NUMBER 28

## Theta Xi Wins APO Blood Drive: Retires Trophy

The APO Blood Drive, held last Thursday and Friday, was won by Theta Xi fraternity. By winning the Drive for the third time, Theta Xi not only gets to keep the APO Blood Trophy for a semester but retires it to their mantle permanently. The traveling trophy was established a few years ago to stimulate more interest in the Drive by the various campus fraternities, eating clubs, and other organizations. It can be said that the purpose of the trophy has been accomplished very well.

A total of 72 MSM students participated in the blood program this last week. Theta Xi led the parade with 21 donors, but Theta Kappa Phi was close behind with a total of 19 donors. As far as percentages go, Theta Xi was far in front with 57 per cent of its members donating as compared with Theta Kappa Phi's 30 per cent. Behind Theta Xi and Theta Kappa Phi came the Engineers' Club, 8 donors; Independents, 7 donors; Sigma Nu, 5 donors; Shamrock Club, 3 donors; Kappa Sigma, 3 donors; Kappa Alpha, Beta Sigma Psi, 2 donors each; and Tau Kappa Epsilon, 1 donor. In addition to the male students that gave blood at least eight faculty members and two co-eds donated.

Theta Xi, one of the smaller fraternities, member-wise, at MSM, certainly deserves a round of applause for consistently good rating in the drive. Every semester they never fail to impress the campus with their positive attitude toward civil functions. To quote Jack Tolliver, president of Theta Xi, "We'll be doing our best to win the first leg on the new trophy next semester." The spirit of the occasion did not end with the members themselves; the fraternity cook also found time to be a donor too.

The results of the drive this semester were not quite what many people hoped for. It was thought that many more students would take part in the program. The president of Alpha Phi Omega, national service fraternity, commented that the junior ROTC cadets could not give blood because of recent medical shots. This situation probably decreased the number of donors considerably.

Since the student body at MSM give a large part of the blood quota in this district, APO co-operates with the Red Cross in persuading students to give blood. Without this help the Red Cross would have a rough time obtaining the required pints of blood needed. Many hours are spent by the officers and members of APO in preparing signs and posters to attract the attention of the students to the blood drive. Why

can't we, as a student body, follow APO's lead by spending thirty minutes a semester giving blood which may save someone's life? One never knows when he or she might have an accident and need a transfusion badly. If so, wouldn't you be thankful if someone had taken time to donate the blood that would save your life? Gerald Stevenson.

## Sigma Tau Gamma Pledgings Held

The Sigma Tau Gamma Fraternity has had wonderful success in pledging a fine pledge class. There were two pledgings; one on April 15 and the other on the evening of April 19.

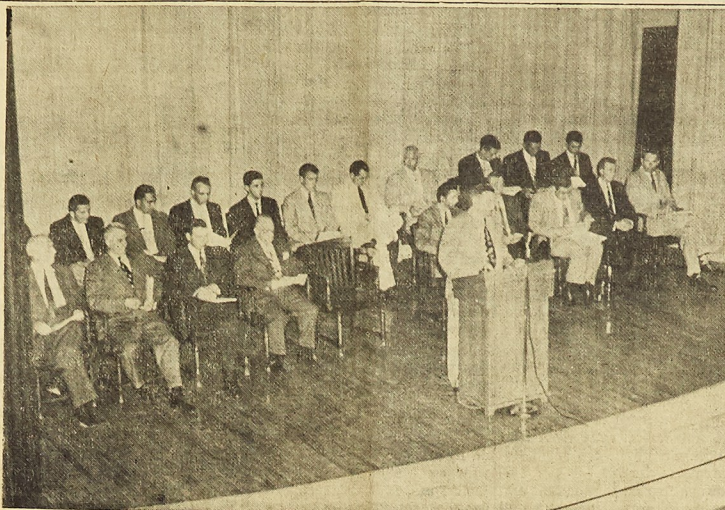

Those responsible for the organization of the colony are Bill Hygh, Walter Rothermel, Harold Nuffer, Jerry Frank and Professor Kerr. Mr. Kerr is working hard to make this fraternity one that the other frats and campus will be proud of. The pledges themselves deserve a great deal of credit since they have, because of their interest, found and encouraged others to join.

There was one other pledging this last week. The men in the fraternity now feel that it has a potential of becoming one of the leading groups on the campus. All of the pledges and actives of Sigma Tau Gamma wish to thank the I.F.C. and all the fraternity men for their invitation to Greek Day. It helps to know that others are interested in our growth and success. We also want to thank in particular the Sigma Phi Epsilon and Kappa Alpha Fraternities for their invitation to their dance on the evening of Greek Day.

While at the Grotto two unfortunate actives took a swim in a beautiful, but murky, flower pond. After drying off somewhat, poor Walter and Jerry went dancing. That afternoon a large kite was flown over the picnic area. Its success was measured by the number who stretched their necks to read "Sig Tau" in blue letters printed on the shield like kite. The kite was built by Richard Edwards and George Grady who deserve a big round of applause by Donald Lee Ege

### NOTICE!

All articles for publication in the Miner must be in the Miner Box in the Rolla Building or delivered to 707 State Street before noon on each Tuesday. We cannot promise that copy received after this deadline will be printed.

Scene at the Seventh Annual Honors Convocation in Parker Hall last Thursday morning. Those in the picture are, left to right, first row: Mr. Noel Hubbard, Registrar; Dr. W. T. Schrenk; Mr. W. E. Bowman, '41, General Electric Co., St. Louis, Mo.; Prof. I. H. Lovett; Prof. W. J. Jensen; Dr. A. J. Owens; Robert G. Fuller, Rolla, Mo.; Dr. D. S. Eppelsheimer; Guy W. Heinrich, Jefferson City, Mo.; Don E. Williams, North Little Rock, Ark.

Second row: Dale L. Rockwell, Belleville, Ill.; Donald D. Baker, Cole, Mo.; Jack D. Stewart, Aurora, Mo.; Frederick E. Jackson, Marshall, Mo.; David W. Stolte, St. Louis, Mo.; Charles R. Altheide, Hannibal, Mo.; Prof. J. M. Brewer; Robert H. Kline, Kansas City, Mo.; Charles Jerome McCoy, Sikeston, Mo.; Philip S. Roush, Springfield, Mo.

## Twenty-Eight Awarded Scholarships

Twenty-eight students were picked from the MSM student body and Missouri High School Seniors as winners of a large number of scholarships that have been awarded this past year. These students were presented with their awards at the seventh annual Honors Convocation held in Parker Hall Auditorium on April 26, 1956 at 10 a. m. The purpose of the convocation is for the presentation of awards made in public recognition of students of superior scholastic achievement and general engineering promise.

