could mix up some pretty potent paint to help it withstand the elements.

With spring in the air and the birds and bees in full force let's turn to the romantic side of life at the Missouri School of Mines and Metallurgy. Is Roxanne pregnant?

Until next week remember this: You can always tell a good student by the company of profs he keeps.

Get you a gal
And get you a jug
That's ill you need
We've got the mug

Wear your old duds
Wear your old boots,
We'll have no rugs
And won't allow suits

Come for Romance,
But don't take a chance,
Anyways Come—
COME TO THE OLD
MINER DANCE!

Dean Comments

The most important advantage which any college can offer its students is an able faculty. Missouri School of Mines is fortunate in having a devoted and distinguished faculty.

They carry heavy teaching loads, far heavier than that which is considered normal or ideal. In addition they serve on innumerable faculty committees. The educational policy and standards of this college are set by the faculty through the medium of faculty committees. As these committees seem to be almost continually in session and as they report their recommendations and actions to the entire faculty at least once each month, the curricula, courses and entire educational program are constantly advanced to meet the progress made by modern technology.

I like especially the personal interest which our faculty members take in each and every student. This seems to be one of the outstanding characteristics of Missouri School of Mines and Metallurgy. I hear it from parents, from high school teachers, from alumni and even from the students themselves. They like to come to MSM because they can be sure to receive careful individual attention, not merely from some professional counselor or dean of men hired for that particular purpose, but from the teachers themselves.

Along with their teaching, their committee work, and their work with students and student organizations, our faculty members are recognized by the community as good and respected citizens. They take part in community activities in church work and in service clubs. They are members of their professional societies and many of our faculty members hold office in these societies on State and National level. They make themselves and therefore this School known all over the world.

Students will be interested in some information recently gathered by our Graduate Committee. In the past two years 26 faculty members in 9 departments published 64 articles in various scientific and technical journals. Almost all of these articles were on original research done in the laboratories of this campus. Such articles are evidence of productive scholarship.

Yes, we are fortunate indeed to have a faculty of such able and dedicated teachers. I know they are dedicated because under present conditions any of them could go immediately to positions at other universities or in industry. They remain here because they believe in the objectives of this college and they enjoy working with the students who come here. They believe that our country will continue to need more and better engineers to preserve its own security and the freedom of all nations of the world.

Wise students will make good use of their years spent at this college. They will learn all they can from these excellent teachers. It has been truly said that behind every great engineer there stands some great teacher. We have some great teachers on this campus. That is why I am confident that our graduates will become great engineers.

STUMBLING AROUND THE CAMPUS

by Dave Stolle

This is Monotony . . . take one. Coming up on Monotony in the next half hour is a trip to MSM with three illustrious senators, a visit to the newest cemetery in Rolla, a report from the fashionable Brown Room of the Hotel Caney, a civic discussion from 'Town Meeting of the Ozarks' on the practicality of stop lights, and, among other things, a musical interlude, provided you bring your own instrument.

First: to our roving reporter on the campus of MSM where he has garnered three senators (or should we say legislators?) from the state appropriations committee: seems that the head of this illustrious, well-spoken, and even voluble, group has expressed the opinion that this school does not need the funds DEAN WILSON has been fighting for so valiantly. In fact, the opinion of this reporter is that he just doesn't care for the whole cotton-pickin' School of Mines! Pity, what with enrollment jumping, classrooms overcrowded, and conditions of such a nature as to warrant immediate attention. Maybe it will take a jail break, riot, or raging fire to help our famed legislators make up their minds about funds. As it stands now, with this gentleman against us, we can kiss the EE department goodbye . . . speaking of riots, may we warn the scholastic citizenry of the tremendous advances made in the police dept. of this town? . . . ask BOB RICKEY about the latest addition to the police force, a graduate from the Olympic team, who passes out tickets for speeding as he runs alongside the car.

What with the addition of the new stop lights, the police force should have much more time to devote to the apprehension of criminals . . . by the way, this is also to serve notice that the 5 o'clock rush, long a standard on Pine street, will be lengthened until it becomes a 6 o'clock rush in the future, because of the stop lights . . . question of the week:

who put the tombstones in the front yard of the school hospital? Couldst be that they're burying their dead so close to the establishment now? . . . from the El Caney Bar comes word that the place has been completely rejuvenated . . . they swept the floor.

