FRIDAY, OCTOBER 8, 1965, ROLLA, MO.

NUMBER 4

Alumni Association Elects Kasten President

New officers for the MSM Alumni Association were installed Oct. 8 at the annual meeting of the Board of Directors, held in connection with Homecoming activities.

Former executive vice-president, R.O. Kasten, Kansas City, took over as president for a three-year term. Kasten, manager of wire and wire rope production engineering and development, Sheffield Division, ARMCO Steel Corp.,

MR. R. O. KASTEN

succeeds James W. Stephens as Association president.

A 1943 graduate of MSM, Kasten is from Old Appleton, Mo. His career began with Curtiss-Wright Corp., which he joined after receiving a B. S. degree in civil engineering at MSM.

He has been a tool designer for Emerson Electric Manufacturing Co. and in 1944, began working for Union Wire Rope Corp., Kansas City, which is now part of ARMCO. Kasten is married to the former Dorothy Muilenburg of Rolla. They live with daughter, Jill, at 6136 Manning, Raytown. Son, Joe Kasten, now attends MSM.

Homecoming Weekend Promises Variety of Events for Alumni

Two thousand alumni are expected to arrive on the campus of MSM for Homecoming festivities Oct. 8 and 9. Graduates of nine classes will be honored in a week-end of reunions, dances and dinners, planned by F.C. Edwards, executive secretary of the MSM Alumni Association, Prof. G. G. Skitek, MSM public occasions committee chairman and Howard Stine, student special events director.

Events begin at 9 a. m., Oct. 8, with alumni registration in the Student Union and guided tours of the campus and new buildings. At 6 p.m., Friday, the Homecoming parade will march from 6th and Pine Streets in downtown Rolla to a pep rally and bonfire at the intramural field on Highway 63.

Official "kick-off" for the celebration honoring former MSM graduates will be at 6:30 p.m. at the Edwin Long Hotel. Alumni and guests will attend a welcoming buffet dinner.

New MSM Alumni Association officers, elected this fall by mail ballot, will be installed at 1:30

p.m., Oct 8, at the annual Board of Directors meeting. The new president, will officiate at the convocation and annual meeting of the Alumni Association. Reunion luncheons for classes of 1920, 1925, 1930, 1935, 1949, 1945, 1950, 1955, and 1960 will follow the meeting. St. Louis Section, MSM Alumni Association, will host an open house and pre-game reception at 12:15 p.m. at the Carney Manor Motel.

In Saturday afternoon activities, alumni will give audience to future Association members, as undergraduate "Miners" meet St. Mary's of the Plains, Dodge City, Kansas.

Twenty-two Homecoming queen candidates from 12 cities in Missouri and near-by states, one of which will reign over festivities, will appear with the University.

(Continued on Page 6, Column 5)

Student Council Strives To Promote School Spirit

The Student Council, backed by the M-Club, is striving to get cheerleaders on the football field by Homecoming. Al Ponnwitz, a member of last year's cheerleading group, said that he would try to get a bigger group this year. There is a very good chance that we can even have girls on this year's team if we get a little cooperation from the coeds.

The Student Council sponsored the second Annual Breakfast with high school counselors on Friday,

October 2. The purpose of the breakfast was for the representatives to mingle with the counselors and give them a student's viewpoint of life on the MSM campus. Guest speakers included the presidents of the IFC, dorms, and Independents, who gave brief talks on the three ways to live on campus.

The primary objective of your Student Council is to help the student in any way that it can. One way this is accomplished is through the committees formed at the beginning of each school year. These committees touch upon every aspect of student life at MSM. They coordinate all the campus activities and see that everything is done for the good of the student body.

Special Program On Interviewing To Be Presented

A special informative program for all students planning on interviewing for employment is scheduled for October 12, 1965, at 7:30 p.m. in the Student Union Ballroom. In cooperation with Dean Hershkovitz, the Student Union is presenting a program called Interview Panel. The program will consist of four representatives from large corporations answering questions asked numerous times about interviews.

E. E. Hill, Armco Steel Company, will discuss the subject "What Employers are Seeking in Employees." R. L. Miller, General Electric, will talk on the topic "The Interviewee's Obligation to the Employee." J. W. Thompson from Monsanto will discuss the subject, "The Interviewer's Obligation to the Interviewee." John T. Snyder, McDonnell Aircraft Corporation, is scheduled to talk on the subject "Long Range Program of Selecting an Employer." Chancellor Baker will be the moderator.

Morris Opens Concert Series

A brilliant double-encore performance by pianist Richard Morris opened the University of Missouri at Rolla's 1965-1966 Extension Concert Series. Presented in the Student Union on Tuesday night, Mr. Morris' concert was heard by an unfortunately small but enthusiastic audience that marveled at his strong technique and interpretive grasp of the piano.

The concert's program consisted of six classical compositions by four great composers. Opening the performance was Rondo in A Minor by Mozart. Following this was another selection by Mozart, Second Rondo in A Minor. Mr. Morris' third number was a sonatine by Ravel that consisted of Modere, Mouvement Menuet, and Anime. Following a brief intermission Richard Morris played Thirty-two Variations in C Minor by Beethoven. His fifth number was Nocturne in F Sharp Major, Op 15 No. 2, by Chopin. The highlight of the evening was Mr. Morris' exceptional performance of Polonaise in A Flat, Op. 53, by Chopin. His vivid interpretation of this classic and the entire concert brought about several minutes of sustained applause and two encores. For his encores Richard Morris played a selection by Schumann and an etude by Chopin.

Mr. Morris was immensely enjoyed by all who heard him perform.

His talents are an example of what MSM students may see and hear in the future as a result of the Student Union's Concert Series. Upcoming programs in the series are John Swanay, a folk-singer on December 2, 1965, Wiktor Labunski, pianist on February 2, 1966, and the Chamber Opera Company on March 29, 1966. The Student Union has gone to a great deal of trouble and expense to provide these performances for you. Show your appreciation by attending the future programs.

Pianist Richard Morris entertains Miners in the opening concert of the school year.

Curators Give Go-Ahead on New Library

MODERN STRUCTURE WILL REPLACE JACKLING GYM.

In a meeting on Friday, October 1, the Board of Curators gave the "Master Plan." At this meeting the Board approved the plans for the proposed \$2¼ million library to be built on the sight of what is now the Jackling

Area Counselors Congregate Here For Conference

Forty invited high school guidance counselors attended the second annual Engineering Conference for High School Guidance Counselors at MSM September 30 and October 1.

