UNIVERSITY OF MISSOURI - ROLLA

VOLUME 55

WEDNESDAY, NOVEMBER 13, 1968, ROLLA, MISSOURI

NUMBER 9

Post News Correspondent Liberator Editor to Lecture To Speak at University On Negro Riots and Revolt

James Deakin, White House Correspondent for the St. Louis Post-Dispatch, comes to UMR on Thursday, Nov. 14 at 8 p. m. and will deliver a timely, first-hand report in the Mechanical Engineering Auditorium.

Deakin has been reporting from

JAMES DEAKIN

Washington since 1954. He has covered three Presidential campaigns and three Presidents — Dwight D. Eisenhower, John F. Kennedy and Lyndon B. Johnson. Kennedy once referred to him publicly as "a distinguished cor-

respondent for one of our most distinguished newspapers."

His book "The Lobbyists" (published in 1966) is a study of major pressure groups and how they put the heat on Congress to influence vital legislation. It was widely reviewed and well received by such publications as The New York Times, The Christian Science Monitor, The Washington Star, The Kansas City Star and The Philadelphia Bulletin, which said the book "belongs in the library of every student of government."

Deakin has covered several major lobbying campaigns, including the American Medical Association's battle against Medicare, the savings and loan industry's fight against interest and dividend withholding, the legislative struggle over natural gas regulation, the Bobby Baker hearings and the Fulbright investigation of foreign lobbying.

He was one of the reporters who broke the story of Sherman Adams' intervention with government agencies on behalf of Boston businessman Bernard Goldfine. The series of stories by Deakin in the Post-Dispatch was instrumental in producing the Congress-

(Continued on Page 7)

Daniel H. Watts, one of the leading exponents of militant black nationalism, will give his views on America's racial crisis on Thursday, Nov. 14, 1968 at 8:00

p. m. in the Student Union Ballroom.

Mr. Watts, editor-in-chief of the LIBERATOR magazine, gave up a promising career as an archi-

Daniel Watts, distinguished Negro editor, will speak on "Race Riots, Rebellion, Revolt, or Insurrection."

other militant blacks feel that violence must be used if the Negro is ever to be really free, both in his own mind, as well as in the relationships with a white society. But, as violence-oriented Negroes go, Watts is a realist. He has nothing but disdain for the Utopian revolutionaries who look forward to a third-world uprising in which the black people will inherit the earth. As Watts sees it, social disorder in urban areas (the city, he maintains, is the black man's land), if it is organized around a carefully worked out ideology and programmatic demands, will succeed in winning for Negroes, not control of the society, which Watts dismisses as an absurdly impossible goal, but a "realistic piece of the action."

Those who think they already know what "Black Power" is are always surprised to have their opinions altered greatly by this congenial spokesman of the Movement. Mr. Watts is an articulate, intelligent, and intelligible man who realistically explores the many Negro splinter groups, that each have different objectives, aspirations and ideologies. His arguments are based on facts and intelligence, rather than on emotion or anger, and his talk gives a new insight and understanding to the burning internal issues that this nation must face up to — now.

Daniel Watts' subject will be "Race Riots, Rebellion, Revolt, or Insurrection."

Daniel Watts is one in a series of lectures brought to you by the UMR Student Union Board.

"Gospel According to Peanuts" To Be Subject of Short Talk

Dr. Robert Short, Professor of Theology and Literature at the University of Chicago, will speak at the UMR Student Union on Friday, November 15, at 7:30 p. m. on his popular best-seller THE GOSPEL ACCORDING TO PEANUTS. He will then have an informal question and answer period at the Cellar Door Coffeehouse in Christ Episcopal Parish House, 10th and Main Streets, at 9:00 p. m. The public is welcome to attend.

While still in his undergraduate days Dr. Short developed an interesting method of working his way through college — he wrote a best selling book which has been quite a favorite among college stu-

wonderful! Dr. Short is called "one of the most urbane and erudite interpreters of Christianity. . . ." The book is available for sale now at Scott's Book Store and the Campus Book Store.

Dr. Robert Short will speak at UMR Friday. His subject will be "The Gospel According to Peanuts."

dents. THE GOSPEL ACCORDING TO PEANUTS covers the major themes of Christian faith seen from the uniquely sane, down-to-earth "Peanuts" perspective that's funny, warm, and just plain

Dr. Short's appearance at UMR is sponsored by the campus ministries of the UCCF, Methodist, Episcopal, Lutheran, Baptist, and Roman Catholic communions.

tect to devote full time to the propagation of the doctrines of militant black nationalism. His magazine, with a circulation of some 15,000, has featured the work of many leading Negro authors, including poet-playwright Leroi Jones. Watts has lectured at colleges and universities across the country and has been the subject of articles in LIFE, THE NATION, THE NEW YORK TIMES, and many other national periodicals. He has also written an article which will appear soon in the SATURDAY EVENING POST. He appeared on TV in the first of the National Educational Television Network's challenging series, "The Dissenters."

Born in New York City, and educated in the city's public schools, Daniel Watts graduated from Columbia University with both a B.A. and a Bachelor of Architecture degree. He worked as an architect with the Park Avenue firm of Skidmore, Owings and Merrill for a few years before founding the Afro-American Research Institute and the LIBERATOR, thereby sacrificing architecture, affluence, and middle class respectability in the process. The LIBERATOR has, in its short life, become the mouthpiece of the Negro militant-intellectual, containing the blueprints for revolutionary action. According to columnist Jimmy Breslin, "Daniel Watts is the real voice of the Negro Ghetto."

In their search for a meaningful racial identity, Daniel Watts and

Richard Nixon's Elected Responsibility

By ROBERT HOECH
Miner Feature Article

The American electorate has selected a new leader, and in the coming months the exact direction, magnitude, and historical significance of this change in leadership shall gradually define itself. Displacing the aura of the Great Society will be an atmosphere of Nixon professionalism and pragmatism. On the domestic scene the most profound challenge facing the new president will be that of reuniting a nation rent asunder by dissension over the longest, most expensive, most unpopular war of the nation's history and by the simultaneous youth and Negro revolutions, which have rocked American society to its foundations. Just as he rallied a disconcerted Republican Party around him during his campaign, so must he now seek to rally a schism ridden people behind his administration in the critical years ahead.

If he can bring it about, such a converging of American attitudes and sentiments would constitute quite an achievement for Nixon, especially after his campaign's obvious appeal for the white middle class vote. Nixon, however, can draw upon the experiences of his predecessors. Plagued throughout much of his

political career by a tendency to leave audiences uninspired, he will attempt to cultivate a charisma reminiscent of the popular, influential Kennedys, striving the support of discontented minorities and of an alienated class of intellectuals, whose cynical, bitter attacks upon the Johnson administration eventually crumbled it. To accomplish these ends, Nixon will try to cast himself as an intellectual as he revamps his political image and undoubtedly will strongly support federal aid to education, despite other cutbacks in government spending. To complete the new image, a Negro Wall Street lawyer and certain former Kennedy men, such as Arthur Goldberg, are rumored to be sharing the inside track for cabinet posts with Nixon supporters, advisors, and close friends.

Nixon's domestic policy at the outset of his administration will bear the unmistakable imprint of conservatism. Stiffer means will be employed to deal with rioting and other crippling over-extensions of the right of dissent. To ease a mounting budgetary deficit, Nixon will probably table certain war on poverty measures and will generally soft pedal many Great Society programs. Rather than initiate a sweeping Marshall

Plan for the Cities, as proposed by Humphrey, he will seek to encourage and to co-ordinate federal aid with the efforts of charitable organizations, churches, individual volunteers, and private enterprise — both white and black capitalism — to rehabilitate the ghettos and urban slum areas and to improve overall urban living standards. Although Nixon may be somewhat disillusioned with his running mate, vice-president-elect Agnew is certain to assume an unprecedented role in domestic affairs under Nixon.

Summit conferences and frequent encounters with top officials of foreign nations will be much more prevalent during the Nixon administration than during the past four years. Nixon has expressed a willingness to make concessions to the Soviet Union — a practice for which he could be extensively criticized — but only in exchange for some significant improvement in Soviet-American relations. Although he may be persuaded to abandon his goal of German reunification and perhaps even recognize the East German state, discontinuation of aid to non-communist Asian nations is highly improbable.

