# Dave Brubeck Quartet Gives Inspiring Concert

Colorful. Talented. Well-schooled. Sincere. Swinging. These are just some of the adjectives that describe Dave Brubeck, one of the most important figures ever to appear on the jazz scene.

Colorful. He's a tall, intense, enthusiastic man in his mid-thirties, who hides none of his emotions when he is playing, or, for that matter, when he is talking. And when he speaks, he speaks in-

with the touch and the technique of a classicist, and yet he is a musician who definitely knows his jazz, who feels it, and who has the fortunate ability to transmit his knowledge and his feelings via his unique and brilliant improvisations.

Well-schooled. Much has been previously noted about Brubeck's having studied with the famed Darius Milhaud at Mills College,

Dave Brubeck Quartet appears at Rolla High School gymnasium.

Intelligently, not only of his music, but of people and the world around him. His personality has intrigued not only his fellow musicians and his followers, but also many, many people who have been attracted to jazz specifically by Brubeck, himself.

Talented. Dave is an extraordinary musician. He is a pianist

and of course, much of Dave's classical training has seeped through into his jazz, so that his work has been often cited as the best blending of the two kinds of music. His training began when he was four. His teacher was his mother, a pianist. At nine he was playing the cello. A few years later he began his jazz career, playing in both dixieland and swing outfits. He majored in music at the College of the Pacific, where he also led a twelve-piece dance band. He continued to study while in the army and after his discharge, returned to Milhaud and to further piano lessons from Fred Saatman.

Sincere. There is nothing phony about Brubeck's music or about Dave, himself. He believes implicitly in what he is doing. He believes in it and he enjoys it, as becomes patently obvious to anyone who has ever seen him work. Though his is basically a modern sounding group, it is not a cool-acting group of musicians. Born in 1920 in the San Francisco area.

## Ponnwitz Heads Council Officers

Student Council officers for next year were elected on April 27. Incoming officers are: Al Ponnwitz, president; Bob Graham, vice-president; Mike Hardie, treasurer; Jim Chase, executive committeeman; and Jim Peterson, secretary. Student Council offices are divided and alternate every year between fraternity and independent representatives. This year the offices of president, treasurer, and secretary were chosen from among the independents. Vice-president and executive committeeman were open to fraternity men. Next year this will be reversed and the top offices will go to the fraternity representatives. This insures equal representation from all on campus.

The Annual Student Council Banquet will be held on Sunday, May 23, in the Crystal Room of the Carney Manor Motel. The officers will be honored for their fine job done the past year as well as the new officers installed. Bill Norfleet, the past president, will be presented with a gavel. Dean Thompson will end a fine evening by being the guest speaker.

Last Tuesday, Al Ponnwitz met with the presidents of all the campus organizations. This was the first meeting of its kind and its purpose was to insure campus coordination between the Student Council and all organizations.

UNIVERSITY OF MISSOURI AT ROLLA

VOLUME 51

FRIDAY, MAY 21, 1965, ROLLA, MISSOURI

NUMBER 30

## Outstanding Cadets Honored At Annual Brigade Review

The annual MSM ROTC Brigade Awards Review was held on Jackling Field at University of Missouri at Rolla, Tuesday, May 18th. Awards were presented to outstanding cadets by Doctor Dudley Thompson, Dean of the Faculty and Director, School of Engineering, Colonel Denmark C. Jensen, Professor of Military Science, Missouri Military Academy, and other distinguished guests of the MSM Military Department.

Dean Thompson presented the Board of Curators Award to Cadet Colonel Dannie R. Clarida, Senior, New Burnside, Ill.; Cadet Staff Sergeant James H. Evans, Sophomore, Vandalia, Mo.; and Cadet Private Gary L. Mann, Freshman, St. Joseph, Mo.

Dean Thompson, who holds the rank of Colonel in the U.S. Army Reserve, also presented the Armed

Forces Chemical Association Award to Cadet Master Sergeant Floyd W. Jennings, Junior, Warrenton, Mo., and the Sons of the American Revolution Award to Cadet Platoon Sergeant Daniel N. Leininger, Sophomore, Belleville, Ill.

Colonel Jensen, chief of the U.S. Army inspection team conducting the Annual General Inspection of the MSM Military Department, presented the Association of the United States Army Award to Cadet Master Sergeant Gary D. Rueter, Junior, St. Louis.

Professor Ernest W. Carlton, Chairman of the Department of

cadets in each class: Cadet Brigadier General Richard C. Cleve, Senior, Farmington, Mo.; Cadet Master Sergeant Carl H. Westenberg, Junior; Cadet Platoon Sergeant Michael S. Clayton, Sophomore, Hayti, Mo.; and Cadet Private Robert J. Feagute, Jr., Freshman, St. Joseph, Mo.

Colonel Robert H. Nau, U.S. Army Reserve, Professor of Electrical Engineering, MSM, and immediate past president of the Missouri Department, ROA, presented the Missouri Department ROA Awards to: Cadet Platoon Sergeant Kenneth W. Kaiser, Sophomore, Sedalia, Mo.; and

Doctor Dudley Thompson, Dean of the Faculty and Director, School of Engineering, congratulates U.S. Army ROTC Cadet Private Gary L. Mann upon presentation of the Board of Curators Award for the Freshman Class at MSM ROTC Brigade Awards Review on Jackling Field, Tuesday, May 18th. Dean Thompson holds the rank of Colonel in the U.S. Army Reserve.

Civil Engineering, presented the Society of American Military Engineers Award to Cadet Lieutenant Colonel Ronald W. Umphrey, Senior, Kansas City, and to Master Sergeant Carl H. Westenberg, Pleasant Plains, Ill.

Colonel Glenn R. Taylor, USA-Ret., former Professor of Military Science at MSM, presented the Department of Army Superior Cadet Awards to the outstanding

Cadet Private Lester C. Roth, Freshman, Festus, Mo. Cadet Master Sergeant John R. Ruser, Jr., Poplar Bluff, winner of this award for the Junior class was in the hospital and could not be present to receive the ward.

