# THE MISSOURI MINER

VOLUME 44

ROLLA, MO., FRIDAY, OCT. 18, 1957

NUMBER 4

## IFC Does Many Worthwhile Things for School of Mines

The IFC on the campus of the Mo. School of Mines is the governing body for its member fraternities and is composed of two members from each fraternity on the campus—a senior member and a junior member. Besides its administrative functions it sponsors various other activities. Some of them include the well known Greek Day, IFC Sing, IFC Bridge Tournament, the bowling league, the Fraternity Man of the Year, Homecoming Displays, Scholarship Trophy, Christmas Parties for Children of Rolla, City "Good Turn" projects and other services in conjunction with Dean Gevecker and the school.

Following is a list of the members of this school year:

Beta Sigma Psi—Sr. Melvin Finke, Jr. Ronald Mueller; Delta Sigma Phi—Sr. Al Dusing, Jr. Maisak; Kappa Alpha—Sr. Tom Meyer, Jr. Jim Jackson; Kappa Gerald Fox; Lambda Chi Alpha—Sr. Bill Varga, Jr. Roger Echelmeier; Pi Kappa Alpha—Sr. Tom Welsh, Jr. Ron Rath; Sigma Nu—Sr. Al Pope, Jr. Bill Henning; Sigma Phi Epsilon—Sr. Ron Sander, Jr. Bob Elrod; Sigma Pi—Sr. Ken Schultz, Jr. Bill Thompson; Sigma Tau Gamma—Sr. Rich Edwards, Jr. Ed Ninnenger; Tau Kappa Epsilon—Gerry Schaeffer, Jr. Jim Marble; Theta Kappa Phi—Sr. Bob Wagner, Jr. Dave Anderson; Theta Xi—Sr. Gene Russell, Jr. Ted Ellicott; Triangle—Sr. Bill Schwalb, Jr. Bill Love.

The officers for this semester are:

President—Ken Schultz  
Vice President—Al Pope  
Secy-Treasurer—Tom Welsh

If anyone should desire more information concerning the IFC or would like to make any suggestions, would you please contact any of the members or officers.

### "Hold That Line" For Traffic Safety; Mo. Scoring in '57

Traffic safety was compared to football games by Patrol Superintendent Hugh H. Waggoner today in a plea to drivers to "hold the line" on traffic accidents.

Colonel Waggoner said, "When the home team is winning but the opposition is threatening, every fan in the stands will rise and shout, 'hold that line!'"

With the reduction of traffic deaths that we have scored this year, we think it is time to call on our team, the motorists, to hold that line to keep traffic tragedies from scoring in the last quarter.

"The traffic deaths record in Missouri for 1957 is over 100 less than for the same period in 1956 and if every member of our team will do his best for the next two and one-half months we will end the year with a far better record than we scored in 1956."

"Our team of automobile drivers is comparable in many ways to the winning football team," the Colonel said. "With this differ-

(Continued on Page 8)

### Juniors Apply Now For Federal Careers

The U. S. Civil Service Commission has announced that Juniors as well as Seniors many now apply for the popular Federal Service Entrance Examination. This one examination will enable men and women with Bachelor's degrees to enter any one of more than 125 different types of positions in the Federal Service.

Eligible students currently enrolled will receive eligibility and employment offers effective upon graduation. Starting salaries range from \$306 to \$377 a month with excellent possibilities for rapid advancement.

The positions are definitely of the trainee type. Those appointed will receive training in such fields as administration, business analysis, personnel management, library science, budget management, electronic data processing, recreation, procurement, records management, and tax collection. In addition positions in agriculture and the natural sciences such as agriculture economics, fishery biology, market reporting, plant pest control, soil science (research) and wildlife biology are open.

The written test will be administered Saturday, November 16 and will require about four hours of your time. Applications for this test must be received by the Director, Ninth U.S. Civil Service

## AIEE Section Meets Tonight at Mizzou

This evening the St. Louis Section for Student Branches, American Institute of Electrical Engineers will hold its Joint Meeting at Columbia, Mo. The AIEE Branch of the University of Missouri will be host to fellow EE students from Washington University, St. Louis University and our own Local Branch at M.S.M.

Meeting in the Daniel Boone Hotel at 5:30, the annual banquet this year will feature Mr. Harold E. Gove. His topic will be "Atomic Energy, Today and Tomorrow." Preceding the dinner, all visitors are welcome to inspect the EE Labs and the new network analyzer on the campus of M.U.

The Local Branch of the AIEE-IRE will hold its regular monthly meeting this Wednesday, October 23, in the Parker Hall auditorium. Of interest to all EE students, the program will consist of a panel discussion. Members of the panel will include Mr. W. C. Wooley from Moloney Electric Co., Mr. L. W. Buechler from Vickers Electric Co., and Mr. N. Blair from Southwestern Bell Telephone Co. The program, furnished by the St. Louis Section AIEE, promises to be beneficial to all.

In order to carry through successfully with the year's plans mentioned in last week's article,

committee work is needed. Openings are still found for any interested students. These should sign the list on the EE bulletin board or see the respective chairman.

The chairman for this year's committees are Carl Godfrey, Membership Committee; Thomas Eaker, Publicity Committee; Eugene Zesch, Refreshment Committee; George Tomaz, Field Trip Committee; Wanye Andreas, Program Committee; and Robert Boschert, Constitution Committee.

### Notice

#### No High School Letter Jackets on MSM Campus

It has been brought to the attention of the M Club that a number of students, primarily freshmen, have been wearing high school letter sweaters and jackets on campus. This is contrary to the custom of this school and will not be allowed. These sweaters and jackets may be worn only if the letters and other awards have been removed.

The M Club.

## Dr. Eppelsheimer Appointed Conferee to World Met. Congress

Dr. D. S. Eppelsheimer, Professor of Metallurgical Engineering, Missouri School of Mines and Metallurgy, has been appointed by the Board of Trustees of the American Society for Metals as an American Conferee to the Second World Metallurgical Congress to be held in Chicago November 3 through November 8, 1957.