Obviously a peace settlement will not immediately follow Nixon's inauguration. Pledged to the quest for an honorable peace, he will pursue the war as doggedly as did Johnson; however, Nixon has in mind a gradual deconcentration of U. S. military might in Vietnam and a subsequent redistribution of U. S. power around the globe to meet the growing threat of Soviet influence in the rest of the world, especially in the Middle East and Mediterranean area. The president-elect has been

quoted as saying that he regards power the best bargaining point in peaceful negotiations. Accordingly, he considers direct military aid to Israel, including the sale of fighter jets, the most effective deterrent to an Arab war of revenge.

Cautiously and efficiently executed, Nixon's flexible yet firm domestic and foreign policies, coupled with the support of the American people, can guide the nation unscathed through the next four crucial years.

"A BIG HAND FOR THE LITTLE LADY"

Henry Fonda, Joanne Woodward, Jason Robards, Burgess Meredith, Paul Ford. "Kid-glove casting, razor-sharp scripting, first rate performances and top-notch direction add up to a totally entertaining production," says Variety. An assortment of fascinating characters in a slick story of the annual biggest poker game in the West. Tense excitement builds as the game progresses, stakes become higher, and Joanne Woodward has to take over her husband's hand — a once in a lifetime poker hand. "Beautiful performances," according to Judith Christ — and for a finish, "... a delightful surprise ending that serves as a tasty dessert," New York Times.

Organizations Show Pep At Season's Home Games

For the first time at UMR a new idea for encouraging team support was recently introduced by the cheerleaders. For all home football games this fall a spirit jug was awarded to that organization or club which displayed the most spirit and vigor in cheering the Miners on to victory. The first organization to win the jug this year was Delta Tau Delta. For the next two games MRHA captured the jug by displaying the tradi-

tional "Miner enthusiasm." This week the UMR Marching Band took the jug as the Miners slipped by the Northwest Missouri State Bearcats, 7-6.

All interested Miner fans, students, and supporters of UMR are encouraged to attend a pep rally which will be held Friday afternoon at 4:30 in front of the library. This rally will be for the season finale as the Miners play SMS Saturday at Springfield.

HOT LINE BUDGET PLAN SPREADS YOUR OIL HEAT PAYMENTS OVER 9 MONTHS . . . AND INSURES YOU WHILE YOU PAY! NO INTEREST OR CARRYING CHARGE

J. W. Van Hooser found out from oil heat customers here in Rolla how they prefer to pay.

The result is our Hot Line insured 9-month budget terms. Tailor-made for you. You also get Sta-Ful automatic Delivery, instant credit and 24-hour emergency oil delivery service.

You'll be happier with Hot Line — modern oil's most modern heating service.

Intercollegiate Knights Crown Miss Cynthia Cain as Queen

Miss Cynthia Sue Cain was crowned 1968 Osage chapter duchess, Friday night at the second annual Intercollegiate Knights

Coronation Ball. Miss Charlene Krewson and Miss Brenda Wilhelm were named first and second runners-up, respectively.

IK Duchess, Miss Cynthia Cain.

Miss Cain was selected from a court of five semi-finalists by a chapter vote Thursday night. Cynthia lives here in Rolla and is a freshman at the University. She is a cheerleader and is very active in campus activities. Cynthia plans to transfer after two years and become a high school history teacher upon graduation.

First runner-up, Miss Charlene Krewson, lives in St. James and is also a freshman at the University. She, too, plans to transfer and become an elementary school teacher. Second runner-up, Miss Brenda Wilhelm, a freshman, is seeking a degree in Computer Science. Brenda, who is from St. Louis, spent one summer as a Candy Stripper at Barnes Hospital. The other lovely members of the royal courts were Miss Judith Myers and Miss Janine Delaney.

The New Blend teamed up with The Disciples of Soul to provide a spectacular evening of entertainment for those in attendance.

University Day's Exhibits Almost Near Completion

UMR University Day is Saturday (Nov. 16). This day is set aside for high school and junior college students and their teachers, parents and friends to visit the campus.

Everyone is invited to tour classrooms, laboratories and research facilities and talk informally with professors and students. The day's activities begin with registration at 8 a. m. in the Student Union. Visitors may participate in guided tours of the campus or go it on their own.

All of UMR's engineering, science, humanities and social sciences departments, as well as physical education and military science, will be open with special displays on exhibit. Representatives of all phases of UMR life will be on hand to answer questions about what the campus has to offer.

Visitors may tour Missouri's first nuclear reactor, the computer science center, the mineral museum and classrooms and laboratories in ceramic engineering, geological engineering, metallurgical and nuclear engineering, mining and petroleum engineering, chemical engineering, civil engineering, electrical engineering, en-

gineering mechanics, mechanical and aerospace engineering, chemistry, geology, mathematics and computer science, engineering management, physics, humanities, social sciences, physical education and military science.

Guests may talk with representatives of UMR's extra-curricular activities including athletics, scholastic, professional, service recognition and interest groups. The registrar will be on hand to explain enrolling at UMR.

UMR grants the most undergraduate engineering degrees of any institution west of the Mississippi River. It has the largest departments of metallurgical engineering and civil engineering in the United States.

UMR IFC, ICC Entertain Boys At Saturday's Football Game

On Saturday, Nov. 9, the UMR Inter-Co-op Council and Interfraternity Council hosted 30 boys from Boys Town of Missouri at St. James.

The UMR ICC and IFC sponsored a day for Boys Town to come on the UMR campus, see a football game and have dinner at their various organizations.

A bus brought the boys to campus Saturday afternoon where they were met by organization members and escorted to the UMR-Northwest Missouri State College football game. There, they saw a rousing sports contest and got their fill of hotdogs and soda pop.

After the game, the boys were taken to fraternity houses and eating clubs where they played games and ate a hearty dinner. The boys returned to St. James on the bus.

Members of Rolla's ICC and IFC organizations entertained the boys of Boys' Town in activities Saturday.

Miner of the Week

Inter-Campus Student Council Organized for "Four" Campuses

COLUMBIA, Mo. — President John C. Weaver met with the presidents of student governments of the 4 campuses of the University of Missouri here Nov. 1 to organize the Inter-campus Student Council. This action was the result of a meeting of student leaders called last month by President Weaver to seek student reaction and points of view on matters of concern to students.

"Even though as President I am not directly involved in student affairs on any campus, I

am vitally interested in being sure that the student voice is heard in the consideration of policies related to all campuses of the University," President Weaver said. "I feel that no President can serve an educational institution effectively if he lives in a vacuum detached from personal contact with students."

The group agreed that it would discuss only matters of University wide significance. President Weaver emphasized that all campus

matters involving students must be taken up with the Chancellor of the individual campus.

The ISC will be comprised of the student president from each campus and another student he will select. President Weaver and A. G. Unklesbay, University vice president for administration, will be members of the ISC. In addition, the University Board of Curators will be asked to have a representative at each meeting. Occasionally a student president may bring one additional student when that student has some special information that will be helpful in the group's discussion of the particular subject.

Objectives of the ISC include establishing communications between the University President and students, University wide. The ISC will enable the President to know how students feel about various University wide matters and assist him in seeking a better understanding of student concerns in order that he can make use of this information in evolving University policy.

Attending the meeting, in addition to President Weaver and Vice President Unklesbay, were: Bob Bruce, Rolla campus; Al Katz, Kansas City campus; Dave Thomas, Columbia campus; and Mike Longcor and Joe Bono, both from the St. Louis campus.

Meetings will be held every month, with at least one meeting every year on each of the 4 campuses. The agenda will be made up of items suggested by any of the members. The next meeting is scheduled for December 5th, in Kansas City.

NOTICE!

Wesley Foundation program for Wednesday, Nov. 13, 6:00 p. m. will be Dr. Jim Pogue, Chm. of the Humanities Dept. at UMR, who will review the popular best-seller *THE GOSPEL ACCORDING TO PEANUTS*, by Dr. Robert Short. Dr. Short will appear on campus at the Student Union Friday, Nov. 15, at 7:30 p. m.

On Outhouse Burning...

There seems to be considerable misunderstanding among many students concerning the intent of last week's article concerning the annual Outhouse Burning.

In the interest of clarity and to further emphasize a point, I think that UMR students deserve a word of explanation.