The conference was initiated for the purpose of orienting high school counselors to engineering education and the engineering profession. It also encourages high school students to acquire adequate information about engineering as a career. Thirty interested firms and individuals employing graduate engineers cooperated in support of the conference.

During the two-day conference, counselors were given the opportunity to hear about engineering from representatives of different branches of the profession in education and in industry.

During the Thursday morning session, counselors were welcomed to the campus by Dr. Merl Baker, chancellor. This was followed by a discussion of the objectives of the conference by Robert B. Lewis, registrar, and a resumé of the history of engineering by Dr. Dudley Thompson, dean of the faculty. At other sessions, counselors learned about the different branches of engineering by visits to various campus departments and discussions with the department chairmen and their engineering faculty members.

On Friday morning, counselors were given the opportunity to hear of engineering education from a student viewpoint as they met at breakfast with the Student Council and at conferences with students from their hometowns.

The conference was directed by Robert B. Lewis, registrar, and J. Kent Roberts, professor of civil engineering and state president of the Missouri Society of Professional Engineers.

Gymnasium.

Construction which started in the first part of September to house the office and dressing rooms of the Department of Physical Education is now near completion. This temporary building will be used by the department during the time the Jackling Gym is being razed and the proposed new athletic complex is being constructed.

As a major addition to the plan of entire campus improvements has been the remodeling and moving of the offices of several campus departments.

The Rolla Building, oldest building on campus, leads the list of major improvements. The top two floors have been changed from classrooms, as they have been used from the beginning of school, to office space. Among those who now have their offices here are the humanity instructors and the office of the School of Engineering.

The Office of Public Information, formerly located in building T-8, has moved to a new modern office location at ninth and Rolla Streets. Sharing with them this second floor space will be the Alumni Office, moving from the Old Met building and the Centennial office.

Also included in this massive move was the offices of the Military Department which was mov-

ed from T-3 to T-8. The Office of Technical Service, headed by Prof. Leitner has moved to T-11.

Companies Seek Undergraduates For Summer Jobs

Undergraduates who have completed their freshman year and who are interested in summer employment may apply at the Placement Office. It is located on the second floor of the Buehler Building, 9th and Rolla Streets. Sign-up sheets for interviews will be available from now until April, 1966.

Every two weeks, the bulletin board announcements will have a special sheet devoted to summer opportunities. There will be a sign-up date as well as an interview date. Do not come to the placement office before the indicated sign-up date. Any day after the sign-up date and up to the interview date is satisfactory.

Those qualifying for the summer opportunities may sign-up on the sheet for the particular company. Any questions will be answered by the placement office personnel.

Forensic Club Holds Meeting For Debaters

Sixteen prospective debaters were present for the first meeting of the Forensic Club, Wednesday evening, September 29. This is twice the number that attended the organization meeting last year.

The meeting was held to enroll new members and acquaint prospective debaters with the national debate topic for 1965-66: "Resolved that Law enforcement agencies in the United States should be given greater freedom in the apprehension and prosecution of crime."

The meeting was presided over by the out-going president, Dave Cantwell. Dave was a member of the negative team that tied for top honors in the novice division of the State Speech Tournament last spring. Sponsor of the Club and debate coach is Professor Charles E. Bess of the Humanities Department. Other members of last year's debate squad enrolled this year are Brunn Roysden and Ed Will.

Invitations have already been re-

Dr. Maxwell to Give Lecture at Mining Engineers' Conference

Dr. James C. Maxwell, associate professor of geology at MSM, will present a paper at the 1965 fall meeting of the Society of Mining Engineers. The meeting is being held jointly with the Rocky Mountain Metals Conference in Phoenix, Arizona October 7-9.

The paper which will be presented at the October 9 Geological Engineering session, is entitled "Use of Abandoned Mines as Potential Water Resource, Joplin District, Mo." E. J. Harvey, Rolla, resident ground water geologist for the Water Resources Branch of the U.S. Geological Survey, is senior author. The paper was based in part on work done by Renny Nichols, Kansas City graduate student, who received his master's degree in January, 1965.

Also participating in the conference will be Dr. William C. Hayes, Rolla, director of the Missouri Geological Survey. Dr. Hayes will be co-chairman of a session on Trends and Outlook for the Mining Industry October 9. He received his M.S. in geology at MSM in 1947.

The Society of Mining Engineers is a constituent organization of the American Institute of Mining, Metallurgical and Petroleum Engineers. About 1,000 executives, educators, economists and public officials from all parts of the country are expected to attend the meeting. Although the keynote theme will be on the provocative field of energy in its various aspects and prospects, a comprehensive program of papers on a variety of subjects has been scheduled. Water supply and pollution, both currently of widespread concern, will be an important phase of the discussion.

Also attending the Phoenix meeting will be Dr. J.J. Scott, professor of mining engineering. Dr. Scott will go from the SME meeting to Convention Center, Las Vegas, Nev., for the American Mining Congress, an industrial conclave and mining equipment show. At the Congress, he will be in-

involved in a special panel on education in mineral industries.

Prof. C.R. Christiansen, of the MSM mining department, will also attend the Mining Congress.

Enrollment in the mining engineering degree program at MSM has increased 20 per cent with fall semester enrollment. According to Dr. Ernest M. Spokes, chairman of the department of mining and petroleum engineering, 59 students are enrolled, compared to 49 at this time last year. The change represents an increase of two undergraduate students and eight graduate students.

Dr. Spokes says, "We are happy to see an increase in enrollment because for a number of years

the demand for mining engineers has been increasing while enrollments have been decreasing. The present need for mining engineers is several times the available supply. "The chairman attributes growth of graduate enrollment to improvements in curriculum offerings and quality of instruction. "Undergraduate increases seem to be due to the intensive efforts of a small group of men in industry and education to point out the opportunities in mining engineering to high school students," Spokes adds.

Among 99 students enrolled in mining at MSM, 40 are registered in the petroleum engineering program.

EAGERLY AWAITING...

This was the scene as girls arrive for the Mixer held at MSM last Saturday. Girls from five colleges attended.

ROTC Program Stresses Leadership From Students

This year, for the first time in 46 years, the ROTC program is not required of all eligible freshmen and sophomores at MSM. Though the requirements for ROTC have changed, the curriculum has not changed any more than it normally would. Changes to modernize the ROTC program would come about anyway, without regard to whether or not the course is voluntary or compulsory.

