ROLLA, MO., FRIDAY, SEPT. 26, 1958

NUMBER 2

Dr. Eppelsheimer Announces Future Plans for Building Of Nuclear Reactor

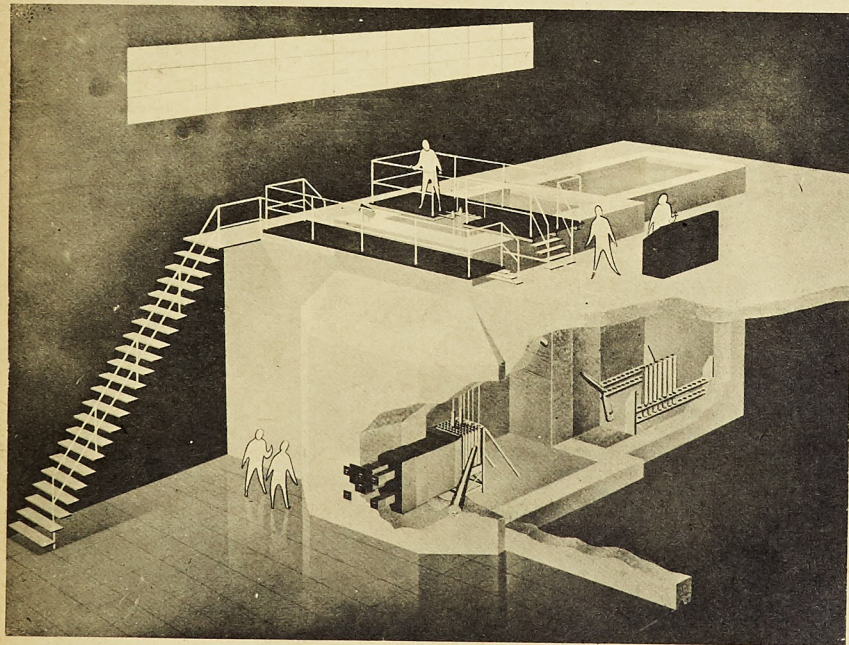

The erection of a nuclear reactor building on the MSM campus is to start in the near future, according to Dr. Daniel S. Eppelsheimer, Chairman of the Nuclear Engineering Advisory Committee of the school. The construction of the building and the reactor has been held up for some time due to a legal technicality. An Act of Congress passed August 23, 1958 amending the Atomic Energy Act of 1954 has

empting non-profit educational institutions from financial protection has made resumption of the project possible.

Additional funds totaling \$147,000 were granted to MSM by the Atomic Energy Commission for teaching facilities to be used in conjunction with the reactor. The AEC is making grants to certain American universities for the purchase of nuclear equipment to be used in the training of students

mit the implementation of laboratory instruction in nuclear and reactor physics as well as the production of isotopes. Two reactor physics laboratory courses have already been drafted and will be initiated as soon as the reactor facility is completed.

Dr. Eppelsheimer said that the committee considered the following features to be particularly important when they selected their training reactor: Safety; Inte-

made it possible to resume activities.

The University of Missouri Board of Curators has selected and approved the present site of building T-5 east of Fulton Hall for the site of the new building. The architect, Mr. P. J. Hoener, who designed the new Electrical Engineering Building has started work on the plans for the building.

The new building will house a 10 kilowatt swimming pool type training reactor. The Curtiss-Wright Corporation has been chosen by the Board of Curators to supply the reactor.

Funds in the amount of \$150,000 were made available to the University in early 1958 for the purchase of this reactor by the United States Atomic Energy Commission. However, the one agreement was unconstitutional under the present Missouri Constitution. The amendment to the Atomic Energy Act of 1954 ex-

in the various fields of nuclear engineering. To date, grants have been made to the University of California at Los Angeles, Ohio State University, and MSM for training reactors.

The nuclear program at the Missouri School of Mines was initiated in 1946 with the establishment of a course in Nuclear Physics. The Nuclear Engineering Advisory Committee was appointed by Dean C. L. Wilson to evaluate the nuclear engineering field and plan the nuclear curriculum of the school.

Under the guidance of the committee, courses in nuclear and reactor physics, heat transfer systems, and metallurgical and ceramic technology of reactor systems have been established. A Master of Science Degree program was established in 1957; as a result of this program, the school has been approved by the AEC as a participant in its fellowship program.

The reactor facility will per-

grity of components; Flexibility; Simplicity; Economy.

He said the committee evaluated all available types of training reactors. They concluded that the swimming-pool type reactor best met their needs in terms of the above and other criteria.

The reactor they selected is designed for operation at 10 kilowatts.

Short time operation at higher power levels is possible.

The control console was designed with many fail-safe features and alarms, since safety is a prime requisite in a student training reactor.

Open pool construction permits flexibility in the operation and utilization of the reactor. The students also have visual contact with the core and many of the experiments.

The reactor selected by MSM is one of several pool-type training reactors offered by Curtiss-Wright Corporation.

MSM Registration Tops 2900 This Fall

A total of 2922 students were registered at the end of the third day of registration this year, according to Paul E. Ponder, Director of Admission. Compared with 2814 total registration last year this means an increase of four percent.

The freshman registration was slightly less than last year, the increase in enrollment was brought about by transfers from other schools and colleges.

The departmental conscious souls on campus may break out when they discover that the E.E.'s still haven't enrolled a larger mob than the M.E.'s. The breakdown is:

Mechanical	656
Electrical	628
Civil	548
Chemical	259
Metallurgy	241
Mining	231
Sciences	140
Geology	87
Ceramics	41

Of the 140 Science majors 120 prefer Physics, shocking isn't it. The others have found Chemistry a jolly good game.