The Cities Service Oil Company Scholarship, in the amount of \$600.00, was presented to James A. Caselton by Professor G. B. Clark. This award is made to a student starting his junior year, having been chosen by a special faculty committee. Professor Clark presented Harry E. Harbeck the Schlumberger Foundation Scholarship, which carries a stipend of \$500.00.

Delbert E. Day received the J. B. Arthur and Family Scholarship amounting to \$500.00 which is awarded annually to an outstanding junior or senior in Ceramic Engineering. The A. P. Green Fire Brick Company granted its annual \$300.00 scholarship to Robert G. Fuller. The American Smelting and Refining Company Scholarships, each carrying a stipend of \$500.00, were awarded to Frank J. Coffey and Billy Lester. The American Society for Metal Foundation Scholarships of \$400.00 each this year went to Richard

C. Fabiniak and Thaddeus J. Fabiniak. The Deister Concentrator Company annually awards two scholarships of \$250.00 each. Harold B. Pressly and Richard Zimmerman were this year's winners of these awards. Edwin L. Wagoner was granted the Haynes Stellite Company Scholarship covering full tuition and fees plus \$200.00 per academic year for books and supplies. The Kennecott Copper Corporation contributes \$1,000.00 annually for scholarships. The money was awarded as \$500.00 scholarships to Edwin J. Beckemeyer and Robert L. Wright. Professor D. S. Eppelsheimer made these presentations to the winners of the awards.

Professor I. H. Lovett presented the Westinghouse Achievement Scholarships and the Fortesque Fellowship. The Westinghouse Achievement Scholarships were awarded to Albert F. Hutters and Harold A. Steinbruegge. The scholarship awarded to Hutters amounted to \$250 and Steinbruegge received \$500. Kenneth F. Steffan received the Fortesque Fellowship amounting to \$2,000.00.

Two scholarships, conferred by General Electric Company and by Monsanto Chemical Company for the first time this year, were presented by Professor W. T. Schrenk. Raymond L. Hussey received the \$650.00 General Electric scholarship and Monsanto Scholarship, amounting to \$450.00, went to Eldon R. Dille.

The Alumni Association of Missouri School of Mines has provided six scholarships of \$500.00 each. Registrar N. H. Hubbard presented this award to each of the following: Harley W. Benningfield, Russell Van Cochran, John D. Crecelius, Kenneth J. Howard, Ronald Scott and Donald W. Thomas. John Fuller was awarded the Alumni Association, MSM Class of 1914, Scholarship in the amount of \$500.00.

Mr. Hubbard then presented the Easley Scholarship of \$500.00 to Carlos R. Guerra. Joseph C. Lewis received the Schuman Scholarship with a value of \$500.00. The annual Special Educational Scholarship was granted to Glen W. Hoffmann. This award carries a stipend of \$500.00.

A complete list of scholarships and other honor awards that have been presented throughout the year may be found in the program distributed at the Honor Convocation. This program, containing a complete list of all honors and awards that have been made during the past year, was compiled by Professor W. J. Jensen. Professor Jensen, chairman of the Faculty Committee on Assemblies, presided at the Convocation.

Jerry Borman

## MSM Host To Better Concrete Conference

### ASME Convention Awards for Best Technical Paper

Last Thursday and Friday, April 26-27, 1956, The ASME Student Branch from MSM was the host branch to the 24th annual Region VI, Southern Tier Student Conference at the Roosevelt Hotel in St. Louis.

This conference is composed of two Technical sessions in which a student from each of the 13 universities in Region VI presents a technical paper in competition for cash awards. These schools are: Bradley University; University of Illinois; University of Illinois, Navy Pier; State University of Iowa; University of Kentucky; University of Louisville; Missouri School of Mines; Northwestern University; University of Missouri; University of Notre Dame; Purdue University; Rose Polytechnic Institute; and Washington University.

The program opened with registration on Wednesday evening and Thursday morning. The first Technical Session started at 9:10 a.m. and continued until luncheon at 12:15 p.m., with Mr. Ernest Hartford, consultant for the ASME, giving the remarks after lunch. The second Technical Session started at 2:00 p.m. and went until 4:30 p.m.

The Awards Banquet, at 6:30 p.m. in the Harmony Room of the Roosevelt Hotel, climaxed the conference. An address by Dean Curtis L. Wilson on "Instruments of Accomplishment" was thoroughly received and enjoyed by everyone. Following the Address, Mr. Ben G. Elliott, Vice President, Region VI, awarded prizes for the papers of the day: First Prize went to Jamshed Modi, Purdue; Second Prize to Samuel A. Gulotta, MSM; Third Prize to Richard P. Carroll, Notre Dame; Fourth Prize to Albert W. Black, Washington University; and Fifth Prize to Donald H. Hansen, State University of Iowa.

Appreciation is expressed to the St. Louis Section of ASME, Professor G. L. Scofield, Chairman Thomas F. Martin and Ben W. Holder, and the General Committee for making the conference a success.

### University Dames

A banquet is being held in honor of the girls whose husbands are graduating in June. It will take place on March 9 at 6:30 p.m. in the Pine Room at the Greyhound Bus Station.

Program Chairman Marge Lacy, along with the help of her committee, have a very enter-

The Better Concrete Conference was begun with registration at 8:30 this morning. Amos J. Snider presided over the first session as Dean Curtis L. Wilson delivered an opening address. Professor E. W. Carlton then spoke on the Theme of the Conference.

Carl J. Chappel presided over the second session, which showed a film on "How to Transport, Place, Finish and Cure Quality Concrete." George Walton talked on Safety in Ready-Mix and Products Plants. The subject of Quality Concrete in House and Subdivision Construction was handled by Frank A. Beets.

The group then recessed to the Pine Room of the Greyhound Bus Terminal for a luncheon and talk by Albert R. Waters. This meeting was presided over by K. D. Kennison.

M. E. Suhre will conduct the fourth session at 2:00 p.m., in Parker Hall, which will include a talk by R. A. Willis on the Determination of Cement Content in Plastic Mixes. Joseph Konchanaki will lecture on the Use of the Kelly Ball as a device for Measuring the Consistency of Concrete in the Field, followed by Bengt F. Friberg's talk on Highways of the Future Will Be Pre-Stressed. At 5:00 p.m. the group will adjourn for the afternoon.

The Social Hour will begin at 5:20 p.m. in the Edwin Long Hotel. Dean Curtis L. Wilson will deliver a dinner address.

The talks will be resumed at 9:00 a.m. Saturday morning by Richard Quinn and his discussion of Precasting Concrete Bridge Units. Precast Concrete Construction for Buildings will then be the topic of a dissertation by Carlos Bullock.

Following a coffee break at 10:45, a Construction Company Discussion of the "Pros and Cons" of Redi-Mix Concrete will be presented by Clarence H. Ax. At noon the conference will adjourn.