There will be over 500 overseas

Region, New Federal Building, St. Louis 1, Missouri before October 31, 1957.

conferees from 40 countries in attendance at the conference. Many of the conferees will meet two weeks ahead of the opening session on November 3 for planned trips to plants and institutions between New York and Chicago.

Dr. Eppelsheimer was also a conferee to the Second World Metallurgical Congress which met in Europe in 1955, the meetings being held in England, France, Germany, and Belgium. Dr. Eppelsheimer spent this past summer in Europe visiting various Metallurgical and Atomic Energy Plants.

## There Are Advantages to Being a Good Listener

Are you a good listener? The average person is only a "half listener." Even when he tries, he retains only about 50 per cent of what he hears right after he hears it.

But there are advantages in being a good listener says Dr. Ralph G. Nichols and Leonard A. Stevens of the University of Minnesota in an October Reader's Digest article, "Are You Listening?" It is material from their book of the same title being published by McGraw-Hill.

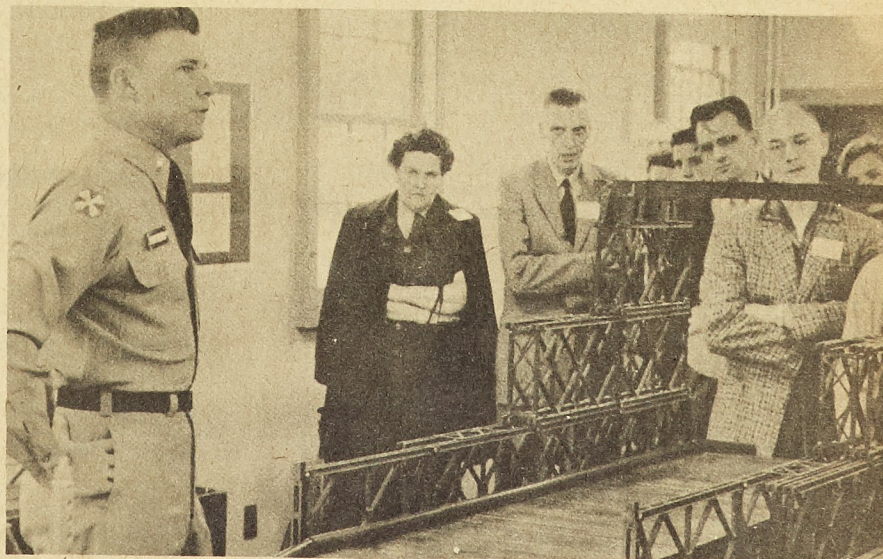

"Concentration is more than half the battle," they say. "A good listener fights distraction. He will close a door . . . move closer to the person talking . . .

interrupt only when it is necessary to clear up a point.

"One of the reasons for paying close attention . . . is simply that it is courteous to do so. But there is a selfish reason too . . . the way you listen has a great deal of control over the way people talk to you. Intelligent listening on your part helps the speaker . . . give you information that you may need. How you listen has a direct bearing on what you learn."

Becoming a good listener, the authors say, also makes you a better, more interesting speaker yourself.

"Just as you will get more fun and reward from listening," they conclude, "so other people will get more out of what you have to say."

Lt. Kenneth Knox explains an engineer bridge structure to a group of parents during the Parents Day activities last Saturday. Several hundred parents toured the campus and attended the Miner football game in the afternoon.

## THE MISSOURI MINER

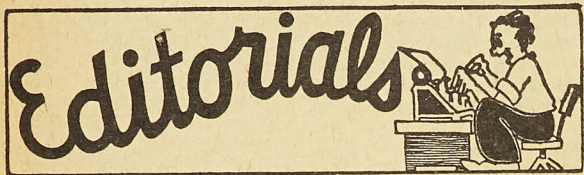

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla, Mo., every Friday during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo., under the Act of March 3, 1879.

The subscription is \$1.00 per semester. This Missouri Miner Features Activities of the Students and Faculty of M. S. M.

#### To the Editor

In an editorial in a recent issue of the Miner the question of a liberal arts vs. technical curriculum was discussed. But no mention was made of the possibility of both existing on the campus at the same time. It seems that the proponents of either idea would impose their will upon the student regardless of his preference.

In the final analysis, the school exist for the benefit of the students. The benefits to society are the results of the benefits to the students. Since the students must choose the profession he will follow, why not permit him more choice in selecting a curriculum that will best fit his needs. If he feels that some liberal arts courses would be of value, he would be free to include them in his curriculum. The student who is engrossed in technology or science, because of his lack of interest, would profit but little from liberal arts courses, and therefore should be allowed to specialize in the field of his choice. Since the Department Head cannot live the student's life, he should be restricted to the role of an advisor and not be allowed to dictate the full course of studies as is now done in some departments, notably the Department of Mining Engineering.

This plan would not eliminate required courses but would reduce them to the minimum required for the basic foundation in the arts and sciences of the particular field. But a reasonable portion of the advanced or specialized courses would be left to the student's choice. The very existence of the debate is evidence that the student would be accepted in industry regardless of his choice.

Frank Orday

## The Miner Is Your Paper

The MINER is the official publication of the Missouri School of Mines and Metallurgy; it features articles by the students and faculty of M.S.M. Or at least that's what the masthead of the paper says. It is discouraging, however, that the students do not take advantage of the privileges the MINER affords them.

Most important of these privileges is writing a letter to the editor. By writing a letter to the editor, a student can air his pet peeve, straighten out erroneous thinking about a specific organization, or publicly compliment an individual or organization.

If there is something of which you drastically disapprove, the only way it will be corrected is by bringing it out in the open. Nothing can be done to improve an undesirable situation unless the proper know about it.