The happy news is that we're progressively becoming co-ed; over 25% more of those warm, soft, wiggling, giggling females have enrolled. A new sexy-sixsome have made a grand total of 24 baby-dolls on campus. Now, there are only 125 men to every gal. Honk, honk!

Freshmen Beware—there is a fifth column among you, disguised as scholars. The following crew of cutthroats have passed their

Math 5 tests without twitching an eyelid: Allen Lewis Affolter, Ladish Scholarship; Ronald Lloyd Cowperthwaite, Easley Scholarship; Donald Joe Greer, Alumni Scholarship; Jerry Roger Joerling, Central Mo. Sci. Fair Scholarship; Frank H. Speckhart, Kessler Scholarship; Richard Edward Wallace, General Motors Scholarship.

Their ringleader is a quiet, intelligent young chap from St. Claire, Mo., named Joe Hemman. Since he was bitten by a radio at the age of 11 he had dreamed nightly of becoming an EE. He certainly has started college life off with a roar: A's in the Math 5, Chem and the English examinations (52 grade points). Handle this dangerous hoodlum with care as he may be armed with a 5 microfarad condenser. He feels his instructors aren't too rough and claims his off hours are sufficient to study on. Times must be changing.

Rouges Gallery Portrait Number Two: Louis B. Allen Jr. Wanted for passing the Chem and Math 5 tests. AIEE tattoo over left belly-button. He will serve out a Kessler Scholarship for being salutatorian of his senior class in Savannah, Mo. Caution, psychotic tendencies; he "likes Rolla so far." He has one question to ask before being sentenced to four years of MSM, "Hey What'd they do with the babes in this town, lock 'em up or sumpin'?" Tell him, boys.

Advise to the Frosh: Steal their pencils, crib sheets, slide rules, etc.

Fraternities Are Off To a Flying Start

by Gerald Misemer

Every fall many young men enter college for the first time. They are amazed and confused by the complete change in their lives. Among the many things adding to this confusion is the maze of Greek-letter fraternities. He sees the multitude of pearl-studded pins, the Greek-letter decals on car windows, and the numerous chapter houses and he wonders to himself—"Just what is a college fraternity?"

During the rush week held on most campuses a freshman is given an opportunity to explore the workings of these organizations and find out what makes them tick. This is also a chance to discover their goals, their standards, their financial obligations, and what they have to offer a new student. Through rush week, parties are held at the different chapter houses in order to acquaint freshmen with these aspects of fraternity life.

The Greek fraternity system in the United States had its beginning in 1776 at William and Mary with Phi Beta Kappa. Phi Beta Kappa has since become an honorary scholarship society but the ideals stressed by this earliest fraternity are still evident in the fraternities of today. From this small origin the fraternity system has enlarged until there are approximately seventy nationally recognized fraternities.

College fraternities have endured and grown for over a century. There are several reasons for this steady growth.

Many overcrowded school depend upon fraternities to ease the housing situation by pledging as many new members as possible. Every chapter desires to operate its own chapter house but this is not always possible. Often a college will assign a section of a dormitory in order that fraternity members may be together.

The aims of social fraternities are primarily intended to help their members. Scholarship is encouraged by enforced study rules. Fraternities realize that their members are at college primarily for study. The fraternity encourages its members to enter extra-curricular activities in order to bring honor and prestige to the chapter. This gives their members an opportunity to broaden their personalities through outside interests. Otherwise these students would hold back because of inexperience or lack of incentive.

Social life in a fraternity gives a student an excellent opportunity

Editorial

Why Winter Commencement Will Not Take Place

Due to the large number of students that will fulfill their academic requirements in January, there again rises the question of a graduation ceremony. Naturally it is an inconvenience for the students and their parents or wives to return four months later and attend the graduation. Although they have worked for and looked forward to graduation day.

The administration and faculty of MSM realizes that there is an inconvenience connected with one graduation a year to the students, as said Dean Wilson, in an interview about this matter. During the war years MSM had a January graduation only because the graduate would be in the service by June unable to attend, even if he wanted to.

There are only two major colleges in the midwest that do have a January graduation, Ames and Iowa State. Apparently these schools feel that it is necessary to have them. The majority of schools MSM included, feel that the significance of graduation,

which is an important occasion in a person's life, loses its importance and becomes too common if a number of them occur during a school year. The main reason for only one major graduation is the element of time. MSM has barely nine days between semesters and this time is needed for registration and scheduling for the spring semester. The administration and faculty would have an added thorn in their side so to speak, if they had to worry about commencement exercises also.

An added reason is that some of the January graduates would be further inconvenienced and delayed from their jobs by the added nine days they would have to spend in Rolla to attend the graduation ceremony.

The administration regrets that due to these and other minor circumstances it will be impossible to have a January graduation and sincerely hopes that the students will return to attend the June ceremony.

Here's one I think all Miner gals will agree on . . . "Lovemaking hasn't changed

much in the past 2500 years. Greek maidens used to sit and listen to a lyre all evening, too.

Prevue

Feature of the Week Starts 3-Oct.

In the past few months, several college papers have been running features on events of national importance. It seems that the only parts of the city papers the students read are sports and the comics. Therefore we feel that to greatly enhance the scope of the average reader, the Miner will print features concerning national problems. The first of these articles will be printed next week. It concerns the integration problem in the South.

This article was solicited by the editors of this paper to present one side of a many-sided problem found just south of us. Its author has resided in Little Rock for many years and has recently spent the summer months there among friends and relatives. The writing is based solely on personal information, opinion, and observation; and, in no way, is it intended to be a scholarly last word upon the problem or to necessarily reflect the views of this paper, its staff, or its sponsors.

Since many engineers from this school will be employed in these regions, we of the Miner, feel that it will be of interest. Furthermore, we welcome all comments and opinions that you, the students wish to present. Kindly print or type such articles and deposit in the Miner Box located in the Rolla Building. Please acknowledge your article.