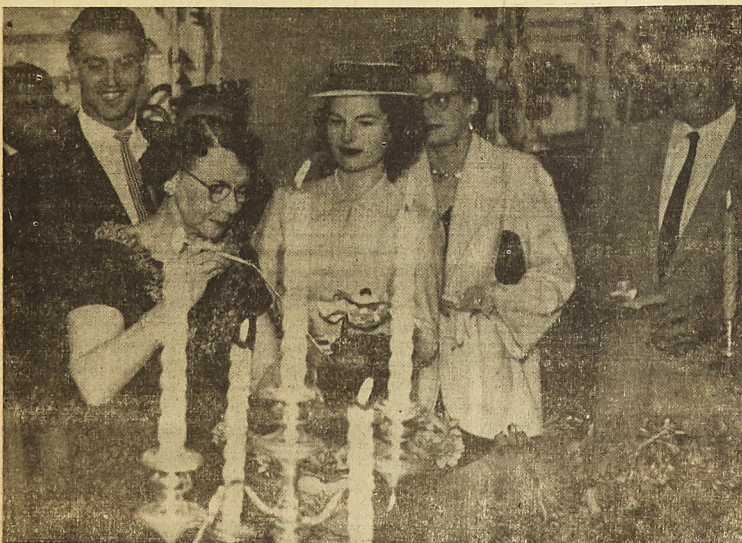

Students will not be required to pay a registration fee to hear the talks.

The program is sponsored by the School of Mines and Metallurgy, the U. S. Bureau of Mines and the Adult Education and Extension Service.

taining evening planned consisting of a "Fashion Show," "Installation of New Officers for next Semester" and a "One Act Comedy" presented by the Drama Club.

Many are participating to make this evening a big success.

Here is a chance to get together with your friends; get your ticket (before May 4th) and plan to attend!

Scene at the reception of the open house of Lambda Chi Alpha's new fraternity house. Mrs. Curtis L. Wilson, wife of the Dean here at the School of Mines presides at the tea table. This is the first new fraternity house to be built on the campus in several years. (Ned Peet Photo)

The four Hilltoppers and Wendy Moore, vocalist for Blue Barron's Orchestra taken at the concert last week in Parker Hall. The four Hilltoppers are, left to right, Lou Mastor, tenor; Karl Garvin, bass; Wendy; Eddie Crowe, baritone; and Jimmy Sacca baritone and leader. This young choral group is considered one of the best to hit recording circles in several years.

## THE MISSOURI MINER

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla, Mo., every Friday during the school year. Entered as second class matter February 8, 1945 at the Post Office at Rolla, Mo. under the Act of March 3, 1879.

Subscription Price \$1.00 per Semester. (Featuring Activities of Students and Faculty of M.S.M.)

## School Appropriations

The biggest news here at the School of Mines this week is the \$3,500,000 appropriation from the State's \$75 million bond issue. The General Assembly of Missouri has finally awakened to the fact that MSM is in a frightening plight. Year after year, for many decades, this illustrious body of lawmakers has been ignoring the pleas of Dean Wilson and the Board of Curators for larger appropriations. It is a well-known fact that year after year the school has been losing key professors and instructors because of lack of funds to increase their salaries to a decent living-standard level. Buildings are in a miserable, decrepit, condition, some to the extent of almost collapsing (re: the old Chemistry Laboratories). Last fall, the General Assembly gave the School of Mines a very pleasant and unexpected surprise. For the first time in years, they did not cut the requested two-year general operating appropriation but left it at \$1,800,000. This unexpected money will be used to increase the faculty both in size and salaries.

Then from Cape Girardeau, James A. Finch Jr., President of the Board of Curators, announced that the School of Mines was in dire need of three new dormitories, a cafeteria, and student union building. An estimated 2300 students could be expected next year and 5000 within 10 to 20 years was not unfeasible, stated Mr. Finch. At the same time the Board of Directors of the MSM Alumni Association described the urgent need of several new buildings on the campus to accommodate the Electrical Engineering, Civil, Mechanics, Math, and Physics Departments. About the same time the students here at the school approved plans for a new student union building. Dean Wilson promised that the building would be built in the near future.

The ball was beginning to roll, and it looked like MSM would finally begin to rise out of the rut into which it had been shoved by the General Assembly. On Tuesday, January 24, a \$75 million bond issue was approved by the voters of Missouri by a three to one majority. Dean Wilson hopefully submitted a request for \$4,925,000. This was broken down into \$1,000,000 for an Electrical Engineering building, \$1,500,000 for the Civil and Mechanics departments, \$750,000 for classrooms to house the Physics and Mathematics departments, \$350,000 for student infirmary, \$175,000 for new boiler at power plant, and \$650,000 for repairs and remodeling on present buildings. Shortly after the Federal Housing and Home Finance Agency, Washington, D. C. approved a loan of \$1,228,000 for new dorms and a cafeteria. The promised student union building was omitted.

Then the State Budget Department delivered a low blow to the school as they slashed \$1,475,000 from the requested appropriation. This left the amount at \$3,450,000 and it looked like MSM's critical problems were again being slighted. Finally the bill was passed. Missouri School of Mines was to receive \$3,500,000 for expansion and improvements. This is broken down as follows: \$1,000,000 for Electrical Engineering Laboratories, \$1,000,000 for Civil Engineering building, the Mechanics dept. wing was omitted, \$750,000 for classrooms to house the Math and Physics departments, \$175,000 for new boilers and turbines in Power Plant, the rest being for repairs and remodeling of present buildings. The student infirmary was also deleted and will remain cramped with its obsolete facilities in the small house it now occupies.

Although the school considers this appropriation fortunate and necessary to say nothing of being overdue, it is not nearly enough for all the improvements necessary. With enrollment increasing as it is; over a thousand freshmen are expected next fall: MSM must change its plans and ideas vastly. It is no longer a small college although it continues to operate from a small-school campus. In a survey presented to the Board of Curators this spring, the school estimated its needs above and beyond the usual operating appropriations, conservatively at better than \$14 million for the next 10 to 20 years. Parker Hall is daily becoming more overcrowded. More room is desperately needed for administrative offices. The school has no auditorium or gymnasium that will seat more than 500 students at a time; or only one-fourth of the student body. Although the bond issue is a great improvement, it is just a beginning. The General Assembly is finally realizing the plight here at Rolla. Let us hope that now that they have given the school a crutch to climb out of the rut that they don't now sit back and close their eyes and ears to the needs brought about by the increased enrollment. In their hands lies the future and fate of Missouri School of Mines and Metallurgy. With their help MSM can and will rise to the very top. Progress or Decay; Glory or Ignominy, the answer is up to them. Will the General Assembly meet the challenge? Only time will tell.