The entire ROTC program is designed to produce leaders. This is accomplished by teaching the elements of management. Before a person can lead, he must be able to be led. This is one of the essential points stressed by the ROTC program. Drill period has been changed to better promote the essentials of making good leaders. The classroom instruction stresses history, organization, management, economic, and political topics.

This year there are 684 students enrolled in the ROTC program, which is approximately twenty percent of the eligible student body. This is compared with the national average of approximately 10 or 11 percent. Three hundred and seventy-five freshmen or thirty percent of the class is enrolled in ROTC.

Colonel Gundling, the Professor of Military Science at MSM, is very enthusiastic about the

present ROTC program. He favors the voluntary program because more attention may be given, and it may be more beneficial to those people interested in improving themselves. The leadership learned in ROTC is valuable in civilian life. It teaches the ability to deal with others and to accept as well as give orders. This essentially sums up the prime objectives of the ROTC program.

Local Churches Responsible for New Coffeehouse

The Cellar Door, a coffeehouse for Miners and their dates, will be open for business for the first time tonight and tomorrow night. Identified by the sign of the fish, the Cellar Door is located on the southeast corner of State and Ninth Streets. It will be open from 9:00 p.m. to 1:00 a.m. on both nights.

People from several of the local churches will organize and staff the Cellar Door. Its purpose is to provide a place where students can relax, talk over a cup of coffee, and listen to good folk singing.

The Cellar Door is operated on a non profit basis. There will be a nominal charge to cover expenses.

Those behind the coffee house plan to open its door on all major party weekends. There may be special events on other weekends.

Miner Editorials and Letters

Welcome Alumni

On behalf of the students and faculty of the University of Missouri at Rolla, better known as the Missouri School of Mines and Metallurgy, the MINER would like to welcome all of the alumni who have returned for the Homecoming Weekend.

We hope that you will enjoy your visit to MSM, and will be able to participate in the reunions, celebrations, and activities of the weekend. The football game against St. Mary's of the Plains should prove to be interesting, since they have an impressive record for the season, while the Miners are determined to post another victory for the Homecoming game.

Undoubtedly you will notice signs of progress and change on our campus, but we hope that you will also notice the presence of the same spirit and traditions which have helped to make our school one of the top engineering colleges in the nation. In the near future these changes will become even more apparent due to an expected enrollment, by 1970, of 6000 undergraduate and a possible 2000 graduate students. Plans are now in the completion stage for numerous new buildings on campus, including a new library, materials research center, field house, and an addition to the Student Union. If plans are followed, we will have these plus others in time for our centennial in 1970.

It is our wish that you will return for many Homecomings in the future, and that you will witness these advances, which will be taking place on our campus and which will increase our school's tradition of greatness in the field of engineering.

THE MISSOURI MINER is the official publication of the students of the University of Missouri at Rolla. It is published at Rolla, Mo., every Friday during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo., under the Act of March 3, 1879.

The subscription is \$1.25 per semester. This Missouri Miner features activities of the Students and Faculty of U. M. R.

On the Other Side of The Transit

BY DON WARD

Broadway has just finished its worst season in ten years. Of the 30 some odd shows that appeared on the scene, only a handful were able to survive. *Golden Boy*, *Fiddler On the Roof* and *Roar of the Crowd*, *Smell of the Greasepaint* were the seasons only musical successes. Dramawise, *Odd Couple* and a bewildering *Tiny Alice* were the only shows to cause any stir. It was thankful that shows like *Funny Girl*, *Hello, Dolly* and *Subject Was Roses* were still around for the avid theatre goers. But last year is over and new one is upon us.

Henry Fonda will return to the stage for the first time in ten years in *Generation*, a comedy by William Goodhart. *Oliver* was such a success that Leslie Bricusse (usually teamed with Anthony Newley) has decided to try another Dickens tale. The result is *Pickwick* starring Harry Secombe. *Drat! The Cat!* offers the most unusual title for the new year. It's a musical and stars Elliott Gould (Barbra Streisand's husband) and Lesley Ann Warren. *Picnic* is to be made into a musical this year - an idea which I just cannot picture.

The big news however is from the Lincoln Center whose shows of last season fell under very heavy criticism. This year has brought two new directors to replace the bitter Kazan. Herbert Blau and Jules Irving plan to produce a rather racy version of that rather racy play of Wycherley *The Country Wife*. Also they will present Satre's *The Condemned of Altona* and Brecht's *The Caucasian Chalk Garden*. Many eyes will be paying special attention to this set of productions.

There is also talk of new plays by Edward Albee (*Virginia Woolf* fame), T. Williams and John Osborne. There is also talk of some new experimental theatre. But none of this is definite.

Another season is opening and everyone will pay close attention as producers lose sleep and hair and actors cram lines. It is a break-neck business, but everyone loves it.

LITTLE MAN ON CAMPUS

"AFTER LOOKING OVER THESE TEST PAPERS - I'D SAY SOME OF YOU COULD WELL AFFORD TO PAY MORE ATTENTION IN CLASS."

Selective Service Redefined

With the October and November draft calls, the largest since the Korean War, the nation's draft boards are set to look at requests for student deferments with a more discerning eye.

The Selective Service System has no intention of abandoning deferments for students in colleges and universities. Under the tighter policy, draft boards will be picking up some deferred students who are not attending school full time or who are not making satisfactory progress in their classes.

Last January the total nationwide draft call was only 5,400 men. In February it dropped to 3,000. The Viet Nam crisis shot the draft call to 7,900 in March; 13,700 in April; 15,100 in May; 17,000 in June; 17,100 in July; and 16,500 in August.

Then on July 28, President Lyndon Johnson announced that a September call of 27,000 men would be necessary in order to meet

the increased commitment in Viet Nam.

Even at that time most state Selective Service men were quoted as saying they didn't feel the new figures would cause any change in the draft status of most men because "draft pools" were large enough to take care of the increased demands. In most states, draft officials were quoted, some off the record, as saying that married men with no other dependents still need not fear for the draft. Under a 1963 order by President Kennedy, married men with no children were not to be drafted as long as single men were available.

But the Defense Department announced an October call of 33,600 and recently announced its November call of 36,450 - the two largest calls since the end of the Korean War. And in November, for the first time since Korea, the draft will include men for the Marine Corps.

Some states began to backtrack on their previous statements about married men and many conceded that it would be necessary to take married men "sometime in the fall."

