Tau Beta Pi Admits 39 Honor Students

After a rugged ordeal of nine and one-half hours, from 6:30 p. m. Friday, November 4, until 1:00 a. m. Saturday, November 5, thirty-nine pledges qualified for membership in Tau Beta Pi, national engineering honor society, by passing the entrance examination. Those first-semester juniors who qualified are given a special honor by being designated "Honor Juniors" because of the exceptionally high grade point required of them. They are the following: Lawrence Green, Edward J. Haug, Barry W. Jouse, Benjamin W. H. Jaeger, James D. Kallmeyer, Robert M. Logan, Daniel N. Payton, John P. Plassman, and Paul D. Plavick. The remaining new undergraduate members, second-semester juniors and first and second-semester seniors, are: Donald J. Albers, Donald Annis, Robert L. Jenner, Charles A. Blake, Raymond C. Bretthauer, Roland D. Jayley, Herman H. Dewing, Jr., Harry E. Farmer, Thaddeus E. Flood, Garland K. Grechus, John K. Grindon, Jimmy D. Hahs, Kenneth W. Henry, Dwight R. Hutcheson, Richard T. Johnson, Richard R. Kapfer, Charles A. Kiefer, John B. Kincaid, Thomas J. Lampe, Robert M. Laurensen, George W. Leck, James R. Lynn, Russel M. Ousley, John W. Rick-

etts, Albert D. Sharon, Paul W. Shy, Douglas D. Stickley, Jackie D. Thomson, Joseph F. Urekar, and Rayburn L. Williamson. Dr. E. J. Scott and Dr. M. R. Strunk are the two new alumni members. The final requirements for membership, the formal initiation, was held on Saturday afternoon. At 6:30 p. m. the Initiation Banquet was held at the College Inn in the Hotel Edwin Long. After the meal, Toastmaster Richard Bolander announced John Kincaid as the winner of the pledge essay contest. His essay was entitled "Where Do You Stand" and concerned professionalism in engineering. Announced as first and second place pledge bents were those of Rayburn L. Williamson and Dwight R. Hutcheson respectively. The honors having been done, Toastmaster Bolander then introduced Dr. E. J. Scott of the Naval Ordnance Laboratory in Silver Springs, Maryland, the guest speaker of the evening and also one of the two new alumni members. Dr. Scott's talk bore the title of "The Future of Young Engineers" and was quite interesting. His talk concluded the initiation ceremonies for the forty-one new members, of whom Missouri Beta Chapter is justifiably proud.

Female Guests to Arrive At Three Sat. for Mixer

The long awaited day has just about arrived. Tomorrow afternoon after 2:30 girls will be arriving at our Student Union for "Get Acquainted Party" from 3:30 until 5:30 and for the Mixer which is from 8:00 until 12:00 tomorrow evening. Jazz Central set will provide the music for the dance tomorrow evening. The attire for the Party in the afternoon and the dance in the evening is semiformal. So remember Miners, if you want to date

tomorrow evening all you need to do is be at the Student Union tomorrow afternoon and you may have one.

The names of the winners of the Student Union Bridge Tournament have been placed in the Student Union next to the bulletin board of daily events. Also keep in mind that sometime in December there will be a pool tournament sponsored by the Student Union and all students are eligible to play, the rules will be posted in advance, but if you would care to practice the facilities are available at the Student Union anytime during its hours of operation.

There has been some discussion about a photography contest and if anyone has an interest along this line, tell the clerk at the candy counter. The reason for this is, the Student Union Activities of this sort on the MSM Campus.

The movie this Sunday at the Student Union is; "Man Called Peter" starring Richard Todd and Jean Peters. It is the story of a Scottish immigrant boy, whose conscience would permit no compromise with principles.

Phi Kappa Theta Wins Blood Drive

Last Thursday and Friday A.P.O. held its annual blood drive in conjunction with the local chapter of the American Red Cross. The results of the drive have been tabulated and Phi Kappa Theta has been named the winner with 55 per cent of that house giving blood. Acacia was second with 50 per cent.

A WHO'S WHO

Blue Key Pres. Named Nov. Man-of-Month

Wayne Siesennop, Blue Key President, has been chosen by this organization as November's Man of the Month. Recipients of this honor are selected on the basis of scholarship, extracurricular activities, leadership on campus, and contributions to the betterment of the student body.

