## Low Cost Vacation in Cuba Is Offered

A low-cost vacation in Cuba for American students is being offered by the National Student Council for the Fair Play for Cuba Committee.

Student contingents will leave Miami, Fla., December 23 and will return on January 2. The price of the trip, which includes transportation from Miami and all expenses in Cuba, is \$100.00.

The projected tour is part of the Fair Play for Cuba Committee's program to acquaint students with their version of the Cuban situation. The Committee was established last April by a group of distinguished writers, artists, journalists and professionals. Prominent members include C. Wright Mills, Simone de Beauvoir, Truman Capote, John Killens, I. F. Stone, Leo Huberman, Kenneth Tynan, Norman Mailer and Jean Paul Sartre.

Students who wish to make the Cuban trip should make reservations immediately with the Student Council, Fair Play for Cuba Committee, Room 536, 799 Broadway, New York 3, N. Y.

## Rollamo Pictures Planned

November 21 and 22 will be make-up days to give all Juniors, Seniors and Graduate students who haven't had their pictures taken for the Rollamo an opportunity to do so.

Please cooperate. Pictures will be taken from 6:30 to 10:00 p. m. each night. Failure to have your picture taken will result in your picture not being in the Rollamo.

TO SING WITH LINDENWOOD

## MSM Glee Club Moves To New Headquarters

The MSM Glee Club, bigger and better than ever, now occupies the entire top floor of T-1, complete with two pianos, risers, a new coat of paint, and all other musical necessities of a vocal group.

Membership is now closed, however it seems that mother nature did not present this campus with an even distribution of low and high voices. This presents a problem. The club is working hard to prepare a com-

bined concert singing the Messiah with Lindenwood College. This concert is scheduled for December 10, less than a month away, and tenors are needed. So for those tenors who are genuinely interested, membership is still open. If you are able to help out, sound off. You might drop in and see Professor Brewer in the Rolla Building or contact Milt Leet or J. R. Wyatt if you want further details.

## Jazz Central Octet

## 200 Female Guests Come To Rolla Over Weekend

On November 12th the MSM Student Union was the scene of the first all school mixer on this campus, with approximately 200 girls in attendance. These girls hailed from Cottey College, William Wood College, and Stevens College in Columbia, Mo. The 200 guests began arriving at 4:30 p. m. Saturday afternoon. An impressive group of Miners were on hand to greet them. The dance, which was held in the Student Union Ballroom, began at 8:00 that evening, with music provided by the Jazz Central Octet. At 1:00 a. m. Sunday morning the 200 female guests left

Rolla and headed for their respective campuses.

At the end of the seventh round the lightweight staggered to his corner in a dazed and battered condition. His manager approached him and whispered in his ear: "Say, Jake," he muttered, "I have a great idea. Hit him back."

## FOOTBALL, MAYBE

Ardent Little Leaguer Jimmie Lipski, nine years old, looked up from a period of deep concentration and said: "I've been thinking, mommy. What am I going to do when I grow up? . . . I mean, during the off season."

## Sports Predictions Contest Won by Ron Brenner From TKE

By Roger Klienpeter

The sports predictions contest ended last weekend with Ron Brenner being the low scoring contestant for the five conference games. Ron received a new suit

Leslie Stapleton and Bill Montgomery, who tied with the same number of points. Mr. Montgomery and Mr. Stapleton are roommates, but yet both predicted different scores on all five

The following were the scores of the winners:

1. Brenner ..... 77
2. Young ..... 83
3. Montgomery ..... 84...
- Stapleton ..... 84

Pictured above are J. C. Alexander, manager of Bishops, and winners of the Prediction Contest.

from Bishop's Men's Shop as his share of the winnings. The second prize, a \$15.95 pair of shoes, went to Bob Young, who had been in the running all five weeks of the contest. Third prize, \$5.00 set of jewelry, was split between

games. Another note of interest was that Mr. Brenner was the farthest of the four winners from first place after the first game, being nearly twice as far off as any of the other three contestants.

The Miner Board wishes to thank Bishop's Men's Shop for their donations and sponsorship of this contest, and it is hoped that other contests will appear with future sports events.