Even though the MINER is written for students, the administration and faculty read it carefully to find out what the students think and in what they are interested.

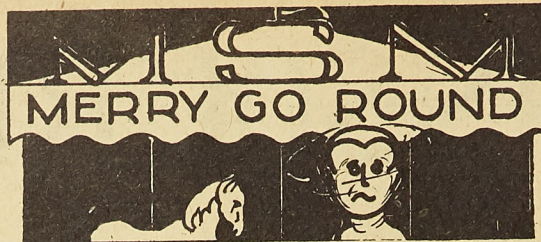

The policy on letters to the editor is as follows:

1. No letter should exceed 200 words.
2. No letter will be published possessing profane language or enticing others to violence.
3. All letters must be signed. However, names will be withheld upon request.

The MINER is under no obligation to print all letters.

The MINER is your paper. You are asked to be a part of it by writing letters to the editor, for it is the purpose of this paper to be a listening post for the campus. A place where your views on a subject can be aired where all will hear.

Richard H. Okenfuss; Editor.

Hello, all you happy people! You're not so happy, huh? You're tired, rundown, study too late, got a physics quiz tonight, your right arm has just been amputated. Or maybe you got an allergy and found out you can't be around girls, or did you bet on the Cardinals in the World Series and then found out they weren't even playing. Well, friend if all these things are bothering you, you're probably suffering from "tired blood." Right about now you are probably wondering why I didn't use something original instead of "tired blood." Well, for one thing I couldn't think of anything else. er—where was I—oh, yes. You think you've got it rough. What about the guy Russia sent from Siberia, land of the enchanting salt mines, to the Rolla School of Mines — er — excuse me — the Missouri School of Mines. Off hand, the opinion might be that he is here to steal secrets on our School of Mines

Satellite. Nope. He's being punished. Well, you can't blame Russia; is there a worse place to be sent for punishment?

So much for our little troubles, let's take a look around campus and see what's been happening. You know, as I was walking on campus last weekend, it was quite heart warming to see all the parents and their daughters who were taking such a great interest in our humble school, especially their daughters, who actually fascinated me more than the parents. If a few of us that think along the same line would band together, maybe we could establish a Sister Day or better still a Sister Week.

Another event here at the Missouri Salt Mines was the great Woody Herman and his "Third Herd" Concert. The Student Council has done a good job in planning the General Lectures. Woody got the first one off to a swinging start last Monday night.

As all of you from the school of jazz know, Woody is one of the great leaders in the jazz world today, and it is fortunate he was booked for a General Lecture. While we're on the same subject, these lectures are a great thing for the school and the student. At least they're a heck of a lot better than those Tom Mix movies at the local Cinema (picture show).

What else has been happening on our lovely campus — hummm — oh, it seems we're having a social feud between the Theta Kap's and the Sig Ep's. Social behavior plays a most important role. Keep up the good work boys, a good feud never hurt nobody.

Well, dear friends that's about all this week — oop's one last thought as a guiding light for the long hard weeks to come. Let's see now, got to get a piece of scrap paper. — uh-huh . . . and a slide rule. O. K., now, two times two equals three point nine six . . . three or is it four. There I got it now — only 57 more shopping days 'til Christmas. Talking about buying, it's bye for now from Bax and Mox Nix.

"NOW," said the prof, "pass all your papers to the end of the row; put a carbon sheet under each one, and I can correct all the mistakes at once."

## Parker Hall Site For Important GDI Meeting Mon. Night

The Independents meeting, postponed from last week, will be held this Monday, Oct. 21 at 7:00. Parker Hall has finally been obtained for the site of the monthly meeting.

At the meeting, discussions will be held on the possibilities of holding a Christmas Dance and building a float for St. Pats. Early plans for the St. Pats' Dance will be made among other items.

At Monday's meeting committees will be organized to start work on these events. Volunteers are desperately needed to join these committees to successfully plan and execute the approved ideas, votes and help in making the organization YOU want.

Entertainment for the meeting has not been forgotten. If everyone attends and chips in his part Monday less time will be spent on business and more on entertainment at future meetings.

Valuable door prizes will be given to lucky members present at the meeting next week. Movies, including a short on jet aircraft and four cartoons, will be shown. For the Miner Football Team, Coach Goofy will explain his ideas on "How to play Football".

The Independents last Saturday welcomed back Dick Boyett on his return to action on the Miner Team. We all know Dick had been patiently waiting with injuries since the first game to play his first home game of the season. Good work, Dick, and the rest of the Independent players for a fine game last Saturday.

Jim Robertson

## Eating Clubs Enjoy Parents' Day Dishes

First, we would like to thank all those who did a fine job as guides last Saturday for Parents' Day. The volunteers from their respective clubs were PROSPECTORS: Ronald Scott, J. W. Benningfield, Herb Bland, Fred Bennett Bill Souby; TECH CLUB Allen Tolgo, Jim Howard, Charles Baskin; ENGINEERS: Ted McFarlane.

At the open house the ENGINEERS CLUB and TECH CLUB served chicken and turkey dinners, respectively, to their visiting parents. Owing to lack of space the other eating clubs were sorry they also could not have open house. The SHAMROCK CLUB has enjoyed eating all week the fine cookies made by Shirley Cornell. Thanks, Bill, but can we get more.

Members of the SHAMROCK CLUB recently gave the newlyweds, Mr. and Mrs. David Godsy, an electric skillet as a surprise wedding present. Now we'll see who can cook.

The ENGINEERS and TECH CLUB finished first and second in their respective intramural football leagues. The former hopes to complete two perfect seasons of football after the play-off this week. The SHAMROCKS ended up with a 4-2 record for the season.

Did any of you realize we have just passed the mid-point between the start of school and mid-semester. Why work so hard. Flunk now and avoid the rush.

"Young lady, I'll bet your mother would be angry if she saw you in that skimpy bathing suit." "I'll say she would! It's hers."