## Letters to the Editor

In the last issue of "The Miner," a request for suggestions which might improve the paper attracted my attention. After glancing through the paper, I wondered why this request was not made sooner. I do not think improvement is the correct word for what this paper needs, however. This "sheet" is too far gone for that.

For example, in the last issue of the "Miner," I found no technical articles whatsoever. Is this logical for a paper put out by an engineering school? There was one page devoted to the various fraternities. This was unusual, as two pages are usually wasted for this. A very small percentage of the students at MSM belong to the fraternities, yet all of us pay for the paper. Or maybe I should say all of the students pay for a publication which contains stories which are of interest only to a minority.

I think the biggest improvements which could be made would be as follows: (1) Keep the fraternity news down to one page or less. This is still more room than is necessary, but even small improvements are helpful. (2) Devote more space to technical articles which are of interest to all the students. There are eight curricula offered by MSM. Surely one good article each week dealing with one of these curricula would not be too much to ask. (3) Why not have a few personal interviews with different instructors at the school, and with students having unusual talents, hobbies, or ideas. (4) The feature section could be cleaned up a bit.

With a few such improvements, I think the "Miner" might be made a little more readable to many more students.

Hopfully,  
Clifford Rapp  
\*\*\*

The above letter brings out several acknowledged improvements to better the Miner. Fraternity article have been printed as it is felt that the majority of the students who read the Miner are those in fraternities and eating clubs. The paper attempts to report news and these articles are news to the majority of the students who read the Miner. However if you notice, Fraternity news is now a consolidated article and will continue in this manner. The Miner has ideas for technical and informative article on the various departments now in the advanced planning stage. Some have already been written. The Miner Staff feels that it would be more appropriate to start these articles next fall with the new semester. Several other changes are also being planned. We ask you and all the other students to bear with us for a little while longer and you will see a paper you can be proud to read and show to your friends.

## Gamma Delta Has Spring Banquet

The two essentials of a successful banquet are good food and a good speaker, and last Sunday evening, April 29, the Alpha Phi Chapter of Gamma Delta had them both. The food, a delicious turkey dinner served by the Dorcas Society of Immanuel Lutheran was tops, and the speaker of the evening, introduced by m. c. Wayne Kosfeld also was excellent. He was Dr. Henry Wind, director of Social Welfare of the Lutheran Church, Missouri Synod. Dr. Wind spoke on the three principles of Christian living: faith, once not so popular but now very popular; love, always popular; and work, never too popular. His talk was excellently presented and well received, and everyone present left with the feeling of an evening well spent.

## Letter to the Editor

As many of you will remember, there used to be a cannon here at MSM which was a traditional conversation (?) piece among the fraternities, or should I say trophy? Many good-natured contests took place for the possession of this cannon, and I am sure many of you Greeks reading this have been in on one or more of these sporting events. These came to an abrupt halt when one of the fraternities here on the campus seized the cannon and, probably doubting their ability to hold it in the traditional manner, dismantled it and rendered one of the major pieces immobile by sinking it in concrete. Recently this fraternity approached us here at the KA house with the following proposition. They would give up the pieces of the cannon they still hold if we here would also give up the pieces we have regained by a series of raids. The cannon would then be reassembled and presented as a traveling trophy to the fraternity winning the Greek Day competition. KA wishes to use the Miner to give answer to this proposition.

The cannon, as it stood before, was well on its way to becoming a symbol of spontaneous action and good spirit here on the campus, and when it was dismantled it left quite a hole in the "esprit de fraternity." We see no reason why we should be a party to further action of this sort, reducing the cannon to the same status as a loving cup won at an intramural softball tournament. The cannon means a hell of a lot more than that to us, and to all the fraternities; with it, would seem, one exception. In this light we make the following counterproposal. If Triangle will give us the pieces it now holds, we will rebuild the cannon and set it in its old position on the house, and any group who would like to try to obtain it may feel free to do so at any time. All we ask is that if they do obtain it they will mount it somewhere in plain sight on their house so that others may have the same chance to take it from them.

In this way we hope that the tradition of the cannon may be begun again.

Signed:  
Kappa Alpha Fraternity

## A Mo. Miner's Version of a Typical Date

The evening had been great. Your date is a real queen. You have just finished a good drink. You drive in your new convertible to your favorite parking place. There is a soft breeze and a full moon. Then the fun begins. You stop. Reach over and turn on the radio. Then you try to find some music. What do you get?

Xul Soap now brings you another chapter of *Sophia's Other Lover*. Yesterday Sophia was . . . you turn the dial . . . listening to the 64 Question Quiz Programs. Tonight we shall give away . . . Red Perkins and His Hillbilly Band with his latest record . . . Why did Wyatt Earp Adventure Show brought to you by Crunchy Wunchy Breakfast food. Tell your mother . . . Sophia's doctor has just arrived. "Sophia, darling, sweetheart! Where did your husband go? . . . St. Louis is the correct answer. Just 63 question to go. . . Meanwhile, back at the ranch, Wyatt was hiding in the barn . . . while her husband was with the boys at the club. The doctor has just left . . . with question number 60. What does . . . this station offer is good for thirty days. You get the life-size statue of . . . Sophia! . . . that glows in the dark. Just send one dollar to . . . Wyatt. I need help. My daughter has . . . lost her husband. What will Sophia do now? The maid is upstairs . . . with Red and His Hillbillys playing "If You Will Be My Girl, I Will Go Over . . . to Sophia tomorrow. Remember, same time, same questions will be given. Next week . . . Wyatt will meet the Raiders . . . and His Hillbillys on the same . . . bar of Xul Soap. STATION BREAK . . . This station will now present

## AUTOMATIC LAUNDRY

INDIVIDUAL WASHERS AND DRIERS

Same day shirt and trouser finishing Monday through Friday.

if brought in by 1 p. m.

Drying service for clothes washed at home . . . Corner 7th &amp; Rolla

15 minutes of the latest news . . . news . . . news . . . Word has it that Grace Kelly will be deported from the country of Monaco after failing to bear an heir to the throne on the fourteenth try. Fourteen replicas of Grace Kelly is too much for any country.

"CLICK"

And there you are. A great evening ruined. The mood gone with the first breeze. Don't try it. Be a civil engineer and make your own music.

## Teacher Shortage Serious, Warns Harvard's Dean

In addition to the pressing need for grade school and high school teachers, President Nathan M. Pusey warns, in his annual report, teachers for colleges "will soon be in woefully short supply." In the field of primary and secondary education, he says, Harvard "can never expect to make a substantial contribution to the hopelessly large quantitative aspect of the problem, but: "The need for more professionals of high quality in this particular area, as we approach a time when it would take half the college graduates for ten years to meet the need for teachers, is obvious."

"Harvard's contribution," he says, "will be to send a few more individuals of high ability to work in this field."