GOBBLE, GOBBLE

## BSU Traditional Turkey Dinner 6:30 November 22

A traditional turkey dinner with all the trimmings will be served at the annual International Student Banquet given by the Baptist Student Union. It will be held on Tuesday, November 22, at 6:30 in the Educational Building of the First Baptist Church, 9th and Cedar. All International Students of MSM are special guests at the banquet; however tickets may be purchased by BSUs and others interested in attending for seventy-five cents.

The theme for this year's program is "Our World?" and it will be highlighted by two guest speakers: Bennet Kwan, a graduate of MSM and a native of Hong Kong (now employed in St. Louis) and Jim Reed, the city-wide Director of BSU work in St. Louis.

Another feature of the evening will be the presentation of the International Student Hospitality Program. Through this program Internationals are given an opportunity to know some of the people of Rolla better, being invited into their homes. The BSU

feels that understanding one another better can be a great help in improving International Relations.

## Terry N. Turner Receives \$1,000

A scholarship program providing \$1,000 for an outstanding senior in one of the mineral industry curricula and a chance to compete for a \$3,000 fellowship after graduation has been established at the Missouri School of Mines and Metallurgy, Rolla, Mo. Known as the Louis Ware Scholarship in mineral preparation engineering and mining engineering, the annual award was made available by the International Minerals and Chemical Corp., Skokie, Ill. Terry N. Turner, Kansas City, Mo., a senior in metallurgical engineering is the recipient of the scholarship for this year.

## School Holiday Monday, Dec. 19

Under the authority granted it by the Faculty of Missouri School of Mines and Metallurgy, the Student Council has declared Monday, Dec. 19, 1960, as a school holiday.

In view of the excellent cooperation in matters of deportment given by the Student Council, the Social Fraternities, the Men's Residence Halls Association and other groups, the Faculty has voted to add Tuesday morning, Dec. 20, to the one declared by the Student Council.

The Christmas vacation thus begins at 12:20 p. m. on Saturday, Dec. 17, 1960, and ends at 12:30 p. m. on Tuesday, Jan. 3, 1961.

## New Look in Engineering

Engineering has come a long way since the first wheel was designed. It has evolved from a history of inventors, theorizers, modifiers, mathematicians. From the beguiled scientist and the thoughtful mathematician has emerged the ivy-clad, crew-cut young man with the slide rule in his hand.

This process did not culminate overnight. It resulted from centuries of pride obtained from using Nature to make life easier for man. The engineer did not come from a status-seeking group; it arose from a type of individual fiercely proud of his achievements and a civilization thankful for these achievements. Engineering thus became more than a job—it became a respected vocation, a

profession.

Webster defines a profession as . . . "an occupation to which one devotes oneself." Engineering surely fulfills this definition, as what other occupation requires more devotion to obtain success?

We, the engineers of tomorrow, are charged with the duty to keep our profession just that, a profession. The blue-jeaned freshman must prepare himself for the responsibilities of the business world, not solely as a formula-spouting scientist, but as a well-rounded educated individual worthy of the title of Engineer. The MINER encourages all Miners to join their particular professional society and cooperate with it to make engineering an even more esteemed profession.

## Hints for Job-Seekers

All through the month of October, interviewing teams and individuals representing many organizations have been talking to January, June, and August graduates. This will continue through April, 1961; and, although the number of companies is somewhat less than last fall, it is certain that there will be plenty of opportunities for all to find employment.

Most of the companies have become more selective this fall; however, this does not mean that they are only looking for those in the upper quarter of the class. They are looking for students who have something else than a fine engineering education. They are taking into account the student's personality, his participation in extra-curricular activities, and also his overall attitude toward the engineering profession. If one has all four of these he has an excellent chance for getting a very good job.

Some students are not taking full advantage of the scheduled interviews. Everyone is probably in possession of The 1961 College Placement Annual; it is highly recommended that the article, "You Plus Preparation Equals a Good Interview," on page 34, be read. Everyone who reads this article and follows the advice will

for sure have a very successful interview.

The opportunities available are not only from those companies interviewing here on campus but also from almost any organization. They will welcome a letter and an application from anyone interested. They are listed in your College Placement Annual, and their applications are on file in the Placement Office.