On August 26, President Johnson dropped his well-remembered bombshell and announced he had revoked President Kennedy's order and that from now on married men without children would be considered the same as single men as far as the draft was concerned.

Trying to beat the order's midnight deadline, young couples sought out marriage spots like Los Vegas, Nev. Some made it and got married before midnight.

But Lt. Gen. Lewis B. Hershey, national director of the Selective Service System, observed, "I believe these couples will find they didn't beat any deadline. We'll get most of them - in four or five months."

The facts remain that with the increased draft calls, local boards are rapidly running out of single men between the ages of 19 and 26 - the present induction limits - and the childless married men are the next to go.

The same sort of concern has been registered among college students who fear that continued high draft calls will further deplete the draft pools and they, after the married men, will be the next to go.

To a degree, they're right.

As one Selective Service official points out, "There is nothing automatic about a student being deferred. Each case is considered on its own merits with the student's course of study, its importance to the national interest, and the student's scholastic ability" being used as measuring sticks.

The same high official suggested that as the quotas rise (or even if they stay at the present high level for some extended period of time) and the age of the draftee drops, boards probably will not be able to give deferments for longer than a year.

"This would cover a man in his senior year or probably could be extended in order to let a junior finish school, but it probably

Any of you who drive a car (and I use the word "drive" loosely in case I have any Female readers) know that one of the more perplexing problems which you will encounter is that of parallel parking. It takes a special breed of person to perform this task with the grace and dignity befitting today's sleek but overlength cars.

Several systems had been worked out to help the average driver simplify this problem. However, the only trouble was that no two parking spaces were the same size - usually too short - so all of the mathematical systems failed. For this reason the problem has gone on virtually unsolved.

But, lo and behold, from the small town of Rolla comes the answer! A solution at last to our ever-present problem. . . simply eliminate the parking spaces altogether!! This way no one ever has to worry about being embarrassed by not being able to park next to a curb properly because, unless you are extremely lucky or wish to park across the tracks and walk to class, you will never find a curb to park next to!

The enlightening part of the situation is that you can now park on the ROTC drill field - except on Thursdays. What are we supposed to do on Thursday, stack the cars double?

Passage of Bill to Lessen Cost of Education Envisioned by Congress

A plan designed to ease the financial burden of parents of college students and to create new sources for the establishment of scholarships is receiving increasing attention and support from both educators and legislators.

The concept of granting tax credits for some expenses of higher education has had bipartisan backing in both houses of Congress for more than a decade, but has never been enacted into law.

Now there are signs that a tuition tax credit measure may pass in the current session of the 89th Congress.

The tuition tax credit concept stems from widespread concern over the mounting costs of tuition and fees at both private and publicly supported colleges and universities. Proponents of the measure note that costs have been rising at an increasing rate, and that all evidence indicates that they will continue to do so.

The reason, they point out, is that increased enrollments, necessary increases in faculty salaries, and general increases in expenses have forced annual operating budgets sharply upward. The increased budgets have been mirrored almost universally in alarming rises in the cost of a college education to the student and his family.

Tuition tax credit was conceived to relieve financial pressure on persons paying for college education and to reduce the threat of students being priced off the campus.

The measure would permit a credit against the Federal income tax of persons paying for tuition fees, and other essential expenses

of college students.

Advocates of the plan emphasize the difference between a tax credit and tax deduction. Each dollar of credit would reduce a person's tax by one dollar. If a taxpayer owed \$1,000 at the end of the tax year and had qualified for a \$400 tax credit, he would owe the Federal Government only \$600 in income tax. A \$400 tax credit would save exactly \$400 for the individual whether he earned

\$5,000 a year or \$20,000.

A deduction, on the other hand, would save a \$20,000-a-year man more tax dollars than a \$5,000-a-year man.

The Ribicoff-Dominick measure — typical of the many tax credit bills put forth by members of both houses in recent years — is based on the first \$1,500 paid for tuition, fees, books, and supplies per student at an institution of higher learning.

The amount of credit would be 75 percent of the first \$200 spent, 25 percent of the next \$300, and 10 percent of the next \$1,000. The maximum credit allowable would be \$325.

In addition, scholarship-holding students from middle-income families could reduce their scholarships to the extent that they received tax credits. This would permit institutions to make more generous and more selective use of increasingly inadequate scholarship funds.

BSU to Conduct Vesper Services Monday-Thursday

The Baptist Student Union helps to enrich Christian lives through the Vesper programs which meet on Monday through Thursday evenings from 6:00 to 6:30. There has been a good attendance at each of these meetings. We would like to invite everyone to come and join us. On Friday nights a Bible Study is conducted from 6:00 to 7:00.

The Baptist Student Union is located on the corner of 11th and State and is the center of BSU activities. There are ping-pong tables, a TV lounge, a library and study room, a prayer room and an assembly room where Vespers are held.

This Saturday night, October 9, there will be a party beginning at 7:00, at the BSU center. All are invited to attend.

Mrs. Bullman Is Speaker At First Dames Meeting

The first fall meeting of the MSM chapter of University Dames was held Monday evening, September 27, in the Student Union Ballroom. An unusually large number of student wives attended and registered as members for the first semester.

The business meeting consisted mainly of introductions of the officers, advisors; interest groups available to members were described, and each member was encouraged to join at least one of them.

Mrs. Gale Bullman, a long-time resident of Rolla and wife of the MSM athletic director, spoke about Rolla and willingly answered questions concerning the town. Mrs. Bullman was employed for twelve years at the Rolla Chamber of Commerce and now works in the Centennial Office at MSM.

The October meeting of University Dames will be held Monday, October 11, at 7:30 p.m. in the Student Union Ballroom. Members will be privileged to hear and meet Mrs. Warren Hearn, wife of the Governor of Missouri.

LITTLE MAN ON CAMPUS

"WHAT THIS CAMPUS NEEDS IS A GOOD 'NOON HOUR' RECREATIONAL PROGRAM."

John Lauritzen wanted further knowledge

He's finding it at Western Electric

When the University of Nevada awarded John Lauritzen his B.S.E.E. in 1961, it was only the first big step in the learning program he envisions for himself. This led him to Western Electric. For WE agrees that ever-increasing knowledge is essential to the development of its engineers—and is helping John in furthering his education.

John attended one of Western Electric's three Graduate Engineering Training Centers and graduated with honors. Now, through the Company-paid Tuition Refund Plan, John is working toward his Master's in Industrial Management at Brooklyn Polytechnic Institute. He is currently a planning engineer developing test equipment for the Bell

System's revolutionary electronic telephone switching system.