"The task of recruiting extraordinary talent for college teaching is as pressing as any," President Pusey continues. "Yet such are the nature and rewards of the college teacher's career that, properly set before young people, I am convinced this profession cannot fail in each generation to attract its share of those of first-rate ability."

Only 40 per cent of all college teachers today have earned the Doctor of Philosophy degree, and it is estimated that by 1970 this percentage will have declined to 20.

With about 9,000 new Doctors of Philosophy coming from all U. S. universities a year ago (264 of them from Harvard), and an annual need for 20,000 new college teachers, President Pusey continues, "the graduate schools of arts and sciences constitute one of the most critical areas in education at this time."

"For the sake of all the professions, and for the continued play of ideas, and of high purpose and informed skill in our national life, the graduate schools of arts and sciences throughout the land must now be enlarged or multiplied, and in either event strengthened. The future of college education, and also, therefore, of professional education, clearly depends upon such efforts."

## ASM Elects Next Semester Officers

The final meeting of the MSM chapter of the American Society for Metals was held Wednesday, April 24th. Highlights of the meeting were elections of officers for next year and the guest speaker, Dr. W. A. Mudge. Dr. Mudge, who is the Director of Technical Service on Mill Products for the International Nickel Co., gave a most enjoyable and informative talk on "The Metal Metals." His discussion was well illustrated by appropriate slides.

Officers for next semester are: Chairman - Robert B. Webb; Vice-Chairman - Frank G. Coffey; Secretary - Henry A. Root; Reporter - I. Lawrence Spencer; Treasurer - Lester A. Unnerstall; Food Chairman - Louie J. Reitsma.

## STUMBLING AROUND THE CAMPUS

by Dave Stoltz

Looks like a regular snow every week lately . . . we may beat last year's May 8 snow . . . it might be wise, if you start out in the morning with your Bermuda shorts, to carry a pair of long-johns and an overcoat . . . there's a lesson to be learned by the more biased among us from a group of children seen playing on Oak Street the other day . . . seems they had quite a softball game going . . . the game had a salt and pepper aspect, with colored children and white kids playing side by side . . . wonder if, 10 years from now, they'll work side by side?

From the statements against the state appropriations committee in last week's column, when, on Thursday, they voted to give MSM some of the needed funds, your writer has just this to say: pardon, senators, while said curd scrapes dust! . . . notice Rolla's new radar system (courtesy BOB RICKEY) . . . 2 policemen with stop watches standing a block apart . . . Winners of the week: JIMMY SACCIA, of the Hilltoppers, from Parker Hall Monday night (speaking of the baritone's wife's new baby): "Let the proud father take a bow . . . whereby the other three members of the quartet bend low . . . comedian GARY MORTON, from the TED HEATH, FOUR FRESHMEN, NAT COLE show at Kiel Auditorium Saturday night: " . . . We had a formal wedding; her father carried a white shotgun." . . . What is home without mother? . . . A good place to bring a girl\* . . . to the person loudly panning him from the audience: "Don't poke fun. This is the only way I can make a living. After all, how would you like it if I took your shovel away from you?" . . . TIME's apt appraisal of the Prince of Monaco . . . (He's) . . . the hereditary proprietor of an amusement park."

Seems there's going to be another raise in rent next year here in Rolla . . . some landlords just don't know when to quit . . . this is a headache that even the well-touted Bufferin can't cure . . . in the words of one official, the school can definitely—even positively—suffer by the upsurging rent in this area . . . a possible solution comes from the University of Iowa and the U. of Illinois . . . a board of regents similar to our Board of Curators has set up an inspection system whereby rooming houses, and in the case of the University of Illinois, the fraternity and sorority houses, are regularly inspected and graded according to national safety standards . . . those considered unfit are listed as such, and no student who rents a room in one of these houses may enroll at the

school. True, it could go hard for some students, but the overall effect is that these homeowners consequently clean up their establishments. In this way, no house considered a firetrap could be used for the rooming of students. Do you know that 20 OUT OF 25 ROOMING HOUSES HERE IN ROLLA might be considered fire traps? . . . this writer thinks the recent rash of fires in rooming houses here in Rolla justly proves this statement . . . Look around your own room, and the odds are that you'll agree, at least to some extent . . . "But it won't happen to me!" you might say . . . Oh, no? . . . this writer once said the same thing, but found to his chagrin that it DID happen, after the Christmas vacation . . . if any of you residents and rooming-house proprietors chance to read this, you might consider what this increase in rent could do for your town . . . as the cost of living increases, the rent SHOULD go up; but not 25-75% for every 5-10% increase in utilities costs! . . . then too, as enrollment increases. Here's your chance to sock the student for all he's worth . . . will he take it lying down? . . . sure he will . . . but supposing he didn't? Where would that \$1-plus million a year he spends with your merchants come from, if he were to take his business elsewhere? . . . how long do you think you could go on soaking up that \$5-10 per month per student? . . . if you said indefinitely, you'd probably be right . . . the students will hear no cries of "To Arms" from this corner, but it's still a disgusting, evident perpetration of a crime on the part of those who rent to students . . . and it's certainly something for the freshmen and sophomores to think about.

Voice from a parked car: "Either you take your arm from around my waist or keep it still. I'm no ukelele."

—MSM—

A man ambled into a tennis tournament and sat down on the bench.

"Whose game?" he asked.

A shy young thing answered, "Not me."

THE MISSOURI MINER

PAGE 3

## Miner Tracksters Edge Out Drury In Final Event

by Thos. Colandrea

Once again the Miners held the taste of victory as they triumphed over the team from Springfield during last Saturday's track meet. The event was held at the M. S. M. track. The weather, except for a bit of rain, was suitable for the meet.

The Miners out-classed the Drury team in the field by a wide margin, taking first in all but pole vaulting. Smith came through again in shotput with a tremendous heave of 44' 4 1/4". So far this year he's been top man for the Miners with the shotput, and shows promise for the event in the future. Williams and Eaker, both Miners, placed second and third in that order. The closest throw presented by the Drury team was that of Nickelson with a throw of 36' 7". The M. S. M. men took the high jump in great style as Hammond sailed over the bar with a 6' jump. Evans took part in a three-way tie for second along with Wolf and Hoskins from Drury. As the meet progressed Ager, who can really handle the discus, placed first with a throw of 122.2'. Williams and Eaker, the same combination that took second and third in the shot, again placed in the same order in the discus. At this point in the meet the running score was 39 1/3 to 19 1/3. A lead of twenty points for the Miners. This lead was increased with the winning of the broad jump by Esbough (20'6"), and the javeline by Parker (159'9"). The top pole vaulter of the day was Hoskins of Drury with a spring of 11' 6". Kreyder proved to be the best for the Miners by copping second place.