Some students have not signed up for interviews with certain governmental organizations for the supposed reason that they are only interested in high grade point men. This is very untrue. Although they do pay a bonus for those in the upper quarter of the class, they are also in great need of those in the lower half of the class and they will welcome anyone interested for an interview.

If anyone has any individual problems that may come up, do not hesitate to come in and talk to Dean Hershkovitz personally.

Hear about the suburb that has so many foreign cars it's been two years since anyone has been hit above the kneecaps.

Nature must have a perverted sense of humor to let spring fever and house-cleaning come at the same time.

## LETTERS TO EDITOR

## Discussion on Saturdays Mixer

Dear sir:

I feel that the Student Union Mixer Saturday was very poorly organized, mainly because the fraternity men (maybe it would be better to classify them as boys) went to the Student Union and took the girls to their own parties. If they wanted to have parties the same weekend they could have seen about having their own girls in Rolla. But instead they had to be so cheap and selfish as to get the girls from the Student Union Mixer. It sure seems that around this campus the "Frat brats" have authority to do most anything.

Sincerely,

A Disgusted Miner.

Author's name withheld for obvious reasons.

Sweet Sue doesn't think sex should be taught in high school unless the teacher really wants to learn.

## Improved Course of Study Offered by ROTC Dept.

Editor's Note: The following is an Intercollegiate Press bulletin which we thought might be of interest to the student body.

Possibly something along this line could be worked out at MSM to ease the load of the advanced cadet.

BRUNSWICK, ME.—(I. P.)—A revitalized course of studies within the voluntary Bowdoin College Reserve Officers Training Corps program was announced here recently by President James S. Cowles.

Beginning with the present academic year 1960-61, advanced ROTC students will take about 30 per cent of their military instruction in regular college subjects taught by civilian faculty members in the general fields of science, psychology, communications, and political institutions.

This option, authorized by the Department of Defense, was selected by the College as most advantageous to the student in

the last two years of the four-year ROTC program.

The new course of studies here will remove some 45 hours of instruction from the direct supervision of the ROTC Department and enable the students to elect certain academic subjects in place of what were formerly subjects of an exclusive military nature.

To permit the change, military subjects such as crew-served weapons instruction will be taught during the six-week summer camp period, normally attended between the junior and senior college years.

The Army anticipates that the new program will stimulate increased intellectual attainment on the part of the ROTC students, lessen the training load on students, and make the overall program more attractive.

*Etc.*—A sign used to make other people believe you know more than you do.

## Zeroing in on the future

At Gen Tel, our aim is to develop the supercommunications system that will be needed to meet the demands of tomorrow. And we're constantly shooting new ideas at this target.

In our 24 research laboratories, more than 3500 scientists and engineers have their sights set on entirely new concepts in order to achieve these results.

Example: a task force of General Telephone & Electronics scientists, working in the unexplored areas of electroluminescence and photoconductivity, have developed an operating model of a switching device with no moving parts, that may revolutionize telephone communications. It is a thin wafer only 3 inches square that may someday connect and disconnect up to 10,000 telephone lines.

Meanwhile, this new discovery holds promise of having numerous applications in other fields, including switching and read-out devices for electronic computers.

Research is but one of the many areas in which General Telephone & Electronics is thinking and working ahead—not only to meet today's communications needs, but tomorrow's as well.

TELEPHONE & ELECTRONICS**

ANOTHER LETTER

## More Ideas Concerning Neat Dress, Good Grooming Expressed Below

Dear Mr. Murray,  
It is obvious from your letter last week's Miner that you have failed completely to grasp the basic concepts of the personal appearance of a Miner. MSM is known not only as one of the oldest and finest engineering schools in the nation but, in spite of this, as a "poor boy's school." For this reason I hope at you are not considering rakes, sweat shirts, letter jackets, and sport shirts sloppy as such. The discriminating critic would consider clean levis and shirts superior to slacks and sport coats that we could not afford to have cleaned as often as regular wear demands. Besides, the wearing of slacks and a good shirt is very impractical in a neat many labs (and every one required to take many labs). And, as for your comments about "I guess you have noticed that they too tend to be more practical than stylish." Your criticism concerning growing beards out of plain ziness makes it evident that you either (1) have never grown beard, or (2) are incapable of