November's Man of the Month is originally from North St. Louis County and after graduation from high school in 1957 he entered college here at MSM in the Mechanical Engineering Department. Since that time he has compiled a very impressive record of both scholastic and extracurricular achievements.

Within the Mechanical Engineering Department, Mr. Siesennop is a member of the American Society of Mechanical Engineers and Pi Tau Sigma, honorary engineering society, being initiated into that organization as an Honor Junior. He has been on the Dean's Honor List six semesters and has received the Gold Key Award for his high scholarship.

Wayne Siesennop

While compiling this outstanding scholastic record, Mr. Siesennop has not neglected other facets of student life. He is a member of Beta Sigma Psi social fraternity and has held the offices of secretary and treasurer in that organization. He is a member of the "M" Club, having earned three tennis letters. He is a former member of the St. Pat's Board. In Blue Key he has held the offices of treasurer and, this semester, president. Such active participation in extracurricular activities has earned for him the honor of being selected twice for "Who's Who Among Students in American Colleges and Universities."

Mr. Siesennop has been instrumental in the progress achieved by the Student Union Board since its formulation, having held the positions of assistant director of activities, vice-president, and,

HALLOWEEN MOOD

Mixer With Lindenwood College Is Big Success

The MRHA last weekend held a mixer with Lindenwood College. The girls arrived at 4:30 Saturday afternoon and were shown to their rooms in Farrar Hall. After a brief tour of the

there was also a large amount of hay and other halloween representing things. The credit for the decorations goes to Bob Harris and his decorations committee.

Saturday Night Halloween Dance

campus, the "mixers" ate and then at 8 o'clock the actual party began.

The music for the dance was provided by the "Dealers". They played good swing and slow music, and many of the dormites and their dates were particularly entertained by the exotic foreign style in which the combo played all its music.

The decorations for the dance were designed in the Halloween mood of the season. To accentuate the decor many small haystacks were placed around the dance floor. Behind the band

At 1 o'clock the band stopped playing and the dancers left Rayl Hall. Slowly the 102 girls that had come to Rolla for the mixer found their ways back to Farrar Hall, and at 2 o'clock the party truly ended with the girls all returned to "the little island at MSM".

The next day at noon the Lindenwooders boarded their bus and bid MSM's MRHA a fond farewell, wondering if ever again they were to be so important as to cause their hosts to lock them up and even deny them the use of the telephone.

IBM Associate Engineer Presents Talk On Nov. 9

The joint student branch of the AIEE-IRE featured Mr. James S. Rupp, associate engineer from IBM, on November 9th. Mr. Rupp presented an interesting program on the use of computers in problems of an engineering nature. The talk was given in the Civil Engineering auditorium.

Student membership in the AIEE and IRE is recognized as one of the most essential parts of the society, as the students go so goes the society. Mr. Johnson, head of the student activities committee, attended the AIEE district No. 7 executive committee meeting in Oklahoma City on October 28 and 29. There was great interest and enthusiasm concerning the student activities. Special committees are working to establish closer cooperation between student branches of AIEE-IRE.

The next meeting will be held on December 7th, at 7:00 p. m. at Vickers Electric Company, of St. Louis. A demonstration Lec-

ture on the use of silicon rectifiers will be presented.

Dr. L. H. Lund Writes Article

Dr. L. H. Lund, Professor of Physics, is the author of an article entitled "X-ray Scattering by a Cell-Model Liquid" in the October issue of The Journal of Chemical Physics.

The cell model is one of the (Continued on page 3)

NOTICE

Last week the St. Pat's Board met and decided the following: The theme for the floats this year will be "Famous Quotes"—the one and only benefit movie for this year will be held at the Uptown, Feb. 9, 1961. The movie itself has not yet been picked but will be soon.

NOTC DEPT.

Officers Honored Tuesday, Nov. 1

Three officers of the Military Department have been honored recently in informal ceremonies in the office of Colonel Glenn R. Taylor, Professor of Military Science at the Missouri School of Mines and Metallurgy. Their wives were present in an attempt to surprise the officers.

Mrs. Joseph D. Bennett, 1808 Power Road, pinned the bars of Captain on her husband in the most eagerly awaited ceremony. Mrs. John H. Anderson and Mrs. William L. Durham were present to see their husbands receive The Army Commendation Medal.