Directly in connection with last week's editorial on cooperation, we noticed a good example of the cooperation on campus: during a recent track meet, the shot putters had to give way to a crack ROTC drill team and a surveying crew on Jacking Field . . . yesiree, cooperation . . . BOB MASON can tell you a good one about a daring chase through the streets of Rolla at 4 in the a. m. . . are you sure those gendarmes wanted to go fishing, Bob? . . . Classic quips from the last Engineer's Day festivities . . . one tentative freshman to another: "Man, what time is it?" . . . reply: "5 crazy minutes till nine!" . . . JACK BROSE to a group he was conducting through the Petroleum Dept.: "The purpose of the pump on the top of the oil well is to put pressure down into the hole, so the oil won't come spurting out too fast." PROF. ROSTON will love you, Jack . . . wish I'd said this: TED MUELLER, at a recent election: "Frown tho you may, I'll have my say" . . . seems to me that they've added quite a few hills to the MERAMAC SPRINGS area . . . about 17 1/2, according to this writer's aching feet . . . BOZO GRUENWALD had some difficulty finding adequate provisions for putting out a fire last Saturday.

Understand the Hilltoppers and Blue Baron's aggregation will hold forth at PARKER HALL next Monday night, with shows at 7 and 9 . . . it should be an evening well worth attending . . . all we'll need is someone to go to the 7 o'clock show! . . . hope CLARENCE, Triangle's roving good will ambassador, made it all right to Louisville . . . his arrival on campus must have given some premonition of the visit by the lawmakers, except that Clarence has the form of a pig, and justly so . . . wasn't that a 10-lb. sack of feed the Triangle pledges were struggling with on 7th street? See Beaucoup juniors with sore

arms from the "Tetanus Special" to Fort Leonard Wood last week . . . here's hoping for good weather for all you greeks this week-end . . . pity Clarence couldn't have stayed for a greased pig race . . . from the EE Dept. comes word of PROF. SKITEK'S latest discovery: the EGE effect . . . impressive, indeed, was the test given in honor of Engineer's Day (and on Engineer's Day) in a certain department . . . if, from the Mechanical Dept., you hear strains rattling those blown by Satchmo, you'll know Rolla's version of the great Louis Armstrong is working up a lip . . . and so, as we ride forth into the gathering twilight, there comes into sight a lovely amber glow reflected from the blood running freely in front of Hell's Half Acre, politely known as the Physics Dept. . . . From the April PETROLEUM ENGINEER . . . srehe'tht ed ENGINEER . . . there's the girl who hasn't much upstairs . . . but what a stairway! . . . irate wife: "What do you mean, coming home half drunk?" . . . "Sorry, dear, I ran out of money" . . . thought for today (gone tomorrow) . . . Nothing is so firmly believed as what we least know. This is Monotony, returning you to your prof., who, by this time has discovered you reading in

class.

PI KAPPA ALPHA

Say, hey, the big week-end is coming up. Yeah! Here's where we all get smashed legally. I imagine the tomato juice will catch it Sunday morning.

The PIKES (including John Wolf) are looking forward to the "blast" with great hopes and expectations. It's a shame we've got to put up with sex while we are drinking our beer, but I'm told it can be done. They say you're supposed to take a girl to the dance, too. Oh wlel, anything to climb the social ladder.

Outside of the excitement over Greek Day, things have been somewhat normal around here. Softball practice has been going strong, so you PIKES get out and work. Won't be long till track time too.

Boeing production engineering—precision on a big scale

This Boeing B-52 wing jig is one of a battery of four. Each one is 90 feet long and weighs more than 1,000 tons. Yet many of its tolerances are within 1/1000 of an inch—as close as a fine watch! Almost absolute accuracy on a tremendous scale like this means that Boeing production engineers face some of the most stimulating challenges in engineering today.

These production engineers are of many types. And, because of steady expansion, Boeing needs more of them: industrial, civil, mechanical, electrical and aeronautical engineers.

There is "growing room" for topnotch production engineers at Boeing's Wichita and Seattle plants. Big programs are now

under way on the airplanes and guided missiles of a few years hence. And Boeing production engineers are responsible for the high quality and continuous development of such industry-leading airplanes as the B-52—famous "Long Rifle" of Strategic Air Command—and the 707—the world's first jet tanker-transport.