The Boy Scouts of America Award was presented by Doctor Gerald B. Rupert, Assistant Professor of Geophysical Engineering, MSM, and District Scout Commissioner, Big Piney District, Ozark Empire Council, Boy Scouts of America. The recipient of the award was: Cadet Colonel Charles F. Seger, III, Senior, St. Louis.

The Distinguished Military Musician Award was presented to Cadet Master Sergeant James E. West, Junior, Edwardsville, Ill., by Professor David L. Oakley, Director, MSM ROTC Band. Professor Oakley also presented Kappa Kappa Psi Awards to Cadet Staff Sergeant Rodger L. Elliott, Sophomore, Alton, Ill.; and Cadet Private Daryl F. Sohn, Freshman, Kirkwood, Mo.

Lieutenant Colonel Lester D. Stowell, USAF, 29th Air Division Headquarters, Richards Gebaur Air Force Base, Mo., presented the Armed Forces Communications and Electronics Award to Cadet Lt. Col. David E. Henard, Senior, Murphysboro, Ill.

The Rolla Chapter ROA Award was presented to Cadet Colonel Russell C. Lindenlaub, Senior, St. Louis, by Doctor Harvey H. Grice, Professor of Chemical Engineering, MSM.

## Dr. John Schwada Guest Speaker at Commencement

Over 600 degrees will be granted at commencement exercises at MSM on May 30.

Included in the 600 degrees are 10 degrees of doctor of philosophy, the largest number ever granted at Rolla. Eight women students will receive their degrees, also a record number of women graduates in any one year. Eleven professional degrees will be awarded to outstanding alumni.

Dr. John W. Schwada, chancellor of the University of Missouri, Columbia, will be speaker at commencement exercises which will be held at 5 p.m. The Rev. Edward Coffman, Jr., minister of the First Christian Church, Kirksville, will speak at the baccalaureate service at 10 a.m.

## Gaylord - Blue Key Man of Month

Blue Key's selection for the May Man of the Month is Thomas K. Gaylord, a senior majoring in Physics. Tom came to MSM from Kansas City, Missouri, where he attended East High School. Since arriving here he has distinguished himself both in the classroom and in campus activities.

Tom is a member of Sigma Nu fraternity and has served as president, vice-president, treasurer, and steward during his membership.

His record of activities in campus organizations includes president of Sigma Pi Sigma, a national physics scholastic honor society; membership in Tau Beta Pi and Phi Kappa Phi, both national scholastic honorary fraternities; president and alumni secretary of Blue Key, a national honor fraternity; membership in Theta Tau, a national professional engineering fraternity; membership

in Alpha Phi Omega, a national service fraternity; membership in

TOM GAYLORD

the MSM Chapter of the American Institute of Physics; Presi-

dent of Kappa Mu Epsilon, a national mathematics honorary society; membership in the AIAEE; and membership in the MSM Nuclear Engineering Society.

Among the many honors conferred upon him during his career as MSM are Who's Who in American Colleges and Universities, a National Science Foundation undergraduate research grant (four semesters), the Phi Kappa Phi Book Plate Award, a National Science Foundation Fellowship for graduate work in electrical engineering, and consecutive placement on the Dean's List for seven semesters. In spite of his many activities, Tom has maintained a 3.6 overall grade point.

In view of his achievements, anyone can easily see that Tom is a dedicated worker and a true leader. A salute to Tom Gaylord — Blue Key's May Man of the Month.

Dave Otto receives Theta Tau Freshman of the Year Award at the IFC Banquet.

## Professor Carlton Ends Lifetime of Teaching

Prof. E. W. "Skipper" Carlton, who will retire at the end of this academic year after 42 years on the faculty at MSM, was honored here Saturday night at a dinner at the Student Union.

Almost 300 friends, colleagues and former students gathered to honor Prof. Carlton. Hundreds of others sent their greetings.

Prof. Carlton joined the faculty of MSM in 1923. Since 1955, he has been chairman of the department of civil engineering.

Presiding at Saturday night's affair was Dr. Curtis L. Wilson, dean emeritus of the Rolla school and long-time associate of Prof. Carlton's. Dr. Wilson characterized Prof. Carlton as "Mr. Engineer" in Missouri for his efforts in elevating the standards of the engineering profession. Prof. Carlton was one of the founders of the Missouri Society of Professional Engineers, and the second president, serving two terms.

### TWENTY YEARS OF SERVICE

## Infirmiry Nurse Plans to Retire

The Miner would like to salute Mrs. Stella Miller for twenty years of faithful and devoted service as a nurse caring for MSM students through the MSM infirmiry. Mrs. Miller came to the MSM Infirmiry Staff on December 12, 1945, which was then under the direction of Dr. E. E. Feind. The Infirmiry was then located at 10th and State Streets; the present location of the school dormitories.

Mrs. Miller is a licensed practical nurse who received her training at Lincoln, Ill. and has taken refresher courses in St. Louis from time to time. Her first employment as a nurse, working for Dr. M. K. Underwood, was in a maternity hospital. She helped deliver several boys who are now students here at MSM notably Bill Anderson and Mike Tulloc.

Mrs. Miller has been a resident of Rolla most of her life. She has a daughter, Mrs. Sue Wiganwsky and three grand children, Robin, Jan and Terry. After Mrs. Miller retires at the end of June, she plans to spend some time visiting in Grand Rapids, Michigan, possibly to make her home there.

Once again, Mrs. Miller, our thanks for many years of helping and caring for Miners through the MSM Infirmiry.

Dr. Elmer Ellis, president of the University of Missouri, lauded Prof. Carlton for his professional activities, and his wise judgment. He is a fine teacher whose "work lives on in his students and in his many students who have themselves become teachers."

A native of Colorado, Prof. Carlton received his B.S. in me-

PROFESSOR E. W. CARLTON

chanical engineering and M. S. in industrial education at Colorado State University. He received his B.S. in civil engineering and the professional degree of Civil Engineer from MSM.

Prof. Carlton will receive the title of professor emeritus of the civil engineering at commencement exercises May 30, climaxing his many years of service to the school, the state and his profession.

