Preservation Hall Jazz Band Entertains New Orleans's Jazz Comes To UMR

When the Preservation Hall Jazz Band arrives here for their concert on October 1 at 8 o'clock in the Student Union Ballroom they will play New Orleans Jazz. The music is the root of all that we now know as jazz, plus the sound that changed the orchestras and the playing styles for all of our popular music, and has influenced many classical composers. Fine...but what is the music that will be heard here?

It is easy to say what New Orleans Jazz isn't, but what it is to an audience is very subjective, what it is to a musician is equally personal. The sources for New Orleans Jazz have been explored many times.

There are labels. You can call it Blues, and be right, Ragtime and be right sometimes. You can hear the marches of funeral parades and of John Phillip Sousa. You can hear the spirituals of Pineywoods churches in Louisiana and the songs of gospel quartets. The music of the Creole people in New Orleans with their quadrilles and even their minuets and their other special music is there.

New Orleans Jazz is not slick and arranged on paper to be

played the same each time. It is not Dixieland and it is not the vaudeville and night club brand of vaudeville music. It is not straw hats and funny jackets and cheap tricks.

When you finally reach New Orleans Music, it is five or seven or sometimes a few more men who are playing a tradition, and still reaching into a deep well of creative genius to improvise. The trumpet plays the melody, the clarinet plays the counter melody, the trombone plays the harmony, the piano plays the chords on which it is all based, and the rhythm section keeps everyone inside the limits of the tempo... and then suddenly the melody moves to a different instrument and that player improvises and changes everything and the excitement builds and your spirits soar along with the music and the happy sounds or the sad sounds and you know you are listening to New Orleans Music.

On another level you are hearing men who heard Freddie Keppard or Buddy Bolden or King Oliver or Johnny Dodds or Kid Ory or Jelly Roll Morton or Baby Dodds play that melody and that change for the first

time 55 years ago and you are hearing men who have played it for that long and have answered the demands of audiences at home in the Louisiana Parishes for that many years and they are playing their music.

So New Orleans Music doesn't submit to the confines of words very well. The Preservation Hall Jazz Band plays it the way it was played by these same historical people when they

created jazz. They play it with as much vigor and joy as they did then. Never mind that each member of the band is more

UMR Hold Cooperative Education With Viet Nam

At the request of the Miner staff, this progress report is being made to the students and faculty of UMR on what the first years 'achievements' of this cooperative education effort between the engineers of Viet Nam and the engineers of UMR.

The present 'staff' of UMR active in the Mission at the Phu Tho Engineering College, number five; Dr. E.M. Spokes, Chief of Party, Dr. Marshall Findley, Professor of Chemical Engineering, Dr. Myrne R. Riley, Asst. Professor Mechanical Engineering, Dr. Norman G. Dillman, Associate Professor of Electrical Engineering, and Mrs. Lera Zahourek, Administrative Secretary. Drs. Spokes and Findley, with Mrs. Zahourek, comprised the initial team arriving in Saigon last September. Dr. Riley arrived 15 February and Dr. Dillman this past 9th of September. Within this next year, the team will be increased by the addition of a Professor of Civil Engineering.

UMR's Participation

The goals of our education assistance effort with the faculty and students at Phu Tho

are seven fold: One to assist the Phu Tho Engineering College in the development of a quality engineering discipline in the four engineering programs currently established; Two, to assist the College in developing the additional curricula and disciplines required to promote the industrial development of a peaceful country; Thirdly, to assist in the development of and equipping of the laboratories vital to a technical education; Fourth, to assist in the development of a comprehensive technical library; Fifth, to present technical English language training; Sixth, to recommend and assist in the entrance, registration, record keeping, and administration techniques of the engineering college and lastly, to provide such additional consultation-assistance as may be desired by the engineering college staff and faculty and by the Ministry of Education.

The Phu Tho Engineering College

The Phu Tho Engineering College presently occupies a portion of the Phu Tho Technical School on the out-

skirts of Saigon. The six buildings allocated to the College serve as the lecture and laboratory facilities for the disciplines of Mechanical Engineering, Industrial Engineering, Chemistry-Chemical Engineering, Electrical Engineering, and Civil Engineering.