It was not the intent of the article to criticize the conduct of the students, police, or anyone else. On the contrary, the students acted sensibly and the police did an excellent job of holding order. They should be congratulated for their conduct.

The question which comes to mind is "Is it worth it?" Just what does it accomplish? Why do many, many people have to spend many hours year after year to prevent any trouble from happening on Halloween?

These questions are not easily answered. In fact, many cannot be answered at all.

The real meaning and the purpose of the Outhouse Burning as a tradition seems to have long since been lost in time.

Coming of Age . . .

The elections are over. The United States has chosen a new president. And political life in the United States again settles down to its old self.

But one issue has come up time and again in this and other election years. It is an issue that bears the immediate attention of both incumbent and newly elected politicians.

The issue? The 18-year old vote!

For years the idea of 18 year olds voting has been batted around among political circles for many years. Just recently has it gained any prominence as a political issue.

All over the country young Americans are trying to gain a greater voice in the nation's destiny. The student demonstrations, student involvement in political campaigns, and interest in government decisions all indicate the interest and involvement.

The young people of America contain the interest and maturity to vote and should be allowed to do so.

High Cost of Education?

LITTLE MAN ON CAMPUS

Nation's Grad School Deans Indicate Squeeze by Draft

SAN FRANCISCO (CPS) — Deans of some of the nation's most prestigious graduate schools are worried about recent publicity that the abolition of draft deferments has not hurt graduate schools.

They fear the publicity will make it difficult for them to lobby for a change in the draft law when the new Congress and administration take office in January.

Most graduate school deans had predicted dire consequences when graduate deferments were ended last February. "Graduate schools will be filled with the halt, the lame, the blind and the female," was the most popular prediction. But statistics show that graduate schools' enrollment haven't dropped significantly, and the press has been full of stories that the graduate schools aren't badly hurt.

"Nobody knows whether graduate schools are badly hurt," says Gustave Arlt, president of the Council of Graduate Schools in the U.S. "Who are these students?"

Arlt is urging that universities gather more information about their graduate students. He said, "We need to know who is enrolled and why."

Specific things graduate schools should know, according to Arlt, include which disciplines have had increases and which have had decreases in enrollment, how many of the students are part-time only, and statistics showing prospective graduate students who were

drafted, enlisted to avoid being drafted, or who took positions in teaching and industry to avoid the draft.

Arlt's position won an endorsement from the Association of Graduate Schools at a recent meeting here. The AGS is a division of the American Association of Universities (AAU), a prestige association which requires universities to meet certain standards before it will admit them. It has only 44 members.

Besides adopting Arlt's recommendation, the AGS also called on universities to watch draft de-

velopments "almost on a day-to-day basis," to do all they can to convince Congress of "the magnitude of their problems and their need for assistance," and to "correct the folklore about the draft that is doing them so much damage."

This "folklore," the AGS's committee on the draft said, involves the "notion that many or even most graduate students are in fact draft evaders."

The AGS favors either a lottery conscription system or complete abolition of the draft. It opposes deferments for graduate students.

OUR MAN HOPPE

Losers Band Together

It being the morning after the election, a goodly crowd of new members was on hand for the traditional Morning-After meeting of that huge but little-known service organization - Loser's Anonymous.

Standing on the rostrum beneath the club's banner - "The People Have Spoken, the Bums -" was the organization's experienced director, Mr. Sisyphus.

Rapping his gavel to quiet the hubbub of groans and moans, Mr. Sisyphus cleared his throat and launched into his annual inspirational talk entitled, "The Evils of Politics."

★ ★ ★ ★

Good morning, fellow losers. Welcome to the club. You have all, I'm sure, waged vigorous, hard-hitting campaigns. And you all, of course, have lost. Remember, as you sit there with your heads in your hands, that we are here to help you.

"Yes, friends, with our help, with your own strength of character and with Divine Guidance, you will be able to" - here, Mr. Sisyphus paused for dramatic effect - "swear off politics forever!"

As usual at this point, there

were cries of "Swear off," "No more speeches?" and other expressions of horror.

"There is no alternative," Mr. Sisyphus said firmly. "Let us take a cold, hard look at the statistics: for every man who struggles through the primaries and the November elections to at last win political office there are, on a national average 12.3 losers. Think of it, 12.3 to 1! Does it make sense to buck odds like that? Year after year?"

"True, there are a fortunate few who can take politics or leave them alone. But the first thing we must admit to ourselves is that we can't. For us, the only answer is total abstinence.

"Oh, it won't be easy. Temptation will beckon at every cocktail party when issues are raised. 'Well,' you'll think, 'a little social politicking won't hurt.' Don't yield! For the next thing you know you'll be making speeches from the floor at your local P.T.A. meeting. And, oh, the headiness of the applause!

"Carried away, you'll find yourself sneaking down to party headquarters to pore over old precinct lists. You'll be spending your

nights with the boys in smoke-filled rooms. And you'll be grabbing the hands of total strangers on the streets.

"Then, inevitably, you'll succumb. Once again, you'll go off on a months-long campaign binge - forsaking your family, squandering your savings on bumperstrips and whooping it up at rallies night after night. And once again, 12.3 to 1, you'll lose!"

Mr. Sisyphus paused to let this sink in. "Remember, friends," he said slowly, "politics is not a character weakness. It's a disease. You can be cured. When you feel that urge to shake a hand, to make a speech, call us - night or day.

"With total abstinence, you can be rehabilitated. You can be restored to your family and friends. Yes, fellow losers, by giving up politics you can once again become a useful member of society."

★ ★ ★ ★

So eloquent was Mr. Sisyphus traditional appeal that, as usual, every man in the crowd was convinced. As usual, each looked around at the others and said the same thing to himself.

"He's absolutely right," each said, "about these other guys."

Windowshopping

By WALLY EDWARDS

It has been noted that "Windowshopping" has destroyed many of those institutions which were once considered sacred, and this week is no exception. Mother - a word that might well mean the world to some individuals - only succeeds in posing a problem to those college students away from home. It seems there is an unwritten law that the son or daughter spending time in a higher educational institution shall write his or her mother as frequently as she demands. You don't believe that, eh? Well, let us assume you don't write your mother for a rather lengthy period of time. She then has a number of ways to "convince" you (often with all the finesse of an unpaid creditor) that it would be best to take pen in hand and send that letter. The techniques she uses fall into three categories: 1) apparent innocence, 2) guilt and 3) bribery. Any mother who is resourceful enough can successfully employ all of these methods in her letters and will eventually prompt her naive offspring into writing. Pay careful attention and you will see those tactics outlined above in a series of letters I once received from Mom. If you are one of those like myself who find it a bothersome chore to write home, you will soon learn to avoid succumbing to this primitive strategy.

September 23

Dear Son,

Here it is two weeks into a new school year and we still haven't heard from you. I know that you are busy but surely you can take a few minutes out to write. With so many exciting things happening, you must have something to say. A postcard will do. I'm certain a letter is already on its way, and all this is unnecessary. If so, please forgive my anxiety.

Mom

October 10

Dear Son,

There is still no word from you. Our next door neighbor has a son in college and she gets a letter twice a week. What am I doing wrong? Your father and I bought something nice for your room last night.* I know you want to see it, but if you don't get the chance to come in, I'll tell you all about it once I get your letter.

Mom

*Note: In reality, this turns out to be a new rug.

October 27

Dear Son,

We looked for your letter over the weekend, but it didn't come. It must be at the Post Office because I just can't believe that you would forget to write. Perhaps you have forgotten our Zip Code and that has slowed up the mail. I have enclosed a stamped, self-addressed envelope so you won't have that problem again. We tried calling you last weekend, but they said you were out on a bender. Is that one of those new car models?

Mom

November 11

Dear Son,

Where have we gone wrong? What have we done to deserve this? Yesterday a census taker came to the door and asked, "Do you have any living dependents?" And I answered, "I don't know." Your father decided last night that if we don't hear from you soon, we're going to stop sending money.

Mom

I would continue this discussion further, but I have an important piece of correspondence to get to. Don't forget the Wally Edwards Show from 10 to 11 p.m. every Sunday night on KMSM Radio. Stay outta trees.

A GI in Vietnam who saw Lyndon asked, "Aren't you President Johnson?" LBJ said, "Yes, I am." And the GI said, "Man, that's what I call a draft board!"