M. S. M. steadily lost ground on the cinders and by the fifteenth event Drury came so close to tying the score that they were only a third of a point behind with the running tally reading .65 2/3 to Drury's 65 1/3. This was accomplished by a sweep of first, second and third places in the two miler. The Miners started off in the lead and kept it for the first five laps but they couldn't keep up the terrific place that Drury set, not only in this event, but also in some other track events, they showed their superiority in the high hurdle by taking both second and third places. Shannah ran the course in :10.3, Hoskins coming across in the second position. Shannah was way out in front and seemed to have little trouble in getting over the hurdles. Gammon, of M. S. M., copped third position. This situation changed somewhat in the 800-yard run with Burkhead running in splendid time (2:02.6), to take the leading position for the Miners. He was followed by Rache, also a Miner. Burkhead did a fine job at the meet, considering that this is his first year in college track. That was the 880-yard run. In the 880 relay M. S. M. was disqualified for taking too much time in passing the baton. The Miners were in the lead when the incident occurred.

Allison and Feaster took the two leading slots in the 100-yard dash as Allison crossed the line in :10.5. Drury came back quickly and took first and second in the mile run. Kellogg and Mason did the running for Springfield. Top time by Kellogg was 4:56.6. It was the last event that was the deciding one in the meet with the score standing at 65 2/3 to 65 1/3, the Miners barely in the lead. The last run was the mile relay. The event was worth five points for the winning team, and M. S. M., with Burkhead, Hill and Esbough composed the top combination, finishing first in 3:30.8 to win, with the score being 70 2/3 to Drury's 63 1/3. A swell job by the M. S. M. tracksters.

If all the coeds in the world who didn't neck gathered in one room, what would we do with her?"  
—MSM—  
Prof: Why are you tardy this morning, Dorr?  
Dorr: Because the class started before I got here.

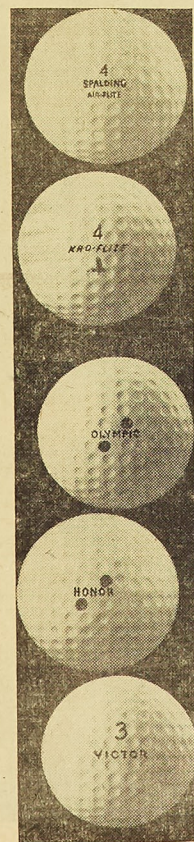

## INTRAMURAL Sports

The intramural golf matches will be held on the MSM links on Saturday and Sunday May 12 and 13, eighteen holes to be played each day. Any organization may enter a two man team so long as that entry is in by May 10. Pairings will be posted on the intramural bulletin board in the gym on Friday May 11. If inclement weather causes cancellations on the matches on Sunday, Saturday's matches alone will decide the winner, in like manner if Saturday's matches are cancelled the eighteen holes played on Sunday will decide the winner. First, second and third places award 300, 275, and 250 respectively to the winning organizations. Regular course rules will govern play.

The rules and time schedule for the intramural track and field meet are now posted in the gym. Entries in all events are due next Thursday, May 10. Preliminaries will be held May 15 (Tuesday) and finals on May 17 (Thursday).

In the intramural softball tournament only four teams remain in the undefeated ranks, they are Triangle, Theta Kappa Phi, Tech Club, and Pi K A. Pairings on the winner's side for the semi-final round are Triangle vs. Theta Kappa Phi and Tech Club vs. Pi K A. If there are no more postponements in the softball schedule, the final game will be played next Wednesday or Thursday afternoon, depending on the outcome of Wednesday's game.

Organizations	Singles	Doubles	Points
Sigma Nu	1	1	300
Dorm "A"	2	4	275
Theta Kappa Phi	4	5-6	250
Kappa Alpha	9-12	2	225
Kappa Sigma	7-8	5-6	200
Theta Xi	9-12	3	167.5
Tech Club	3	9-12	167.5
Baptist Student Union	5-6	9-12	140
Pi Kappa Alpha	9-12	7-8	100
Shamrock Club	5-6	13-17	90
Engineer's Club	7-8	13-17	75
Tau Kappa Epsilon	13-17	7-8	75
Triangle	9-12	13-17	50
Beta Sigma Psi	13-17	9-12	50
Sigma Pi	13-17	9-12	50
Lambda Chi Alpha	13-17	13-17	25
Sigma Phi Epsilon	13-17	13-17	25

## Are you playing the right Spalding ball?

For the low handicapper, Spalding's new high-compression AIR-FLITE® offers maximum distance. The exclusive DURA-THIN® cover withstands scuffing and bruising far longer. \$14.75 doz., 3 for \$3.75.

The Spalding KRO-FLITE® couples distance with superb durability. The tough cover will stand up under surprisingly rough treatment and the ball stays round, white and puttable. \$14.75 doz., 3 for \$3.75.

The Spalding OLYMPIC® is a medium-priced ball with a very tough skin. It combines exceptional wearing qualities with a playability usually associated with higher-priced balls. \$11.40 doz., 3 for \$2.85.

Many golfers choose the Spalding HONOR®. Popularly priced, it offers good durability and playability. Like all Spalding balls, it features True Tension winding for extra resilience. \$9.00 doz., 3 for \$2.25.

Get economy and quality in this golf ball. Spalding's VICTOR® is an "economy" ball with plenty of distance. The extra-thick cover promises great durability. \$7.00 doz., 3 for \$1.75.

\*TRADE MARK

**SPALDING**  
SETS THE PACE IN SPORTS

M. I. A. A. CHAMPS! Pictured above is this year's Miner Golf Team and last year's M. I. A. A. Champs. Harvey Penn, Arch Burke, James Joslin, Ted Friedline, Bob Wilkins and Sam Sands. This fine aggregation of duffers have a 5-0 season's record and have an excellent opportunity to bring home the Miners' first conference championship of the year.

## GOLF TEAM

Tennis singles play ended Monday night. Frank Hill of Kappa Sigma took first place by defeating the representative of Tech Club. Hill was undefeated throughout the season. Tech Club was the winner on the left side of the bracket by virtue of a victory over Engineers Club in the final round. Official results of the singles play found Kappa Sigma taking first place, Tech Club-second, Engineer's Club-third, Pi K A-fourth, Triangle and Wesley tie for fifth and sixth, Sig Ep and Sigma Nu tie for seventh and eighth; Beta Sig, Kappa Alpha, Theta Xi, and Theta Kappa Phi tie for ninth through twelfth places; Lambda Chi, Sigma Pi, Tau Kappa Epsilon and Shamrock tie for thirteenth through seventeenth places.