### BRUBECK QUARTET

(Continued From Page 1)

where his home has been ever since, he leads a direct, unfettered personal life devoted to his family.

Swinging. This is perhaps the most controversial of the five descriptive adjectives. A swinging beat is, to Dave, as it is to many jazz performers, the basis of all jazz. If a musician doesn't swing, then he's not a jazz musician. Dave Brubeck is most definitely a swinging, romping, jumping jazz pianist who, working both with his group and against it, achieves a tremendous, exhilarating beat.

The performance Monday night, May 17, was tremendous and exciting. The majority of the tunes were played by the quartet. The quartet featured Dave and his close, personal friend, Paul Desmond, an exceptionally talented alto saxist, whose voice has become an integral part of Brubeck's jazz. His style is a combination of modern and swing era jazz. The tone is liquid and light; the harmonic ideas are in today's idiom. Paul's time is more of the swing era; his melodic line has all the warm emotion of hot, rather than of cool jazz.

Dave and Paul share almost all the solos. With the rhythm section, consisting of Eugene Wright on the bass and Joe Morello on the drums, supplying the basic beat, Brubeck and Desmond take off on excursions. The high spot of the entire performance occurred when Morello performed one of his more memorable drum solos. Eugene Wright plays a very demanding bass solo with an occasional interlude of 4-time playing by

## Phi Kappa Phi Initiates Thirty-Five as Brothers

Thirty-five upperclassmen and graduate students were initiated into the honor society of Phi Kappa Phi. Two Rolla High School students were also honored when the organization held their spring initiation and banquet at the Student Union, May 14.

John P. Legsdin and George C. Miller, Rolla High School seniors, were presented Pickett slide rules by Professor Robert Nau on behalf of Phi Kappa Phi. This was awarded as recognition of scholarly achievement in the sciences.

Dr. Paul Dean Proctor, professor of geology and director of the School of Science, was guest speaker. His topic was "Geology of the Moon."

New officers were announced. They are Dr. Joseph H. Senne, president; Dr. Doyle Edwards, vice president; Prof. William J. Jensen, secretary-treasurer; and Prof. Carl Christiansen, journal correspondent.

Phi Kappa Phi is a national scholastic honor society, open to outstanding students in all departments of American colleges

Brubeck on the piano. The concert ends with *Take Five*, a Desmond composition in 5/4 and one of the most defiant time-signatures in all music, for performer and listener alike — perhaps the Quartet's most popular and dynamic tunes yet to date.

## Watke Honored by IEEE

Donald E. Watke, senior Electrical Engineering major, has been elected outstanding Electrical Engineering Junior by IEEE. All EE students of either the first or second semester with a three point grade average or better were first voted on by the faculty. When narrowed down to seven students, the final choice was made by a vote of the IEEE students. The award was sponsored by the St. Louis section of IEEE.

Don is active in a number of honor fraternities including Eta Kappa Nu, of which he has been corresponding secretary, Tau Beta Pi, Phi Eta Sigma and Phi Kappa Phi. He has also been a member of IEEE, Radio Club and Prospectors Club. Donald will graduate in January 1966, spending only three and one half years

in college. Don works for Professor Nau during the semester and for Black and Veatch consulting Engineers of Kansas City in the summer.

After graduation Don will try for a fellowship for graduate work at either the University of Illinois or Michigan. He plans to go into research and development and possibly specialize in computer Science.

Wouldn't you really rather own a Buick? It may be easier than you think to own one.

## Blue Key Selects AICHe As Society of the Year

The American Institute of Chemical Engineers has been selected the winner of the Blue Key sponsored "Professional Society of the Year" contest for the school year of 1964-'65. The Institute of Electrical and Electronic Engineers and the American Institute of Mining Engineers, Mining Section were selected as first and second runners-up respectively by faculty judges.

This contest was initiated by Blue Key National Honor Fraternity two years ago in order to

give recognition to the outstanding professional organizations on campus for the fine job they do of serving the student and projecting the image of the school. The University of Missouri at Rolla should be proud that on its campus are some of the best professional organizations to be found on any college campus.

Congratulations are in order for the officers, faculty advisor, and members of A. I. Ch. E. for making their organization the "Society of the Year."

## Various Topics Discussed At Dr. Baker's Final Chat

At the final Chancellors Coffee Chat of the year Chancellor Merl Baker and Dean Paul Ponder answered questions from the students concerning cutting classes, fraternity pledging, the accrediting program, and the new building funds. The chat was held in the lounge of the student union on May 13.

When asked if a student should be dropped when his grades are above a C when he has been cutting the course, they answered that this is entirely up to the teacher and the department. The purpose of attending class is two fold, first to learn and second to contribute, and this what the rules are based on.

Whether entering freshmen should pledge a fraternity or not filled a large amount of the time. Chancellor Baker stated that this

depends on the fraternity and the amount of the demands that are made on the student. He also stated that he thinks the IFC should investigate the matter and straighten it out by themselves. The school feels that the fraternities should be able to initiate 80 percent of the students that pledge.

There will be summer registration for entering freshmen this year. This should cut down on the long lines that were present in the first semester of the current school year.

The idea of a departmental meeting of the students and faculty each semester was brought up. This would provide a chance for the faculty to explain their grading system and the students to air any complaints that they might have. The people attending were generally in favor of the idea.

UMR came out very well in the recent accrediting check by the Engineers Council for Professional Development. More humanities will be added to each curriculum along with some minor changes. Such courses as economics can no longer be classified as humanities courses. The number of hours required for graduation will also be lowered in some departments.

Still under consideration by the faculty is the six week drop rule. Chancellor Baker stated that the school needs more students to pass without lowering the standards of the school and this may provide a partial answer. Also the classes would become set sooner and more could be accomplished.

In the near future a curriculum of systems engineering will be added to the schools set up. This is a cross between industrial engineering and computer technology for training in industrial management. It is not however a substitute for a good technical training.

There will be fewer 7:30 classes in the future. However, they are and will be necessary in such rooms as G-6 in the Chemical Engineering building which are in constant use.