If you set the highest standards for yourself, both educationally and professionally, we should talk. Western Electric's vast communications job as manufacturing unit of the Bell System provides many opportunities for fast-moving careers for electrical, mechanical and industrial engineers, as well as for physical science, liberal arts and business majors. Get your copy of the Western Electric Career Opportunities booklet from your Placement Officer. And be sure to arrange for an interview when the Bell System recruiting team visits your campus.

Acacia's Success Paves Way For Rebuilding Program

Acacia was founded in 1904 by 14 Master Masons in Ann Arbor, Michigan. Since then Acacia has grown to its present number of 50 chapters throughout the United States.

The MSM Chapter, which was chartered in 1958, has grown rapidly and has achieved much. Acacia has many men to be proud to have as members. One brother, Mr. William Burchill, a member of the St. Pat's Board, Blue Key, Theta Tau, Who's Who in American Colleges, AIME, ASM, Alpha Sigma Mu, and Student Council, was awarded the Order of Pythagoras by our national fraternity this past summer for outstanding

leadership. They have equal right to be proud of the outstanding scholastic standing among the fraternities. First in the spring semester of 1964 and second both semesters last year missing first last year by a hundredth of a grade point. This semester we are planning to get back up to first place.

The officers for this year are as follows: President - Chester A. Henson, Vice president - Lester Roth, 2nd Vice president - Wendell Neumeyer, Recording Sec. - George Scrall, Treasurer - M. Lee Dilthey.

This semester we are going to do a minor remodeling job on our house. In two years we are planning to begin construction on a new house on Nagogami Road. The MSM chapter of Acacia is looking forward to bigger and better things in the future.

"Sig Ep" Pledges Thirty-Two Men

Sigma Phi Epsilon marked the pledging of thirty two men. These new aspirants to the brotherhood are Danny Bennet, Larry Carl Carr, Jeffrey Lewis Chambers, Leslie George Daly, Robert Emmett Barrett Jr., Robert Lee Andrews, Mark Allen Doering, James Lawrence Fox, Dennis P. Gerdel, Lawrence J. Gilbert, Ronald Lee Griesenauer, Joseph Edward Grimm, Bruce Arther Hachmann, Michael J. Knenlein, Oliver Dee Krage, Richard James Krumery, David William Lovell, Michael B. Mallory, John L. Mundwiller, Larry Joe Oliver, Danny Keith Powers, John C. Roberts, Ronald Robert Sanders, Paul Michael Sheary, James Robert Schipper, Robert L. Schmidt, John Joseph Schumacker, Keith Robert Troutman, Ronald F. Turner, John D. Uhlhorn, Thomas J. Vosburgh, John David Ward. The active chapter is quite enthused over the pledges, and feels confident that they will successfully accept their new responsibility.

ALUMNI ELECTIONS (Continued From Page 1)

Citation of Merit by the MSM National Alumni Association.

Other new officers include three incumbents vice-presidents, J. Craig Ellis, sales engineer, Maxon Premix Burner Co., Westfield, N. J.; Joseph W. Mooney, representative, New York Life Insurance, William B. Fletcher, Industrial Systems, Inc., South Gate, Calif.

Newly-elected treasurer-secretary is Dr. Thomas Beveridge, chairman, departments of geology and geological engineering, MSM. An area director, elected for each of nine areas in alternate years, has been re-elected. He is director for area No. 6, Bennett D. Howell, fuel superintendent for the Public Service Co. of Oklahoma.

Two incumbent directors-at-large have been re-elected. They are Allan J. Kiesler, of the General Electric Metallurgy and Ceramics Research Dept., Schenectady, N. Y., and Rex Z. Williams, president, Rolla State Bank, Rolla. A third director-at-large, James A. Vincent, takes office for the first time. He is president of Adams Equipment Co., Orlando, Fla.

"Sig Tau" Welcomes Nine New Pledges

Sigma Tau Gamma's Rush Chairman Jim Searcy performed a successful task in lining up rushees this summer. Nine pledges were welcomed into the house this semester, all of whom can be credited to the fine rush put on by the entire chapter. The pledges from the St. Louis area are: Glen Larson, Jim Stutz, John Stutz, John Bakula, and Eric Zust. From St. Clair, Mo., are: Bob Neff, Lennie Butts, and Leo Butts. Union, Mo., a neighbor to St. Clair, sent forth Mike Kissing. From the Pittsburgh, Penn. area is Tom Stefansky.

Sunday, Sept. 26th the Alpha Omega chapter of Sigma Tau Gamma was proud to initiate five new actives into our brotherhood. Our new brothers are: Tom Albers, Don Peterson, and Darold Robb, all from the St. Louis area. Tom Watson is from Brinkley, Ark., and Less Pollack from Monticello, N. Y.

With the addition of these nine

pledges and five new actives, the "Tau" House is bursting at the seams with members. And to cure this problem plans are now being drawn up by the architect for a new fraternity house, which we all hope will be completed for next fall's classes.

HOMECOMING EVENTS (Continued From Page 1)

versity band and Pershing Rifles at half-time. They will follow the presentation of the Interfraternity Council Pajama Race and the Homecoming display awards.

A post-game reception, given by Chancellor and Mrs. Merl Baker, will be in the Electrical Engineering building, prior to the Annual Alumni Banquet at 6:30 p.m. in the Student Union. Following dinner, the 11-piece orchestra of Johnny Polzin, music-master of The Admiral in St. Louis, will perform for the Homecoming Dance. Also featured will be formal coronation ceremonies for the queen at 11 p.m. Simultaneously, a reception will be held for alumni at the Hotel Edwin Long.

Homecoming is under the direction of F.C. Edwards, executive secretary of the MSM Alumni Association.

SUPPORT THE MINERS

Engineers and Scientists:

Let's talk about a career at Boeing...
50-year leader in aerospace technology

Campus Interviews Wednesday and Thursday, October 20 and 21

The most effective way to evaluate a company in terms of its potential for dynamic career growth is to examine its past record, its current status, and its prospects and planning for the future, together with the professional climate it offers for the development of your individual capabilities. Boeing, which in 1966 completes 50 years of unmatched aircraft innovation and production, offers you career opportunities as diverse as its extensive and varied backlog. Whether your interests lie in the field of commercial jet airliners of the future or in space-flight technology, you can find at Boeing an opening which combines professional challenge and long-range stability.