Official results of both singles and doubles play in horseshoes showed the teams finishing in this order:

The Miner's golf team has a present record of 5 wins and 0 losses. The team is composed of last year's members with the exception of freshman Sam Sands, formally of Rolla High School. Veterans Harry Penn, Robert Wilkins, James Joslin, Arch Burke, and Ted Friedline, are responsible for winning last year's MIAA conference championship. In dual golf meets, the Miner squad has proved outstanding, losing only twice in two years, these losses accredited to Carbondale and St. Louis University. This year the Miners with their unbeaten record had little trouble adding Carbondale to their string of defeated teams. In this year's conference meet, the greatest competition to be offered the

Miners will probably come from Warrensburg and Cape.

Harry Penn, a three year letterman, is from West Plains, Mo., where he graduated in 1953. Harry is the captain of this year's golf team and is a very low and consistent scorer on the links. In 1953 he won the city golf championship at West Plains and last year was awarded the outstanding athlete award in golf. Harry, who stands a good chance of winning medalist honors at the conference meet, is a second semester junior in the ME dept.

Sam Sands, a civil engineering student, is the only addition to the golf team. He was sent this way from Rolla High, where he graduated in 1955. Sands promises to be one of the best golfers here on the campus if his present ability is any indication of years to come.

## Prospectin' the Conference

by Don Binz

The track powers of the MIAA Conference met head on in a quadrangle track meet last Friday afternoon in Springfield, Missouri and the resulting effects of this collision were felt throughout the conference.

Cape Girardeau, who had previously shown their strength by winning the M.I.A.A. Conference Indoor track meet, emerged victorious by a margin of 11 points, thus showing a clear superiority over its two nearest rivals. Closely at the heels of the Indians were the Warrensburg Mules with 58 points and the Springfield Bears with 39 points. A late entry in the field, Oklahoma State of Tahlequah gathered in five points.

Being knee-deep in talent, the Indians were dominant in both the sprints and the weight events. Powell needed no help in winning

Arch Burke, West Plains, Mo. High School grad, entered the School of Mines after graduation and time in the Army with Uncle Same. Burke is a two year letterman with a consistent low score on the golf course. Arch is a Soph in the ME department.

James Joslin, a two year golf letterman for the Miners, is probably the most improved golfer on the squad. Jim won medalist honors in the dual meet against Drury College where she shot a 71. Jim is a civil engineering student in his first semester, soph. year.

Bob Wilkins is a Soph in the Chem Engineering department and a graduate of Rolla High School. Bob's golf ability is combined with that of Ted Friedline, both members of last year's championship team, to round out the Miner squad. Ted is a graduate of Cleveland High School in St. Louis and is in the ME department.

the 100-yard dash with an electrifying 10 second run into a strong wind. He also picked up a fourth in 220-yard dash and a first in the broad jump. This gave Powell twelve and the honor of high scorer in the meet.

Another sprint event, the 220-yard dash, was grabbed off by Brennecke of Cape with an impressive 23.2 second time. Four other first place positions fell into the hands of Cape Girardeau in the form of the mile run, the two-mile run, the 880-yard relay, and the shot put. Wigger, the winner in the mile run, was clocked at 5:43.5 while the Indians football team was well represented in the 880 when four of the halfbacks got together in the relay to whiz to a speedy 1:31.5 first place. Calvert heaved his chosen weapon, the shot put, 46 feet 5 5/8 inches and Miller knocked off the two-mile run in 10:26.2 for two more firsts.

Warrensburg brought home three firsts and their usual large amount of second and thirds Friday, but just could not mass together enough points to get over the strong Cape squad. First and second went to Scott and Spain respectively in the 440-yard dash. Their mile relay team of Crews, Yennie, Spain and Scott sped to first in 3:27.7 seconds and Brigham heaved the discus 142 feet, 9 inches for an event winning toss.

Although the Springfield Bears came in a poor third, they compiled only one less first than the meet winning Cape Girardeau Indians. Six such events were copied by Springfield. They were the high jump, pole vault, javelin throw, 120-yard high hurdles, 880-yard run, and the 220-yard low hurdles.

The second and third high scorers of the meet were both from the Springfield squad. Bill Anderson got together 11 tallies while his teammate, George Simpson, managed just one less point by pacing both the low and high hurdle events.

## Fraternity News

There has been a lot of activity around Kappa Alpha this week, particularly in the direction of Frisco Pond. Seems someone sowed the opinion that all the seniors ought to be Baptized before they graduated. Everyone got into the spirit of the thing, including the Rolla Police who were kind enough to put their spotlight on the scene so we could see the splash in all detail. One thing, though, why didn't the police get out of their car? Some bystanders were a little surprised when six cars and a station wagon (very handy article for such action) screamed to a stop in front of the Uptown and about 40 maniacs piled out and kidnapped some innocent bystanders. It was shortly after that that the police showed. A terrific time was had by all, and this may get to be a habit.

If there are any students who will be going to Summer School and do not have a place to stay, KA is going to keep the Annex open and rent quarters to such students. Particulars may be had by contacting Bill Hill or Hershel

Henson here at the house.

The men at Beta Sig were fortunate this weekend in one respect. Without even leaving the front porch, they witnessed some of the excitement that is emitted from this bustling town of Rolla. The C and B cafe, caught fire Friday.

One of the fellows in the house called the operator and asked her to give him the fire dept., that it was an emergency. The operator promptly replied, "That number is 230."

It seems as though Dave Berg is getting carried away with mechanical materials. He tried to find out how much stress his closet would take. It reached its elastic limit and now Dave has to rebuild it.

The Sigma Pi Pledge Dance, alias the "Dry Gulch Stomp," this year will be quite unlike any of the other social events to date. It will include features such as a "Hillbilly Band" from good ol' Salem for the square dance Friday night, there will be extensive gambling at the Sigma Pi Saloon both Friday and Saturday nights (play money naturally), and a picnic and barbecue to be held at Meramac Springs Saturday afternoon. After the last roundup Saturday afternoon, a popular dance band from St. Louis will be featured at the house from 9 p. m. to 1 a. m. for those who are still

able to enjoy the finer style of music.

The annual Fraternity officer election was held last Monday. The following men were elected to their respective offices: Ken Schultz, Sage; Dale Klor, Second Counselor; George Tomazi, Third Counselor; Al Sheets, First Counselor; Duane Crofts, Fourth Counselor; Walt Shepard, Herald. I am sure that these newly elected men are capable of guiding Sigma Pi through the coming fall semester.

Well again it is Friday. Some people spend more time away from here than here. Take Brother Damerval for instance, he left yesterday at noon for another long, long weekend in St. Louis and points West, while others are leaving today for Columbia. (complete with white coats and black ties)

New officers to guide us safely through next fall are: Commander Ed Reid; Lt. Commander Don Belchamber; Recorder Frank Berveiler; and Dave McKinstry Pledge Marshall.

The pressure and fear of final exams has finally manifested itself as noted by the "closed, gone studying" sign on Chullino's barber shop.