In existence since 1958, it provides the sole source of graduate engineers for the country and its needs. Enrollments in these four disciplines are approximately 446 with the following distributions: Civil Engineering 157, Ind. Chemistry-Chemical Engineering 45, Electrical Engineering 116 and Mechanical Engineering 128. There are, approximately, 875 graduate engineers in Viet Nam. Thus, with a population of some 17 million this yields one engineer for every 19,500 people. This ratio is one in 8,000 in Indonesia and one in 154 in the U.S.

There are some 1,300 qualified high school graduates applying each year for the 35 vacancies of the freshman class of each discipline at Phu Tho.

Miners To Host All-School Mixer

This Saturday, October 3, UMR will once again host an All-School Mixer. The action begins approximately between 12:00-1:00 p.m. in front of the Student Union when buses unload. The schools receiving invitations for this year's Mixer are as follows: Lincoln University, Jefferson City; Monticello, Godfrey, Illinois; William Woods, Fulton; Webster College, Webster Groves; Avila College, Kansas City; Cottey College, Nevada, Mo.; Stephens College, Columbia, Mo.; Christian College, Columbia, Mo.; Lindenwood, St. Charles; Maryville College, Fontbonne, Notre Dame, Barnes Hospital School of Nursing, Lutheran Hospital Nurses' Residence, Marguerite Hall, Rogers' Hall, Deaconess Hospital of Nursing, St. Luke's Hospital of Nursing, Depaul School of Nursing, all of St. Louis, Missouri; and Delta Zeta, Beta Sigma Gamma and Alpha Ki Delta Sororities also of St. Louis.

The Student Union Board and

Student Council which co-sponsor this event have scheduled three dances to help the Miners show the girls some real hospitality during their short visit here.

The first two dances will be casual attire with the first one

(Continued on Page 4)

NOTICE!

Each organization requesting appropriations from the Student Council should submit an application form containing the following:

1. All sources of income.
 2. Expected expenditures.
 3. Organizational activities.
 4. How your organization benefits the student body.
 5. Future plans for becoming self-sufficient.
 6. Number of active members.
 7. A copy of the organizations constitution
- Come by the council office, 201 St. Union for application forms. Application deadlines to be announced.

Cool Hand Luke

When the establishment attempts to put the clamps on a man with a fiercely independent spirit, the result is an explosive lack of communication. Paul Newman is that man in the powerful drama "Cool Hand Luke".

Pitted in the deep South, the story centers upon a harshly disciplined chain-gang and the prisoner who rebels against his jailors and any system that seeks to limit his personal freedom. Newman's excellent portrayal of Luke won him an academy award nomination for best actor of the year, and co-star George Kennedy received the Academy Award for best supporting actor of the year.

NOTICE!!

The Wesley Program will be September 30, with Rev. Rutledge speaking on the 34th hour at 6 p.m. at the Wesley House, 403 West Eighth street.

Fraternity Headlines

The University of Missouri at Rolla Chapter of Tau Kappa Epsilon Fraternity has been chosen as a TOP TEKE CHAPTER in the nation by the International Fraternity's Awards Commission.

The award is given annually to the best chapter in each of four divisions based on number of fraternities on the campus. A TOP TEKE CHAPTER is considered superior in all aspects of fraternity accomplishments. The criteria for judging include financial accomplishments, new members, size of the chapter, scholarship of the chapter, and participation in campus and fraternity activities. The Beta-Eta Chapter of TKE is one of 20 fraternities on the University of Missouri campus.

Tau Kappa Epsilon is the largest of the collegiate social fraternities with 284 campus chapters in the United States and Canada, and has over 15,000

undergraduate members and 65,000 alumni members. International Headquarters of the Fraternity are located in Indianapolis, Indiana.

This year the chapter of Phi Kappa Theta at UMR has received the Phi Kappa Theta "Founders Cup". The award is presented annually to the Phi Kappa chapter which excels in academic achievement as well as intramural sports and other extra-curricular activities. Each summer the Cup is awarded by the International Board of Trustees of Phi Kappa Theta on a national basis.