Student Forum

5th Dimension

Missouri Miner
University of Missouri - Rolla
Rolla, Missouri 65401

Dear Sirs:

I have recently returned my tickets to the Fifth Dimension concert that was intended for Halloween night. Today I heard a rumor from a fellow from St. Louis who was in that city this past weekend. He was commenting on how everyone he talked to in St. Louis was impressed by the fine concert given by the Fifth Dimension in St. Louis on Halloween. It seems, according to the same rumor, that the concert was presented as a benefit for the Teamsters of St. Louis. Very Interesting!!!!!! How is it that the Miners are given excuses for cancellation and their money turned down, but the group sees fit to present a benefit for the Teamsters? This might be a good question for the Student Council to ask.

Signed,
JOE MINER

(Editor's Note:) Joe Miner's information is basically correct, however, several extenuating circumstances must be explained in connection with the cancellation of the Fifth Dimension performance.

The fact that they played for the Teamster's in St. Louis is true. They play with several other acts in a Democratic Fund Raising Benefit. Sponsored by the Teamsters. Their performance was short due to the number of fine acts, and Miss McCoo's doctor allowed her to perform for 15-20 minutes in St. Louis, but would not per-

mit any extended performances such as the 2 hour show in Rolla.

It should also be noted that the benefit was arranged in conjunction with Frank Sinatra, an old friend of the Fifth Dimension and who was responsible for their entrance into show business.

I'm sure that if at all possible, the Fifth Dimension would have performed in Rolla, only 100 miles from St. Louis on the 30th (the day before the Teamster's benefit) for \$8000 if at all possible.

Compliments

Mr. Robert S. Bruce
Student Council Office
Dear Bob:

I am most grateful to the Student Council and especially to the efforts of its officers for maintaining an orderly celebration on Halloween. As you know, student activities are very much on the minds of the public and even small disorders can be very damaging in the attitude of the public.

Rolla now has the best relationship ever with the Missouri public and with the Legislature. I am confident that this is largely a result of the academic performance of our students and also of their seriousness of purpose.

Sincerely,
Merl Baker
Chancellor

Gentlemen:

On behalf of the Rolla Police Department and all Officers, we express sincere appreciation to your organization and the many hundreds of students at UMR, for your interest and help and assistance in making this halloween a time for fun, instead of a time for vandalism.

We feel that this year's activities were one of the best we have ever experienced and that this was accomplished through efforts of organizations such as yours.

Sincerely Yours,
A. W. Light
Chief of Police

Odd Bodkins...

Honorary Cadet Colonels Chosen

This year the ROTC Department has selected the finest group of young women ever to represent the cadet brigade. The new Honorary Cadet Colonels include COL Barbara Killian, LTC Glenda Miller, LTC Judi Myers, and

ball game Saturday, November 9. They all will be at several other formal events this year including ROTC Brigade Reviews, Awards Ceremonies, and the Annual Military Ball. Honorary Cadet Colonel Barbara Killian, is a sopho-

brigade for the highest rank, that of full Colonel. She will be escorted to social events including the half-time ceremony this semester by the Cadet Colonel Gary J. Bockman.

Honorary Cadet Lieutenant Colonel Glenda Miller is a freshman at UMR majoring in English. Her home town is St. James, Mo. She is a 5' 3" blonde, with hazel eyes and should be well known to Miner fans as being one of our lively cheerleaders. Besides having a great interest in sports, she also enjoys dancing. She plans to go into teaching after graduation.

Glenda was selected to be the First Battalion Sponsor so she will be escorted to events by the First Battalion Commander, Cadet LTC Denny R. Townson.

Honorary Cadet Lieutenant Colonel Judi Myers is a freshman at UMR majoring in Computer Science. Her home is in St. Louis, Mo. She is 5' 10" with light brown hair and baby-blue eyes. Judi was selected to be the Second Battalion Sponsor thus escorted to events by the Second Battalion Commander, Cadet LTC Ronald W. Anderson.

Honorary Cadet Lieutenant Colonel Martha McNeill is a sophomore and Math major here at UMR. As evidenced by her charming personality and dialect, her home is in North Little Rock, Arkansas. On campus, she is quite active in the Math Club and Young Republicans. She is a 5' 4" brunette with big brown eyes. Martha was chosen to be the Third Battalion Sponsor. She will be escorted to all military social events by the Third Battalion Commander, Cadet LTC Tom M. Wilcox.

Honorary Cadet Colonel Barbara Killian and her escort to all official events, Cadet Colonel Gary J. Bockman.

LTC Martha McNeill. The young ladies are chosen from coed students on campus who are willing to devote a part of their time and energy to represent the ROTC Cadet Brigade at many social functions. They will be introduced to the student body at the half-time ceremony during the foot-

more majoring in Psychology. Her home town is here in Rolla. She is 5' 2 1/2" tall with brown eyes and radiant blond hair. Students may recognize her uptown as the very attractive, sophisticated blonde who works at Lorraine's Children's Shop.

Barbara was selected by the

The UMR-ROTC Honorary Cadet Colonels for 1968-69 are (from left to right): Martha McNeill, Judi Myers, Barbara Killian, and Glenda Miller.

After you've met the challenge?

If you're the kind of Civil Engineer we're looking for, you'll start searching for another one to conquer. Here at the Pennsylvania Department of Highways, we offer a host of challenges to the right man. But, to be that right man, you've got to be pretty special.

You see, we search out and encourage Civil Engineers whom we consider capable of grasping a challenge; skilled men, comparable to the great Engineers who are "building Tomorrow today in Pennsylvania." If you can measure up to the standards necessary to fulfill Pennsylvania's \$10 billion plan to lead the nation in highways, we'd consider it a challenge just to get to know you.

A Pennsylvania Department of Highways Career Representative will visit your campus. To arrange for an appointment, or if you desire additional information, contact the placement office.

Proctor Relates Conditions In Prague to UMR Students

The program for the monthly A.U.S.A. meeting this month was Prague-Invasion and takeover presented by Dr. Proctor. Dr. Proctor, dean of science here at U.M.R., related the story of this past August when he attended the International Geological Congress and the meetings were adjourned by the Russian invasion.

The 23rd Congress which is held every four years was attended this year by over 4000 scientists representing 91 nations including Russia. It was held in Prague, Czechoslovakia, the heart of eastern Europe, this year.

His presentation included slides of the trip. Pictures of his trip going to the congress included those of Iceland and Frankfurt where he went for geological reasons. Once in Prague, most of the photos taken were of the actual takeover. Said Dr. Proctor "the people seemed so carefree and gay even though they knew they were sitting on a powder keg, which was about to blow up any minute." After the invasion he said of the people "the older ones hung back, having been through an invasion before and knowing the consequences of resistance, but the young people showed that a takeover wasn't what they wanted by offering very active resistance and suffering for it."

The Doctor also expressed the feeling that the U.S. Embassy in Prague was very inadequate in their concern for U.S. citizens there and made no effort to supply information on the happenings or how they could escape. The American citizens had to band together

to let the Embassy know just who was present. They were eventually taken care of and were able to exit the country by train but not before they witnessed much of the rioting and violence.

News Editors Support Halt In U.S. Bombing

MINNEAPOLIS, MINN. (ACP) - A majority of the nation's college newspapers editors favored the stopping of all bombing in Vietnam in order to further peace negotiations.

The poll was conducted by Associated Collegiate Press during the second week of October before rumors became persistent that the United States actually stopped bombing and was based on a computerized sample and a mail ballot to 10 percent of all college editors.

Editors were asked: Regarding the conflict in Vietnam and peace negotiations, I favor - (a) stopping all bombing, (b) increased military effort to deal from strength and (c) a middle course of military action.

Results indicated 52 percent favored stopping all bombing, 24 percent increased military action, 22 percent a middle course and 2 percent called for stopping all bombing and immediate withdrawal.

Breakdown of the respondents by sex showed 35 percent were women and 65 percent men.

Jean-Claude Killy talks shop... Chevrolet Sports Shop

(Freely translated from the French) "I am a man who drives for sport... for fun, you know? This is why I am telling you about the brave new Chevrolet and its Sports Shop."