The Editor

NOTICE Dorm Residents

The Post Office in Rolla has asked that the residents of the MSM Dorms please give their return addresses as "Dormitory Box" plus their number. Quite a bit of confusion has arisen because students in the Dorm have designated only the word "Box" in their return addresses.

Nightwatch at Mo. School of Mines!

The Time: Shortly before Dawn.

The Place: Mox Nix Social Club and Athletic Association.

Main Characters: Bax, Mox and Dobbs, (the Alki)

Scene Opens: Dobbs: (Burp), Mox, Bax, time to hit the skids, Kids!

Mox: Take it easy Honey, I'm beat. (Dazed)

Bax: Make mine a double. (Gurgling on the Floor.)

Dobbs: Come on team, gotta take it and go to that 7:30!

Mox: Get lost man, the birds aren't even up yet.

Bax: Oh yes they are, Mr. Garner said that this is the best time to observe the birds.

Mox: Mr. Garner??

Bax: Well come on Mox, let's get the Merry Go Round started.

Ah yes! Team, the 7:30 kick is in full swing. The blood from our eyes dribble down in puddles on the floor but the Prof sings on.

This new phase of campus life is closely followed by another, namely the 11:30 to 12:30 bull session. The next time you see the guy in front of you take out a bag of bones (Bar B Que) and a bottle of juice (formaldehyde, Courtesy of the Friendly Corner Funeral Home,) be thankful that he is eating. He may have died of starvation and you might have had to carry him out to Greener Pastures.

This idea comes to us from Ron Husemann, who is one of the unfortunates that must be in class from 10:30 to 4:30 inclusive. You all remember Ron (St. Pat of '58), he now works at Bear Tracks as a bowling machine waxer.

The Literary Corner:

It gives us great pleasure to report from that factual novel, "How to Laugh Sadistically" with permission from Bax and Mox Nix Inc.

Where did the Sadistic laugh originate? It dates back way before the dawn of the distillery. Nero laughed sadistically when Rome burned. Allison MacKinsey laughed saidistically when her best friend had her arm cut off in Peyton Place. Bax and Mox laughed saidistically when the out-house burned on the Dean's lawn. How does one know if he is able to laugh in this manner? For instance, if your roommate is taking a bath on the third floor head and as he steps out of the tub he slips on a bar of soap and flies out the door and down three flights of steps.

If you first consider whether or not he owes you any money before rushing down to see if he is hurt, you are one of the few that can boast of a sadistic laugh.

Also do you break out in uncontrollable fits of laughter when you see a campus dog devour a stray cat? All of these depressions tend to develop the laugh of the Sadist.

ADVERTISEMENT: Customers wanted! No experience necessary. Must be 21 and able to crawl. Apply Bear Tracks.

I Like The Miner Dept:

Our thanks to Dr. Cole of the Physics Dept. for the statement that he liked the smoother paper on which the Miner is printed. This gives further proof to our suspicion that the Miner is used for more than one purpose.

Campus Decorations:

With heart-felt thanks, we are proud to report that Red, the Coed has returned to MSM. We welcome all female guests to Rolla and say "Come on a My House, to My House."

Well Girls, the Dean is mounted on a bulldozer and is trying to run us down. Best we get in the groove and get on the move.

Love with a yawn.
Bax and Mox Nix.

Move up to quality...

Move up
to Schlitz!

British Educators Visit MSM Campus

Nineteen distinguished educators from Universities of the British Commonwealth, eleven of them accompanied by their wives, were on the campus of the Missouri School of Mines and Metallurgy on the afternoon of September 12th. They had been attending the Triennial Meeting of the Association of Universities of the British Commonwealth held in Canada.

The group had spent September 11th on the campus of the University of Missouri at Columbia. On the way to Rolla, they visited the campus of Lincoln University at Jefferson City.

Accompanied by President and Mrs. Elmer Ellis of the University of Missouri, the visitors arrived in Rolla at four P. M. and were greeted by Assistant Dean of the Faculty, V.A.C. Gevecker in the absence of Dean Curtis L. Wilson and were then conducted about the campus by a group of Department Chairmen of the School of Mines and Metallurgy.

At six P.M. the visitors met at the home of Dean and Mrs. Curtis L. Wilson for an informal tea which was attended also by the departmental chairmen of the School of Mines. Here Sir James Duff, Vice-Chancellor, University of Durham, expressed the thanks of the visitors for the privilege of visiting both the campuses at Columbia and at Rolla. In response President Elmer Ellis of the University of Missouri expressed appreciation of the faculties of the University, both at Columbia and at Rolla, for the privilege of exchanging views with these distinguished educators.

At 7:45 P. M. the visitors boarded the Texas Special Train for a further visit of the educational institutions in Texas. Those attending are listed as follows:

1. Professor H. Blaney, Professor of Mathematics, Ghana University-College
2. Professor K. B. Cumberland, Professor of Geography, University of Auckland
3. Mrs. Cumberland
4. Mr. L. H. Downs, Treasurer, University of Hull
5. Mrs. Downs
6. Sir James Duff, Vice-Chancellor, University of Durham
7. Dr. J. P. Duminy, Vice-Chancellor, University of Cape Town
8. Mrs. Duminy
9. Mr. B. S. Hallward, Vice-Chancellor, University of Nottingham
10. Mrs. Hallward
11. Mr. E. L. Morgan, Municipal Engineering, Manchester College of Science and Technology
12. Mrs. Morgan
13. Professor J. L. M. Morrison, Dean of Engineering, University of Bristol
14. Mrs. Morrison
15. Professor R. A. C. Oliver, Professor of Education, University of Manchester
16. Professor C. N. Parkinson, Professor of History, University of Malaya
17. Mrs. Parkinson
18. Dr. V. K. R. V. Rai, Vice-Chancellor, University of Delhi
19. Sir William Robieson, Member of Court, University of Glasgow
20. Lady Robieson
21. Dr. Anthony Steel, Vice-Chancellor, University of Wales
22. Mrs. Steel
23. Mr. J. R. Stewart, Clerk of the Court, University of London
24. Miss Donne Sherwin, of the staff of AUBC Office, London, England
25. Sir George Barnes, Principal, University-College of North Staffordshire
26. Dr. H. B. Thom, Vice-Chancellor, University of Stellenbosch
27. Mrs. Thom
28. Mrs. S. Govindarajulu, Vice-Chancellor of Sir Venkateswara University
29. Mr. U. Kramet, Vice-Chancellor, University of Panjab (Lahore)
30. Mrs. Kramet