The word from PI KAPPA ALPHA isn't much this week. Nothing very earth shaking happened around here. I imagine it's the calm before the storm. By storm I'm referring to senior month and finals. The latter of the two being more pleasant. Yes, it won't be long and we'll be getting rid of some of these higher roll numbers. Oh boy! God help industry.

About twelve o'clock Saturday night your author came through the threshold of old PI K A and almost stumbled over the president. Yep, there was "Charlie" (Alvin Wentz) craped out in the hall, covered with a throw rug. It seems that Charlie was a guest at the annual AIME outing and after that broke up he ran into some THETA KAPS he knew. Any way, it all added up to a pretty picture, and by the way, we've got one for the record too.

A very enjoyable week-end was had by a number of the RA Sig Eps at Fort Leonard Wood. The bus was still moving upon arrival at the Fort when Lt. "Halftrack" Aberle leaped off and yelled, "Where the hell is the PX?" Yes, Rich should really be in heaven this summer; Bud is only 20c a bottle.

Our Senior steak fry and outing was held at Maramec Spring this past Sunday afternoon. Monk Burton, acting as chef, did a fine job with the steaks. Buzz "Let's drink to that" Lentz seemed to think everything anyone had to say deserved a toast until he couldn't find his mouth any longer. After the Seniors had spoken their words of wisdom everyone got back to partying and those still able to focus their eyes enjoyed a game of corkball.

We would like to congratulate

A. E. Long, M.S.M., Ex '22, Lois S. Long, William S. Jenks, Jr.

the "Bleeders" here at Theta Xi for winning the blood trophy. Its a wonder the Red Cross Accepted the blood with its alcohol content.

Theta Xi welcomes its new officers. We are happy to announce that Joe Mickes was elected president, Byron Harding vice-president, Bob Bramlet Steward, Frank Ruppert, Treasurer; Rich Canady House Manager and Warren Williams Corresponding secretary.

Lambda Chi held an open house Sunday before last and turned out to be a tremendous success. There was an estimated 450 to 500 people who attended that Sunday afternoon. The house stood out in its finest array, having been decorated by mostly the wives of the active members and the wives of the alumni. We wish to thank them sincerely for their help. We especially want to thank Mrs. Lloyd for her gracious help and time toward making the open house such a success. Thanks also to Bill Rowden, our social chairman, for all of the time and work he contributed. This was probably one of the biggest and finest social events that we have ever had the pleasure of presenting.

The Saturday night preceding the open house, a banquet was held in celebration of the house birthday. There was a large turnout of alumni and now that we have settled down we hope they will return every year.

Well, first of all, congratulations are in order for the newly-elected officers at the Teke House. They are President John Anderson, Vice President Bill Habersatt, Treasurer Sam Bowman, Secretary Bob Cowan, Historian Tom Colondrea, Sergeant-at-Arms Harry West and Pledge Trainer Al Posner. We would like to thank the outgoing officers for doing such a splendid job of handling the affairs of the TKE House for the past semester.

Congratulations to Billy Lester on his winning of a scholarship from The American Smelting and Refining Company. Bill, who is our new steward, promises better meals and steaks four times a

week. Right Bill?

Last week-end, Theta Kap played host to the Mid-Western Province Convention.

After the convention was over Saturday evening, everyone went to Lion's Park for "soda," hot dogs, and a good time. This gave everyone who was attending the convention a good chance to get to know everyone else a little better. Everyone was having such a good time that the party did not break up till 12 o'clock.

Brother William Grogan, our illustrious Nation Vice-President, had a little trouble on the sleeping porch Friday night. It seems no one told him about the one step down at the door of the porch and since it was totally dark, it came as quite a surprise to him. Luckily he didn't make much noise, or he might have been fined.

WHOP! CRACK! Yes, time for paddles has come around again. Next week has been offi-

cially proclaimed Paddle Week. May the moans and groans from our four pledges not be TOO long or loud. But cheer up, pledges — it all comes out in the END!

A spinster was shocked at the language used by workmen repairing a telephone line near her home, so she wrote the company. The foreman was requested immediately to make a report of what had happened.

The report read as follows: "Me and Spike were on this job. I was up the pole and let the hot lead fall on Spike—right down his neck. Spike looked up at me and said: 'Really, Harry, you must be more careful.'"

1st Miner: What makes your tongue so black?

2nd Miner: I dropped a bottle of whiskey on a freshly tarred road.

Overheard in the Kentucky Mountains: "Pour me out the interest on that mortgage, Hank."

The little darling, wanted very much to wear her mother's girdle—but she didn't have the guts.

"I'm telling you for the last time, you can't kiss me!" "I knew you'd weaken."

And then there is the fellow who walked up to the bar optimistically and walked away misty optically.

Wife: "Darling, tell me how did you ever get Junior to eat olives?"

Hubby: "Simple, I started him out on Martinis."

Prof: pointing to cigarette butt on the classroom floor: "Is that yours?"

Student: Of course not, you saw it first."

Two roosters were caught in a deluge of rain. One ran for the coop the other made a duck under the porch.

## The new Arrow FREE-WAY puts "action" in a shirt . . .

Here's a knitted shirt just made for active sports (and lounging around, as well). The feather-light fabric is bias-cut for perfect freedom in any position. The back, cut longer than the front, lets the collar fit your neck just right. In 20 colors. Wear it correctly—with the Arrow Bermuda shorts (6 different colors)—and you've made the perfect choice for summer FREE-WAY, \$3.95. Shorts, \$3.95 up.

## What young people are doing at General Electric

## Young ad man handles G-E jet and rocket engine advertising

The first jet engine ever to power an American plane was built by General Electric in 1942. Since 1948, G.E. has supplied the Air Force with over 30,000 of its famous J47 jet engines. And General Electric's jet experience soon will be paying additional new dividends to national defense. Its J79—called the most advanced engine of its type in the world—will soon enter production.

The man responsible for reporting G.E.'s jet and rocket engine progress to its customers and the public is Roy O. Stratton, Jr., 27-year-old account supervisor in the Company's Apparatus Advertising and Sales Promotion Department.

### Stratton's Work Important, Interesting

Stratton supervises the planning and preparation of direct-mail promotion, brochures, films and presentations, as well as public-informational space advertisements for Time, U.S. News & World Report, Business Week, Aviation Week, and other magazines.

Considerable personal contact with the Armed Services makes Stratton's job an interesting one. Last year he traveled over 60,000 miles, visiting many of the country's Air Force bases to gather necessary information and pictures.

### 25,000 College Graduates at General Electric

When Stratton came to General Electric in 1952, he already knew the kind of work he wanted to do. Like each of our 25,000 college graduates, he is being given the chance to grow and realize his full potential. For General Electric has long believed that: when fresh young minds are given the freedom to develop, everybody benefits—the individual, the Company, and the country.