"Only in the Chevrolet Sports Shop do you find cars like the Camaro Z/28. Ah, the Z/28. Camaro with 302 V8, more muscular suspension and Hurst shifter. Only Z/28 offers 4-wheel disc brakes like Corvette, also in the Sports Shop."

"You will find, too, the Camaro SS, Chevelle SS 396, Nova SS and the big Impala SS 427."

"The Sports Shop. Part of the Sports Department at your Chevrolet dealer's."

"But of course."

Putting you first, keeps us first.

Jean-Claude Killy, winner of three gold medals in the 1968 Winter Olympics.

IAESTE-US Seeks UMR Students To Work Overseas Next Summer

Applications are now being received for interested UMR engineering and science students who wish to work overseas this next summer. The program which sponsors this exchange is IAESTE - US (International Association for the Exchange of Students for Technical Experience), the largest technical student exchange program in the world. These applications and information on the exchange program can be acquired from the Center for International Programs and Studies, 110 Mining Building. Deadline for submission to New York is December 15.

The IAESTE program annually exchanges engineering and science students among 39 foreign countries to provide these students with a meaningful summer experience in their discipline of study with a corporation in a foreign country. Over 10,000 students are

exchanged annually.

The participating countries are: Belgium, Denmark, Finland, France, Netherlands, Norway, Sweden, Switzerland, United Kingdom, Austria, Germany, U.S.A., Israel, Italy, Spain, Yugoslavia, Canada, Iceland, Portugal, Turkey, India, South Africa, Greece, Poland, Tunisia, Argentina, Luxembourg, U.A.R., Ireland, Colombia, Japan, Lebanon, Sudan, Chile, Czechoslovakia, Iran, Syria, and Malta.

IAESTE is a worldwide exchange program developed in 1949 in Europe to provide the technical student with an intellectual, cultural, and international opportunity during his university studies.

Dr. R. E. Carlile, Director, UMR International Center is the local representative and has been on the U.S. Executive Council of IAESTE for the past 8 years.

Applications are limited to Sophomores, Juniors, Seniors, and Graduate Students in the following disciplines: Aeronautical Engineering, Biology, Ceramics, Chemical Engineering, Chemistry, Civil Engineering, Electrical Engineering, Geodesy, Geology, Industrial Engineering, Mathematics, Mechanical Engineering, Medicine, Metallurgy, Mineral Dressing, Mining, Oil Technology and Physics.

UMR Opinion Poll

There has been some discussion among students at UMR concerning the possibility of establishing a Navy ROTC program. With this in mind, the *Miner* is conducting a poll of interested people to determine if interest is of such an extent to warrant further investigation.

National Groups Attack Freshman Questionnaire

WASHINGTON (CPS) - A questionnaire being distributed this fall to one and one-half million college freshmen by the American Council on Education has been attacked as an invasion of privacy and a possible violation of due process by the National Student Association and the American Civil Liberties Union.

The questionnaire, a detailed four-page set of inquiries on home life, interests, activities and habits, is an attempt to correlate a student's predilection toward protest activities with his high school record, his study habits, his grades, and various other elements of his background and interests.

The NSA and ACLU spokesman who studied the questionnaire protested to the ACE at its annual convention recently that the form did not provide adequate safeguards for the students completing it against "improper disclosures of information and use of the questionnaire by unauthorized persons."

Specifically, according to NSA President Bob Powell, there is no guarantee that the information given via the questionnaire will not be seen by officials at the student's university and used against him. According to the ACLU, requiring a school president to sign statements that the data will not be abused "is not a satisfactory safeguard."

Another of the form's omissions, according to Powell, is of a statement telling the students to whom the form is sent (a random sampling of some kind) that they are not required to fill out the form, nor to answer all the questions on it.

NSA also objects to use of the student's social security number as a code number, since through that number he is easily identifiable to government agents or other persons who might obtain access to the information.

UMR Geology Department Records Biggest Earthquake in Years

Last Saturday at 11:02 A.M. an earthquake of moderate intensity rocked the central region of the United States. Measuring 5.5 on the Richter scale and 4 on the Mercalli scale, the earthquake was slight and caused very little damage and injury.

Seismologists of the geology and geophysics department of UMR registered the quake on their instruments and found it to have an epicenter somewhere in the vicinity of the southern Illinois-Indiana border. Dr. Saad of the geophysics department said that the earthquake had a duration of approximately two minutes with a short break in the middle. He also stated that there were no fore or after shocks as of three hours following the quake.

The quake, although of only moderate intensity, shook a large area of the United States ranging from as far west as Oklahoma and Iowa to the Atlantic coast in the Carolinas, and north from Wisconsin to Mississippi. Those who observed the effects of the earthquake reported that cars rocked, windows cracked, bricks fell, chimneys toppled, and plaster cracked in many places. In particular, it was noticed that certain areas of ground had sunk in Iowa. Although there were no deaths reported, a few injuries were sustained and some nerves frayed.

Other sources stated that the center of the quake was within the New Madrid Fault area, located near Missouri's Bootheel. It was in New Madrid in 1811 and 1812 that one of the world's largest earthquakes occurred. Quakes equaling the intensity of the San Francisco quake of 1906 rocked the central United States for a year. So powerful were these quakes that principle shocks were felt over an area of over one million square miles. Over three thousand square miles of land were altered, and the course of the Mississippi River was temporarily reversed. Entire islands in the river were sunk and others were born. Lakes suddenly appeared and swallowed up forests and thousands of acres of farm land. Some 150,000 acres of prime timber were destroyed. It is an extension of the fault caused by this massive earthquake that has been attributed to the recent quake.

The earthquake registered 5.5 on the Richter scale. As a comparison, this quake had only one-seventh thousandth the energy produced by the San Francisco earthquake of 1906 which registered 8.9 on the scale. This is equivalent to a Mercalli scale reading of 4 which describes an earthquake that is felt during the day by many indoors and by a few outdoors. At night some people are awakened. The general effects are that windows, dishes and doors rattle, while walls make creaking sounds.

Several theories exist as to the cause of earthquakes. However, it is the Sea Floor Spreading Theory which is most generally accepted and is applicable to the quake of Saturday. The theory states that there is a convection at the sea bottom in which huge amounts of material from the manta layer of the earth are moving in a circular path up from the depths

of the ocean floor beneath the continental land masses. As a result of this convection, stress and pressure increase to overcome a weak fissure or fault, and cause either a vertical or horizontal slippage. The impacts of the moving manta material produces shock waves which travel far from the place of origin. This justifies the case that earthquakes are more frequent in the coastal regions where the effect of the land convection is more evident. In a central location such as Missouri, the convection is not nearly as great as it is near the ocean; therefore, it takes a longer period of time to build up enough pressure to overcome a fault and cause a slippage.

There is presently a program of

research aimed at forecasting earthquakes. Commenting on this research, Dr. Saad stated: "As of now, there is no way of forecasting earthquakes accurately. I do expect that some sort of forecasting system will be developed within the next decade." Japanese and U.S. scientists are working on some sort of method to predict these quakes so that an effective warning system may be set up. At present they are working on a system that involves the change in the earth's magnetic field since it has been observed that during earthquakes of sizeable proportion the intensity of the earth's magnetic field changes. But until some warning network is established, we are vulnerable to one of nature's most potent weapons - the earthquake.

Annual Asphalt Meeting To Be Held at Rolla

The annual Asphalt Conference will be held Nov. 14-15 at UMR.

Participants from across the United States will hear talks and discussions on the latest developments in the manufacture and use of asphalt. Educators, professional engineers and company executives from across the country will speak in five technical sessions.

Among topics to be featured will be the repair and maintenance of city streets, hot storage of asphalt paving mixtures, performance of skid resistant overlays, asphalt surfaces for recreation and parking areas, use of asbestos in bituminous bridge deck overlays, use of blast furnace slag in bituminous concrete and improving the

riding qualities of bituminous concrete pavements.

The event is sponsored by the UMR department of civil engineering in cooperation with the Missouri Bituminous Contractors Association, the Missouri State Highway Commission, the Asphalt Institute and the Missouri Society of Professional Engineers. The conference is under the direction of Dr. Ward R. Malisch of the UMR department of civil engineering.

Registration may be made and further information obtained by contacting the UMR Extension Division. Registration fee, which includes a banquet and luncheon, is \$12.

We encourage job-hopping. We do try to keep it intramural—within Du Pont that is—and we do have a more formal title for it, "planned mobility."