growing one; or you would never call anyone who carefully shaves around, trims, combs and shampoos his beard lazy! For those of us who can and do grow beards they are our "mark of a Miner." The casual attire and apparent indifference on this campus represents a far deeper school and group loyalty than most of us will admit. To be casual in our appearance and indifferent to everything except our schoolwork is one of our forms of togetherness, our way of snobbing the Ivy League by refusing to be led by their whims, our way of proclaiming "I'm a Miner," one of our status symbols.

This is the way of the Miners.  
Casually and unshavenly yours,  
Kimbrough

Sir,  
I notice that you signed your letter "casually and unshavenly yours." I hope you don't plan to approach your engineering career with the same attitude you now have toward good grooming and neat dress.  
H. V. M.

It was late in the evening when the hostess of the party asked the local soprano to sing. "It is too late," she protested. "I would disturb the neighbors." "Not at all," declared the hostess. "Besides they poisoned our dog last week."

A teacher called on the mother of a boy who came to school in a dirty condition.

"Can you explain," she asked, "how he gets his nails so dirty?"

"I expect that's because he's always scratching himself," replied the fond mother."

## Solid opportunities with solid state devices

A big part of Western Electric's job is to manufacture the miniature "new arts" products that are changing the science of communications. It's a job which offers you a challenging career—a chance to plan new methods of mass producing ever-improving kinds of transistors, ferrite devices, diodes, special purpose electron tubes, etc.

You'll be with a company that is expanding rapidly in this field. At present our Allentown and Laureldale, Pa., plants are devoted exclusively to making electron devices, and a big new plant is under construction in Kansas City. The needs of the Bell Telephone System for these products are increasing daily and will multiply enormously with the introduction of Electronic Central Office switching now nearing trial operation.

These devices are changing the scene at all our manufacturing plants as they go into the startling new communications products developed by our associates at Bell Telephone Laboratories. From microwave transmission

equipment to submarine cable amplifiers, our products call for creative production engineering, installation planning, and merchandising methods. Our job for the Bell System and the U.S. government has grown to the point where we are now one of the nation's "Top 11" in industrial sales. And your chance to play an important part in our future growth is solid!

Opportunities exist for electrical, mechanical, industrial, civil and chemical engineers, as well as physical science, liberal arts, and business majors. For more information, get your copy of *Career at Western Electric* from your Placement Officer. Or write College Relations, Room 6106, Western Electric Company, 195 Broadway, New York 7, N. Y. Be sure to arrange for a Western Electric interview when the Bell System recruiting team visits your campus.

## DEAR JOHN'S

## Advice to Miners

Dear John,

Last Friday night, I was stopped by the "cats in blue" for driving with only one front headlight. I had been out and consumed a few, and was really sweating when this fellow told me to get it fixed P. D. Q.

What really has me worried, is why was this guy so nice to me?

Signed  
Wondering

Dear Wondering,

Consider yourself lucky, and get the headlight fixed P. D. Q.

John

Dear John,

Well, I took your advice and wrote six letters for dates this past weekend. I wound up with five dates. None of my friends needed a date, and trying to date five girls in one weekend without them finding out, really took the fire out of me. Thanks to you, I may never be able to get a date again if these girls find out.

Signed  
Five of 'um

Dear Five,

Well, it's your own fault, you had my name and address. I could have personally handled two, and I have a friend who could have taken one. That would have left only two, and if you cannot keep up with two, you don't deserve to have a date in the first place.

John

Dear John,

Well, another party and more "Bird-dogs." What are we guys who go to all the trouble to write and obtain a date, then drive to bring her down going to do?

Signed  
Rooked Again

Dear Rooked Again,

If you can't lick 'em, join 'em.

John

Dear John,

Well, I see the Football team had a perfect season, they lost them all. What do you think is the trouble?