Attn: Veterans Heed New VA Amendment

Non-disabled veterans of the Korean Conflict who have interrupted training under Public Law 550 for more than 12 months may be eligible for re-entrance into training under an amended Veterans Administration regulation, P. S. Pollock, manager of the St. Louis VA Regional Office, said today.

The change applies to re-entrance into training in colleges, vocational schools, correspondence courses or on-the-job.

Pollock estimated that more than 17,500 veterans in St. Louis and Eastern Missouri may be eligible to return to training under the amended regulations.

He said "all veterans under Public Law 550 who have timely initiated training, but who have interrupted for more than 12 months, are being furnished an application and information concerning re-instatement by the VA."

"Any veteran not receiving this information within approximately two weeks should contact

the VA Regional Office, 415 Pine Street, St. Louis."

Re-entrance into training will be approved when the interruption was caused by reasons beyond the veteran's control, such as:

1. Where immediate family or financial obligations required him to suspend training to obtain employment.
2. Where the veteran was prevented from continuing his training because of personal or family illness or because of a death in his immediate family.
3. Where the allowable 12-month period during which training can be suspended without VA approval ended during a vacation, recess, or other period during which it was not possible to re-enter school.
4. Where the veteran was required to suspend training because of unavoidable conditions arising in connection with his employment.

Electrical Engineers Hold AIEE-IRE Smoker

A crowd of approximately 250 old and prospective members attended the annual American Institute of Electrical Engineers and Institute of Radio Engineers membership smoker which was held Wednesday evening September 17, 1958. One of the highlights of the smoker was the information on the new Electrical

announced at the smoker that the first program will be "Miracle of Sound" presented by the Bell Systems on Wednesday, October 1, 1958. Also, there will be several interesting field trips planned for the benefit of those interested in either power or electronics. The chief goal of the Student Branch this fall is to obtain the 100% Club. To attain this, 100% of the Electrical Engineering graduating class must belong to one of the national organizations: either A. I. E. E. or I. R. E.

Refreshments consisting of soda, coffee and donuts were enjoyed by all who attended the smoker.

A good number of new members were signed up and we hope that these new members will continue to attend the meetings.

Engineering building presented by Professor Lovett.

Leland Long, President of Eta Kappa Nu, explained the activities and requirements for the honorary Electrical Engineering Fraternity. Leo Hogard, President of the Radio Club, described the facilities available to members of the Radio Club. Mr. Johnson, A.I.E.E. Counselor, then gave an interesting talk in which he enumerated the many advantages of belonging to the professional Electrical Engineering organization. This was followed by a brief exchange of comments between

Mr. Johnson and Dr. Nolte, the I.R.E. Representative, over which team, power or electronics, will win the next softball game at the annual outing. Each year the name of the winner is stamped on that magnificent trophy which so gracefully adorns Norwood Hall. After this stimulating discussion, Dr. Nolte described the many publications available to members of the I.R.E.

The joint student branch has many activities and programs throughout the year which should be of interest to both lower classmen and upper classmen. It was

MSM Alumnus Joins Cities Service Oil

C. Lee Mueller, son of Carmen O. Mueller, 6136 Adkins, St. Louis, Mo., has joined the college graduate training school of Cities Service Oil Co.

Mueller, who received his Bachelor of Science degree in Petroleum Engineering from the Missouri School of Mines and Metallurgy, will be initially assigned to the company's Production Division in Wichita Falls, Texas.

Assignments in other divisions will familiarize Mueller with the over-all operations of the fully-integrated oil company during the training period. Permanent assignment in one of the company's divisions will climax the training program.

While a student at Missouri School of Mines, Mueller was a member of A. I. M. E. and Pi Kappa Alpha. He attended Cleve-

Let's Go Miners... Beat Washington U.!

TRADITIONAL GAME ENTERS 37th TALLY

Tomorrow, Sept. 27, the Miners will enter their thirty-seventh annual game against the Washington University Bears at the St. Louis field.

The MSM-Men should do quite well this year, as they have played two games this season, whereas the Hilltoppers will be playing their first contest. The Miners have had some tough competition so far, in the Tahlequah and Lincoln games, and should be in good shape to meet the St. Louis team.

Recent years have found the M. S. M.-Wash. U. game to be close, and usually a very good game. In 1955 the Miners won by one TD, 20-13; 1956 found the Bears edging the Miners, 14-13; and last year the Washington U. team came out ahead, 14-

7, which shows that, in the last three years, there has been one TD or less difference in the scores. The 1958 Miners should, with their advantage of two games experience, do very well against the Wash. U. eleven, though nothing can be told about the St. Louis team, as they have played no games this season.

The faculty has been kind enough to suspend Saturday's classes this week, to facilitate as big an attendance as possible, so that *Everybody* will be able to see this contest, which will be worth your time to see. Our men will need all the support we can give them, because, when they know there are people in the stands rooting for them, they are bound to play their best, and play to win. See you there!