## ASM Offers Engineers Advice on Entering Industry

by Tom O'Keefe

On the evening of October 9, the ASM held its first meeting of the new school year in room G-10 of the new Met. Building.

The featured speaker for the evening was Dr. C. C. Long of the St. Joseph Lead Company, Monaca, Pa. who told "What Industry Expects of a Newly Graduated Engineer." It was a very informative and interesting speech which was well received by all who attended.

The ASM would like to extend an invitation to all freshmen interested in Metallurgy to come to the next meeting which is scheduled for November. So remember to watch the daily bulletin for the time and place and I'm sure you'll have a very interesting and enjoyable time.

When you stop to think, don't forget to start again.

## ALPHA PHI OF GAMMA DELTA

Sunday, Oct. 13, Alpha Phi Chapter of Gamma Delta held its first cost supper and business meeting of the current year.

We were glad to see many of our fellow Lutheran students back again and a surprisingly large number of pledges.

After the supper we were led in the business meeting by the president, John Poppitz. Following this was a topic discussion led by George Frenke on "Spiritual

**FROG**

IN A SMALLER POND AT HAGAN CHEMICALS & CONTROLS, INC.

Small pond? Small enough that you won't be a platoon-system trainee, or a number on a king-size roster. We're looking for just 20 qualified graduates this year.

Yet, at Hagan, you'll be part of a company big enough to number among our thousands of customers: 98 of the 100 largest industrial firms in America; 40 of the 50 largest utilities; and thousands of other industrial, municipal and household customers.

### WHAT DOES HAGAN MAKE AND DO?

**Controls and Instrumentation.** We design, manufacture and sell automatic control and instrumentation systems for use in power plants, steel mills, aeronautical testing facilities, and in many basic process control applications—including electronic instrumentation.

**Industrial Water Service.** Our Hall Service Engineers help thousands of industrial plants prevent costly water troubles, by on-the-job consultation and service for every type of industrial water problem—from procurement to disposal.

**Calgon and Hagan Chemicals.** Calgon phosphate compounds, and Calgonite detergents—including popular household versions of each—are among the many chemicals we process and sell for water treatment in utility, industrial, municipal and household water systems.

### HOW WE TRAIN ENGINEERS AND CHEMISTS AT HAGAN

**Mechanical and electrical engineers,** for our Mechanical Division, receive six months training, including: laboratory work; classroom instruction; on-the-job train-

ing with a Field Engineer; and rotation in various departments. Then, assignment as a Field Service Engineer—where possible in a territory of your choice.

**Chemical engineers and chemists,** for our Hall and Calgon Divisions, receive six months training, including: classroom work; on-the-job training with a Field Engineer, and rotation in various departments. Then assignment to a District Office—where possible in a territory of your choice.

**What's ahead for you?** Hagan is growing fast. Field Service Engineers and Chemists have excellent opportunities for positions in Sales Engineering, or administrative work.

For specific details on type of work, travel, benefits, etc., make an appointment through your College Placement Officer to learn about the opportunities for you at Hagan. Remember, you start as one of a select team of only 20 graduates.

### HAGAN CHEMICALS & CONTROLS, INC.

Hagan Building, Pittsburgh 30, Pennsylvania  
Divisions: Calgon Company, Hall Laboratories

Hagan personnel officer will be interviewing on the date shown below. See your placement officer for interview time.

November 18, 1957

# Mules Downed

**Parker, Allison and McPherson Star**

The Miners won their first conference game beating the Warrensburg Mules 47-6. The running of Parker and Allison and the passing of McPherson were largely responsible for the Miner victory. Parker and McPherson each scored two T.D.'s and McPherson threw eight passes and completed five. The Mule's gained most of their ground on pitch-out plays and their only T.D. came on a pitch-out and a pass.

The Mule's won the toss and elected to receive. The kick off by Parker was returned 7 yds. The Mules were unable to get a first down and were forced to punt. Parker returned 10 yds. On the return the Miners received a 15 yd. penalty putting the ball deep in their own territory. Parker and Allison then proceeded to march up the field to the Mule 3 yd. line. Parker drove through the middle for the T.D. and then made good the extra point.

The Mules came right back to score their only T.D. The T.D. came on a pitch out to Hensley who then passed to Dahman who ran the 25 yd. pass 35 yds. for the T.D. The extra point attempt was blocked by Agers of MSM.

The second Miner T.D. was helped by a Mule fumble on their 20 yd. line which was recovered by Agers. Parker and Allison ran the ball up to the Mule 5 yd. line and Allison drove through middle for the T.D. Parker kicked his second extra point of the day.

The Mules drove deep into

Miner territory for a T.D. bid. Gieringer then tried to pass for the T.D. but Boren of MSM intercepted setting the stage for the Miner's 3rd T.D. On this drive, Allison's running and McPherson's two complete passes one to Parker and one to Allison brought the ball down to the Mule 10 yd. line. With a 4th down and three to go McPherson on a keep play ran around end scoring the Miner's third touchdown. Parker made good his 3rd extra point attempt.

The Miner's 4th T.D. came on a pass by McPherson complete to Allison who ran the 25 yd. pass 20 yards for the T.D. Parker's 4th extra point attempt was wide.

The Mule's with 5 minutes remaining in the first half were unable to score. The score at half time was 27-6, Miners.

The Miners received the kickoff. They scored their fifth T.D. on their first drive in the 3rd quarter. The key play was a pass by McPherson to Allison for the T.D. Parker kicking his 4th extra point of the afternoon.

The Miner 6th T.D. was set up when Calvin intercepted a Mule pass. Parker then brought the ball up to the Mule 3 yd. line. A lateral by McPherson to Allison was good for the T.D. Parker kicked his 5th extra point of the afternoon tying a MSM record for most extra points kicked by a MSM player in a game.