Signed  
Fan

Dear Fan,

Fan H\_\_\_\_\_, they didn't lose all the games, we did. If the student body would take a more active interest in our football squad, maybe they would have more incentive to win. You ask what's the trouble? Well, there are so many things that it would take this complete column, and part of another to list them all, and 80 per cent of it has nothing to do with the team itself.

John

Dear John,

Where can I obtain a copy of SHOWME?

Signed  
Reader

Dear Reader,

Be at the Student Union with your money in your grubby little fist the next time a copy is placed on sale. You should have no trouble.

John

## --TGIF TICKLERS--

A kindly old soul asked the seven children of an acquaintance to tea. The youngsters ranged from three years to fourteen. As they streamed into the drawing-room, her brain reeled and their Christian names failed her.

"And which are you dear," she asked a solemn boy of seven,

helplessly.

"Me?" he said importantly. "I'm the one with spectacles."

"You are charged with Oomph in a built-up area," said the judge..

"Excuse me m'lud," said the prosecutor, "that should read 60

m.p.h.!"

"I think you've got the wrong number, madam," said the doctor on the 'phone, "I am a doctor of music."

"I know," was the reply, "I'm suffering from a singing in my ears."

# TOUGH

...SO

you'll be  
SAFE!

You'll agree with us, there's no substitute for safety in a life insurance policy.

In Indiana, where our home office is located, our tough, time-tested state insurance law requires that we invest only in legally approved securities and with wide diversification.

Furthermore, the Compulsory Deposit Provisions of the law require that . . .

**Our reserves, to the total amount of the net value of all outstanding policies, are on deposit with the State of Indiana at all times.**

In addition, College Life is regulated by the insurance laws of 35 other states, and the District of Columbia, where we operate.

You just can't beat safety and security like this. When you add on all the

other major benefits you get from College Life's BENEFACITOR policy, you'll find it's far and away the best buy for your money.

Get the full story about THE BENEFACITOR from your local College Life representative.\*

MINER FEATURE OF THE WEEK

# The Art of Understanding Women

It can't be done. That's the considered opinion of countless theorizers, from traffic cops to tragic poets, who've tried to fathom feminine motives.

Said one 19th century versifier, an Englishman with the unlikely name of Coventry Patmore:

A Woman is a foreign land  
Of which, though there  
he settle young  
A man will ne'er quite  
understand

The customs, politics  
and tongue.

Other thinkers, more successful with the pretty and puzzling ex, have milady all - well, almost all - figured out. Gib Supple, Ad Director of Shulton, has compiled some of these valuable clues to making a hit with Her, and Her, and Her.

1. *Act devoted.* Brush imaginary dust from her shoulder, hold hands under the dinner table, touch your lips to the glass her lips have touched, and don't worry if the gesture seems old hat or corny. These suggestions, for instance, come from a 2,000 year old treatise on "The Art of Love." Did they work? So well that Ovid, the author, was obliged to write a sequel telling men how to avoid entangling alliances!

Other tips from Ovid's first work: lose to her at gambling, yield to her smallest whim, be sure those sitting behind her at the circus don't thrust their sneezes into her back.

2. *Act jealous.* A man who's unreasonable, within reasonable limits of course, is one of the most effective ego-builders a woman can have. Therefore, grumble a bit when she smiles fetchingly at another man. If you're still single and not yet at the going-steady stage, ask if she's free for a date in a tone that implies you think you're competing with at least two other guys. Never let her suspect that you know you're her only beau, even if you know it for a fact!

3. *Know what to say.* Suppose she's made an obvious effort to look glamorous and you can't remember whether you've seen the dress before. Or you'd like to compliment her on her flair for fashion but you wouldn't know the difference between an Empire line and a chain gang. Get out of it gracefully, and effectively, by saying simply, "How lovely you look!"

4. *Learn to read her signals.* Many men suspect, and many women cheerfully admit, that women have a language of their own, expressed in tonal variations and pauses between words as well as in the words themselves. You'll never speak it, but for optimum success with bilingual ladies, it behooves you to understand a little of it.

Watch out for the significant

pause. Have you asked her if your pooch can come along on your romantic evening stroll, and has she hesitated just a few seconds before saying yes? Drop the subject; if Rover comes along you'll be in the doghouse. The same goes for a cautious, over-polite tone; if she'd really love to go to your class reunion, she'd

head and the distance from her nostril to the corner of her mouth for clues as to her intelligence, temper, and virtue!