Captain Anderson received the award for his outstanding work in intelligence activities while he commanded the 557th Engineer Detachment in Korea prior to his assignment here.

Captain Durham received the award for his meritorious performance of duty in the Seventh Army in Germany, prior to his assignment here.

LETTER'S TO THE EDITOR

Miners Comment on Personal Appearances

Dear Sir,

I am a sophomore at MSM and am just as unneat as anyone around, but I feel that something must be done to improve the general appearance of the student body.

As everyone knows this school does not have many girls enrolled. And speaking generally it is the presents of girls that keeps our co-ed campuses' male population well groomed. Now just because we have a lack of girls does not mean we are entitled to dress in as sloppy a manner as possible.

Not only does the dress around school reflect the non caring attitude of the students, but the general grooming of the student

body does too. Presently many Miners are growing beards out of plain laziness. Beards are, as everyone knows, a sign of the coming of St. Pat's. They are not things to be grown to give the wearers a reason not to shave.

Many Miner contend that good grooming and neat dress are not a necessity here at MSM. This is a mistaken conception. Good manners, good grooming, and neat dress are the signs of a truly educated and cultured man. We are all studying to be engineers and as engineers we will eventually of necessity hold positions of importance in life. In these positions we will be dealing with other educated people and unless we have a certain degree of culture to supplement our educations we will not succeed as engineers. So if we study for four years to become engineers, we should also practice for at least four years the basic rules of good grooming and dress.

I hope the appearances of the student body will improve in the future.

Your copy editor,
Hugh Murray

Course To Improve English is Offered

Beginning Tuesday evening, November 8th, and every Tuesday evening thereafter, Conversational English classes will be held at the Baptist Student Center, 11th and State Streets. These classes are open to all International students and, although no credit hours will be given, it will offer an opportunity for one to improve his facility in using the English language. Mr. Willard Campbell, an instructor in the Humanities Department at MSM will be directing these classes.

Two one hour sessions will be held, at 7:00 and 8:00 p. m. each one being limited to fifteen students. Several openings remain available in each class and those interested are urged to drop by the BSU Center or contact Mr. Willard Campbell to enroll or to obtain further information.

Overheard: "Columbus proved the world wasn't flat, but that was before income taxes."

The best place to spend your vacation is somewhere near your budget.

At a bowling alley, "Get Your Kids Off the Street and in Our Alleys."

Every year it takes less time to fly across the Atlantic and more time to drive across town.

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla, Mo., every Friday during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo., under the Act of March 3, 1879.

The subscription is \$1.00 per semester. This Missouri Miner features activities of the Students and Faculty of M. S. M.

Moderator of "Quiz a Catholic" Show Speaks at Last Newman Club Meeting

The Newman Club had as its guest at the last meeting the noted radio and TV announcer from St. Louis, Lee Cavanaugh. Mr. Cavanaugh, an Easterner and graduate of Syracuse University, has worked on various shows in St. Louis. He is presently the moderator of "Quiz-A-Catholic" on KMOX-TV.

He based his talk upon this show and the work of the Radio-TV Apostolate.

The Radio-TV Apostolate was first started seven years ago by Archbishop Ritter of St. Louis and placed under the direction of Father Frank Mathews. The purpose of the show is to tell the story of Catholicism and to bring it to all people right in their own homes. The show has been very successful while working on a very limited budget. It has been estimated that the program reaches 100,000 viewers each week.

The basic idea for such a program goes back to the time of Christ when He said, "Go therefore and teach ye all nations." The Catholic Church through the centuries has always used the latest means of communication to spread the faith. The Church has

kept up with the times in the media of newspapers, magazines, radio and television.

The show "Quiz-A-Catholic" is an attempt to get across the story of Christ to those who would not be exposed to it under normal conditions. In the confines of a person's own living room he can watch and listen without any special effort.

Making up the panel of this show are priests, nuns, and Catholic lay people. They give candid answers on many questions non-Catholics have concerning Catholic beliefs. The priests know the answers and can correct many incorrect opinions of the Catholic faith.

There are stories of conversions, sometimes even of whole families, which have resulted from this show and others like it. This show is not meant to try and convert everyone, but to instruct in the basic concepts of the faith. Mr. Cavanaugh and Father

Mathews have done a lot of work on this program and the fine results of their efforts can easily be seen.