At Boeing, production engineers find individual recognition in tightly integrated teams in design-analysis, test, and liaison-service. They find that Boeing is an "engineers' company," with a long-standing policy of promotions from within the organization.

Career stability and growth are exceptional at Boeing, which now employs more than twice as many engineers as at

the peak of World War II. Boeing engineers enjoy a most liberal retirement plan. And life for them is pleasant in the progressive, "just right" size communities of Seattle and Wichita.

There are opportunities at Boeing in design and research, as well as in production. If you want job security, satisfaction and growth, it will pay you to investigate a Boeing career today.

For further Boeing career information consult your Placement Office or write to either:

FRIDAY, APRIL 20, 1956

THE MISSOURI MINER

PAGE 3

Miners Even Seasons Record; Lose To Washington U Beat Westminster

by Ted Mueller

Gale Bullman's Miners went down in defeat 69-61 to Washington University Wednesday, April 11, in a close contest in track and field at MSM. A moderately dry track and clear day was the scene for fast action as the Miners were cheered on by members of the campus and faculty. Roger Feaster spearheaded the attack with a total of 8 points by capturing first place in the 220 yd. dash and second place in the 100, followed closely by teammate "Pappy" Allison.

The most exciting event of the day was the mile relay with the crowd urging on anchor man Bob Eshbaugh who couldn't quite close the gap as Felon, Washington anchor man, neared the finish line. This proved to be fatal to the Miners, who could have won the meet with a victory in this event. Eshbaugh made a fine showing, winning first place in the 440 with a time of 51.6 seconds as he crossed the wire.

Things got underway badly as three Miners failed to place in the first event of the day, the mile run. Washington U. swept this event, headed by Tower, winning in 4:51.6 seconds and followed by Robert and Jackes.

In the shot put, Smith bettered hefty 45' 1/4" toss and Rex Wilkins finest mark to date with a liams added to the Miners' score by taking third.

A clean sweep was in progress in the 220 yd. low hurdles until Parker, who was away to a fast start, injured his leg. A fine showing was made by teammates Cradill and Gammon, who rallied and captured second and third places, respectively.

Another highlight of the day was the stamina of Burkhead in the 880. It seemed as though the Miners might be in serious trouble at the beginning of the race, but Burkhead showed considerable spark as the race was nearing its finish and as a result claimed second place for 3 points.

Again Don Agres showed his worth as he won first place in the discus with a 125.9' throw. This surpassed his best throw to date by a margin of 5' 8". Williams placed third in this event which won this event for the Miners.

Unfortunately Wally Northup's best throw of the day in the javelin event was scratched when he fell. He still easily managed to take top honors with a throw of 165.05' and was followed by Ray Parker, whose throw won third.

April 14 saw the Miners playing host to Westminster in their fourth track meet of the season. The Miners proved too much for the visitors from Fulton as they won 89-41. Things started off with a bang at MSM as the shot-put and high jump events were quickly claimed by the Miners. In the high jump, teammates Hammond and Evans battled out a 5' 10" tie after leaving Westminster competition far behind. Smith, Miner shotputter, didn't improve his best throw of 45' 1/4", but managed easily to win first with Williams and Eaker following Smith to make a total of 9 points in this event. Smith's winning throw was 43' 5".

Gahan, Westminster miler, was not far ahead of Crane, Miner miler, as he won in the time of 5:06". Third place went to Del Day. The Miner milers improved remarkably since their last meet against Washington U. when they failed to place.

Once again Bob Eshbaugh showed true ability as he won the 440 in 52.0 seconds. Bill Hill out of the blocks in quick fashion following Eshbaugh, poured on a burst of speed and won second place, passing Edwards of Westminster. Eshbaugh, consistent high scorer, offers thrillers at MSM track meets in the 440. This event is always watched closely by students.

In the 100 yard dash, Allison and Feaster again were racing against each other rather than opposing sprinters, as Feaster won in 10.7 seconds.

To date Feaster's best time in the 100 is 10.1 seconds. Allison won second with Jackson of Westminster winning third. Allison moved down the track in

good fashion and form although he pulled a muscle in his left leg in the Washington U. meet.