When asked about the appropriations for the new buildings on campus, Chancellor Baker said, "All we can do now is wait and see what the legislature does. We are pretty sure of getting most of what we want in the next few years."

## Success Marks Spring Arts Festival

The first annual Spring Arts Festival of the Rolla Arts Association was considered a success by the Association members as it ended at 6:00 p. m. Sunday, May 16th.

Association members express their appreciation to those who attended.

The festival was held on the playground of the Pershing grade school at 6th and Main Streets in Rolla. It was well attended by persons interested in the arts. In addition to the Rolla residents, some of the guests came from St. James, Newburg, Jefferson City, and St. Louis.

The Rolla Community Orchestra played to a near capacity crowd at the Rolla Community Hall on Sunday afternoon as the major part of the Musical Division's contribution to the festival. The concert was well received. The Rolla Community Orchestra is directed by Professor David L. Oakley, Director of the MSM ROTC Band.

An instrumental trio from the Musical Division performed on Saturday afternoon. They were: Carol Johnson on the flute, Greg Goldbogen on the oboe, and Mrs.

C. A. Johnson at the piano.

Harold Cleveland, Mrs. James C. Maxwell, Miss Sue Fisler, and Mrs. Howard Rollin also presented literary readings on Saturday afternoon.

Twenty-seven artists of the Visual Division exhibited their

works at the festival, 38 members of the Rolla Community Orchestra performed in the concert, and thirteen writers of the Literary Division had their works included in the book, "TILT," published by the Literary Division for the festival.

#### TESTS, AND HOW THEY GREW

Just the other night I was saying to the little woman, "Do you think the importance of tests in American colleges is being overemphasized?" (Incidentally, the little woman is not, as you might think, my wife. My wife is far from a little woman. She is, in fact, nearly seven feet high and mantled with rippling muscles. She is a full-blooded Ogallala Sioux and holds the world's shot put record. The little woman I referred to is someone we found crouching under the sofa when we moved into our apartment back in 1928, and there she has remained ever since. She never speaks except to make a kind of guttural clicking sound when she is hungry. To tell you the truth, she's not too much fun to have around the house, but with my wife away at track meets most of the time, at least it gives me someone to talk to.)

But I digress. "Do you think the importance of tests in American colleges is being overemphasized?" I said the other night to the little woman, and then I said, "Yes, Max, I do think the importance of tests in American colleges is being overemphasized." (As I explained, the little woman does not speak, so when we have conversations, I am forced to do both parts.)

But I digress. To get back to tests—sure, they're important, but let's not allow them to get too important. There are, after all, many talents which simply can't be measured by quizzes. Is it right to penalize a gifted student whose gifts don't happen to fall into an academic category? Like, for instance, Finster Sigafoos?

She is a full-blooded Ogallala Sioux...

Finster, a freshman at the Wyoming College of Belles Lettres and Fingerprint Identification, has never passed a single test; yet all who know him agree he is studded with talent like a ham with cloves. He can, for example, sleep standing up. He can do a perfect imitation of a scarlet tanager. (I don't mean just the bird calls; I mean he can fly south in the winter.) He can pick up BB's with his toes. He can say "toy boat" three times fast. He can build a rude telephone out of 100 yards of string and two empty Personna Stainless Steel Razor Blade packages. (This last accomplishment is the one Finster is proudest of—not building the telephone but emptying the Personna packs. To empty a Personna pack is not easily accomplished, believe you me, not if you're a person who likes to get full value out of his razor blades. And full value is just what Personnas deliver. They last and last and keep on lasting; luxury shave follows luxury shave in numbers that make the mind boggle. Why don't you see for yourself? Personnas are now available in two varieties: a brand-new stainless steel injector blade for users of injector razors—and the familiar double-edge stainless steel blade so dear to the hearts and kind to the kissers of so many happy Americans, blades so smooth-shaving, so long-lasting that the Personna Co. makes the following guarantee: If you don't agree Personna gives you more luxury shaves than Beep-Beep or any other brand you might name, Personna will buy you a pack of whatever kind you think is better.)

But I digress. Back to Finster Sigafoos—artist, humanist, philosopher, and freshman since 1939. Will the world ever benefit from Finster's great gifts? Alas, no. He is in college to stay.

But even more tragic for mankind is the case of Clare de Loon. Clare, a classmate of Finster's, had no talent, no gifts, no brains, no personality. All she had was a knack for taking tests. She would cram like mad before a test, always get a perfect score, and then promptly forget everything she had learned. Naturally, she graduated with highest honors and degrees by the dozen, but the sad fact is that she left college no more educated and no more prepared to cope with the world than she was when she entered. Today, a broken woman, she crouches under my sofa.

© 1965, Max Shulman

Speaking of tests, we, the makers of Personna®, put our blades through an impressive number before we send them to market. We also make—and thoroughly test—an aerosol shave that soaks rings around any other lather: Burma Shave®, regular and menthol.

## ROTC Extends Deadline Date For New Program

Application deadline for participants in the new two-year ROTC program has been extended beyond the previous May 15 closing date. An application will be accepted from any qualified student, providing it can be processed in time for him to attend either the June 14 or June 21 ROTC summer encampment.

The new two-year program, to be taken in the junior and senior years, opens ROTC opportunities to the man who, for some reason, was unable to participate in the basic course in his freshman and sophomore years. The program includes two six-week summer training periods prior to the junior and senior years, in addition to on-campus instruction during the school term.

The students who enters ROTC in his junior year will receive a retainer fee of \$40. Cadets attending the first, basic ROTC summer training camp will receive \$78 per month. During the second training session, termed advanced summer camp, the cadet will be paid at the rate of \$120.60 per month, the same rate paid students in the four-year program.

Young men in this area who desire to participate in the new two-year program are urged to contact the professor of military science of the ROTC detachment at MSM.

# Miner Editorials, Letters and Features

## The "Miner" vs "ROTC"

Dear Editor:

I refer you to your article titled, "Students to Receive M. S., B. S. Degrees during Commencement" in your May 7th Miner.

You will recall that the article discussed degrees to be granted and the number of semesters required for students to earn these degrees.