Last Sunday was Communion Sunday for all Club members at the 10 o'clock Mass. They all sat together in front of church and led the congregation in the responses at the Mass.

At the next meeting there will be a discussion of a religious or political topic, probably a combination of both. The members will be divided into small groups where they can all express their opinions and each group will try to reach some decision on the topic. It should prove to be very interesting and give everyone an opportunity to learn something new.

TV will never replace the newspaper. How you gonna get a TV set into the bottom of a bird cage?

PHYSICS PROF

Dr. Anderson of MSM Publishes

In the July 15, 1960 issue of the Physical Review appeared an article entitled "Effect of Added Gases on the Sensitized Fluorescence Spectrum of a Hg-Tl Mixture" by Richard A. Anderson and Robert H. McFarland. Dr. McFarland is formerly of Kansas State University and is now in industry.

Dr. Anderson joined the MSM faculty in the fall of 1958. He spent last summer at the Los Alamos National Laboratory. His research has been primarily in the field of Spectroscopy. This fall he has been awarded a Research grant from National Science Foundation for \$13,000. The title of the project is "Energy Exchange in Collisions of the Second Kind." In addition to Dr. Anderson there will be several undergraduate and graduate physics students working on the project.

yours?

This is the B-52. Advanced as it may be, this airplane has one thing in common with the first war-galleys of ancient Egypt...and with the air and space vehicles of the future. Someone must chart its course. Someone must *navigate* it.

For certain young men this presents a career of real executive opportunity. Here, perhaps you will have the chance to master a profession full of meaning, excitement and rewards...as a Navigator in the U. S. Air Force.

To qualify for Navigator training as an Aviation Cadet you must be an American citizen between 19 and 26½—single, healthy and intelligent. A high school diploma is required, but some college is highly desirable. Successful completion of the training program leads to a commission as a Second Lieutenant...and your Navigator wings.

If you think you have what it takes to measure up to the Aviation Cadet Program for Navigator training, see your local Air Force Recruiter. Or clip and mail this coupon.

There's a place for tomorrow's leaders on the Aerospace Team.

THIS YOUNG ENGINEER IS ON THE ROAD TO MANAGEMENT

Dick Cotton knew he wanted to take the engineering route into management long before he joined New Jersey Bell Telephone Company. In fact it was his goal when he was working for his engineering degree at Rutgers.

When he graduated, he had his lines out to eleven other companies. He came to New Jersey Bell because: "I didn't feel I was just a number to these people. There was no doubt in my mind that this job would be the best for the long pull."

His first assignment was a tough one. A complex of major telephone cables lay in the path of the approach to the new traffic level of the George Washington Bridge on the Hudson. Dick's job was to find the most practical and economical way to reroute these cables, and at the same time to provide for future telephone growth in the area around the bridge approach.

Dick ironed that one out and got a crack at another tough job.

Next stop: New Jersey Bell Headquarters Engineering Staff, Special Studies Group. Here

Dick was a member of a four-man team whose job was to find ways to eliminate some of the routine work of field engineers to give them "more time to think." Dick also helped plan and control a \$100,000,000 annual telephone construction budget.

Presently, Dick is responsible for telephone equipment engineering projects in the Camden, New Jersey, area.

How does Dick look at it? "This is a growing business. I work with this growth every day. And growth means more room at the top. Of course, I don't figure I'll get there overnight—but on my jobs so far I've had a chance to take a good look at how this business is run. And I think the sky's the limit for a man who really wants to work for it."

If you're a guy who can tackle a tough job and deliver the goods—then you're the kind of man who should find out more about the Bell Companies. Visit your Placement Office for literature and additional information.

"Our number one aim is to have in all management jobs the most vital, intelligent, positive and imaginative men we can possibly find."

FREDERICK R. KAPPEL, President
American Telephone & Telegraph Co.

BELL TELEPHONE COMPANIES

Dr. Wehner von Braun Gives Speech On "Why Must We Conquer Space"

The principal speaker for the first session of the Missouri State Teachers' Association Meeting at Kansas City was Wehner von Braun, speaking on the topic "Why Must We Conquer Space."