MSM Beaten By Lincoln, 46-0

by J. P. McKeone

On Saturday, Sept. 20th, the Miners were blanked by the Lincoln University Tigers, 46-0. The Miners did not seem to be playing their usual game, and were no match for the fast, strong team from Jefferson City who, in the opinion of prominent coaches, are one of the most under-rated small-college teams in the nation. With the brand of ball played last Saturday, the Lincoln University eleven could hold their own in many a big-school circuit. Silent witness to the excellence of the Tiger line and backfield is the fact that they gained 331 yards rushing to only 42 for the Miners.

The game started with a bang

for LU, as they set up a continuous drive from the kickoff reception, resulting in a TD only 12 plays later, starting what looked like a complete rout, in which the Miners were not even able to slow down the Bengal charge.

Only one play showed the LU team that the Miners were a team of note, which took place in the game, in which Kamicar grabbed a LU fumble out of the air, and after two lateral passes, marched to Lincoln's 4 from the 3 yard line. Toward the last minute of play of the first half the Miners found themselves temporarily as they completed two fine passes which brought them within six yards of scoring. The two passes brought the ball a total of 55

yards. Booth received the last pass with just a few short seconds left to play. He was brought down just as he went out of bounds in an attempt to stop the clock but the whistle blew just as he did so, ending the first half.

The Miners tried hard but proved to be no match against a squad that was packed with power and speed, against a team that could dodge and turn on a dime. Tomorrow the Miners are back at it to try again... this time against the Washington University Bears in the traditional Wash. U.-M. S. M. battle. The game is set for 2:00 p. m., St. Louis time, so break your plans and make your plans to be there. Support YOUR team!

Football Highlights Autumn Intramurals

Intramurals roll around again, as another school year begins. Football is right off the bat. They have made a few changes in the way the games are played. This year for the first time they will run a double elimination, that is the main change.

All the fraternities and eating clubs are out practicing, running plays, having scrimages and getting into some type of physical shape.

Flag football in some instances is much rougher and harder to play than tackle. For instance in flag football there is no crossbody blocking down field. And the offensive runner can't bowl over a

defensive man, he must spin or side-step away or be penalized. Pulling a flag is not the easiest thing in the world, with a guy spinning and jumping around like a madman. But there is a certain amount of skill required for all sports and flag football is no exception.

The big teams last year were the Engineers and Theta Kappa Phi, with the Engine Club winning out. They later went on to win the intramural championship. The question is to see if they will repeat or if a different out-crown. The teams look just about fit will walk away with the set and this week the games begin. Good luck all.

You're ready for the big entrance...with

Oxford Miniatures

Arrow's newest stripes and checks put you quietly, but firmly, in the "best-dressed" spotlight. They're so crisply and colorfully right with your Fall clothes.

And this rich, new oxford weave is also available in wash and wear!

Try an Arrow and you'll discover why college men buy Arrow 4 to 1 over any other brand. \$5.00 up. Cluett, Peabody & Co., Inc.

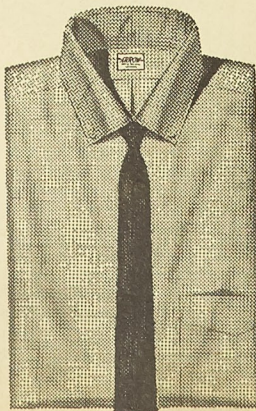

—ARROW— first in fashion

Worth a straight "A" anywhere — come see 'em!

The "A" is for "Arrow" and these Oxford Miniatures are the mark of this Fall's well-dressed college man.

You can wear these crisp patterns confidently anywhere. Yet you virtually can't wear out this new oxford weave.

And we have them in a wide and handsome choice of colors. Drop in and look them over.

Booth, of the Miners, found himself playing against Father Time in last Saturday's game against Lincoln University. With just three seconds left in the first half (see picture, left) Booth caught a pass which brought him within six yards of paydirt. Fletcher, of the Tigers, stopped him there, thus ending the imposing Miner threat.

Fraternity News

SIGMA PI

by Gary Woley

Remnants of the 1957-1958 school year, in the form of dust, welcomed the Sig Pis back to Rolla. After dusting away the past the Sig Pis looked to the future, by means of Rush Week. Rush Week now is completed, the results show twelve new prospective new members to fill the ranks of the fortunate departed. Quality seems to be the chief characteristic of the new pledge class. Hailing from many parts of the country, the new pledges are: Pat Lennis, Lee's Summit, Mo.; Bill Farabee, Jennings, Mo.; Bob Gollhofer, Downers Grove, Ill.; Shelby Hankins, Burden, Kans.; Jerry Leamer, Sioux City, Nebr.; Jerry Metcalf, Savannah, N. Y.; Herb McGilton, Kansas City, Mo.; Bill O'Brien, Paducah, Kentucky; Tom Pinkel, Belleville, Ill.; Don Stih, Rolla, Mo.; Rich Swanson, St. Louis, and Bob Watson, Jennings, Mo. We welcome these men as pledges.

Last semester's small pledge class yields four new initiates. They are Chuck Heileg, Dale Pluhar, Bill Spaulding, and Bill Wasson. Although Bill Spaulding has transferred to the University of Illinois, he will return to be initiated into Sigma Pi on October the fifth. Congratulations are in order for these men.

Although the summer seemed shorter than hoped, many events took place. Brother Al Sheets wasted no time in losing his newly gained freedom, via graduation, by taking the count to the tune of bells. Wedding bells rang for Mary and Al in Springfield, Mo., in August.

The author relinquished his freedom and pin this summer, and Art Jacobsmeier, not to be outdone, returned without his pin after the season's first weekend warriors trip.

Walt Shepard, Harold Olsen and Doug Dallmer brought many ideas and changes back from the 1958 Convocation at French Lick, Ind. Seems they had a good time, along with the serious business considered.

This weekend will see the house quiet. The noise being moved to St. Louis, the Washington U. football game and the Alumni Party that Saturday night. Monday promises an other week of classes.