I was particularly concerned about two paragraphs in this article which I considered quite damaging to the ROTC Department. I became more concerned when, after investigation, I found the comments to be UNTRUE.

Let me quote the two paragraphs to refresh your memory:

"Many of those who took more than 9.4 semesters are taking 4 years of military. The 20 hours required by the Military adds up to an extra semester of school."

"... a person taking four years of military could also go on probation, thus multiplying his problems and the time needed for graduation."

Referring to the first quoted paragraph, University records prove the statement wrong in its entirety. Observe this compilation of FACTS:

a. For the 84 Advanced Course cadets that were graduated in the Spring, Summer and Fall semester (Jan. 65) of 1964, the average number of semesters to complete their schooling was 8.7 which is 0.7 semesters less than your stated national average of 9.4 semesters and 0.3 semesters less than the 9.0 semester average for the MSM graduates of January 1965. (Later statistics from the Dean of the Faculty.)

b. The grade point average of these 84 students was 2.67 as compared to the overall grade point average of 2.29 for the student enrollment in January 1965.

In addition you should know that the 20 hours required by the Military was not over and above that required for a degree. The University, itself, required 8 hours of basic military for physically qualified individuals and in the case of engineering students gave six hours credit towards a degree for advanced (12 hours credit in science). So where you refer to the 20 hours adding up to an extra semester, you actually are talking about 6 hours. I am sure that you will agree that these extra six hours do not necessitate an extra semester and the statistics above prove this to be the case. In short, the semesters in school for military students was actually less than for the total senior enrollment.

Relative to your second statement about probation and military further increasing the students problems, evidence available does not support your contention. True, during the Freshman and Sophomore years, a student was required to take military whether or not on probation. However, no students having serious academic difficulties have been permitted to enroll in the Advanced Course.

In short, Mr. Editor, I feel that your allegations are incorrect. Additional semesters over the normal has been and is due to bad grades and not due to the Military as the referenced article so pointedly inferred.

David L. Gundling  
Colonel, US Army  
PMS

(Editor's Note: The statistics mentioned in this letter are more exact than those used in the article mentioned.)

## Students Propose Communication With Washington to Voice Opinion

Once again, it seems, the students and faculty of MSM must in some way apologize for the behavior, tactlessness and lack of comprehension of our sister Universities, especially those within our own state. Government foreign policy, the war in South Viet Nam, has been the target of repeated juvenile outbursts on college campuses across the land; yet no outburst has come from technical or engineering schools in general and our school in particular. Why?

Engineering students are trained in deduction, well versed in logic and have intelligent regard for fact and reality. The "case" against the war in Viet Nam can be substantiated only by a total disregard for logic and fact. This explains the Washington U.'s faculty letter to McGeorge Bundy, Special Assistant to the President, the University of Missouri at Columbia's picket lines and the many, many ridiculous actions of the students and faculties of other universities.

I believe that we, the students and faculty of MSM, should communicate to the President of the United States and the officers and men of our armed forces fighting and dying in South Viet Nam, our whole-hearted support and thanks for a job being done well.

Edward L. Will, Thomas M. Bohn, John T. Jackson

## THE MINER

THE MISSOURI MINER is the official publication of the students of the University of Missouri at Rolla. It is published at Rolla, Mo., every Friday during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo., under the Act of March 3, 1879.

The subscription is \$1.25 per semester. This Missouri Miner features activities of the Students and Faculty of U. M. R.

## Miners' Firefighting Assistance Saves Campsite from Destruction

Dear Editor:

On Sunday, May 2, some of the students from your school volunteered to fight a fire that was burning on our property. I want to write this letter of commendation for these fine young men.

We had many people in camp over the weekend and the fire was discovered just before the last 6 or 8 people were leaving. They fought the fire for many hours themselves and were relieved to see your students arrive at the campsite at 11:00 p.m. that night. I understand that most of the boys arrived back at their dormitories around 1:00 a.m., so that they did fight the fire for several hours.

The assistance of these students was invaluable in getting the fire under control. On behalf of all those who have put in endless numbers of hours working on the campsite I want to thank these boys for contributing this service to our organization.

Sincerely,  
Mrs. J. F. Yancey  
President  
Camp Fire Girls, Inc.

It's getting to be that time of year again when the sky gets overcast, the trees turn brown, and the flowers begin to die... not autumn, like most of you think... it's FINAL TIME!! Now you will be able to learn just how much you didn't learn during the semester. You will see where all of your midnight oil went to.

It's a fine season for professors; they love to sit in front of their array of quizzes and extraneous text books (dating back to the time when books were printed by hand) and pull out some of the most ridiculous questions and problems imaginable. It's open season on students and believe me, there is a tremendous mortality rate. Shotguns which only a few weeks ago resounded singly now are combined into twenty-one gun salutes.

Are we going to stand for this kind of treatment? Shall we let a small number of big bullies kick sand in our faces like we were 97 lb. weaklings? If you stop and think about it, what could they do if none of us showed up for any of our finals? They could flunk us all? Don't fool yourself... they need us just about as bad as we need them (and that is debatable). How would it look if registration day rolled around and the school officials found, much to their astonishment, that the estimated enrollment for next semester was approximately 50?

Even though this is a rather far out example, it does show what we can do if we all stick together. Maybe some of our beloved faculty members would even realize that it is not merely a small per-cent of the students that are discontented, but that it is the masses that hate to be drug through the fantastic farce of their ferocious finals.

# GREEK WEEK IN REVIEW

## Kappa Alpha - Reigns As Greek Week Victors

Under the direction of the Interfraternity Council, the Greek Week games and festivities held last week proved to be a tremendous success. Kappa Alpha won the overall trophy for the third straight year with a total of 30 points. Second place went to Sigma Pi with 22 points, followed by Lambda Chi Alpha with 20 points.

All of the proceeds from the Carnival at Lions Park Friday night were given to Boys' Town. Sigma Pi made the most money at their booth, followed by Kappa Alpha and Tau Kappa Epsilon in second and third places, respectively. Kappa Alpha took first place for booth decorations at the Carnival. Second place went to Sigma Pi, while third place went to Kappa Sigma.