5. *Watch your grooming.* Women have one trait in common with the less beautiful sex; they feel flattered when a date or mate takes special pains to be attractive. Beau Brummel broke hearts

Old Spice, is "built into" every conceivable grooming aid, from shower soap to after-shave lotion to hair shampoo—and a special hair grooming cream known as "Short Cut!"

6. *Give the right type of gift.* Gifts, like courtesies, should be small and frequent, rather than rare and extravagant, if you're going to give her the sense of appreciation she craves. Take a tip from Napoleon, who courted his second bride by arranging to have flowers sent to her every

day—more than a century before the days of flowers by wire!

7. *Accept her faults.* Presumably your objective is to join 'em, not beat 'em, so why start needless arguments? Is she always late? Be unpunctual with her! (Your hosts may understand.) Recognize that certain beliefs are fixedly rooted in the feminine mind, and don't attempt to debunk such articles of faith as the following: every woman could be pretty if she'd just

(Continued on Page 8)

have said so heartily. Be alert, too, for the hint so indirect as to be the opposite of what it sounds like. "Don't bother to get anything for my birthday" really means "don't forget, now", and don't you forget it.

But if you think this is tough, ponder what your fathers and

in 19th century England simply because he had a good tailor, and Lord Byron's collars, cleverly arranged to bare his muscular throat, set all of female Europe a-throb. Lacking new safety razors and Old Spice, 16th Century swains powdered and perfumed their beards. Today's men

grandfathers went through; to understand women circa 1900, some young men resorted to the pseudo-science of phrenology, scanning the shape of milady's

can—and do—avoid romantic scrapes not only with extra-fine razor blades, but with an amazing variety of scented toiletries. The best selling male fragrance,

## EE Prof Attends AIEE Conference

by Larry Mattler

Dr. Robert D. Chenoweth, of the EE department, attended the second "Power Industry Computer Application Conference." This conference was sponsored by the AIEE in St. Louis, and brought together electric power system engineers and digital computer specialist to discuss problems of mutual concern.

## SAME Will Honor Best Shot

by Larry Mattler

It was decided at the SAME meeting, held on October 27, to award a target pistol to the top man on the varsity rifle team each year. It was also decided to have a joint meeting with the Fort Leonard Wood chapter of SAME.

Captain Durham, the chapter advisor, gave a talk on the purpose of the SAME chapter and the future of a civilian with SAME. This was followed by the showing of a movie on World War II and the awarding of the door prize, a cigarette lighter.

## Political Science Prof to Visit BSU

Dan Grant, Professor of Political Science at Vanderbilt University, will be visiting at the Baptist Student Center, 11th and State St. on Saturday afternoon, November 19, for a Round-table discussion on the United States and International Relationships.

Professor Grant is well qualified to lead in a discussion on this subject, having spent the past year teaching in Indonesia. While there he served as a representative of the U. S. Government under a program to further international understanding.

Anyone interested in joining the group is invited to come on over.

Rrefreshments will be served.

## Understanding Women

(Continued from page 7)

spend as much time on herself as that model in the magazine; all bachelors are secretly unhappy with their lot and—perhaps the most cherished belief of all—no man really understands women.

A minister was very fond of cherry brandy, and one of his elders thought he would play a joke on him. "I'll give you a bottle of cherry brandy," he said, "if you promise to acknowledge it in the church magazine."

The minister undertook to do this, and in due course a paragraph appeared in the magazine thanking the donor for his gift of fruit and the spirit in which it was given.

Confession may be good for the soul but it's bad for the reputation.

What's so difficult learning the rhumba? You just wave goodbye—without using your hands.

NORTH AMERICAN AVIATION, INC. 

# Kappa Sigma Wins Swimming; Dorm Takes Second Honors

Kappa Sigma's dominance of intramural swimming was closely challenged by a strong Dorm team this year. The meet was not decided until the last relay in which Kappa Sigma placed first and Dorm third, making Kappa Sigma the winner by a margin of one meet point.