Gammon and Pritzker, Miners running the high hurdles, weren't far behind Hicks who won first place in 16.4 seconds. Pritzker showed no ill effects although he also injured his left leg against Washington. Gammon followed Pritzker by winning third and added to the rapidly mounting score of the Miners.

Bob Jackson set the pace for the first lap in the 880 and then Burkhead came in first far ahead of Hull of Westminster who captured second place. Burkhead's time for the 880 was 2:04.2" and Miner Rashie won third. The running score after 9 events showed the Miners ahead 52-28.

Bob Eshbaugh won the broad jump ahead of Westminster jumpers Hough and Long. Eshbaugh's winning jump was 21' 2". Westminster won the pole vault with no opposition offered on the part of the Miners. Miner pole vaulters Kreder and Burmeister failed to show up for the meet and Kenney and Hughes shared first as they both cleared 9' 6".

Consistent winning sprinter Feaster of the Miners again won the 220 in 23.8 seconds. Jackson of Westminster won second, followed closely by Miner Hausman. Don Agers won the discus throw 124' 6" and followed by Miners Williams and Eaker which gave the school another clean sweep in this event. A clean sweep was also taken in the javelin event with Northup, Parker and Hammond winning in that order. Northup's winning throw was 157' 4", which was good against the strong wind which was against the contestants.

Distance runners Crane and Day were responsible for 4 more points as they finished second and third in the 2-mile run. Gahan of Westminster took first in this event, but our distance men are certainly improving and this fact is quite evident from Crane and Day's work on the field. Surely Washington would have a harder time of it if they paid us another visit here on the campus.

In the low hurdle event, Hicks of Westminster won in 26.2 seconds. Pritzker and Gammon who are always good for points, finished second and third in that order. There was no question as to the outcome of the mile relay as the Miners took the event easily in 3:35.8 seconds. Hausmann, Hill, Burkhead and anchor man Eshbaugh shared the honors. The mile relay is always a thriller, and is most important, due to the fact that 5 points go to the winner. No points are awarded the loser, which isn't the case in other events. Scoring is awarded as follows: First place 5 points, second place 3 points, and 1 point is allotted third place.

To date the track team has two wins and two losses; wins over Harris Teachers and Westminster. The Miners lost to Springfield and Washington U. Tomorrow the Miners oppose SIU at Carbondale.

SIGMA NU

Well here it is Friday again but this is not just any old Friday. This is a party Friday (if you are a Greek). The house is beginning to resound with female voices and all the assorted paraphernalia associated with them. While on the subject of girls, the Polar Bear noticed that the number of "moral angels" present had decreased. Seems that some people are learning.

If you would like to blow off a little steam for a worthy cause, be sure to visit our booth tonight. Somebody is going to have a very messy face. Wonder who—you? I think we will just forget that three will be school again on Monday.

Last Friday night a gay jam session was held here at the snake house. It was a real blowing affair. Just ask Sucher. By the way, Bob, where did you learn the dance of the pyramids. Brother Haygood was so moved by the music that he tried to rock and roll with his bed. Who finally won out, Jim?

BOB ESHBAUGH is shown crossing the finish line in the mile relay against Westminster. The Miners won this race in 3:35.8 seconds and the meet by a 89-41 margin.

TENNIS TEAM LOSES ALL BUT ONE TO WMINSTER

The tennis team in a heated battle lost to Westminster last Saturday afternoon, by the score of 6 to 1. Our only win being the beautiful and precise playing of our new doubles team, composed of Don Roth and Bob Hunter. They teamed up to win over Carl Reddick and Don Pensler, by the score of (6,3) (7,5). Our number two man Frank Hill had a close but lost to Don Pensler, by the match drawing out to three sets, scores of (6,4) (3,6) (6,0). The team is looking forward to next weeks match against Washington University. Washington is supposed to have a hard hitting winning team.

FOR MSM (doubles)
Roth - Hunter over Reddick-Pensler 6,3; 7,5;
FOR WESTMINSTER Singles

Carl Reddick over Don Roth, 6,0; 6,4; Don Pensler over Frank Hill, 6-4, 3-6, 6-0; Paul Rabe over Terry Kohler, 6-3, 6-3; Bob Lloyd over Jerry Godzwon, 6-0, 6-0; Jack Gunter over Paul Sisk, 6-1, 6-4; Rabe-Gunter over Hill-Kohler, 6-2, 6-2, (Doubles).

up his pretty red bow-tie for active membership in Pi Tau Sigma. Congratulations.