Saylor Gilbert, CH.E., V.P.I., 1962, tells it like it is.

It only means we don't put you in a training program. We put you in growth jobs—to help you get to the top of your field the way you want to get there.

"Take a good look around you, and you'll see people at Du Pont who've had a lot of movement through very different kinds of jobs. There's no doubt that this diverse experience helps you. For example, I had four assignments concerned with different aspects of polymerizing, casting, stretching and finishing our polyester film base."

"Having had all this, I feel I was better prepared for my present position of training supervisor. But aside from the fact that variety can help you, I believe most people just like a change after working at one job for a period of time."

Your Du Pont recruiter will be a guy like Saylor. Ask him about planned mobility—or anything else you'd like to know about Du Pont. Mailing the coupon is the surest way to get in touch with him.

FRATERNITY NEWS —

UMR Fraternities Host Boys From Boy's Town at St. James

By Don Rueter

The UMR Interfraternity Council, in trying to promote an increasingly better relationship with the surrounding communities, has developed a new project that was first put to use this past weekend. In this project several young boys from the Boy's Town at St. James were brought to Rolla to see the UMR Miners football game and then were taken to the various

fraternity houses for dinner. The project was small in scope this first time, with eighteen boys being escorted to the game by the fraternities. Of these boys, three were sponsored by Kappa Alpha, three by Delta Sigma Phi, three by Lambda Chi Alpha, and the remaining nine by Delta Tau Delta. It is hoped that this project will be expanded next year when the football season reopens

UMR Amateur Radio Club Explains its Facilities

As you read this, you're no doubt thinking, "What is the UMR Amateur Radio Club?"

To answer your question, the club has been active on this campus since the 1930's, when its first amateur station was set up in one of the towers of the old Jackling Gym. It was then the MSM Amateur Radio Club, and it remained so until last month when the name was changed.

Today the club station, WOEEE, is located in the basement of the Rolla Building, and it is manned by the thirty-four members of the club. One of the station's major activities is the passing of messages from UMR students and Rolla citizens to locations in the United States, its possessions, and several foreign countries. Forms for filing messages are available at the Student Union Candy Counter.

For amateur radio buffs, the complete Heath SB line is in use

at WOEEE, and a Novice station has recently been added to the "shack". A club committee under Lyndell Brown is working on a VHF installation. Herschel Jackson's committee is building a new wood console to house the station's equipment.

In the near future, plans include an outdoor exhibit of club equipment in operation for University Day, November 16. The new console will be on display outside the Student Union, and messages may be filed and sent from the display site at that time.

Officers for 1968-69 are President Lyle McWilliams, Vice-President Jack Werthman, Secretary Charlie White, Treasurer Bruce Bozarth, Station Manager Jerry Dehaven, and Activities Chairman Terry Webb.

Meetings are held bi-weekly on Tuesday evenings at 7:00 o'clock. The next one is November 19 in room G-5 of the Library.

in order that it may reach a larger number of young boys who would not otherwise have this opportunity.

The brothers of Kappa Alpha were proud to have as their guest Dr. Robert Montgomery who is an alumnus of their chapter at Bethany College in Bethany, W. Virginia. Dr. Montgomery, who is teaching psychology here at UMR, showed a film called "Riot in the Streets" after which he spoke on the causes of riots in the major cities of the United States.

Mr. Frank Woodbury was recently appointed province arcon of all of the Missouri chapters of Sigma Pi fraternity. He will serve as advisor to all of these chapters and will be especially helpful to the local chapter which is tied up in a dispute with the school concerning their moving to the Nagogami Road area.

TEENS OVER-REACT TO BOMB HALT

By GUY MENDES
The Kentucky KERNEL

Louisville, Ky. (CPS) — It was V-A day.

Youngsters screamed, "The war is over," while waving two-fingered victory signs. They shouted; they hugged the people next to them. A victory for peace had been won in America — or at least so they thought.

It had just been announced at a rock concert in Louisville on Halloween night that the President had ordered an end to the bombing in Vietnam. The emcee didn't specify North or South, he just said Vietnam.

Most of the crowd of several thousand were of high school age. At the announcement many jumped to their feet cheering. Visions of troop steamers easing into crowded West Coast harbors danced through my head. For a

moment I had been caught up in the delusion. I checked myself — a time for optimism, yes; for jubilation, no.

I had heard the radio announcement of the halt as I pulled into the concert hall parking lot. The announcement was not unexpected and caused no great elation.

But the audience was young, mostly high school age. Not having communicated in the past few years with the high school set, I wasn't certain they were even interested in political news.

The war still in the primary processes of escalation while I was at that age had had little effect on our daily lives. Few actually feared it; most were headed for college and did not expect to be bothered by the conflict.

Soon after I found my seat, it was to become apparent that the war weighs heavily on the minds of today's teen set.

A thin girl behind me began repeating, "The war is over, the war is over," in an over-zealous tone which led me to believe she was being satirical, or maybe just repeating the identical title of one of the Doors' songs.

I overheard as she turned to the lad next to her and almost squealed — "Isn't that great?"

"Yeah. Eighteen isn't too far around the corner, you know," he told her.

"Well now you can look forward to being 18," she said.

It was too much, sounding more like a canned routine of two back-seat teenie-boppers than a dialog between two live kids.

But they were sincere. Down the row a boy had begun repeating that the war had ended while hugging his girlfriend.

I couldn't stand it; it was as if someone had played a cruel joke on these children, children that,

as I hadn't fully realized, knew they faced a very vague future.

I turned to the girl and explained that even though the bombing of North Vietnam was to cease, the war would continue in the South.

Probably being only a front-page headline reader and not knowing much about the complexities of the war, the girl had trouble grasping what I had said.

She got some inkling of the idea soon enough and grabbed the boy a few seats down, asking me to repeat what I had said to him.

At that the emcee bounded to the stage to give the news.

Many young minds were temporarily eased that night. Unfortunately, the war was far from over. But who could explain that to these suddenly reborn children? They were busy enjoying Jim Morrison of the Doors as he

shouted: "We want the world and we want it . . . now?"

The kids snapped their Christmas Kodaks and hollered back with a loud, affirmative "NOW!"

NOTICE!

There are still a number of students who have not picked up their auto registration stickers. Failure to display a sticker will result in a \$10.00 fine. They should be picked up at the Traffic Safety Office immediately!

Engineering and Science at IBM

"The interdisciplinary environment keeps you technologically hot."

"Working in data processing today pretty much means you work in a broad spectrum of technologies," says Nick Donofrio.

An Associate Engineer at IBM, Nick is a 1967 graduate in Electrical Engineering. He's using his technical background to design circuits for computer memory systems.

"Circuit design used to be a narrow job," he says. "Today it can take you into the front yard of half a dozen different fields. In my job, for example, I work with systems design engineers, chemists, physicists, metallurgists, and programmers."

Nick describes a hypothetical case history: "A memory systems man comes to me with memory circuit requirements. Before I can start designing the circuit, I go to see a physicist. He helps me select an appropriate technology for the monolithic circuit.

"As the design develops, I work with a test group and also check back with the systems and semiconductor people to make sure I'm on the right track."

Keeping up

The interdisciplinary environment at IBM helps you keep up to date technologically. As Nick puts it, "You're constantly exposed to what's happening in other fields."

IBM needs technical graduates to work in research, design and development, manufacturing, product test, field engineering, and space and defense projects. We also need technical people in programming and marketing.

Check with your placement office

If you're interested in engineering and science at IBM, ask your placement office for more information.

Or send a resume or letter to Irv Pfeiffer, IBM Corp., Dept. C, 100 So. Wacker Dr., Chicago, Ill. 60606. We'd like to hear from you even if you're headed for graduate school or military service.

UNIVERSITY OF MISSOURI - ROLLA

Miners Drop Bearcats by 1, Post 4-4 Overall, 2-2 MIAA

By Doug Ross

On Saturday, November 9, the UMR Miners handed Northwest Missouri State a 7-6 defeat. The Miner victory against the Bearcats evened the UMR win-loss total with a 4-4 record.

The game began with Maryville's kick to the Miners' 10 yard line. A 20 yard return by safety Eddie Lane put the Miners on their own 30 yard line. It was apparent from the action in the first quarter that the game would be decided by the defensive squads and the Miners' Golden Horde held firm.