A list of their past year's accomplishments shows that the Phi Kappa Theta brothers are deserving of their award. Last year they took first place in intramural football and volleyball and built the winning St. Pat's float. Their scholastic standing was high and the house held many campus offices. Active in St. Louis, the men

worked on many public service projects. Their wide spectrum of involvement, reflected in excellence, enabled them to earn their honored title.

The "Founders Cup" was presented on August 27 at a special meeting in Memphis. This meeting was part of a Chapter Management School, attended by representatives from all over the country. There to accept the award was Mike Godar, along with Rich Mues and Don Mullen, the other two representatives. We are happy to congratulate the brothers of Phi Kappa Theta for a job well done and an honor well deserved.

New Orleans Jazz

(Continued from Page 1)

than 60 years young now. They know what New Orleans Music is...and they'll be here to play it for you in a concert. The music won't die, they are teaching other young men at Preservation Hall. The music will never be just the same when these creators, who have stayed as young as their music have left the stage for the last time...for they were there when it happened and their technique and their souls have never forgotten how to make it happen again...night after night...on the road, in a dance or at Preservation Hall.

Whatever New Orleans Jazz is, it will be on stage here. The audience will hear something that has never been heard before, and never will be heard again, just as the audience on the next night will hear a unique concert...everyone is different because the musicians, all now in their 60's, 70's or even 80's play an improvised music. It is not just an historical experience to hear the Preservation Hall Jazz Band—it is a happy, musical, enriching experience that makes it more than a concert.

UMR Students Submit Proposal To National Science Foundation

The National Science Foundation has recently established a competitive program for the support of student-originated studies. The two basic objectives of this program are—first, to encourage college students to express in productive ways their concern for the environmental well being of our nation; and secondly, to provide support for groups of college and university students who can demonstrate their readiness to assume increased responsibility for their own educational development.

A group of UMR students, with the leadership of Dean J. Stuart Johnson, is now organizing for the purpose of

submitting a proposal to the National Science Foundation. This proposal will describe the scientific or technological studies they wish to carry out and giving details as the funds required for that purpose.

Supported projects within the general framework of this program are to deal with problems related to the physical, biological, and/or social environment are to be student-originated and student-managed.

The interdisciplinary group will be composed of students, graduate or undergraduate, who can spend forty hours per week for ten-twelve weeks of next summer here at UMR. The program pays up to \$80.00 per week per person.

Students wishing to apply for positions in the group may obtain applications forms at the Student Union candy counter. The closing date for applications will be October 14, 1970.

NOTICE

Anyone wishing to take photographs for the MINER should fill out a form at the office in T-14.

Miner of the Week

Education In Vietnam

(Continued from Page 1)

Budget, facilities and faculty limitations prohibit the admission of larger numbers of these candidates.

The typical academic year is of a form of our two semesters starting in early November continuing through February followed by a March-June Spring semester.

Forty seven full time and 164 part-time faculty assume the teaching load at Phu Tho. The high percentage of part time faculty is directly attributable to the low salary scale of \$100-\$115 U.S. per month. The professor must, to make ends meet, hold down two or more jobs to meet a spiraling inflation.

The engineering education at Phu Tho, due to the absence of strong laboratory equipment and facilities, has been continuously sound and strong in theory. Twelve Phu Tho graduates are currently completing advanced degrees in the States to return to the faculty to provide additional strength. The minimum performance of the same 350 Vietnamese studying in all disciplines at U.S. universities

has been consistently above 3.4-4.0.

Progress on the seven goals of our effort has been made during UMR's first year of assistance, particularly in the areas of Chemical and Mechanical Engineering, the expansion of the College Library from some 800 texts to over 5,000 texts, the development of a Junior-level laboratory in Electrical Engineering, the specifications for a new Food Chemistry laboratory, hydrology laboratory, soils testing laboratory and unit operations laboratory as well as recommendations for the strengthening of the Chemical and Mechanical Engineering curriculums.

The University of Missouri-Rolla is present and working in the field of education in Viet Nam. These efforts are being pursued under one major conviction; that, apart from the political philosophies of Viet Nam in the future, apart from the military doctrines of Viet Nam in the future, what is being accomplished today in education in Viet Nam is the key to the future stability, economic and industrial, of Viet Nam.