Brother Chullino (who has his finger in everything), is willing to risk a case of "Old Scotch" that the K. C. A.'s will win more games than the St. Louis Cardinals. Just have to wait and see. Well only 38 more days.

Recent Graduate Joins Ford Co

Press Release: Ford Motor Company

William A. Gartland, a recent graduate of the Missouri School of Mines, St. Louis, has joined the Ford Motor Company Engineering Staff as an engineer assigned to the development department.

Mr. Gartland received his Bachelor of Science degree in Mechanical Engineering in January.

On the campus he was a member of Kappa Sigma social fraternity, Theta Tau honorary fraternity, and the Newman Club. He was also a recipient of the Missouri Miner award. He is a member of the Society of Automotive Engineers and the American Society of Mechanical Engineers.

Mr. Gartland is married and lives now at 5667 Kenilworth, Dearborn, Mich. He is the son of Mr. and Mrs. Eugene J. Gartland, 35 Berkshire, St. Louis. The elder Mr. Gartland is a St. Louis plumbing contractor.

The young couple had just returned from their honeymoon. All the bride's friends gathered around her, and one of them asked, "How did John register at the first hotel you stopped at?" "Just fine," replied the young bride, blushing happily.

BOB SUCHER "M" CLUB ATHLETE OF THE MONTH

At the regular meeting of the "M" club, Bob Sucher was chosen Athlete of the Month for the month of March.

Bob, generally referred to as "the Whale" around the campus set a new school and pool record of 2:37.8 minutes in the 200-yard breast stroke.

His distinction as an athlete goes back to his high school days, where he lettered two years in swimming. Coming to MSM as a freshman Bob won three first places in the intramural meet, and then joined the varsity and promptly won his "M".

In this year's A. A. U. meet in St. Louis, Bob took a very close second in the 100-yard breast stroke.

Among his other activities Bob is a member of Sigma Nu, Alpha Chi Sigma, and the M club. He has made the Dean's list every semester he has been in school. Bob is an athlete the school can well be proud of and with two more year you can look for even

U. S. Civil Service Needs Engineers For Rocket Work

The U. S. Civil Service Commission has announced that engineers are needed for employment in the Army Ballistic Missile Agency and Redstone Arsenal in Huntsville, Alabama. Starting salaries range from \$4,345 to \$11,610 a year. The optional fields of work include aeronautical, chemical, electrical, electronics, general, industrial, mechanical, and ordnance engineering.

To qualify, applicants must have had appropriate college study or pertinent engineering experience. Applications will be accepted until further notice and must be filed with the Executive Secretary, Board of U. S. Civil Service Examiners, Redstone Arsenal, Huntsville, Alabama.

Further information and application forms may be obtained from many post offices throughout the country or from the U. S. Civil Service Commission, Washington, D. C.

Sailor: You aren't getting seasick are you, buddy?
2nd Loote: Not exactly but I'd sure hate to yawn.

INTRAMURAL Sports

Intramural softball got underway last week after a three day delay caused by inclement weather and wet grounds. Several of the teams participating this year drew first round byes in the double elimination tournament. However, many of the teams that did see action so far seemed to point the way towards a hard fought season for the future championship team this year.

In the games played so far Dorm "A", Baptist Student Union, Theta Kappa Phi and Triangle, last years champs, have advanced in the winners bracket. Triangle stayed in the winners bracket after beating Tau Kappa Epsilon by winning from Kappa Alpha, who had a first round bye. Dorm "A" won over Lambda Chi Alpha and then over the Dorm to stay in. The Baptist Student Union downed Beta Sigma Psi after both having byes in the first round, and Theta Kappa Phi

beat Sigma Nu to move into the winners side.

In horseshoes Sigma Nu and Tech Club advanced to the finals in single play by defeating Shamrock Club and Baptist Student Union, with Theta Kappa Phi and Dorm "A" advancing on the left side of the bracket.