He began by listing the missiles that he had worked with. They are redstone, Jupiter, and Pershing missiles. These he worked with while he was with the military. He now works for the Civilian Space Agency interested primarily in space exploration.

The objectives he listed for the Space Agency is to enhance knowledge about space through the Explorer VII just launched.

Why do all this? To discover all sorts of things, not just what you are interested in, and our economy depends upon scientific progress.

How do teachers fit in? They provide impetus for study improvement.

The doctor's comments on education were that it should orientate the class to the fast or the slow student. His answer was the fast student in order to compete with USSR as they push the fast ones. Dull orientation creates a lack of interest on the part of the fast student. Slow orientation is what the doctor classified as "Misunderstood Democracy."

The doctor then compared the USSR and the United States' educational systems.

In the USSR a student applies for higher education, takes a test, and if he passes he can go on with the government paying for everything. He has no distractions.

In the US there are many educational distractions such as money from jobs which do not need intelligence. Russia doesn't

have a free business system so education is necessary. One must make it educationally in Russia in order to make it financially.

Dr. von Braun offers the remedy of more notice for scientists and teachers, and greater financial support for teachers' salaries. He said that we speed millions for crops but very little or nothing for the biggest crop of all—children. He stresses a need for the return to old fundamentals: patriotism, loyalty, honor, honesty, and good hard work among other things.

In his discussion of the practical application of space discoveries he suggested communication, using satellites to trans-

mit from the US to Europe. The American Telegraph and Telephone Company is interested in this. Using a stationary satellite which has a revolution of 24 hours at a height of 23,000 miles, transmission could be made. This could be made. This could also be used for television.

Another use could be weather prediction using Tiros satellite.

A third use is space exploration using a Saturn rocket. The need for humans into space, is that automatic devices cannot anticipate the unexpected.

People involved in space are now in school is the idea of Dr. von Braun.

LEGEND

T BELL TELEPHONE COMPANY AND AMERICAN TEL. & TEL. CO., LONG LINES DEPT.

W WESTERN ELECTRIC COMPANY

B BELL TELEPHONE LABORATORIES

S SANDIA CORPORATION

NOTE: Advanced as well as baccalaureate training is particularly valuable in research and development work in the Bell Telephone Laboratories, Sandia Corporation and Western Electric. Advanced training is often useful but is less important in other areas of work.

The chart above shows where your college education may best fit into the Bell Telephone System and where your interest in particular types of work may best be satisfied. You can choose from many jobs in the Bell Telephone Companies, the operating units of the Bell System . . . the Bell Telephone Laboratories which is engaged in both civil and military communication research . . . the Sandia Corporation which develops atomic weapons and the Western Electric Company, the manufacturing arm of the Bell System.

Bell System offers wide range of job opportunities

There's a wide range of jobs in the Bell System for men with college training in many fields, and with different personal interests.

The diversity in Bell System work makes it possible to offer opportunities in management, engineering and research in the fields of communications, manufacturing, atomic and military ordnance developments, and basic sciences.

Opportunity for Advancement

Your chances for advancement in the Bell System are excellent.

Here are four reasons why:

There is a long-established policy of promotion from within the business.

The Bell System is decentralized. Each Bell Company is fully responsible for its own operations and the delegation of authority to small operating units offers the able man early opportunity to show what he can do in responsible jobs.

The System is rapidly and continually growing. During the past ten years the Bell System has doubled in size.

Southwestern Bell Telephone Co. • American Tel. & Tel. Co., Long Lines Dept. • Bell Telephone Laboratories • Sandia Corporation • Western Electric Co.

Our business is less affected than many by the fluctuating economic conditions. Bell System policies and plans are made for the long pull.

Special Training

You're given special training to further prepare you for your job.

A brief orientation program gives you understanding of the organization as a whole.

Varied assignments give you knowledge and skill needed for supervisory or staff jobs.

Special management training is given you in fields related to your work, including human relations and policies of the business.

Business Character

The Bell System's aim is to give our nation the best possible communication service. Its employees accept this ideal and strive for it.

Within the business you will find friendly associations with people you like, understanding and competent management, and comprehensive personnel policies with outstanding employee benefits.

A Few Laughs

Cora says, "I think the girls in the colonial days were sure dumb for letting men fight duels over them. Say, if two fellows wanted me that bad I'd make them play poker until one lost all of his money. Then I'd marry the other."