After recovering a fumble on the UMR 27 yard line, the Miners were able to stop the Bearcats only real scoring threat in the first quarter, although a tight NWMS defense also kept the Miners 30 yards from the goal line.

Larry Oliver's unsuccessful field goal attempt from the 20 yard line capped a Miner drive early in the second quarter. Both teams seemed to be having difficulty in moving the ball, the Miners being forced to punt six times for 239 yards, and the Bearcats punting five times for 183 yards in the first half. The Bearcats threatened in the closing minutes of the first half, but a stalwart Golden Horde stopped them cold on the Miner 1 yard line in a tremendous goal line defense.

Three Bearcats fumbles, all recovered by the Miners, helped to prevent any scoring threat by Maryville in the third quarter. The Miner offense also began to move by cashing in on a Bearcats fumble recovered by Merle Hill on the Miner 18 yard line. After two unsuccessful plays, in which the ball was moved back six yards, Miner quarterback Ron Miller was able

to connect with split end Larry Oliver who slipped through the Maryville defense for a 24 yard touchdown. The vital PAT attempt by Oliver was good, and provided what turned out to be the game winning margin.

The Bearcats offense was good for 187 yards as compared to the Miners 167 yards, but 2 pass interceptions and 4 fumbles recoveries by the Miners, along with a successful point kick, gave the Miners the victory.

Ron Miller returns to the starting line-up after being injured most of the season.

Early in the fourth quarter, Maryville took advantage of a 15 yard penalty against the Miners, and scored a touchdown on a six yard scramble by Spinello. A bad pass by the Maryville center made the extra point kick unsuccessful, and the one point Miner lead held for the rest of the game. Interceptions by Ed Hanstein and Eddie Lane killed any hopes of a Bearcats rally in the fourth quarter.

Overall, the Miners led the Bearcats in first downs with 13 for the Miners and 12 for the Bearcats. Nicodemus led in the Miner rushing department, carrying the ball 25 times for a net of 78 yards, with 79 yards in gains by quarterback Ron Miller in the passing department with 26 attempts and eight completions. Nine punts by Ganchev were good for 335 yards.

MEET THE MINERS

By Lynn Lewellen

Larry Carpenter, a senior in Petroleum Engineering, is the subject of this week's "Meet the Miner." He hails from Springfield, Missouri, where he lettered three years in football, basketball and track at Parkview High School. Larry plays defensive end for the Miners, handling the job very well for the four years he has lettered at this position.

Larry is a member of Sigma Nu Fraternity, St. Pat's Board, the Society of Petroleum Engineers, and was the intramural manager for Sigma Nu last year. He enjoys hunting, fishing and has recently begun fly-tying. Last summer Larry worked for Panhandle Eastern Pipeline in Kansas City, Missouri. The engineer-

ing experience was desirable he said, but added "There is not any fishing around there."

In our interview Larry commented of the changes he has noticed in the Miner football squads in the Miner football squads since he came to UMR. "The most significant difference has been in the improved personnel with the addition of transfer students and excellent freshman football players. The attitude of the team has also changed for the better. The morale of the players, especially this year, does not seem to drop although we have lost some close games. The coaching staff deserves a large share of the credit for the team spirit and the Miner success on the field."

NOTICE!

M-Club will sponsor a bus to Springfield on Nov. 16 as the Miners play the Bears. Charge will be \$5.00.

SMS Hosts Gridsters In Final League Match

By Dick Pressler

This week the SMS Bears will host the Miners in Springfield. Even without including Saturday's results, which were too late for this story, the Miners have a pretty good chance of defeating the Bears. SMS held only a 1-6 season record before last Saturday.

This year the Bears rely on quickness and speed to overcome a lack of size. They have good depth with 27 lettermen from last year's squad. Although the Bears have compiled a poor 1-6 record this season, they can be dangerous due to a wealth of experience on the team.

One of the Bear's biggest problems is the lack of a seasoned signal caller. At quarterback are two sophomores, Jim Husser and Bart Hager. Husser is the quicker of the two, an adequate passer, and

is more experienced. Hager is considered to be a passing threat.

Offensively the Bears are led by tailback Ardie McCoy, who gained over 700 yards rushing last year before being sidelined by injuries at mid-season. This year McCoy is averaging 4.5 yards per carry. The offense also has three fine pass receivers in Bob Journagan, John Cambier, and Jay Cummings.

The standout of the defensive squad is Fred Harle, who is defensive captain and the team's only all-conference selection last year. The defensive line is solid and experienced.

Comparing the two teams; the Miners have a better passing attack and defense, while the Bears have a better rushing game. The contest will probably be close, but the Miners figure to win this one.

Riflemen at Work

By Bill Oberbeck

The R.O.T.C. rifle team at U.M.R. was started in 1933. The team has been nationally recognized for the past four years. Last year the rifle team ended up second as a school team and first as an R.O.T.C. team in the nation.

The squad is composed of two four-man teams. They shoot match small bore (22 cal.) rifles at a

range of fifty feet in the prone, kneeling, and standing positions during competition.

This year looks like another winning year for the UMR riflemen. So far this year the team has shot and won against Rose Polytech, Wichita State U. and Lincoln. Also they placed fifth out of eighteen in the Mississippi Valley Invitational.

M-Club News

By Glenn Jensen

In order to serve the campus and to provide more student participation at away games, the M-Club is sponsoring a bus to Springfield when the Miners play Southwest Missouri State College. The charge for the ride is five dollars and sign up is in the Student Union.

Also, M-Club voted to make Professor C. R. Remington an honorary member of the service group. President Stan Notestine presented him with a letter jacket and a UMR blanket prior to the game with Northwest Missouri State College. Professor Remington is presently faculty advisor for the group and has helped the club for many semesters.

Bullman's Harriers Close Season, Lose Outstanding Senior Runners

Gale Bullman, the cross country coach for UMR, has been extremely proud of his team this year basically for their efforts in running and their total output.

This year the UMR cross country team came in sixth place in the conference and in dual meets, which totaled a number of six, Bullman's harriers triumphed in three.

Coach Bullman awarded seven letters to the following for their outstanding work; their best times are also listed.

- 1) Don Duren, Senior, 22.29.
- 2) Stan Notestine, Senior, 22.31.
- 3) Keith Brown, Senior, 22.54.
- 4) Bob Rice, Freshman, 22.58.
- 5) Mike Kozacik, Freshman, 23.29.
- 6) Jim Hellwege, Sophomore, 23.49.
- 7) Ron Tracy, Senior, 24.59.

Sophomore Paul Welsch, with a time of 25.34 just missed lettering by a few points.

Coach Bullman stated that it is going to be hard to replace the graduating seniors, but if next year produces spirited freshmen like this year, then UMR will have a winning season next year. Coach Bullman also said that the

team is also losing its best two runners, Don Duren and Stan Notestine.

As the interview progressed, the conversation became more informal and I was able to catch a few facts about the team. Gale stated that on the cross country team, not one is over one hundred and forty-five pounds with the team average being one hundred and thirty-five. Cross country, he said, is a very hard sport to

excel in if one is stockily built. For the thin and frail, with practice and much strain, one can become quite good.

Coach Bullman has been the track coach at UMR since 1936 and cross country coach since 1966. He concluded that since UMR has turned to drafting students because of their athletic ability and scholastic ability as well, the UMR athletic program has improved greatly.

The UMR Miners take the lead over Washington University.

MIAA Gridiron Report

The Miners were held to a fifth place tie in the Missouri Intercollegiate Athletic Association, although they defeated NEMS 19 to 16 in Saturday's game. UMR now has a conference record of 1 and 2, and an overall record of 3 and 4 before last Saturday's game.

SEMS and CMSC remained locked in a tie for first place in the conference, as they defeated SWMS and NWMS 19 to 6 and 28 to 7, respectively.

CMSC leads the conference in rushing, having totaled 1428 yards so far. SEMS is second, with 1216 yards, and SWMS holds third with 1055.

The Mules also hold the top position in the number of first downs, with 103. SEMS is second in this department with 93, closely followed by the Miners, who have gained 90 first downs.

NEMS is tops in passing, having gained 1019 yards in the air. They are followed by CSMC with 952, SEMS with 830, and UMR with 825.