Kappa Alpha and Sigma Nu stepped into the finals in horseshoe doubles. Theta Xi and Pi Kappa Alpha gained victories on the loser's side to remain in the running.

In tennis singles play Kappa Sigma, Tech Club and Wesley remained undefeated. On the other side of the bracket seven teams still remain.

Theta Kappa Phi and Sigma Nu advanced to the finals in tennis doubles, with Kappa Alpha, Wesley, Kappa Sigma and Baptist Student Union staying in on the loser's side.

The intramural track meet will be coming up soon and the entries will be due on the tenth of May. The preliminaries will be run off on the fifteenth and the finals the following day.

Intramural sports totals, with only five sports incomplete, are:

| | |
|-----------------------|----------|
| Theta Kappa Phi | 3285 1/2 |
| Tech Club | 3157 1/2 |
| Sigma Nu | 3080 |
| Engineer's Club | 2807 1/2 |
| Pi Kappa Alpha | 2747 1/2 |
| Triangle | 2437 1/2 |
| Shamrock | 2060 |
| Kappa Sigma | 2052 1/2 |
| Kappa Alpha | 2027 1/2 |
| Lambda Chi Alpha | 1997 1/2 |
| Beta Sigma Psi | 1965 |
| Tau Kappa Epsilon | 1767 1/2 |
| Sigma Phi Epsilon | 1555 |
| Theta Xi | 1300 |
| Independents | 1292 1/2 |
| Dormitory | 1120 |
| Wesley Foundation | 1112 1/2 |
| Baptist Student Union | 1037 1/2 |
| Dorm "A" | 942 1/2 |
| Sigma Pi | 932 1/2 |

Fraternity News

KAPPA SIGMA

As the weekend draws near, the thoughts are beginning to wander over to the fair sex and the Greek Day weekend ahead. This is to be the last dance this semester and prospects look good for a successful final blast to round out the social year.

This past weekend, initiation was held and we are proud to announce our fifteen new brothers. They are:

Larry Acuff
Jerry Borman
Gerald Fox
Gee Gabbert
Bob Kruger
Jack Lundstrom
Harold Meisenheimer
G. R. Nichols
Ray Oberkramer
Richard Oberlander
C. J. Phillips
Bob Raines
Albert Weinrich
Gerald Wright
Bob Wright

Congratulations fellas.

The softball season got off to a good start for the Kappa Sigma as we won our first game from Sigma Pi by the score of 17-5. The prospects for a successful season are very good.

Tales of Woe Dept.—Poor Walt Edwards is sure having things rough lately. First some nasty agent pasted Walts possessions to the ceiling in a very impressive manner. Noone seems to know anything about it, but it was suggested that it must have been Ricky and his anti-gravity machine. Then Walt was later amazed as his sack suddenly disappeared from his room as Ricky struck again. Walt, you may be the next to disappear. His sure been nice knowing you Walt.

LAMBDA CHI ALPHA

Well, here we are again still situated near the foothills of the ozarks where the weather is ideal for polar bears, seals, penguins, snakes, and arantangs. Anyway, this sure hasn't been the best weather for softball and that is what we are looking forward to. We have played one game but unfortunately we lost by a score which if we lose by or come close to losing by again, everyone participating in the game will suffer a five dollar fine except the pitcher, and he had better start thinking about leaving Rolla. The next game will be played Friday night against Dorm A.

The volleyball team did very well this year by winning six games and losing only two. This was good enough for third place in our league, but of course we have some good excuses as to why we didn't finish higher in the standings.

This coming Sunday, April 22nd, an open house is being planned for our new home. A large

crowd is expected and everyone is invited to attend. Saturday night, preceding the open house, there will be a banquet for the alumni and active members. This banquet and open house is being planned in conjunction with this chapters birthday which was April 22, 1917. We hope that some of the older alumni will be present to see the progress made since the day this chapter was accepted into Lambda Chi Alpha 39 years ago.

Better late than never. Congratulations to our bowling team who won the intrafraternity bowling championship this year. This was the third time our team has taken the title and this permanently gives us the trophy. We have previously won the championship in '51 and in '52. Pi Kappa Alpha won in '53 and '55. Members of the Lambda Chi team then Beta Sigma Phi won in '54; were: Jim Hickernell, Ron Roberts, Bill Gray, Ken Woodruff, Larry Marcum, Lee Heddington and Bob Fahrig. In addition to winning the large trophy for the house, each of these men received individual trophies.