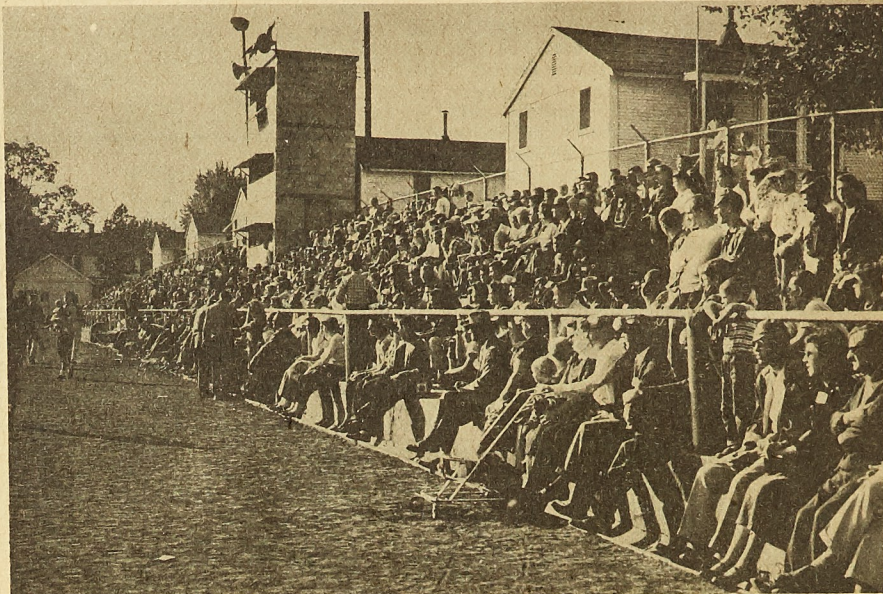

The Miner's final touchdown came when Peterson intercepted

a Mule pass, deep in Mule territory and scored. The extra point by Parker was blocked. The final score Miners 47 Mules 6.

The Miners were rated 14 points over the Warrensburg team by the St. Louis Post Dispatch. The Mule defense was very poor which was the main cause for the severe beating by the Miners. Their defense was unable to stop Allison, Parker or McPherson, the stars of the Miner team.

Don't forget to tune in to the next Miner game, Oct. 18, at Maryville.

# A Cheering Crowd

# Miners To Go For Second Conference Victory

Tomorrow, the Miners go into their second conference game of the 1957 season against a strong Maryville squad.

Maryville started out the season with a rough schedule, their first game leaving them on the shy end of a 44-0 score against St. Joseph's, one of the best small-college teams in the country. St. Joe played against Montana State last year in the Aluminum Bowl and were first in their league. Northwest Missouri State then tied William Jewell College 7-all, was beaten by Fort Hays State 40-27, and was edged by the highly-rated Springfield Bears 3-0. The Springfield game was well played, and hard fought by both teams, but the Bears had the luck that night, though it could have been anyone's game.

Our Northwestern Neighbors haven't had much luck against our Miners in previous years, since 1931, when the Miners first met Maryville on the gridiron, the Miners have won 14 of the 25 games played, with one tied.

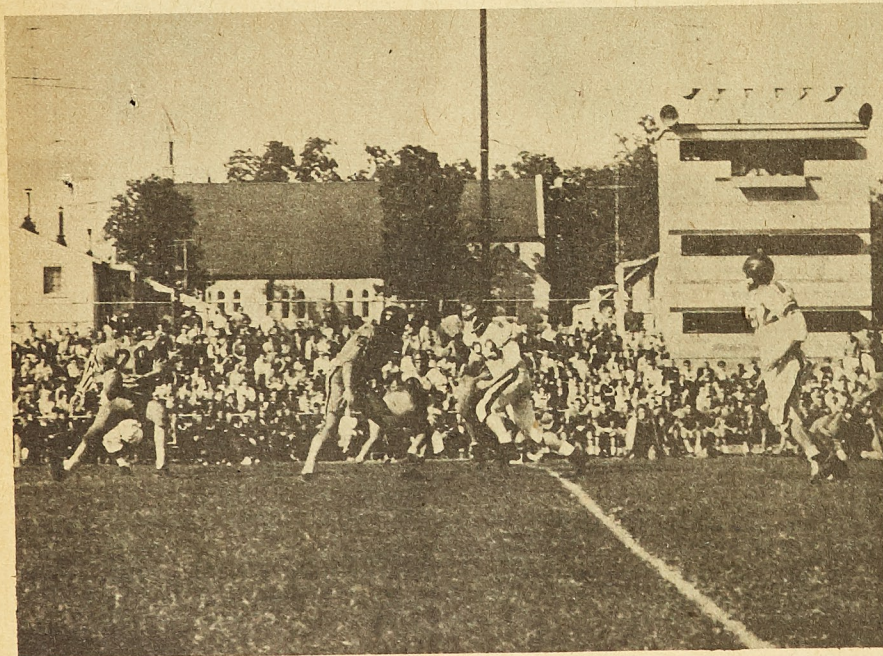

The Maryville men have a tremendous line, with 17 men on their team weighing in at better than 200 lbs., and 10 returning lettermen. The airways are used to a great extent by NWMS, with Dick Powell and Henry Saggau doing much of the throwing. Saggau is a transfer student to Maryville from the University of Ne-

braska, and is a gift to an already strong Maryville 11. He is a good Q.B., a terrific passer, and punts very well. Speaking of punters, Maryville's Elmer led the MIAA in punt yardage last season, though Saggau did all the punting at Springfield last week.

This little summary will show that the Miners won't have an easy go tomorrow, even though the records look good. NWMS has good passing, a strong line, and an all-around BIG team. The Miners will have to play their best to take this one, and it will be one of the main stumbling blocks on the way to that MIAA trophy we know they deserve. The game will be on the Maryville home grounds, but the Miners will know we're behind them.