KAPPA ALPHA

Greetings again from the Kastle atop the hill. The abode is just buzzing with activity as the pledges scurry to do their new-found pledge duties and still find time to explore the immediate area for the beautiful girls they heard about during rush week. Happy hunting, boys, and here's hoping you do better than the thousands who searched before you.

And speaking of hunting: quite a safari ventured forth last Saturday in quest of that elusive quarry known as "the attractive Lindenwood girl." Hunting seems to have improved since I was a lad but the "bag" limit is still about the same. No one returned with a trophy but the feeling is that the herd will move west and enter this vicinity around pledge dance time. Ah, the lilting laughter, the pretty faces, the pleasant party games, the bird dogging...

Flag football will soon be upon us and our stalwart crew, re-enforced by our recently acquired high school heroes, appears ready to wage battle. Led by our speedy backfield, composed of Johnny "Teen-age" "Small Town" Smith, "The Allentown Flash," and "Bouncing Billy," and our line, composed largely of "Blimp," the team looks like a winner?

Well, back to the 3 B's (Books, Bears and Brews). Come back when you can stay longer.

LAMBDA CHI ALPHA

During the past week four new brothers have joined us. The four new Lambda Chis initiated were James A. Colwell, Jerry R. Helgeson, Wayne L. Lucas, and Steve A. Gardner. We want to welcome these new brothers to our Fraternity. With us for the initiation was Wayne Montgomery the traveling secretary.

Our house has expanded in order to meet the demands of a growing membership. With the addition of an annex, Lambda Chi is located on both sides of Pine Street. The annex is located across the street at 1700 Pine, and provides additional facilities for fourteen men.

The Big Team gets into action Tuesday with its first football game, after which everyone will be getting ready for the Washington University Weekend. The boys, after warming up at the mixer at Lindenwood College, are all ready to go back. That is, with the exception of Parks and Cassidy, who said they are giving up everything to make a four-point this semester.

Peanuts, pop-corn, cracker-jacks, and fraternity pins. It has been heard that Douglas has so many dates at Lindenwood, he doesn't know which one to break. He's showing the new pledges the art of love-making. Chuck, our beloved house manager, is just going to show the new pledges the new trash cans he bought. All of us welcome and wish them success in the coming year.

ACACIA

We were having a bit of trouble finding material for this week's column, so someone suggested that we throw Jim Poarch into Frisco Pond to create some news. Unfortunately, Mr. Poarch couldn't be found. Hmmm, I thought I saw him standing here a second ago.

The following pledges have been added to our roster: Darryl Asslemeier, Valmeyer, Ill.; Charles Beatte, Festus, Mo.; Jim Chapple, Independence, Mo.; Bob Deputy, Sorcoxie, Mo.; Dave Drachenburg, Webb City, Mo.; Bill Huff, Webb City, Mo.; Roger Huston, LaGrange, Mo.; Wayne Van Zante, Eddyville, Iowa, and Daniel White, Kansas City, Mo.

Until our annex is finished, our house will be quite crowded; in the second floor sleeping room, the bunks are stacked three high. One of the top bunk men, Bill Gerhart, claims that he should be made an honorary member of the third floor.

One of our men, a sophomore who would rather remain anonymous, has really gone "Joe College." He even went so far as to buy himself a pipe, which promptly made him violently ill. Still a bit green about the gills, R. M.?

The latest word is that the tentative date for our activation is November 15.

DELTA SIGMA PHI

Although the summer was much too short for nearly all Delta Sigs, two brothers found time to tie the marriage knot. Congratulations and best wishes to Dorothy Comer and Art Kincaid, married August 30, and Betty Edwards and Charles Hyde, married September 5.

Rush week, one of the most successful rushes Delta Sig has experienced, resulted in fifteen new pledges for our fraternity. All seem to be on the ball and from all indications, show promise of being an outstanding pledge class. Hats off to Delta Sigma Phi, and an extra congratulations and welcome to all new brothers-to-be.

The football team is shaping up pretty nicely, with some pledges leading the pack. All brothers, however, took time off from football practice September 11, to whip the Pikers in a belated softball game. One can master the little round ball in any season when a tea party is at stake. Right, Dave? Saturday afternoon September 20, the Delta Sigs and the Pikers met to sip their tea, and a good time was had by all.

It seems the first topic to be discussed this semester was a party, so this year may not be so bad after all, fellows.

TAU KAPPA EPSILON

Back with news from 1107 State. Wednesday morning, September 17 found twenty-one fine men pledged to Tau Kappa Epsilon, with a most desirable selection of personalities, and men of both athletic and scholastic prowess. The men pledged were: Gary Block, Don Buller, Dick Greely, Jack Hart, Jim Judkins, Ed Swarze, Jerry Thein, Rich Dunne, and Rick O'Keefe, from the St. Louis area, Tim Brown, of Fairfield, Mo., Jim Dowdy, of Ste. Genevieve, Tom Foster, Osage Beach, Mo., Bob Hyberger, of Mansfield, Mo., Mike Nataluk, of Kankakee, Ill., Gary Roettger, from Arnold, Mo., Ken Stiles, Carthage, Bob Tidmore, from Springfield, Mo., and Kansas Citians: Helmer Jensen, John Robertson, Ralph Shields, Bob Claybaugh, and Larry Carter.

Twenty-one good men who have already started on their duties as pledges, and who should prove themselves to be great assets to our Pledge Class of 1958.

It seems that many of the TEKES took a trip up to Lindenwood last weekend to look over the new crop of feminine pulchritude and to renew old friendships, it must have been a success, because few of the travelers have any complaints as yet. Speaking of travels, everyone is looking forward to the Washington University game and party in the Big City tomorrow, and there should be quite a bit of elbow exercises during the weekend.