Last Saturday Lambda Chi held its annual Root Beer Bust. Everyone had a jolly, jolly time except poor o'le Bernie. He can't stand root beer. He's strictly a Big Orange man. Of course, everyone had a nice little swim and Roger pulled his usual booboo.

TRIANGLE

The annual celebration of the founding of Triangle Fraternity was held last weekend. Mrs. Grubb as usual, fixed a delicious banquet. Prof. Davidson delivered an interesting speech, comparing Missouri Mines at the present to the Missouri Mines of the past, and Prof. Carlton, acting as the capacity of toastmaster, had the fellows in an uproar with his jokes.

At the 10th hole, the boys are discussing our softball possibilities and are inclined to be optimistic. After a tight squeeze with TKE's, the team bounced back with a surprisingly easy victory over KA. Hitting seems to be definitely an improvement over last year but the infield has looked weak so far. Everyone's friend, Joe, did a terrific job behind the plate, showing great promise as a clown.

"You stay on your side and I'll stay on mine," were the only words Robino heard from the back seat this weekend. This could develop into a beautiful editorial scoop but information must be withheld since it might leak to undesirable sources. Mr. and Mrs. Aubuchon treated a few fellows to a top weekend in Festus. That barbecue was terrific, and if you read this, THANKS VERY MUCH.

Those dad-blame cave men were at it again. Why anyone would want to crawl back into a cave, collect bats, and then turn them loose in the house is beyond most sensible people, but this seems to be a hobby with Estep, Garrett, and Harris, plus the rest whose names are unknown. If they knew bat's manure was valuable, I'd hate to think of the consequences.

Be good, Clarence. D.L.

KAPPA ALPHA

By the time this gets to press the Greeks on the campus will be so busy meeting their dates for Greek Week-end and squiring them about that they won't have time to read anything I write, but I'll give it a stab anyway.

We're all set for the festivities here at the Kastle, with the house cleaned from top to bottom and the pledges washed and combed. Sure is hell when you get guys who have never been away from home before; that 5 o'clock bottle is wearing me to a frazzle.

The MSM Senior had just taken the EIT exam and was waiting for the results, walking to and from and chain-smoking himself into a nicotine coma. Dean Wilson, seeking to relax the young man, approached him with the advice, "Go down to Bear's and have a brew or you'll be a nervous wreck." "Me—nervous?" be silly, Willie, I'm as cool as a cucumber. I'm taking this thing absolutely philosophically. If I make it, fine! If I don't... well, I'll just kill myself."

I could close this now and wait until after this week-end, when there will be many, many things to recount to you, but I have another joke (?).

"Why the toothbrush in your lapel?"

"It's my class pin. I go to Colgate."

Be sure to get around to all the booths tonight, remember all the funds collected go to the Cerebral Palsy Brace Fund; and if your tastes run to games of chance, hit the booth in front of the KA house.

Bill Hill

THETA KAPPA PHI

Last weekend, another man was brought into the brotherhood of Theta Kap. Yes, Brother Charles Hollenbeck finally made his grade point with flying colors, and last Sunday, was initiated. Congratulations Chuck, may this be a big gain to both you and the fraternity.

Everyone here is waiting anxiously for the coming weekend. With Greek Day and our Spring

Formal all together, it should be a huge success.

The Festival, Friday night, should prove to be fun and frolic for all concerned. With the weather as it is, it looks as if the snow won't fall and the girls will (into a tank of water, that is.) What a big splash that ought to make. But I was wondering who is going to eat all the pies which are going to be left over from other stands. After all, who wants to throw a pie at the Mayor, when they can see a pretty girl hit the water. But maybe if they got Dean Gev-?? Oh well, you can't hope for everything.

Saturday afternoon, all the boys are really going all out to win the games, so we can take home the trophy, and our candidate made queen. She is Agnes Nellen, seeking to relax the young man, approached him with the advice, "Go down to Bear's and have a brew or you'll be a nervous wreck." "Me—nervous?" be silly, Willie, I'm as cool as a cucumber. I'm taking this thing absolutely philosophically. If I make it, fine! If I don't... well, I'll just kill myself."