The newly married couple were discussing the bad conditions of the hotel which they had chosen for their honeymoon.

"Let's leave this hotel, there is no privacy," implored the bride.

"What do you mean, dear?" asked the husband.

"Why last night when I came out of the bath, my eyes full of soap, I was unable to find the towel and a voice through the keyhole said, 'It's behind you, dear!'"

HERE TODAY;

BROKE TOMORROW

I don't think the Russians will invade the U.S.A. The cost of living is so high they can't afford to stay.

A man and his wife were out walking when they found a water bill on the sidewalk.

Said he: "I'm going to pay this bill, Maggie."

"What do you want to do that for?" she inquired. "It isn't yours."

"No, he replied, "but there's ten per cent discount on it, and I might as well have it as anybody else."

DEAR JOHN'S

Advice to Miners

Dear John,

I have two brothers, one attending Missouri School of Mines and the other was sent to the electric chair for murdering his eighty-four year old grandmother. My mother died of insanity when I was three, my father sells dope to high school students, and my sister is a well known stripper.

Recently, I met a girl who had just been released from reform school where she had been serving time for murdering her husband and child; and I want to marry her. My problem is, do you think I should tell her about Jim who is at MSM?

Signed
Worried

Dear Worried,

By all means DO NOT tell your bride-to-be about your brother. If she knew this, she would live in constant fear that you too may one day decide to attend MSM. This alone is grounds for divorce.

However, if your bride is the fearless type, and she sounds as if she just may be, I believe she could TAKE IT if you decided to come here for your advanced education. You could always get her a secretarial job in the Registrar's Office, or a job as a waiter in the Student Union, or as a bouncer at Shield's.

John

Dear John,

I am a sophomore, and have decided to give up engineering, in fact, I have given up engineering. I am writing this letter from the Student Union at Mizzou. (Man, would you look at the shape of that girl.) I have decided that 4-5 years spent at MSM is just not worth the 4-5 years out of my social life. Friends tried to talk me out of dropping out. Don't you think I did the right thing?

Signed
Free

Dear Free,

Gosh, but you certainly are brave. You actually had the "guts" to quit, chicken out, surrender, give up. You have let the instructors get the best of you. You're not fit to be called a "Miner". By the way, how 'bout sending me some picture post-cards from the outside world.

John

Dear John,

I have a very serious problem. I believe I gave too many C's at mid-semester. How can I avoid this in the future?

Signed
"Teach"

Dear "Teach",

Well, you could give harder quizzes, but that would be the H.S. way to do it. Why not throw away "School Standards", and make up your own standards which the students are to meet. Say, 99-100 for an A 97-98 for a B, 95-96 for a C, 93-94 for a D, and below 93 is an F. This should solve your problem. Gad I'm glad I'm not in your class.

John

Dear John,

I work for the building and grounds committee here at MSM. Everytime we think we have a sidewalk system that will eliminate short cuts across the grass more new cow trails appear. What can we do.

Grass lover

Dear grass lover,

Just keep concreting. Eventually the campus will be just one big sidewalk and there will be no grass left to walk on.

John

Lambda Chi, Prospectors Lead In Intramural Competition

Intramural competition is in full swing and the twenty-four competing organizations are going all out to get as many championships as their ability and

October 31. Since most teams only played one game so far, it is difficult to tell who will be the top teams. The defending champions in basketball is Tech Club

preliminaries will be November 14 and the finals on the 15th.

With results in flag football, table tennis, tennis singles and cross country in, the team standings and total points are:

Lambda Chi Alpha	375.0
Prospectors Club	336.5
Phi Kappa Theta	327.5
Kappa Sigma	303.5
Triangle	290.5
Tau Kappa Epsilon	290.0
Sigma Nu	284.75
Tech Club	271.25
Engineers Club	263.75
Sigma Tau Gamma	254.0
Sigma Phi Epsilon	227.0
Shamrock Club	219.5
Delta Sigma Phi	211.25
Miners '59	165.5
Pi Kappa Alpha	164.75
Dorm	152.0
Beta Sigma Psi	139.25
Acacia	117.5
Sigma Pi	104.0
Wesley	96.0
Theta Xi	67.5
B.S.U.	55.5
Phi Alpha	43.5

Stand Back, Boy

spirit will allow. So far this season Lambda Chi Alpha has taken the flag football title with Phi Kappa Theta the runner up. Shamrock Club won the tennis singles and Phi Kappa Theta was again the runner up. Kappa Alpha was tops in cross country points with Sigma Nu placing second.