UMR Gets New College - Fuller Named Dean

Establishment of a College of Arts and Sciences at the University of Missouri-Rolla was approved by the University of Missouri Board of Curators. Dr. Harold Q. Fuller, chairman of the UMR department of physics since 1948, was named dean effective immediately.

The new college is formed by the merger of the existing School of Science and Division of Liberal Arts. It includes the departments of chemistry, computer science, geology and geo-physics, humanities, mathematics, physics and social sciences.

According to UMR Chancellor Merl Baker, the reorganization at this time gives emphasis to the increasing importance of these departments on the Rolla campus. "This strengthening of the arts and sciences program is a most important step in the continuing development of UMR into a truly outstanding institution of higher education," Chancellor Baker said. "This is also important to our engineering students who take about half of their course work in the arts and sciences."

Dr. Baker said that no degree programs will be changed by this reorganization. It is expected to strengthen all departments and since it is a consolidation rather than expansion, will not affect the costs of these academic programs. In announcing the appointment of Dr. Fuller as dean of the new college, Dr. Baker pointed out that Fuller's success as chairman of the department of physics for the past 22 years has demonstrated his ability as an academic administrator.

The chancellor also praised the accomplishments of Dr. Paul D. Proctor, who has served as dean of the School of

Science since its formation in 1964, and Dr. Jim Pogue who was serving as director of the interim Division of Liberal Arts (established in 1968). "The efforts of these men have been responsible to a large degree for the development of the arts and science programs to their present stature," he said. "In recent years the liberal arts have been strengthened on the Rolla campus and science departments have grown to the point that they are comparable in size and quality to similar departments on the nation's largest university campuses."

Dr. Fuller will serve as dean until he reaches the retirement age for administrators in 1972. He holds Ph.D. and A.M. degrees from the University of Illinois and an A.B. degree from Wabash College. Prior to

joining the faculty here in 1947 as professor of physics, Dr. Fuller was professor and chairman of the department of physics at Albion College, instructor in physics at the University of Illinois and assistant and associate professor at Illinois College. He is a member of Phi Beta Kappa, Phi Kappa Phi, Tau Beta Pi, Sigma Xi, Gamma Alpha, the American Association of Physics Teachers (which he served as president of the Missouri Section).

"The position is going to be a challenging one," Dean Fuller said. "I appreciate the confidence placed in me by the screening committee, department chairman and the administration, and look forward to the future development of the new College of Arts and Sciences."

Preliminary Plans Approved For New Building At Rolla

The University of Missouri Board of Curators approved preliminary plans for a new Chemistry-Chemical Engineering Building to be built on the Rolla campus.

The building, to contain a ground floor and four stories, will replace the Old Chemistry Building which was destroyed by fire last fall. The new building will be constructed on the site where the old structure stood. It will be attached to the existing Chemistry Building, located immediately to the east.

The exterior of the air-conditioned building will be of brick and textured concrete surfaces to blend with existing campus structures.

The ground floor of the building will house laboratories, offices, shops, storage areas

and mechanical equipment. On the first floor will be classrooms, conference rooms, laboratories and offices for department heads and their staffs.

The second floor will contain laboratories, a graduate study room and offices. A cold room, offices and laboratories will occupy the third floor. A partial fourth floor—or roof area—will contain a laboratory, an outdoor research area and mechanical equipment.

A total of \$4,500,000 is available for the project, which is financed entirely by an appropriation made last June by the Missouri General Assembly.

Architect for the building is Mantel, Steele and Teter, Architects, Inc., of Kansas City, Mo.

Presidents Call For Cooperation

In his September message to Congress, President Richard M. Nixon stated that, by an Executive Order, future occupational, agricultural, and paternity deferments were eliminated. At the same time, he had requested Congress to restore the discretionary authority of the President on undergraduate student deferments so that these deferments would also be eliminated in the future. Mr. Nixon believes the only long range solution is to end the need to draft by attaining an all-volunteer armed force. So far, Congress has not enacted the military pay legislation, which is an important step towards achieving an objective of reducing draft calls to zero.