Kappa Sigma's 30 meet points came by way of four firsts, two seconds, one third, while Dorm had three firsts and a tie for first, two seconds, and one third for 29 meet points.

All of the events showed better quality of swimmers competing, as well as a larger number of entries, indicating the importance of this intramural event on team standings. The most exciting event occurred in the 60-yard backstroke where Bersett of Phi

Kappa Theta was timed first with a time of 37.7 seconds but due to a disagreement of pickers in this very close race a tie was

awarded to Mitz of Dorm. This

time of 37.7 seconds is very fast and broke a record of 39.5 seconds which was made in 1946.

queer; For after going from bar to bar, He went from beer to bier. The magazine *Changing Times* said: "Another thing that hasn't survived the income tax is the old theory that you couldn't be wounded by a blank."

Latest in the record album title sweepstakes: This one's by Don Costa and His Free loaders for those who indulge in one too many. Its title: "Shing Along With Ush."

Overheard: "I blame most of our cyclonic winds on the poli-

tics, but this Chilean earthquake probably was caused when Khrushchev opened his mouth in Paris."

Kappa Sig trophy winner

Firemen sent to answer a "smoke in the basement" call from an apartment in Fairfax County, Virginia, found an over-heated clothes dryer and some scorched items of feminine apparel which no one in the building would claim. The firemen reported to headquarters: "Returning to fire-house. Falsie alarm."

Here lies what's left of Peter Carr, Whose life was brief and

## Who's Who in Intramurals

By Roger Klienpeter

The athlete who has probably done the most in keeping Triangle fraternity near the top in intramural sports is Allen Meskan, a well-built senior, who is skilled in many of the various campus sports. Allen helped his house flag football squad to a league pennant this past season by playing both offensive guard and defensive linebacker. He is also a volleyball player, a left fielder for the softball team and plays horseshoes for his organization, being on the 1957 doubles team that took first place.

In boxing, Allen has two first-place medals (1957 and 1960) and a runner-up medal (1959) all in the heavyweight class. To continue still further, he has had high average in IFC Bowling for the last three years besides having high game and high series last year. If this isn't enough for his

busy schedule he entered into three intramural swimming events that were to be held this past week, those being the 60-yard backstroke, the 60-yard medley and the 120-yard medley relay.

Allen's activities outside of sports include SAE, Student Union Board committees and Mechanical Engineering. He is a graduate of Taft High School in Chicago, Ill., and is planning to graduate from MSM this coming January.

### Allen Meskan

Haughty Girl: "I'd have you know that my father is an English peer."

G. I. Dance Partner (cheerily): "That's O. K. My pop's an American Doc."

There ain't no justice in this here land;

I just got a divorce from my ol' man.

I had to laugh at the judge's decision;

He gave him the kids an' they weren't his'n.

One of the final events

## Pi K A Making Strides Toward Basketball Title

Intramural basketball, this year, is almost half over and the Pi K. A. cagers seem to be building for top place in their league. Holding wins over Tri-

angle, 37-35; Sig Ep., 44-37; and Shamrock Club, 33-25, they will be trying for their fourth straight win this week when they meet Sigma Pi.

THE MISSOURI MINER

FRIDAY, NOVEMBER 18, 1960

## Miner Football Ends in 54-14 Loss to 1st Place Kirksville

By George Hoffman

The Miners ended the worst season in football history at MSM Saturday, when they were defeated by Northeast Missouri State of Kirksville by the score of 54 to 14. Kirksville halfback Dale Mills set a new collegiate scoring record when he scored five touchdowns on runs of 2, 66, 7, 34 and 8 yards, and also plunged for three two-point conversions. Ron Kruger the other halfback, scored the other points on runs of 22, 31, and 20 yards. Paul Wiegard and Ted Deranja each scored a

touchdown for the Miners and Wiegard also ran a conversion for two points. The score at half time was Kirksville 28 and the Miners 14.

The Miners lost all nine of their games this year and only came close to winning two of the games. They lost to Martin Branch by one touchdown and to Warrensburg by only two points. They were not even in the rest of the games, losing by such scores as 42 to 0, and 54 to 14. The only other season in which the Miners failed to win a game

was in the war year of 1945 when they played only four games. They reached their peak in 1950 when they won the Corn Bowl, but have been on a decline ever since.