THETA KAPPA PHI

Our rushing program during the summer was a great success and our pledges for this semester are: Andy Aylward, Gerald Bersett, Al Dillingham, Pat Duval, Warren Forness, George Hall, John Hall, Don Holtzman, Jim Haffner, Mike Kanlbinder, Dave Lindsay, Mike McDonald, Pat Norausky, Rich Reeves, John Schwaller, Francis Siebert, Jim Spehr, Dennis Trautman, John True and Jim Wunderlich.

We would like to extend our thanks to Mrs. Johnston for the beautiful gift she presented to the house.

Congratulations to Brothers Dennis Camp and Charles Krysl, who were initiated Monday night; also to Bro. Abkemeier, our new historian, and Bro. Burke, our new student council representative.

Now that all the formalities of the new school year are over, we are set for a great year athletically, socially, and educationally (ARRRRUGH!).

BETA SIGMA PSI

With our rushing program nearing completion, we are happy to have pledged Al Brandhorst, St. Louis; Rich Kahl, Shipman, Ill.; Bob Kramer, St. Louis; Marvin Monday, St. Charles; and John Sedovic, St. Louis. We are sure these men will uphold the reputation and high standards of Beta Sigma Psi.

Our football team has been having trouble in practice in between the rains this past week. They are a little weak through the line and a little weak through the backfield but other than that it's a strong team!

We are all looking forward to September 27. After the Bear- Miner football game we are having a hayride and barn dance.

Leo has promised never to close another door, at least not on Saturday nights.

SIGMA PHI EPSILON

A barrage of cheap cigars has started rain down on the inhabitants of the House With The Red Door since they returned to Rolla, and behind this lavish shower stands a few of the renowned Sig Ep Lovers—Frank Weston, Ed Stewart, and Bob Elrod all became engaged during the summer while John Woodward, Dave Anyan, and Ned McLeane took the more drastic step of matrimony. Congratulations fellows and I hope we will still see you every once in a while.

We of Sig Ep are very pleased with the twenty six men in our fall pledge class and we are looking forward to big things from them even though they are "just pledges." Flash for Mr. Marshall—You are now a pledge of Sigma Phi Epsilon. There seems to be a shade of confusion in his mind.

While the football team, the tennis team, and the ping pong team are working into shape the Olympic party team also warms

up for their first event of the season. This comes this weekend when the Sig Eps of Washington U. throw a party in St. Louis. Come on Saturday.

Last but not least I will bring you up to date on the latest count from Johnce's pen pals. At the tone, 95. Letters, letters, he gets stacks and stacks of letters.

SIGMA TAU GAMMA

Tales of summer success come to us from many sources: California, Vegas, Leonard Wood (there are different kinds of success, you know), and more recently from Lindenwood and St. Louis. The Wash. U. game holds a lot of promise too.

Congrats and best wishes to brothers Hertzberg and Lashley, and their newly-acquired spouses. Also to new brothers Allen, Zorowski, Knoll, Butler and Myers, and to transfer Jerry Cadden.

We'll send along wishes of some sort to the new pledge class too. Seriously, though, they look like a fine, stout-hearted bunch. Glad to have you, men.

What was that faculty sponsor Kerr was talking about today? Oh, yeah, grade point. Which means we'd better get off the stump and hit the books. Tomorrow.

PI KAPPA ALPHA

The annual outing with Delta Sig at the Lions Club park, as expected, was a big success. Everyone from both fraternities enjoyed themselves, but we couldn't understand what Fred Berg found so interesting in the middle of the pond. The men are already talking about the next outing.

This weekend is the Washington U. game. Although Frank Baker has left us as did many a poor soul that tried to join the elite Cardinal Club I feel that the new core will be able to come up with a bang up party. That is if our brother chapter at Washington U. can withstand the strain.

The chapter would like to extend its congratulations or is it our condolences, I always get confused, to the men who entered into holy wed lock and our deepest sympathy to the fair young maidens. In case anyone else is thinking of matrimony, I heard one of these men say when asked, "Can two live as cheaply as one?" He replied between cigarettes, "Hell! Two can't live as cheaply as a thousand." That's what it all boils down to.

Two venerable Negro men, pillars of their community and church, were talking about King Solomon:

"Ole Solomon, yessa, he was a mighty wise king," mused the first. "All dem wives and conkabines sometimes I jes wonder how he 'ranged to provide the necessary vittles to feed all his womeens."

"How he fed all dem womens don't interest me none," commented his companion. "I jes like to know what he et himself."

ENGINEERS CLUB

The Engineers' Club has started what looks like a busy year. The board of control admitted forty new members at its first meeting, bringing the total club membership up to almost 120. There are some pretty fair athletes among them, so the Engineers should be in the thick of the intramural race this year.

It takes awhile for forty new guys to get acquainted. With this in mind we are taking a good suggestion and periodically introducing a new member in this column. Our first pick, Glenn Usher, is a freshman from just outside St. Louis. Glenn stands a shade above 6'2" and has the standard burr on top. Playing quarterback on the varsity football team, Glenn has a pretty good passing arm and will bear watching in this and coming years. Lets make him and the other new members feel at home.

The intramural program already has the Cream of the Crop, defending flag football champs, out polishing up their attack in the afternoons. Among the returning lettermen coming in late to chow after a hard workout we noticed T. McNally, Bill Collins, The Hon. Ed Waefieldk, and Bob "S50,000 Legs" Hodge. With these boys and other sparkling talent it seems hardly likely that Engine Club will do anything but WIN.

SHAMROCK CLUB

Welcome back to the old sod of Misery School of Minds, Shamrockers new and old. Special welcome goes out to the 39 new members recently joining the club. HELLO.