In progress now are basketball and handball which both started

while Sigma Nu won the handball singles and doubles last year. Swimming is the next sport everyone is getting ready for. The

Samuel Johnson is said to have described a tax collector as "a minor official of the king, usually born out of wedlock." No kings around here, but just the same...

Teke Takes It Away

An anxious housewife phoned a police station to ask the date of an accident. All she knew was that a milk truck had been involved. The police found in their records that one accident in which a milk truck had been involved.

"What do you want to know about?" the policeman asked.

The woman hesitated. "Well," she said, "that was the day my cat got out and I wanted to know when to expect her kittens."

A business man sent for a plumber to attend to a blocked kitchen waste pipe. The plumber was met at the door by the householder and his wife.

Ready with rolled umbrella and brief case to leave for business, the householder addressed the plumber pompously, "Before I leave," he said, "I will acquaint you with the cause of the trouble, my man."

The plumber removed his cap and bowed to the lady of the house. "Pleased to meet you, I'm sure!" he said.

PUNCTUAL THOUGH

Mrs. Green was chatting with her neighbor over the garden fence. "I think my husband is getting absent-minded," she announced.

"What makes you think that?" her neighbor asked.

"Yesterday morning, when he thought he had left his watch at home he took it out of his pocket to see if he had time to run back and get it."

DEAR ABBEY—"I have been going with a certain man for ten months and yesterday I found out he had a wooden leg. Should I break it off?"

Who's Who in Intramurals

Well known around the MSM campus for his ability in varsity

Charles McCaw

football and intramural athletics is this years varsity football captain, Charles McCaw of Sigma

Nu.

Charlie came to Missouri School of Mines from Rolla High School and immediately continued his high school athletic potential by lettering in varsity football his first year. In his remaining years at MSM he has become noted in many fields of athletics. As a junior he was named All-Conference tackle and will possibly duplicate this honor in his senior year.

In intramural sports last year, Charlie participated in track, wrestling, swimming, and handball for Sigma Nu. In track he tied for first place in the high jump and also holds the school record for the shot put. In wrestling Charlie has gone undefeated in the heavyweight division and in swimming took second in the 60 yard free style.

Not donating all his time to athletics, he was past vice president of Sigma Nu fraternity, four year member of the M-Club, and is active in the American Society of Mechanical Engineers.

FRIDAY, NOVEMBER 11, 1960

Indians Scalp Miners 42-0; Worst MSM Season in History

Jerry Lueke

A poet once stated that "Life is but an empty dream", and Miner gridiron mentor, Bale Bullman, was probably wishing such was the case, Saturday night, as the Cape Indians added another bad dream to a nightmarish season by walloping the Miners 42-0.

Before a shivering crowd, well fortified with spirits greater than two per cent, the red-shirted Indians put on an awesome display of football power. With the exception of several plays, the Cape football majors amassed the 42-0 bulge by simply outslugging the Miners on the ground with off tackle slants and well executed option plays.

The game began on a sour note as the Miners, after returning the kick-off, lost the ball on their first play from scrimmage when Cape received a stray lateral on the Miner twenty yard line. Six plays later, the hard driving Indians chalked up the first of their six touchdowns of the evening.

Following Cape's first touchdown, the Miners had the ball twice but couldn't crack Cape's defense. On the strength of a series of off-tackle smashes, Cape

made the score 14-0 late in the first quarter. Cape scored twice more in the first half, once on a sustained drive and the fourth TD coming on the heels of an intercepted Usher aerial to make the score 28-0 at halftime.

The Indians continued their surge in the second half by racking up their fifth and sixth touchdown in the third period. The Miners made their deepest

penetration into Indian territory in the final period, but the drive stalled on the Cape eight yard marker when the Miners lost the ball on downs. Most of the Miners' offensive load was carried by Ted Deranja and Paul Wiegard, but numerous fumbles in the backfield quickly negated the Miner's offensive thrusts against the faster, better conditioned Indians.