The Greek Week games began at the Grotto at 12:30 with the chariot race, which was won by Lambda Chi Alpha. Tau Kappa Epsilon and Pi Kappa Alpha took

second and third. Although many of the chariots and chariot runners were worn and battered after the race, they were outstanding examples of fine workmanship before the race. Delta Sigma Phi, Kappa Alpha, and Sigma Nu had the best looking chariots, respectively.

After the chariot race there were other games including the tomato race, the egg-head contest, the balloon race, the egg throw, the girls' limbo contest, and the tug of war across that "beautiful" pond at the Grotto. Kappa Sigma won the tug of war over second place Sigma Nu and third place Lambda Chi Alpha. The first place award for the games went to Lambda Chi Alpha. Second and third were taken by Kappa Sigma and Kappa Alpha.

Greek Week certainly was one of the finest party weekends of the year for the fraternity men on campus.

## Fraternities Collect One Thousand Dollars for St. James Boys Town

Last Friday evening, the Greek Weekend festivities began with the spirit of the carnival prevailing. The various fraternities on campus all were working hard trying to make plans for a good cause. Each house built a booth as in years past and tried to influence as many passer-bys as possible to compete in some contest and show their skill.

When all the proceeds were turned in at midnight Friday, IFC Carnival Chairman Gene Kalkorn announced that the funds reached the \$1000 mark as compared to last year's \$625. It is hopeful that we can increase this amount and raise even larger sums for Boys Town of Missouri through future Greek Week Carnivals.

Each booth was judged on originality of theme, how well the theme was presented, how well it was decorated, and the most money taken in Sigma Pi's Bowling Game took first place, netting the most profits. Other booths placing in the judging were Kap-

pa Alpha's Skillball, Kappa Sigma's Ring-A-Duck, and Sigma Nu's Turtle Race. The Carnival was topped off by several hundred

Gary Bardon (Phi Kappa Theta) IFC President presenting Mr. Philip W. Repert, the Superintendent of Boys Town of Missouri,

Miners and their dates dancing to the music of the Reandos who played from 11 p.m. to 1 a.m.

Shown in the picture above is Gene Kalkorn, IFC Carnival Chairman (Kappa Sigma) and

a check for \$1000. The check was presented on Monday and was followed by a very interesting and informative tour of Boy's Town for several of the IFC members on hand for the occasion.

## Gods and Goddesses

From left to right in the above picture is: Marcia Mensinger of Theta Chi, Glenn Miller, Hades; Patricia Jungers, Theta Xi's queen candidate; Tom (Hephaistos) Ferguson; Gary (Zeus) Bardon; Judy Schmutzler, Greek Week Queen; Gary Nickens, Dionysos; and Bruce Bridges, Hermes.

Below is the man size horses pulling chariots in annual Greek Week event.

## IFC Awards Scholarship Trophy

The annual IFC banquet was held in the Student Union Building on May 13, 1965. After the people in attendance enjoyed a meal prepared by the Student Union, Delta Sigma Phi was awarded the scholarship trophy for the first semester. Beta Sigma Psi was awarded the scholarship trophy for the most improved grade point.

The IFC Man of the Year was also announced at this time. He was Bob Ricketts, a senior in metallurgical engineering. The junior IFC representatives were given their shingles at this time along with the hope for a promising year to come.

The guest speaker for the evening was Dr. Mathews, the Director of Student Personnel at the University of Missouri at Columbia. He spoke on the importance of fraternities and their place in a higher school of learning.

Part of the evening's entertainment was furnished by the well known KA singers who sang several well liked folk selections.

Dr. Mathews, seated directly to the right of the podium, was guest speaker at the annual IFC banquet.

## Alpha Chi Sigma Honors Initiates With Banquet

The Beta Delta Chapter of Alpha Chi Sigma, professional chemical fraternity, held its spring banquet at the Crystal Room on Sunday evening, May 9, 1965. The banquet was honored by the attendance of Dr. Dudley Thompson, Dean of the Faculty; Dr. Mailland Strunk, Chairman of the Department of Chemical Engineering; and Dr. William Webb, Chairman of the Department of Chemistry and Midwest District Counselor for Alpha Chi Sigma.

The banquet was held in honor of the new initiates, Dr. William

J. James, Dr. Jacques Zakin, and Jim Schlosser. Also honored were the following winners of the Alpha Chi Sigma awards: Dennis Krauss, Freshman Award; Gary Graham, Junior Award; Thomas Dunning and Donald Bugg, co-winners of the Senior Award. Dr. S. B. Hanna and Dr. "Ollie" Manuel were announced as the winner and runner up in the Alpha Chi Sigma Professor Snart election in the Chemistry Department. Dr. Hanna was unable to attend but his "shaft" was accepted by Dr. R. L. Venable. Dr. R. M. Wallek and Mr. R. A. "Rusty" Primrose were the winners in the Chemical Engineering Department. The money received through voting is being used in the Alpha Chi Sigma safety program.

Dr. K. G. Mayhan, chapter advisor, provided entertainment with four classes of jokes, and also introduced Dr. Eiton Park as the new chapter advisor. Dr. Mayhan will take a one year leave of absence to do post-doctoral work at the Mellon Institute. Also in attendance was Dr. Arliss Martin, whose quick wit and humor added much to the evening.

Nice trophy . . . suggests the smile on Dick Paul's face as he accepts the IFC scholarship trophy. Delta Sigma Phi won the trophy with a grade point average of 2.43.

## Lambda Chi Alpha Salutes Brothers Active on Campus

The horseshoe team placed third this year with Brother John Paul leading us on. The IM golf team, of Phil Petiford and Gerry Trantina, weathered terrific competition this year and took the second place honors. In addition, Gerry tied for medalists. In varsity golf, Bill Stoltz, Bill McCracken, and Larry Parks, have represented Lambda Chi, and MSM very well. Brother Parks led the team to a second place victory in the MIAA Conference.

Lambda Chi's annual Apple Polishers Party was a resounding success this year. The skits were excellent, and both we and the instructors had an outstanding time.