A great philosopher once said "marriages are the major cause of all divorces." We hope this is not true in the cases of Dave McNeely, Glen Lambkin, and Lance Cunningham who were wed to a charming trio of young ladies this summer. Congratulations and best wishes to all of you.

Good, plentiful food in the best tradition of the Shamrock Club is being upheld with the addition of Nora Brown, a cook par-excellence, to an already talent-laden trio of cooks consisting of Marnie Seidel, Reba Hargis, and Geneva Duncan.

So, with head held high in hopes of a grade point laden year we leave you with this bit of news just off the wire. After taking a wildlife survey of all college campuses, ours has been selected as the squirreliest campus in the United States.

—Barry Weinschenker

PROSPECTORS CLUB

Welcome! Here we are again for another prosperous (?) year. We would like to welcome back all our members and we hope that they all had a nice summer (except the JOTC boys.)

The club opened on Monday, September 15 and applications were filed by hopeful members. By Wednesday, 46 were welcomed as new members. On behalf of myself and the club, we would like to say we are glad to have you all aboard. Our new president, Ed Thoman is at the helm and we are looking forward to an even better year with him. Good luck Ed. Larry Zeigler, who is our business manager, arrived from California where he worked as a Civil Engineer Assistant. (Big shot.)

In our kitchen, we have new faces behind those dirty plates. They are "Dopey" Joe Johnson, John Miller and Bob Bartholomew. Glad to have you soap blowers with detergent hands in the kitchen.

Last but not least, our football team headed by Bob Ganninger has been practicing these last few days for the big intra-mural games ahead. Our team is sparked by a sharp and promising freshman looking forward to a good man named Tom Nicholson and year with a much better team.

G. D. I. MEETING

Once again Parker Hall was jammed as the G. D. I.'s gathered for their first meeting of the year. After appropriate (?) opening remarks by Pres. John Stoecker and Faculty Advisors Doc Johnson and Mr. Oeffner, the meeting was brought to a state of organized confusion.

First on the agenda was the election of Bob Ganninger as our new secretary, replacing Bud Mosby, who heard the call to defend his country—he joined the Marines. "The Gray Ghost" rides again.

Secondly, the organization voted unanimously to donate to the school the Cinemascope lens and screen. Due to their generosity, the entire student body can now have the opportunity to enjoy "wide screen movies" at any social function held in Parker Hall.

The social committee asked for and received permission to schedule the annual fall outing following the football game with Warrensburg.

The meeting was adjourned and "The Revolt of Mamie Stover" was shown.

Don't forget the big Fall Outing which is tentatively set for October 11.

Many a man sweeps a gal off her feet then goes through married life with the broom still in his hand.

to gain social poise and learn the art of being a gentleman. By holding offices in the chapter, a student receives valuable business training and leadership training. Most chapters conduct meetings under rules of parliamentary law. This gives a member familiarization with these rules and fits him for later participation in community organizations.

On our campus are fifteen national fraternities. All of these

chapters operate their own chapter house. The newest of our fraternity family is Acacia. Started in January, 1958, they have purchased a house at 508 W. 9th Street. Acacia pledged the following men for the fall semester: Charles Beatte, Festus, Mo.; James Chapple, Independence, Mo.; Robert Deputy, Sarcoxie, Mo.; Bill Huff, Webb City, Mo.; Roger Huston, LaGrange, Mo.; Wayne VanZante, Eddyville, Iowa; and Daniel White, Kansas City, Mo.

Beta Sigma Psi is the national Lutheran social fraternity. The Eta Chapter was founded in the spring of 1952 and now occupy a chapter at 206 W. 9th Street. Beta Sigma Psi pledges for the fall semester are Allan Brandhorst, St. Louis, Mo.; Richard Kahl, Shipman, Ill.; Robert Krummer, St. Louis, Mo.; Marvin Monday, St. Charles, Mo.; and John Sedouic, St. Louis, Mo.

The Delta Epsilon chapter of Delta Sigma Phi was chartered in 1956. The fifteen pledges who will spend their time in the chapter house at 200 W. 18th Street are Grenville Rudd, Imperial, Mo.; James Marler, Brosley, Mo.; Frank Smith, Mexico, Mo.; Joseph Kadlec, Brentwood, Mo.; Robert Odom, Doniphan, Mo.; Gary Havenner, Mexico, Mo.; Clellan McPheters, Fairdealing, Mo.; Roger Schild, St. Louis, Mo.; William Rosentengel, Imperial, Mo.; Charles Miller, Verona, Mo.; William Maleskis, Niagara Falls, N. Y.; Ron Featherston, Doniphan, Mo.; Richard Wallace, St. Louis, Mo.; Karl Kneile, St. Louis, Mo.; Glen Starwalt, Farmington, Mo.

Kappa Alpha fraternity is

planning to move from their present house at 1311 State Street to a new house by the fall of 1959. Their pledges for this semester are John Abbot, Springfield, Mo.; Don Anderson, Jackson, Tenn.; Al Copp, Aurora, Illinois; Dale Fanter, St. Louis, Mo.; Bob Fyan, Marshfield, Mo.; H. D. Lucky Strike presents

THINKLISH

—the funniest, easiest way yet to make money!

PUT IN A GOOD WORD AND **MAKE \$25!**

Speak English all your life and what does it get you? Nothing! But start speaking Thinklish and you may make \$25! Just put two words together to form a new (and much funnier) one. Example: precision flight of bumblebees: *Swarmation*. (Note: the two original words form the new one: swarm + formation.) We'll pay \$25 each for the hundreds and hundreds of

new Thinklish words judged best—and we'll feature many of them in our college ads. Send your Thinklish words (with English translations) to Lucky Strike, Box 67A, Mt. Vernon, N. Y. Enclose name, address, college or university, and class. And while you're at it, light up a Lucky. Get the full, rich taste of fine tobacco—the honest taste of a Lucky Strike.