Miners Face Kirksville In Final Game of Season

Tomorrow, the Miners will take on the Kirksville Bulldogs in their final game of the dismal 1960 season. The game will be at Jackling Field and will start at 2:00 p. m. The Bulldogs last weekend clinched at least a tie for the conference title by beating Warrensburg 25-0. Over the season they have won six and lost one. They beat St. Joseph's 20-0, Washburn 39-12, Cape 6-0, Maryville 26-0, Springfield 24-0, and Warrensburg. They lost only to Central Ohio 32-8.

Kirksville has two of the

three leading rushers in the conference in Wayne O'Neal and Dale Mills who have averaged 7.50 and 5.33 yards per carry, respectively. Jack Ball, the quarterback, has completed 49.15 per cent of his passes. O'Neal is also the leading punt returner in the conference.

In a series which dates back to 1909, Kirksville has won twelve, the Miners have won twelve and three games have ended in ties. Saturday's game will decide the leader of the 51-year series. Should the Miners lose, it will be the worst season in Miner football history.

Football Competition in MIAA Ends Tomorrow

With this weekend bringing to a close the MIAA football competition, Kirksville has assured itself of at least a first place tie with Cape and, with a likely victory over the Miners tomorrow, will clinch the championship. Present standings in the conference are:

Kirksville	4-0
Cape	3-1
Maryville	2-2
Springfield	2-2
Warrensburg	1-3
Miners	0-4

It is expected that the three conference games tomorrow will not affect the standings except that Maryville will take over sole possession of third place and Springfield will drop to fourth with a loss to Cape. Around the conference this year, as in the past, there have developed several standouts on the

various teams. Mills, of Kirksville, has once again captured the leading rusher position in the conference gaining 715 yards on 137 tries.

In the passing department Warrensburg's Boyce has received 39 passes for 489 yards with Wiegard and Hill (Miners) receiving 17 and 16 passes, respectively. Cronsiter of Cape has completed 21 passes in 42 attempts to put him at the head of the many excellent quarterbacks in this conference.

On the home front, despite the poor won-lost record, the Miners lead the conference in first downs and have the distinction of the least yards penalized of any team in the conference. See next week's issue of the Miner for the complete summary of conference play.

Results of last week's games:
Cape-Miner 42-0
Maryville-Springfield 16-13
Kirksville-Warrensburg 29-0

Kirksville Game Will End Contest

Today the last batch of predictions will be counted and the winners will be announced in the next weeks issue of the Miner. As of today the following persons lead in the contest with the corresponding number of points.

Fox—61, Brenner—61, Young—63, Montgomery—65, Mueller—66, Stapleton—67, Wedig—74, Tucker—74.

KIRKSVILLE FASTEST

MSM Cross Country Team Places 2nd in MIAA Meet

The Miner Cross country team won second place in the M. I. A. A. Conference Meet held here last Saturday. The returning champions, Kirksville, led by Jim McFadden with a conference record setting time of 20:56.75 for our 3.86 mile course, swept away the top honors again this year.

The Miners' top man was Bob Steiner, who ranked 7th in a race of 36 men with a time of 21:49, a new school record. Bill Silverburg finished third for the top spot on the Warrensburg team, while Gerald Jones did the honors for the Cape Girardeau team, with fourth place.

Tony Barulich added the second place score to Kirksville's score, followed by Lewis at fifth, Sutter at sixth, and North at eighth, to complete the winning score of 22 points.

For the Miners it was the strong teamwork of Bob Steiner at seventh, Dick Woodfield at eleventh, Leslie Sheets at thir-

teenth, John Brown at fifteenth, and Bill Erickson at eighteenth, that brought home the second place trophy for the Miners for the second straight year. Since the cross country team here at Rolla was organized three years ago we have taken first place once and second place twice in a conference consisting of Kirksville, Maryville, Springfield, Warrensburg and Cape Girardeau.

Coach Nick Barre stated that the team's performance in this meet affirmed the fact that we would go to the National Championship competition in Chicago later this year.

Cape Girardeau took third place in the conference with Jones, Bouse, Henderson, Foley and Benthof of their squad totaling up a score of 64 points.

Fourth place went to Warrensburg with a score of 106 points, while Springfield and Maryville tied with 126 points for the fifth and sixth spots.