The men of Boeing are today pioneering evolutionary advances in both civilian and military aircraft, as well as in space programs of such historic importance as America's first moon landing. Missiles, space vehicles, gas turbine engines, transport helicopters, marine vehicles and basic research are other areas of Boeing activity. There's a spot where your talents can mature and grow at Boeing, in research, design, test, manufacturing or administration. The company's position as world leader in jet transportation provides a measure of the calibre of people with whom you would work. In addition, Boeing people work in small groups, where initiative and ability get maximum exposure. Boeing encourages participation in the company-paid Graduate Study Program at leading colleges and universities near company installations.

We're looking forward to meeting engineering, mathematics and science seniors and graduate students during our visit to your campus. Make an appointment now at your placement office. Boeing is an equal opportunity employer.

Drivers Must Take Eye Test To Obtain Renewed Licenses

A new state law will go into effect October 13, requiring all persons applying for renewal of an operator's or chauffeur's license to take an eye examination before their licenses are renewed.

Under the new law, a minimum requirement of at least 20-40 vision in one eye will be required, except under special circumstances. At the present time, the minimum requirement is 20-50 vision.

The eye examination will be provided free by the state or the motorist may present a statement by a physician or registered optometrist showing that he meets the qualifications.

The fee for an operator's license will be increased to two dollars under the new law. Also after October 13, the cost of a chauffeur's license will increase to ten dollars and it will be in effect for three years.

Colonel Hugh H. Waggoner, Superintendent of the Missouri Highway Patrol, commented on this new legislation. He said, "Good vision is one of the most important tools a driver can have. Through his eyes, a driver receives a flow of ever-changing traffic information. A driver must be able to identify objects, colors on signs and signals, and relative distances to various objects. He must be able to see his way at night when there is little light.

"It is important, therefore, that

every driver knows how he stands in regard to his vision. A driver who has serious visual shortcomings is more likely to have a traffic accident. This new legislation will help insure that all drivers have adequate vision to operate a motor vehicle safely," Colonel Waggoner concluded.

GRE to Begin Its Testing Program

The National Program for Graduate School Selection of the Graduate Record Examinations will begin its 1965-66 testing program at examination centers throughout the United States on November 13. Other administrations will complete their academic testing schedule in 1966 on January 15, February 26, April 23, and July 9.

The Graduate Record Exam-

inations are required or recommended of candidates for admission to many American graduate schools and of applicants for graduate fellowship awards. To assure the proper completion of these applications, candidates are urged to determine from their preferred graduate schools or fellowship committees which of the examinations are required or recommended and when they should be

taken. (In the past year, more than 100,000 candidates took the Graduate Record Examinations in the National Program for Graduate School Selection.)

The GRE offered in this nationwide program include a test of general scholastic ability and Advanced Tests of achievement in twenty different major fields of study. Offered for the first time

(Continued on Page 8)

The IBM interviewer will be on campus October 19-20

Interview him. How else are you going to find out about new ways to use your talents and skills in an exciting "go-places" career?

RON WALSH (C.E.) of the '60 Bethlehem "Loop" Course is field engineer for important construction projects. He's typical of young men on the move at Bethlehem Steel.

Seniors and graduate students in engineering and non-technical curricula will soon be interviewed for the 1966 Bethlehem Loop Course. We offer splendid career opportunities in steel plant operations, research, sales, mining, accounting, and other activities. For detailed information, pick up a copy of our booklet, "Careers with Bethlehem Steel and the Loop Course," at your Placement Office.

An Equal Opportunity Employer in the Plans for Progress Program

You could visit a nearby IBM branch office. You could write to the Manager of College Relations, IBM Corporate Headquarters, Armonk, New York 10504. But we would like to see you on campus. Why not check at your placement office today? See if you can still make an appointment for an on-campus visit with IBM. Then interview the IBM interviewer. Whatever your area of study, ask him how you might use your particular talents at IBM. Ask about your growth potential in America's fastest-growing major industry. You'll never regret it. IBM is an Equal Opportunity Employer.

IBM

Baker Appoints Lorey to Director Of the Extension Division at MSM

The appointment of Dr. G. Edwin Lorey, associate professor of ceramic engineering, as director of the Extension Division of MSM, has been announced by Chancellor Merl Baker.

At the same time, Dr. Baker named Dwight L. Hafeli, Rolla businessman and former MSM faculty member, as coordinator of educational short courses and conferences in the Extension Division.

Established on the Rolla campus in September, 1964, the Extension

DR. G. EDWIN LOREY

Division enrolled over 3,000 students during the first year of operation.

The Extension Division is responsible for all programs beyond the usual academic offerings on the Rolla campus. These programs include: the St. Louis Graduate Engineering Center, located on the campus of the University of Missouri at St. Louis, off-campus credit courses, evening courses on the Rolla campus, non-credit courses, short courses, conferences and institutes.

This year for the first time, the Extension Division is offering evening courses for college credit both on the Rolla campus and at Fort Leonard Wood. Several non-credit courses are now being presented in Rolla, and others are scheduled for St. Louis and Lebanon. At least ten on-campus conferences and institutes are planned for the coming year.

Extension Director Lorey first came to Rolla in 1965 as assistant professor of ceramic engineering. A native of New York,

GRE

(Continued From Page 7)

this fall will be Advanced Tests in speech and in music. Candidates are permitted to take both the Aptitude Test and one Advanced Test on any of the five nationwide testing dates.

A Bulletin of Information with registration form providing details of registration and test administration may be obtained from college advisors or directly from Educational Testing Service (Box 955, Princeton, New Jersey 08540 or 1947 Center Street, Berkeley, California 94704). A completed test registration form must reach the appropriate ETS office at least fifteen days before the date of the administration for which the candidate is applying.

Lorey received his B.S. and M.S. degrees in ceramic engineering from Alfred University and the Ph.D. in ceramics from Rutgers. Prior to coming to Rolla, he has been a research assistant instructor at Rutgers and research assistant at Alfred University.

Lorey is past president of the Ceramic Educational Council of the ACS, past president of the Rolla chapter of Sigma Xi honor society, and vice chairman of the Materials Committee of the ASEE. He is the author of several technical publications, and has been a consultant for refractories, glass and clay industries of Missouri. A Rolla civic leader, Lorey

has been active in church and community affairs.