George Gasparovic was recently elected Secretary of Theta Tau and Treasurer of Blue Kay; Barry Basden, Vice president of Alpha Sigma Mu; Jim Strickler, Vice President of ASME; Larry Parks, President of Circle K; and Orvil Johnson, Secretary of ASTM. We are proud to have these men leading their respective campus organizations.

To conclude its year in intramurals, Lambda Chi is proud to announce winning the second place trophy. It was a very close decision, with only 1 3/4 points separating us from Sigma Nu.

## Alpha Phi Omega Gives Eshbaugh Life Membership

Prof. Clifford Eshbaugh, who for many years has been faculty adviser of Alpha Phi Omega service organization at MSM, has been honored by the group with the presentation of a life membership, Dennis Worley, president, has announced.

Prof. Eshbaugh, who has been a member of the civil engineering faculty for 22 years, has been active in APO work for many years. He has been faculty advisor of the local chapter since 1953.

Alpha Phi Omega is a national collegiate service organization which was established in 1925. The University's Beta Omicron chapter participates in book exchanges, blood drives, charity drives, and helps with the cerebral palsy school. In addition it provides guides for campus open houses and performs other services for the University and community.

## Military Personnel Make Ready For Departure to Summer Camps

Eighty-one MSM-ROTC cadets and ten active Army members of the Military Department will depart in June for six weeks ROTC summer camps which begin on June 16th.

Two of the cadets will attend the ROTC Camp at Indiantown Gap, Pa., two will attend the camp at Fort Bragg, North Carolina; the other seventy-seven cadets will go to the Fort Sill, Oklahoma, Camp.

The following officers and non-commissioned officers of the MSM Military Department will be assigned to the operations and training activities for conduct of the Fort Sill Camp: Lt. Col. John R. Short, Jr., Major Edward C. Fike, Sergeant First Class Garmon Y.

Price, and Staff Sergeants Clymer C. Cooper, Mack M. Graves, and Orville B. Hughes. Lt. Col. William S. Wood, Major Fred V. Cole, and SFC William D. Merideth will attend the ROTC Camp at Fort Riley, Kansas. Master Sergeant Joe L. Pitt will go to the camp at Fort Knox, Ky.

For several years prior to 1963 the MSM cadets attended a branch material, Corps of Engineers, ROTC Camp at Fort Leonard Wood, Mo. In 1963 branch material ROTC camps were discontinued and General Military Science camps were established. The MSM cadets went to Fort Riley, Kansas, camp in 1963, and to the Fort Sill, Oklahoma, camp in 1964.

THE MISSOURI MINER

PAGE 7

SEASON MARK AT 6-6

## Errors and Unearned Runs Cost Miners Two of Final Three Games

The first varsity baseball season at MSM is now history, and although the results would not be considered history-making, the Missouri Miners did produce a respectable 6-win-6-loss record. SEMO Indians visited Rolla last Friday to scalp the Miners 9-5 for the fifth defeat. Final action took place Saturday as MSM split a double header with Evangel College. MSM lost the first game 2-1, and won the second 9-4.

Nine Miner errors committed against Cape Girardeau were largely the cause of the third defeat of the season at the hands of the Indians. Ken Shuey received the loss, and help from Bill Mueller and Ches Vogt did seem to quench the fire in later innings. Bahr was credited with the win for Cape.

Rich Schrick had a two-base hit for MSM, the only extra-base hit of the day for the Miners. Vaughn, King, and Glasstetter each had doubles for Cape Girardeau.

### MSM Splits Twin-Bill

Two unearned runs were the only things which prevented a Miner victory in the first game of a twin-bill against Evangel here last Saturday. Hanlan hurled seven innings allowing only two hits. Nixon pitched the eighth allowing one hit, but the Evangel winning run was scored while he was on the mound and he received the 2-1 loss.

The Miners totaled seven hits off of Evangel pitcher Tremble, and two of them came in the second as Rich Schrick led off with a double and Howard lined a single. The first and only Miner run was scored in the second.

Jerry Turner errored in the seventh, thus allowing the Evangel tying run to score. The un-

earned winning run was scored in the eighth on another Miner error, and although the men from MSM hit safely once in the bottom of the eighth, no runs were scored.

Winning pitcher Tremble struck-out only one Miner, and Hanlan fanned six during his reign of the mound.

It was a different story in the second game, as the Missouri Miners downed Evangel 9-5 on the six-hit pitching of Ron Huegerich. Huegerich went all the way, striking out ten men and allowing five walks. Although Evangel pitcher Keller was relieved in the fourth by Kopp, the damage was already done. As a

take an early lead. Four more runs in the fifth were added insurance, which might have been needed if the three-run, late inning Evangel rally had held out.

Schrack and Spector each had a double for MSM, and there were no extra base hits for their opponents.

Utilizing a relatively young squad this first year, Coach Leo Christopher has much to look forward to next year as the school enters the MIAA Conference. The twenty-four man Miner baseball team performed well in spite of limited pre-season practice due to Rolla weather conditions. Baseball fans can expect added enjoyment next spring as the Missouri

Final weekend of baseball activity found the Miners splitting with Evangel and losing to Cape.

result Keller was awarded the loss.

The Miners scored one run in the first and four in the second to

Intercollegiate Athletic Association brings the other five teams of the league to MSM for competition.

## Athletic Department To Conduct Summer Program

During the 1965 summer session at the University of Missouri at Rolla, the Athletic Department will conduct a recreation program for those students and faculty who are attending. In the past, groups have been allowed to form from all organizations. This policy will continue this year; in other words give your group a name.

If you are enrolling in the summer session and would like to participate, from a group and select a team manager. Fill out the entry blank provided below, including your team name, manager, and his address and telephone, and return it to Burr Van Nostrand at the athletic office.

A summer softball league is being set up, and if enough are interested, golf and tennis tournaments will be held. The MSM swimming pool will be open from 2 to 4:30 p.m. in the afternoon on Monday through Friday.