Now for a look at some of the individuals who are responsible for these results: this week Smallwood, of SEMS, still holds the position of leading scorer, having made nine touchdowns and 54 points for his team. Johnson, of Central Missouri State is second with three TD's and 26 extra points for a total of 44. He is closely followed by teammate Frost, who has scored seven touchdowns for 42 points. Diepenbrock, of SEMS, is fourth with 40 points, Roberts, of CMSC, is fifth with 36 points, and Oliver of UMR holds sixth with 32 points.

Roberts, of CMSC, has traveled 364 yards on 62 carries for an

average of 5.8 yards per carry. Smallwood is second with 769 yards on 137 carries, an average of 5.6. Mack, of CMSC, is third with an average of 4.6 yards. SWMS has men in fourth and fifth place in this division. McCoy has an average of 4.5 yards and Howell has 4.1.

Cummings of Maryville is still the leading passer in the MIAA, having completed 58 out of 142 for 892 yards and five touchdowns. Eckinger, of CMSC, has completed a greater percentage, 45 out of 89, but has totaled only 839 yards. Schweder, SMES's leading passer, has 757 yards for third place. Schottel holds fourth place for NWMS with 423 yards and UMR's man, Miller and Oliver, have fifth and sixth place with 328 and 302 yards respectively.

NEMS First In MIAA Cross Country Roster

Northeast Missouri State took first place in the cross country meet at Rolla, Saturday, with a total of 51 points. Springfield was second with 56 points, and CMS was third with 60. SEMS, NWMS, and UMR placed fourth, fifth, and sixth, respectively.

The first place winner was Douglas Overholser, SWMS. His time was 20:57.4. Pat Sullivan took second for NEMS, and Dave Frazier, CMSC, was third. Others who placed in the top ten were: Keith Allen, fourth, NEMS; Bob Buhrmester, fifth, CMSC; Steve Parker, sixth, SEMS; Tom Logan, NEMS, seventh; Fred Springer, SEMS, eighth; Clifford Nelles, NWMS, ninth; Bruce Granger, SWMS, tenth.

The leading pass receivers include: Frost, with 543 yards and seven touchdowns for CMSC; Diepenbrock, of SEMS, with 910 yards and five TD's; Blakely, 402 yards and three TD's for NEMS; Oliver, of UMR, with 391 yards and three touchdowns.

Lang, of CMSC, is the leading punter this week. On 37 attempts, he has 1459 yards, an average of 39.4 yards per kick. Sanchez, of UMR is second. He has moved the ball 1769 yards for the Miners in 46 kicks. This gives him an average of 38.5 yards per kick. Muff, of SWMS, is third, with an average of 38.0, and Baker, of SWMS, is fourth, with 1771 yards, and an average of 36.9 yards per kick.

Miner Dave Pfefferkorn is the man who is tops in punt returns. He has returned eight punts gaining 154 yards. His average is 19.3 yards per return. Spinello of NWMS is second on the list with seven returns and 135 yards, an average of 19.2 yards per carry. Blakely, of NEMS, is third with 15.6 yards average, and Spiegelvogel of CMSC is fourth with an average of 12.1.

In kickoff returns, the leader of the pack is Bruna of SWMS. He has returned eight kickoff for 210 yards, an average of 26.2 yards per carry. UMR's Pfefferkorn is second with seven returns and 177 yards, a 25.2 yard average. Weise is third, and has averaged 23.0 yards for NEMS.

Miner Ruggers Attempt To Maintain Championship Team

By Mike St. Peters

After only two weeks of practice the UMR Rugby team is already showing much potential and is looking forward to another winning record. The Rolla ruggers have upheld the tradition of a championship team in each of the five years the sport has been played at UMR.

Rugby Team Captain, Mick Burke, feels that the quality and quantity of players that have turned out for the team could give UMR the strongest team in the

club's history. Mick has a lot of confidence in his veterans, who will make up the first team, known as the "Blacks." The second team, "Golds," is made up of half veterans and half first year men. Mick feels that the "Golds" are coming along fast.

At the present there are approximately 35 players out for the team. These men represent various fraternities and independent organizations on campus.

The one thing that worries the team is that there could be an-

other rash of injuries like last year. The team members were playing with broken nose and wrists, and dislocated shoulders. This of course, affected their record towards the end of the season.

The main rugby season is in the spring. However, the team will play two or three games this fall in order for the new men to become acquainted with the game and to prepare them for a tough spring schedule.

In the past the Rolla ruggers have played various "Big Ten" and "Big Eight" teams, such as Indiana, Wisconsin, Illinois, Missouri and Kansas. Again this year Rolla will try to schedule as many big name schools as possible, including St. Louis U., Rockhurst, and Westminster.

The UMR ruggers will be playing their games on the intramural field and it looks like a good year for them. Let's all give them some support.

Rugby Rules at a Glance For UMR Spectators

Here are some Rugby rules and facts that may be helpful for the spectators.

Rugby is played with an oval shaped ball weighing only 13 to 15 ounces. The game is played on a field 110 yards long and 75 yards wide. Although bodily contact is an important part of the game, no protective equipment is worn. There are 15 men on each team at the start of the game. However, if a player must leave the game because of injury or an infraction of the rules, his team must continue to play with out a substitution.

The game begins with a kick-off as in American football. The ball may be passed, provided the pass is not forward. The ball may

be kicked forward, but cannot be touched by one of the kickers teammates waiting upfield.

A team can score four different ways: (1) By grounding the ball in the opponents end zone. This is known as a "Try" and is worth 3 points. (2) By a conversion kick after the "Try" worth 2 points. (3) By making a field goal on a penalty kick, worth 3 points. (4) And by drop kicking the ball through the uprights during play. This is also worth 3 points.

The action in Rugby is more continuous than in American football since play does not stop when a ballcarrier is tackled. Play is only halted for certain infractions of the rules or when the ball goes out of bounds.

Harmon Highlights

The new top-dog in the Harmon ratings - or, "Old Top-Dog Returned" - is Southern California. Winning their most convincing game in four weeks, the Trojans, by walloping California, moved back to the Number One position. So...the two remaining undefeated teams in Pacific Coast Conference play battle for what will probably mean title and bowl rights. 16th-ranked Oregon State will be only a 6-point underdog to Southern Cal.

And 9th-ranked Auburn, sitting by itself atop the Southeast Conference, gets anything but a breather after its big upset of Tennessee last week. The Tigers catch the Bulldogs of Georgia, ranked in the No. 7 spot. Georgia will take over the league lead, beating Auburn by five points.

No longer riding the crest after a real scorcher against Oklahoma, the Jayhawks of Kansas dropped to 6th in the rankings this week. With the Big Eight show-down coming up next week against Missouri, Kansas should breeze to a 25-point win over Kan-

sas State Saturday. Also looking ahead to a conference title match a week away with Michigan, 2nd-ranked Ohio State runs into a much improved Iowa Hawkeye. 2-legged Wolverines may be on Buckeye minds, but Iowa comes first; Ohio State will win by ten.

Three of the four leaders in that jam-up at the top of the Southwest Conference will continue to lead. One just has to lose. 3rd-ranked Texas will club Texas Christian by 17 points. Unranked Texas Tech is favored over Baylor by 13. And 20th-rated S.M.U. is just a three-point under-dog to 15th-ranked Arkansas.

Very rough tea-party in Big 8; and it's being planned by the 14th-ranked Oklahoma Sooners, up-setters of Kansas last week, in honor of 4th-ranked Missouri. The Mizzou Tigers are favored, but only by five points.

Notre Dame, still staying just outside the top ten - in 11th, will ramble fairly well against Georgia Tech, winning by 27 points.

The Independent Hayride served to "warm up" everyone's spirits for the weekend to come.

Independent Weekend..

The first UMR Independent Weekend is over. Many Miner Independents took advantage of the weekend sponsored by MRHA, GDI, ICC, and Thomas Jefferson, and all who did had a tremendous time. From the opening hayride to the closing dance, spirits were high and good times were had by all.

The whole weekend can only be deemed a success by all involved and many are already looking forward to those to come.

GDI Dance on Saturday night was one of the best ever.

Beautiful girls abounded at one of the many dances held at eating clubs this weekend.

..1968-69

UMR Independent spirit abounded at Saturday's football game.