Hafeli was on the staff of the MSM Athletic Department from 1942 to 1949. A graduate of Washington University, Hafeli was head coach in football and basketball at Kenyon College before joining the MSM faculty. In addition to coaching, he served part of this time as director of athletics and physical education with special emphasis on the physical training program of the Army trainees on the Rolla campus. Since leaving the faculty in 1949, he has been owner and manager of a Rolla drug store and the Rolla Swimming Pool.

Student Union

"Charade", a Technicolor production starring Cary Grant and Audrey Hepburn, will be presented by the Student Union on Sunday, October 10, at 2:30, 5:00 and 7:30. This Stanley Doner production also stars Walter Matthau and James Coburn. "Charade" is based on a screenplay by Peter Stone and the music is directed by Henry Mancini. This movie is a combination of sparkling wit and sophisticated charm in an atmosphere of sinister intrigue. Beautiful Audrey Hepburn is stalked by three

roughs who believe she knows where a gold hoard, stolen by her late husband, is hidden. Cary Grant appears as her protector, but his motives are questioned by Miss Hepburn after she receives an anonymous phone call. She is terrorized by a series of threats to her life and appearances of mysterious bodies as the forces of evil close in on her. "Charade" is a masterful combination of romance, comedy, and mystery that will be enjoyed by all.

Kick the dull driving habit. Step out in a lively Dodge Coronet.

Isn't it time you joined the Dodge Rebellion?

Forget all you've seen and heard about '66 cars. Because Coronet is here . . . sharp, smart and sassy, the greatest thing from Dodge since Year One. Loaded with luxury the higher-priced cars haven't caught onto yet. With a choice of five engines, each one designed to make the walls of Dullsville come tumbling down. And with a whole slew of standard equipment that used to cost extra. Like an outside rear view mirror. A padded

dash for extra safety. Variable-speed electric windshield wipers and washers. Backup lights. Turn signals. Seat belts, two front and two rear. And, as some extra frosting on the Coronet cake, a 5-year or 50,000-mile warranty.*

Enough said to get you really tempted? Now let's get away from the look-alike, drive-alike, first-cousin cars with Coronet, a car with a lively personality all its own.

DODGE DIVISION

CHRYSLER
MOTORS CORPORATION

'66 Dodge Coronet

***HERE'S HOW DODGE'S 5-YEAR, 50,000-MILE ENGINE AND DRIVE TRAIN WARRANTY PROTECTS YOU:** Chrysler Corporation confidently warrants all of the following vital parts of its 1966 cars for 5 years or 50,000 miles, whichever comes first, during which time any such parts that prove defective in material and workmanship will be replaced or repaired at a Chrysler Motors Corporation Authorized Dealer's place of business without charge for such parts or labor: engine block, head and internal parts, intake manifold, water pump, transmission case and internal parts (excepting manual clutch), torque converter, drive shaft, universal joints, rear axle and differential, and rear wheel bearings.

REQUIRED MAINTENANCE: The following maintenance services are required under the warranty—change engine oil every 3 months or 4,000 miles, whichever comes first; replace oil filter every second oil change; clean carburetor air filter every 6 months and replace it every 2 years; and every 6 months furnish evidence of this required service to a Chrysler Motors Corporation Authorized Dealer and request him to certify receipt of such evidence and your car's mileage. Simple enough for such important protection.

Join the Dodge Rebellion at your Dodge Dealer's.

THE MISSOURI MINER

PAGE 9

C-N Eagles Outclass Miners; Experience Proves Valuable

By Lloyd J. Lazarus

Last Saturday night the MSM Miners lost to the Eagles of Carson-Newman 27 to 0, after having traveled thirteen hundred and fifty miles for the game which was played at McGown Field at Jefferson City, Tennessee.

The Miners received the opening kickoff, and on the first play of the game Price fumbled on our own twenty yard line. Seven plays later Lelozier, the Carson-Newman fullback, went in for the touchdown. Rich's PAT was good and with eleven minutes left in the quarter the score was Eagles 7 Miners 0.

MSM Passing Fails

It seemed like that was the way it went all evening on offense. Ron Lewis was only able to connect on five of twenty-five passes. Only one of those in the second half. Four of his passes were intercepted three of them very close to the Eagle goal line. The Miners were deep in Eagle territory and were unable to score. Once Starnes dropped a Lewis pass in the end zone, and they were never able to establish either our running or passing game. This is what accounted for the nine punts during the game.

Damotte Places Third in Wash. U. Meet

Defeat came to the MSM cross country squad for the second straight time this season, as the Washington University Bears walked off with the first two places and the meet, 18 to 34. Romano, a freshman from "The Hilltop," ran the best time for the four mile course, twenty-one minutes and thirty-two seconds. Nelke, a junior on the Wash. U. squad came in second with a mark of 22:07.

Skip Damotte was third in line at the finish, his time being 22:20. The next four places belong to Washington U., and Ronnie Tracy was beat out by a tenth of a second for seventh.

After that seventh man had crossed the wire, five MSM squad members came in within a time period of 30 seconds. According to student-coach Ted Moore, "This shows good strength in the back part of the squad. The group is just a little slow, about 40 seconds off the pace."

Romano edged within a few seconds of the course record for the Washington University circuit, now set at 21 minutes and 8 seconds. It is almost certain that the upstanding mark will fall sometime this season.

Saturday, October 9, the Miners will host Greenville College in a meet to be run on the MSM golf links. Scheduled for a starting time of 11:30 a. m., the meet should produce an indicative showing of power in the Miner ranks. Coach Moore commented that the chances are real good for an MSM victory.

The Miner defensive team was caught napping a few times, but in general played a good game. This was the hardest hitting team the Miners have played against all year. Tempers ran high all during the game on both sides.

Carson-Newman scored again in the first quarter on a twenty-one yard pass from Flora to Cox. Rich's point after touchdown was good and the score was 14 to 0. This was the only pass Flora attempted in the first half. This

In the fourth quarter the Eagles intercepted another Ron Lewis pass. Four plays later the Eagles had covered the fifty-nine yards to pay dirt. Rich who had replaced Flora threw a thirty-one yard pass to Warren for the touchdown. Rich's PAT was good. The score now stood at 27 to 0 and remained that way for the rest of the game.

(Continued on Page 10)

INDIANS SCALPED 50-7

STATISTICS

MSM		C-N
7	First downs	15
125	Yards, rushing	190
59	Yards, passing	160
25	Passes attempted	15
5	Passes completed	8
2	Passes intercepted by	4
9-33	Punts	8-37
28	Yards penalized	91

was very unusual for a team that is known for their passing attack.