The seniors can hardly wait for the big party which we are going to give them. It will consist of a free trip to Frisco, Pond. Bob Kline says they can hold up locked in their room for a long time. But let's face it, they have to come out for supplies, mostly drinks, some time. We will get them sooner or later, so seniors, keep your swimming suits handy.

Note to the Pog:
The roach is a very odd bug. You can see it crawling around. But LOOK OUT! The mole is coming. And it strikes from under the ground!!

—Jerry Brueggling

SIGMA PHI EPSILON

Oh my aching arm! This seems to be about the only thing a number of us brothers have had to say lately. From the looks of the after effects, resulting from those glorious shots the military department has been passing out, you'd think we've been given the third degree. It has been unanimously decided that the ROTC department can take their needles and refrigerated gunk and stick it up their wastebasket.

To get to the sunnier side of things now. A very enjoyable outing was had with the Tekes this past weekend out at Maramec Spring. A softball game was the beginning attraction but due to

the water boy making so many trips to refresh the players it ended in the third inning. The score was a tie—24 cans to 24 cans. Afterwards, since the weather was so warm, everyone, whether they wanted to or not, enjoyed a very refreshing splash in the spring. This ended everything abruptly. The cars were soon filled and heading back home so everyone could get some "good ole" dry clothes.

This next Saturday night should prove to be Sig Ep's answer to a real party. Starting at 9:00 p. m. the Sig Ep saloon will officially open, and mind you, stay open 'til the business drops off, physically. No foolin' grab yourself a date and an rml of straw and we guarantee to show you the way the Old West was, pardners. Anyone carrying artillery will be requested to check it with the for safety purposes.

The Prince Charming of the pledge class, Don Ham, just recently reported that Salem is loaded with dolls, well one anyway. (Sure beats Rolla all to heck.) When requested to describe this cutie he was doing a fine job; color of eyes, hair, skin, phone number, etc., but when asked to give dimensions he replied "I didn't get that far." What are we going to do with this boy? That's about all this week, but before ending would like to extend congratulations from the chapter to Don Ham, who is the winner of a steak dinner for having the best pledge paddle.

Stretch.

Q. How many in the berth?
A. Only one. Here is our ticket.

SIGMA PI

Well Help Week is over, at least here at Sigma Pi, and I think that most pledges received quite a bit of help during the week. However, all of them weathered the storm quite well, even through the perils of mission night.

It just doesn't seem the same around the house after seeing the pledges bring forth their most obedient nature during help week now to slip back into their natural selves again. Ah! Well it was great while it lasted. Seriously though, the spirit was really prevalent among all of the pledge class and under the able direction of Ken Shults a great number of striking house improvements were made.

The whole house is in quite a tremor waiting in mad anticipation for Greek Week. We only hope that our dates this year are as athletic as those we had last year for the first annual Greek Day here at the Missouri School of Mines. We were quite proud of getting the trophy for the first time last year and are going all out to making another stab at it this year.

The chapter was host to a num-

ber of guests for dinner Sunday afternoon. Mr. and Mrs. Lay and daughters, Mrs. Gorley, Mrs. Swallow and her two children. We were all very pleased to have them dine with us. We were sorry that all of our Chaperones from the St. Pat's Festivities could not have been with us.

In closing let me remind you that the difference between a lion roars and panther is what you get on a pantie raid.

PACKS MORE PLEASURE

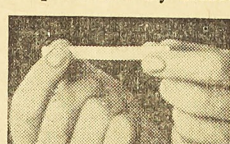

because it's More
Perfectly Packed!

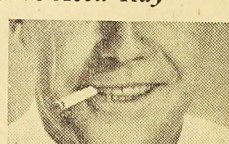

Satisfy Yourself with a Milder, Better-Tasting smoke—
packed for more pleasure by exclusive Accu-Ray

The more perfectly packed your cigarette, the more pleasure it gives... and Accu-Ray packs Chesterfield far more perfectly.

To the touch... to the taste, an Accu-Ray Chesterfield satisfies the most... burns more evenly, smokes much smoother.

Firm and pleasing to the lips... mild yet deeply satisfying to the taste—Chesterfield alone is pleasure-packed by Accu-Ray.

CHESTERFIELD MILD, YET
THEY Satisfy!