## Tech Club Wraps-up 64-65 Intramural Crown

Amassing over two thousand intramural points, the scrappy Tech Clubbers have swept the overall intramural championship once again this season. Lambda Chi Alpha came in second with 1893.0 total points, edging-out Sigma Nu by 1.75 points. Phi Kappa Theta slipped by Kappa Sigma for the fourth spot, scoring less than a single point more in the final standings. Kappa Alpha was sixth in the results of one year of intramural competition. The first, second, third combination is a repeat of the top trio of last spring.

George Gasparovic representing Lambda Chi was the winner in the "photo-finish." Faust (KA) came in second.

Sigma Nu captured the 1965 intramural track crown last Thursday as they totaled 32 meet points for the championship. Tech Club scored 29 meet points for the second place spot and 135 intramural points. Sigma Nu receives 140 points toward the final intramural standings.

Lambda Chi Alpha was third with 26 meet points, and Kappa Alpha was fourth with 14. Kappa Sigma took fifth, and Phi Kappa Theta was sixth.

Gary Paul of Phi Kappa Theta set a new mark in the mile run with a time of 5:09.2. In the 120-yard low hurdles, Jim Petry of Tech Club tied a mark of 13.9 seconds, set back in 1956.

Last year's team champion in track competition was Lambda Chi Alpha, and the team runner-up was Sigma Nu.

Totalling 671 points, the Prospectors Club topped all teams entered in the intramural rifle com-

petition held last week at the MSM rifle range. R. T. Fisher, Norman Miller, and Martin Komo made 212, 227, and 232 points, respectively for the Prospectors, and the Kappa Alpha squad of Fischer, Mace, and Schmidt totaled 651 for second place honors.

Tech Club scored 639 points for third, and the Shamrock Club had 620 for fourth. The men from Prospectors Club will receive 84 intramural points for first place.

Christiansen of the Fifty-Niners Club was high individual scorer with 294 points, and Bob Morfeld of Phi Kappa Theta was the runner-up with 242. High scorer last year was Hessler from Sigma Phi Epsilon, and Tecr Club was the team champion.

For the second straight year, Tech Club has copped the intramural horseshoes championship. Eighty-four IM points go to the top team, and eighty-one were

### AIChE Elects Officers During Final Meeting

On Wednesday, May 12, the AIChE held its final business meeting of the year. Jim Hunter, president of the organization, conducted the election of new officers.

Elected to serve as president for the coming semester was Gary Graham, junior. Other officers chosen by the members were David Hoffmeister, vice-president; Bill Stratton, secretary; Jim Beeson, treasurer; and Larry Yates, reporter.

Besides the election of officers, the AIChE also discussed dates for next semester's regional conference which will be held at the University of Missouri at Columbia.

### TECH CLUB TAKES CROWN

(Continued From Page 7)

awarded to the second place team from the Wesley Foundation. Lambda Chi Alpha was third and Phi Kappa Theta took the fourth position.

Singles champion was Chapman from the Fifty-Niners, and Bickel of Tech Club was the singles runner-up. Bickel was the singles champion last year at this time.

Top honors in the doubles division go to the team of Schaefer-Arment, also from the Tech Club. The Wesley team of Jennings-Kibby took the runner-up spot.

As of this writing, the championship match in tennis doubles has not been played. Tau Kappa Epsilon is opposing Campus Club for the first place award. Tech Club snapped up the third place spot, and the Shamrock Club took fourth.

It is hoped that the limited program of intramural athletics offered next year will not result in lack of interest towards the sports. The Athletic Department is arranging for as many intramural sports to be played as possible under the conditions as they may exist.

## SIDELINES

BY JIM WEINELL

A second set of revised plans for the proposed field house (now demoted to a "multi-purpose building") has been received at the Athletic Office. Although somewhat smaller and more compact, the building still will contain 100,000 square feet of space and most of the previously mentioned facilities. The gymnasium-auditorium will seat 4860 for basketball and 6000 when the floor is utilized for seating. The football stadium under consideration will seat 4000, and the area under the stadium-seating will contain dressing rooms, coaches rooms, and space for equipment.

While rushing and observing prospective members for your organization this summer, keep an eye out for the athletically-inclined students. Besides being an asset to your organization, the sports-minded individual may prove to be a worthy addition to the MSM varsity program. In a sense, varsity recruiting can be considered an obligation of a student of the University or of any school for that matter. Make it a point to mention that varsity try-outs are open to all qualified students. If you feel that a prospective student's abilities are above average in a sport, contact the MSM Athletic Department and give the details of your find.

Do those first three places in the final intramural point standings seem familiar?? They should — Tech Club, Lambda Chi Alpha, and Sigma Nu finished one-two-three last year also. Note the close competition for second place and fourth. Thanks to all participating organizations, this year has been one of the best for intramural sports. Let's keep the reputation of having one of the best programs in the nation.

### A MESSAGE TO ROTC COLLEGE MEN

## IF YOU'VE GOT WHAT IT TAKES TO BE AN ARMY OFFICER, STAY IN THE ROTC

Being an Army officer is a challenge. Officers must be leaders . . . able to take responsibility . . . get important jobs done.

It isn't easy to win a commission as an Army officer. But if you are taking the Basic Course in ROTC you're well on your way—provided you can measure up to the high standards required for admission to the Advanced Course.

As a student in one of the 247 colleges and universities offering senior ROTC training, you are in a privileged group. There's no better way for any college man to get the training and skills needed to be an Army officer than through the on-campus program created specifically for that purpose—ROTC.

Here you learn to be a leader . . . to develop the

qualities that add a vital plus to your academic training . . . qualities that will pay off for the rest of your life in whatever career you choose to follow.

There are other advantages too. Pay, at the rate of \$40 per month during the Advanced Course plus allowances for summer training and travel. Fellowship and social activity. The chance to work with modern Army equipment, and perhaps to qualify for Army flight training if it is offered at your school. And then gold bars and a commission as an Army officer.

Why not talk to your Professor of Military Science now. Let him know you're interested in signing up for the Advanced Course. Then if you are offered an opportunity to join, don't pass it up. It's the program that's best for you . . . and best for your country.

C-465

If you're good enough to be an Army officer, don't settle for less.