The third quarter the Eagles played the kind of ball they are known for. Flora opened up a very effective passing attack that caught the Miner defense flat-footed. Flora passed twenty-eight yards to Warren for the Eagle touchdown. The PAT was not attempted because of a bad pass from center.

Both Defenses Sparkle

The rest of the period was highlighted by an outstanding defensive play by both sides. In the period Carson-Newman picked up two first downs on their touchdown drive and were forced to kick each time they gained control of the ball for the rest of the period. The Eagles in the mean time held the miners and prevented them from picking up any first downs.

Kirksville and Central Mules Edge by Opponents

Narrow margins gave victories to at least three Missouri Intercollegiate Athletic Association teams last Saturday, but those who lost, lost hard! Warrensburg edged Emporia State by a single point (7-6), Kirkville nipped Kansas State of Pittsburg 20-19, and Maryville defeated William Jewell 14-7. Losses included a 50-7 sweep by Austin Peay over Southeast Missouri State, Drake's 24-8 win over SMS, and the 27-0 Miner burning by Carson Newman.

Sharran Washington, 190-pound junior halfback, accounted for all three of NEMO's touchdowns Saturday night, but the most important was the final score in the early minutes of the fourth quarter. Mike Bielec's conversion brought Kirkville from behind to take the game.

Northwest Missouri State held William Jewell of Liberty, Missouri, to 29 yards rushing, and dropped the Cardinals by the

Dodge City Squad Awaits MSM Homecoming Showdown

Homecoming should spell victory for Dewey Allgood's Missouri Miners tomorrow as the Cavaliers from Dodge City, Kansas, prepare for a showdown at the Jackling-Field Corral. Ringleader Charles Branda and his squad from St. Mary's of the Plains College will be trying for their first win in four starts this season, but the fighting Miner Eleven are seeking their second victory of the 1965, nine-game card.

The Silver and Gold of MSM, battling back from a 27-0 shut-out at the claws of the Carson-Newman Eagles last week, are expected to confront an improved Cavalier squad, headed by the right half back John Archer. Archer and his teammates no doubt learned quite a bit from their thrashing by Nebraska Wesleyan Saturday. Nebraska had been noted as one of the toughest small college teams in the midwest, "a real strong ball

club," according to MSM Coach Allgood.

Sixty-nine members are included on the Miner roster at this point in the season, and injuries thus far have been minor. Starting line-ups for tomorrow's game will be as usual, with either Ricker or Gasparovic in the right halfback position and Cucenas or Price in the fullback spot.

Barring adverse weather and unfortunate breaks, returning alumni can expect to see triumphant Miner football in some of the best action this season.

FORENSIC CLUB MEETS

Harmon Picks Georgia, Michigan State to Win

The surprising Georgia Bulldogs continue to roll. They're ranked 6th this week, and will whip Clemson by 27 points. Florida, after its big upset of LSU, moved from 12th right up to the 7th rung of the national ladder. The Alligators will clip Ole Miss by 5 Saturday.

Texas and Arkansas will keep right on winning. The top-ranked Longhorns will bump Oklahoma by 21 points, and 4th-ranked Arkansas will hand Baylor its second straight loss, this one by 13 points.

Michigan — Michigan State . . . almost enough said! It has to be one of the bitterest rivalries in the nation. The Spartans moved up to 3rd . . . the Wolverines dropped to 13th. Though national ranking means nothing, we'll pick Michigan State to win by 10 points.

On the West Coast, Oregon and Southern Cal are storming toward a showdown. The 9th-rated Trojans are ten points too strong for Washington, and Oregon, No. 14, will sneak by the Stanford Indians by six.

A game this Saturday that may be more one-sided than almost any in their series is the Army-Notre Dame fracas in New York City. The Irish are currently 2nd in the Harmon ratings, and the Cadets are trying to bounce back. Notre Dame will roll, however, by 32 points.

Ye Olde Crystal Ball strayed a bit on the blurry side again last

week, so it was a tough battle trying to stay on the plus side of a .750 forecasting average. However, thanks to the Midwestern small colleges where we picked 35 out of 37 correctly, we managed to do it. No thanks to the major colleges!! So the season's totals read about thusly: 404 right and 134 wrong for a .751 average.

A powerful Southerner, still unbeaten, is 5th-ranked Mississippi State. And the Bulldogs will punish Southern Mississippi this week by 24 points. Alabama is still number 10 after a real scare from Mississippi last Saturday. The Tide will pin Vanderbilt by 19 points.

The Cornhuskers of Nebraska climbed from 15th all the way to 8th as a result of their first really convincing win this season. To hold their new spot, they'll have to butcher the Badgers of Wisconsin by at least 14 points.

Taking the biggest skid of any team in the top twenty were the Purdue Boilermakers. Rated 11th this week, they move into Big Ten competition against the Iowa Hawks. And the Riveters should whup the Iowans by 13 points.

MSM VS. CARSON NEWMAN (Continued From Page 9)

The Miners tried hard but were unable to get rolling due to a superior Carson-Newman team. Let's look forward to next week when the Miners have another chance to show the kind of ball they played against Pittsburg.

SIDELINES

BY JIM WEINEL

Profiting on Saturday's blunders and the scarce competition against one of the country's leading small college teams, the Mighty Miners should be in good form for tomorrow's duel with the men from Dodge City. Without a doubt, the fumbles in last week's game did hurt the Miners' chances against Carson-Newman, but the experience gained was invaluable. According to Dewey Allgood, his charges learned how to hit and hit hard. In his words, "it was either learn how to hit, or get 'killed' out there on McCown Field." So the Miners fought back, and we'll all be anxious to see the results of this "on-the-job training" at 2 o'clock tomorrow.

A look into past records points out the startling fact that Saturday's journey to Carson-Newman was the longest athletic trip undertaken in the history of this near-century old institution!! Over seventeen hours were spent on the bus in traveling to Jefferson City, Tennessee, and any coach will tell you that such a trip can only produce detrimental results in a team's playing ability. Although plans were nearly set for a plane trip to C-N, insufficient funds cancelled the much-needed flight.

Coach Allgood also mentioned the fact that the hospitality received at the southern school was tremendous, that is, up until the time that they snapped the ball!! Just an additional note: Two-hundred and fifty girls were mustered up to serenade the Miner squad for Saturday breakfast — They really know how to hurt a guy!!!