# PROSPECTIN' the Conference

by Don Binz

Saturday found the M.I.A.A. Conference members follow true to form, leaving Cape Girardeau, Springfield and Missouri School of Mines victorious. The Miners left no doubt as to who was the power when they literally ran over the Warrensburg Mules, 47-6. Cape Girardeau, the big gun in the conference, turned the tables on the Kirksville Bulldogs, 19-7 while Springfield and Maryville practiced defense and fought to a 3-0 Springfield victory.

Here at Rolla, the Missouri Miners bettered their national college rating as they set back the hopeful Warrensburg Mules with a fine running game highlighted by a sparkling passing attack. Within a few minutes after the initial whistle blew, the Miners scored their first touchdown and were never close pressed thereafter. The statistics were all in favor of the Miners as they rolled up a tremendous amount of total yards and yards rushing.

Perry Allison increased his hold on the league's leading scorer and All-Conference honors. To add on to his previous total is 124 yards gained rushing and 227 total yards gained.

The closest fought game in the conference last week, and possibly the closest for the year, was the 3-0 win for the Springfield Bears over the Maryville Bearcats. Springfield played the same tricks as last year when their

kicking specialist tallied the deciding score. With less than twelve minutes left to play, sophomore Jack Halterman booted the pigskin for 31 yards and 3 points. Springfield's defense displayed its worth, keeping Maryville's offensive surge to 1 yard in the first half and 28 yards in the second half for a total of 29 yards gained. Springfield's offense this year has shown little ability to score but it has become a defensive powerhouse.

Elsewhere, the home team of Cape Girardeau, performed as expected but only after Kirksville gave the Indians a run for their money. The Bulldogs kept the Southeast Missouri State squad scoreless in the first half but the Indians scored in the third quarter with a 52 yard run and another 9 yard plunge. The last quarter saw a trading of touchdowns apiece to bring the score to 19-7.

Without exception, the MIAA Conference members acknowledge Cape Girardeau as being the team to beat in the conference. Although Kirksville lost to Cape by 12 points, it definitely can't be called weak. By comparison, Kirksville romped over St. Benedict's College 26-7 while Pittsburg, Kansas barely edged St. Benedict's last week, 17-13. Considering that Pittsburg has rolled over our conference members easily, this would indicate Kirksville's power and likewise top seeded

Cape Girardeau.  
Tomorrow Cape Girardeau meets Warrensburg at Warrensburg, while Springfield takes on Kirksville at Kirksville. The Missouri Miners travel north to meet Maryville

SUSPENSION STORY—Chuck Steger, M.E. '52, probing dynamic properties of new Air Spring developed by Von Polhemus (I.). A nationally recognized authority on suspension systems, Mr. Polhemus directs Structure and Suspension Development Group of GM's Engineering Staff, helps guide Chuck in his professional career.

## Because engineering is a profession at GM -we offer you a career—not a job

ONE REASON engineering standards at General Motors are so high is that GM recognizes engineering as a profession. And the men who engineer the many different products made by General Motors are respected for the profession they practice.

That is why, when you are invited to join General Motors as an engineer, you don't simply take a job—you start a career.

It is a career that is rewarding both professionally and financially—starting on your first day of association with General Motors at any one of its 35 divisions and 126 plants in 70 cities and 19 states.

During your early days at GM, for example, you work with a senior engineer who guides your career along professional lines.

You are also actively encouraged to pursue your education towards an advanced degree. For we at General Motors recognize that, in doing so, you will become more valuable to us and the engineering profession.

You are given the opportunity to obtain professional recognition through participation in engineering society forums, presentation of technical papers, winning of patents and other recognition of your accomplishments.

And you are also encouraged to take an active role in your community's affairs—because a truly professional man is a good citizen as well as a good engineer.

All this is for a reason—and a good one.

Many of the men who will fill the key positions at GM in the future are the young engineers joining GM today. This is not theory, it is fact. For 14 of our 33 Vice-Presidents are engineers, 23 of our 42 Division General Managers are engineers, too.

Today we are looking for young engineers—such as you—who may fill these positions tomorrow. The rewards—both professional and financial—are substantial. If you feel you have the ability, write us. It could be the most important letter of your life.

### June graduates!

A General Motors Representative will be on hand to answer questions about job opportunities with GM.

October 28 and 29

GM positions now available in these fields:  
MECHANICAL ENGINEERING • ELECTRICAL ENGINEERING  
INDUSTRIAL ENGINEERING • METALLURGICAL ENGINEERING  
AERONAUTICAL ENGINEERING • CHEMICAL ENGINEERING  
CERAMIC ENGINEERING • MATHEMATICS

## Fraternity News

### SIGMA PHI EPSILON

Well, it was visiting day at the zoo last week, and a good time was had by all Sig Ep men and their parents. The pledges, led by taskmaster Marty Rogers, worked hard Friday night to make the house spotless and shining so our parents would think that we live like angels all the time. Bob Harrison worked especially hard. Nobody knows exactly what he worked on, though.

Everyone is looking forward to the pledge dance, which will be held on November 16. The pledges are starting advance work and preparation on it now.

Congratulations are in order for John Woodward, who lost his skull and crossbones to Joyce Whittaker last week. The condolences are for Hawk Hartman, who is still waiting for a letter from his nice girl.

In the intramural department, the flagball team, helped by Ed "Rip em off" Eppinger, finished the season with a 27-0 win over Prospector's Club, which gave Sigma Phi Epsilon a 3-3 record for the year.

### PI KAPPA ALPHA

This weekend Pi Kappa Alpha played host to our families. Rarely is the patter of so many little feet heard around the chapter house. A good meal by our cook and a Miner victory provided an enjoyable afternoon for everyone. Speaking of football teams, the Pikers had an excellent season, suffering only one defeat. This was our hard-fought game with the Engineer's Club which we lost by only one point.

Another pledge was added to the ranks last week. PI KA pledged Donald Janning, of Jennings, Mo., Thursday night. Don is a sophomore in the Electrical Engineering Department and a transfer student from Washington University.