Next year does look a little brighter with the return of two of the leading rushers and scorers in the conference—Paul Wiegard and Ted Deranja. Also returning will be such experienced backfield men as Jay Alford, Glenn Usher, Bob Olson and Arnold Hill.

(Coming Soon)

## Missouri Miner Basketball Contest

### BASKETBALL SCHEDULE

Thursday, Dec. 1	S. I. U. Alton	Alton
Saturday, Dec. 3	Evangel College	Rolla

Wednesday, Feb. 22	Evangel College	Springfield
Saturday, Feb. 25	Cape Girardeau	Rolla

## MSM Places Eleventh in Nation's Small Colleges

By Larry Bailes

MSM Miner Cross Countrymen placed eleventh in the NC-AA Small College National Meet held in Wheaton, Ill., last Saturday. This is the first season since cross country was organized on this campus three years ago that Coach Nick Barre has been able to enter a squad in this meet.

The Miners' top man was Leslie Sheets with a time of 21:58 for a 3.9 mile course to place fortieth in a meet of 150 runners. Bob Steiner was the second Miner scorer, with forty-eighth place for a time of 22:12. John Brown and Sherman Brady brought home places 55 and 73 with respective times of 22:21 and 22:49,

to be the third and fourth Miners to top the first place time that took last year's meet. Bill Erickson completed the Miner score of 292 points with ninetieth place.

The only other school from our NIAA Conference that entered the National Meet was Kirksville who walked off with fourth place with a total point score of 153.

The Number One Team of the Nation for small colleges is Central State of Ohio at Wilberforce, Ohio. Their team score was 72 points.

John Mullholland of Loras College, Dubuque, Iowa, a school of about 300 enrollment, took first place with a time of 20:28.

## SIDELINES

By Roy Kleinpeter

As we look over the 1960 football season we see the worst lost record in MSM history. This record being 9 losses and no wins. A composite of this year's record is:

- MSM 14; Southern Illinois U. 34
- MSM 12; Washington U. 34
- MSM 6; Kansas State Teachers 52
- MSM 12; U. of Tennessee (Martin) 20
- MSM 22; Maryville 53
- MSM 7; Springfield 20
- MSM 21; Warrensburg 23
- MSM 0; Cape Girardeau 42
- MSM 14; Kirksville 53

As a team it is obvious that MSM did poorly this year but the individual records of the players look a little better. With results from four of the five conference games in, Paul Wiegard is fifth best in rushing in the MIAA with 5.15 yards per carry and is second as a pass receiver. Glenn Usher has been hitting about 37% of his passes which is eighth best in MIAA while Charlie McCaw is just out of second place in punting with 36.3 yards per kick. Another point worth noting is that MSM has had more first downs than any other team in the conference.

Now looking at the other side, the Miners were outscored almost three to one (171-64) overall and had more total yardage made against them than any other team in the MIAA. So, it is seen that this side of the picture out balances the individual records, resulting in a last place position. It would be difficult to make a reason or excuse for this except that it seemed when the team got close to pay dirt in a game they let down instead of putting on that little extra steam. For example in the Tennessee game the Miners had 21 first downs to Tennessee's 6 and 238 yards rushing to Tennessee's 94 but were beaten 20-12. One of the Vols' touchdowns resulted in their recovering a Miner fumble after the Miners had worked the ball inside the Tennessee ten yard line. Again, in the Warrensburg game which the Miners lost by only two points, a Miner fumble was recovered by the Mules in their own territory which resulted in a TD. The Miners also lost six other fumbles in this game. As the total first downs and yards from scrimmage show (MSM ranked high in both categories), they could move the ball down field but not far enough for it to pay off.

MSM will be losing 16 of its players this year due to graduation, of which 13 are lettermen. Also, 13 of the 16 men were in the starting line-ups either offensively or defensively. This undoubtedly will hurt the already plagued team even more, and does not give much hope for next year unless Coach Bullman can pull something out of somewhere.