Frank Baker and Jim Urban are going to school on the Wyman-Brenke plan now. This is an eight year co-op plan with Colonial Village Inc.

There is a new sadistic joke going around the house. "Art, are you going to California for the wedding?"

### KAPPA SIGMA

Parent's day has come and gone with a big turnout at the Kappa Sigma House. We hope every one was favorably impressed with the campus and our house.

Everyone is settling down and studying after two big weekends in a row, since mid is not too far off.

### THETA KAPPA PHI

Parents' Day of last week proved to be a very successful one in all respects. As the fall weather was perfect, all outside events were enjoyed by the folks, and the talk flowed freely as the parents became acquainted with the house and each other. The Theta Kaps are especially grateful to the Mothers' Club for their gift of \$650 to the house!

After this very successful Parents' Day enjoyed equally by both parents and sons, the Theta Kaps settled down to a comparatively quiet week divided between studies and sports.

In intramural sports, the Theta Kaps continued to make a good showing. The football team did very well, despite some tough breaks. In tennis and ping pong, the men kept the nets hot, winning regularly.

At this time, plans are starting to take shape for the fast approaching homecoming weekend. Committees are formed and work will soon begin on decorations and other preparations.

### TAU KAPPA EPSILON

The TEKE house is getting back to normal this week after Parents' Day. All the pictures are going back on the wall and the rooms are assuming their customary disorder after the annual clean-up campaign. A banquet was held Saturday afternoon with Dean Wilson as the speaker and after the banquet all the parents enjoyed watching the Miners win over Warrensburg.

In sports TEKE's wound up on top of their league in football as they ended their league games undefeated. In the playoffs we meet Engineers Club in the first game. In tennis our two entries were eliminated last week. With their four and five wins respectively Paul Slinkard and Conrad Bailey make our tennis team a bigger success than we have seen in the last few years.

### DELTA SIGMA PHI

Parent's Day was a big success at Delta Sigma Phi this Saturday. Friday night was spent getting the house in good shape from waxing the floors to washing the light fixtures. As a result of our efforts we received many compliments from our parents. This is the first Parent's Day since our house became a reality instead of a dream last February. Some parents could stay only for a short while but most were able to enjoy the Miner victory over Warrensburg Saturday afternoon.

In a pledge meeting last Tuesday the officers of our Pledge Class were elected. They are: Jim Hague, president; Glenn Brenner,

vice-president; and Fred Huff secretary-treasurer.

The Delta Sigs came out of the football season with a battered and bruised team and a record of 3 wins and 4 losses. In tennis singles, Charles Sullivan has won 4 games but due to an injured elbow he will not be playing any more. The alternate will take over the rest of the matches.

Ralph Maxton

### SIGMA TAU GAMMA

Life in Rolla will have a bright appearance next weekend. Homecoming, in case you haven't heard. All the pledges, including pledge Musgraves, are eagerly awaiting our first blast of the year. I wonder who will get "shot down" first.

The Sig Tau football team has made a great improvement over last year. Congratulations fellows.

One of our men came back from Cape pinned. He still has a very tired look on his face. Good luck, Jim.

Well, I think I'll play alligator, and drag tail out of here.

### THETA XI

The first Parents' Day celebration in our new house was held last Saturday. The open house and tea given by our Mothers and Wives' Club was quite a success.

The tea had hardly dried on their suits before our representatives had retired in the direction of the land of LC. Word has it that ole Cholly accomplished another first, first to go swimming in October that is; nice girls, that's our motto Cholly.

Plans are being made for Homecoming and it looks like it

will be quite a ball. When asked if he would be ready for the party, Ted Soakum was heard to reply, "It's beginning to float." Coats did it again, was the word heard at 1605 Pine as the news got around of the furniture rearrangement. Keep up the good work, Willie, by the way what are you hiding under the safe.

### LAMBDA CHI ALPHA

A tip for the chapter from "Champs Camp" that may be good for a cigar; Leo Bowlin has lost his pin to a St. Joe nurse. How about it Leo?

Lambda Chi has a very full sports calendar for the coming week at the flag ballers go into a play-off with Triangle and Theta Kap. Last week saw an almost entire pladge team defeat Dorm, 54 to 7, and then the team scored 47 points while holding Sigma Tau scoreless. Rich Hampe goes into the semi-final of the losers bracket of the tennis tournament. Good luck everyone.

The house was in spotless readiness as a host of Mothers' and Dads' were welcomed by the chapter. The Parents Day was a great success for everyone with

the exception of one of the pledges who found his parents car was too powerful for him, as observed by Rolla's Scotland Yard.

"Believe It Or Not" Martin Kohler has put his sandles away and hasn't been seen in corduroies for almost a week.

Under the direction of Brothers Lund and Varga the actives and pledges replaced the old stepping stones with a new concrete walk. It looks real good men.

### BETA SIGMA PSI

Seventeen new "bright-eyed and bushy-tailed" men with green beanies in their pockets have been seen recently at the White House.

They are: Roger (Horse) Billen, St. Louis; Bob (Dutch) Hecht, Altenburg, Mo.; Gary (to the rescue) Hoech, St. Louis; Jim (the Gun) Klipp, St. Louis; Ralph (Local Lover) Luebke, Arnold, Mo.; Jim (Tarzan) Maierhoffer, St. Louis; Leo (Mac) Mankovich, Lemay, Mo.; John (Mickey Mouse) McInerney, Affton, Mo.; Ray (Spudnick) Popp, Jackson, Mo.; Bill (Shot-

## Morning Report: Company K-F of MSM Pershing Rifles

It has been a very active month for us. We held two smokers, and consequently we pledged 47 freshmen. The enthusiasm that the actives exhibit while training the freshmen during the past two weeks, and the manner which the freshmen are responding, is a good indication that the company will have a very active year.

The officers for this year are:  
C.O. Robert Willey  
S-1 Robert Schuler  
S-2 Fred Bennett  
S-3 Kenneth Schultz  
S-4 Jan Panyton  
P.I.O. Douglas Dallmer  
Drill Master Martin Rodgers

## KAPPA ALPHA

Rejoicing was in full swing this past weekend with the arriving of families and sweethearts of many of the K.A. members. Hellos and introductions to new friends were the theme for Friday night and Saturday morning. Saturday morning also found several of the K. A.'s guiding tours through our proud campus. These well organized tours were praised by the parents. The K.A.'s helped to increase the weekend's success by making arrangements for lodgings and by serving their guests delicious meals. In all the weekend was a booming success for the K.A.'s and their loved ones.

Most K.A.'s are now waiting to see their sweethearts during the homecoming weekend and their parents at Thanksgiving. A vacation long awaited.

What's this, nothing happening the weekend of Oct. 19th. Well we know K.A. will think of something. Maybe another night-owl fall house cleaning.

## TRIANGLE

Things are back to normal again at the "Rock House" after a rip-snortin' Parents' Day. The parents who were in attendance were quite impressed with the new interior of the house, that we were quite proud to show off. The party Saturday night, here at the house, was just a warm up for our Homecoming Dance which all the Triangles are eagerly awaiting and planning for. (I hear Gary and Pearson are really "hopped" up about Homecoming after the "smashing" good time they had Saturday.)

On the intramural scene this past week, our football team downed the dorm and then came right back with a very important win over the Theta Kaps. Also our doubles in table tennis are still undefeated as of now. Well, in next week's article we'll have the results of the football play-offs and also more about Homecoming.

By the way, Tom: How do you like it in the trench with the steam pipes?

Advisor ..... 1st Lt. Knox  
The Pledges are:  
Dale Baumbch, Edward Berkowitz, Robert Bilbery, Richard Bolander, Donald Branson, Edward Budley, Gerald Butler, Robert Carpenter, Theodore Clark, Gerald Church, Thomas Comstock, Dewey Cope, Echol Cook.

## RAMEY'S BAR

Yusuf A. Yoler joined General Electric's Missile and Ordnance Systems Department in 1955, after receiving his B. S. in E. E. from Roberts College, Istanbul, Turkey (1949), and his Ph. D. from the California Institute of Technology (1954).

## "In a big company, a young man can get to tackle big jobs"

"The thing that has impressed me most in my two years at General Electric," says 28-year-old Yusuf A. Yoler, manager of Aerodynamics Laboratory Investigations, "is the challenging opportunity open to young people here. My field is guided-missile research — the nation's top-priority defense job. Because of the scope of the company's research and development program, I've had the opportunity to work with technical experts in many related fields. And I've seen at first hand the responsibility which General Electric has given to younger men — proof to me that in a big company a young man can get to tackle big jobs."

The research being done by Dr. Yusuf A. Yoler is significant not only to himself, but to General Electric and the security of the nation as well. At present, the company is participating as a prime contractor on three of the four long-range ballistic missiles pro-

gramed by the U. S. government. Yoler, who is playing an important role in this work, directed the design and development of the world's largest hypersonic shock tunnel — a device which will "test-fly" missile nose cones at speeds over 15,000 mph.

Progress in research and development — as well as in every other field of endeavor — depends on how well young minds meet the challenge of self-development. At General Electric there are more than 29,000 college graduates, each of whom is given the opportunity to develop to his fullest abilities. In this way, we believe, everybody benefits — the individual, the company, and the country.

## Annual Fall Tea Marks Opening For MSM Dames

The first meeting of the Missouri School of Mines University Dames was held Thursday evening, Oct. 10 in room G-6 of the Chemical Engineering Building. There were 213 student wives present for this first meeting. The meeting was called to order by the president, Alice Hadler who welcomed all new members to Dames. Alice then introduced Robin Micka, who gave a short talk on 'The Meaning of Dames.' The president then introduced our advisory board with the following: Mrs. Curtis Wilson, Chairman, Mrs. W. T. Schrenk, Mrs. O. R. Grawe, and Mrs. I. H. Lovett.

In order for the new girls to become acquainted with the officers who will serve this coming year, the president introduced all the new officers which are as follows: Alice Hadler, Pres., Phyllis Macalady, Vice pres., Colette

Myer, Recording Sec., Carolyn Richey Corresponding Sec., Treva Welch Ass't, Nanette Graham, Treasurer, and Joan Young Ass't.

Minutes of the last meeting were read by the Recording Sec., Colette Myer and the Treasurers Report by Nanette Graham. The Treasurer gave a short talk on the dues for membership into Dames. The Annual Fall Tea is to be Oct. 20th in the home of Dean and Mrs. Curtis Wilson. Mrs. Wilson welcomed all new members and urged them to attend the Tea.

It was suggested that the organization give a Thanksgiving basket to needy families in Rolla and the members agreed wholeheartedly. A committee was appointed to investigate and present a list of the families at the next Dames meeting.

Following the adjournment of the meeting, the program chairman grouped the members according to the School Curriculum of their husband so that the girls might become better acquainted. Coffee and cup-cakes were served by the refreshment committee.

ved by the refreshment committee.

## MO. HIGHWAY PATROL

(Continued from Page 1)

ence, we are playing the game of our lives and for our lives. We are depending on good passing, good signals and good sportsmanship to provide us a winner."

"As we enter the last eleven weeks of the year we face our stiffest opposition in more hazardous driving conditions. We must tackle this problem with more careful, cautious driving

habits," he said.

The present death toll of 735 killed on our highways is a tragic loss of lives but the 108 lives spared is ample reason for thankfulness and is an indication that our team is cooperating and playing the game of driving in a sportsmanlike manner.

"We can win—We must win," the Colonel said, "by driving like our lives depended on it."

"Something came into my mind just now and went away again." "Perhaps it was lonely."