The Nixon Administration has also taken a number of executive actions aimed at the

reform and renewal of American education. During the last fiscal year, nearly \$12 billion was spent on government education programs. In addition, several new acts have been proposed associated with the financial support of public and non-public schools. Some of these programs include The President's Commission on School Finance, The National Student Loan Association, and The Higher Education Opportunity Act.

"By substantially revising the present structure of student financial aid, it would be possible, for the first time, to assure every lower-income student entering college a combination of Federal grants and subsidized loans sufficient to give him the same ability to pay as a student from a family earning \$10,000.

Roger Ellis Editor

I believe that it would be safe to state that one of the more emphasized aspects of ROTC training is Leadership Lab-DRILL. With the exception of first semester freshmen, all ROTC students have a session of DRILL during each semester. Yes, year in and year out DRILL has basically been the same: Freshmen-learn the Manual of Arms; Sophomores-learn the Manual of Arms; Juniors-learn the Manual of Arms. Quite tedious and the same time and time again. Is it possible that the system is so perfect that change and reforms of any size are not instituted? Very doubtful.

I believe that a good many of both the basic and advanced course cadets feel that Drill is a mere "put-on." It is difficult for anyone to understand this statement who has not experienced a semester of Drill, but for those who have, how many of the following statements hit home?

1. No matter whether you are extremely proficient or extremely poor in Drill your grade will fall between 85 per cent and 95 per cent.

2. During sophomore and junior Drill, that despite either platoon's performance that the company commander will announce that the Juniors looked atrocious and that the Sophomores looked good.

3. You have to be a really sharp person in Drill if you want (?) to make it to summer camp.

The list could be extended, but the entire point of the matter is that even before Drill begins, the cadets know the eventual outcome, which they cannot change, and with this in mind Drill is meaningless to many and a real "pain" to others.

Interest in Drill is lacking considerably, but due to the present "set-up" in which the Seniors run the show; the Freshmen, Sophomores and Juniors have very little say so. A few suggestions which the Brigade Staff and the Military Department might consider for improvement and change are:

1. Look into the possibility of establishing a communications network between the higher-ups and the basic course students. Allow more suggestions and possibly set up a joint council to examine the past drill season to analyze its good and bad points.

2. Not only have the Seniors grade the Juniors, Sophomores and Freshmen; but allow the Freshmen, Sophomores and Juniors to give an evaluation and grading to the Seniors who are their leaders and place heavy emphasis on this mark because the man under a leader determine his success or failure.

3. Try and establish one two-hour drill session per week instead of two one-hour sessions.

Though this particular editorial is considered with one of the more detailed aspects about ROTC, future editorials will deal with the specific AND general aspects of ROTC. Again, the Missouri Miner staff encourages comments and questions.

BUBBA BROTHERS REPORT

"... There's a sucker born every minute..." P. T. Barnum

"And if I get 30 more points, I win a free trip to Europe!" Yes, Miners, its magazine sales time again and all I can say is WATCH OUT. If you've been lucky enough to have been missed by these charlatan's consider yourself fortunate, and if you haven't I'll clue you into their sales pitch. In the last three years I have been exposed to three of these groups of salesmen or saleswomen and they all have a similar pitch: one in which they are contestants in a nationwide program and if you would be so "kind" (rhymes with "sucker") as to purchase a few magazines subscriptions they can win fabulous prizes, each magazine carrying a certain number of contest points. Surprising as it may seem, every one of these salespeople who have approached me only needed a few more points to be the Big Winner. This years salesgirl only needed 600 more out of 10,000 points to win her trip to Europe. (It is interesting to note that when she approached a friend two weeks ago she stated to him that there was only two days left in the contest and she needed considerably less than 600 points to win.) But this isn't the surprise. The surprise comes when you never receive

your magazines! In the last two years I know of two Miners who paid over \$25 in subscription fees and are still waiting delivery of their first issue. Chances are they will still be waiting this time next year, too!

Don't misinterpret me--maybe this years salesman was honest--maybe these subscriptions will come--maybe hell will freeze over!!

Miners To Host

(Continued from Page 1)

having hours 1:00-5:00 p.m. and featuring music by "Jake Jones" formerly known as "The Guise." This dance will be in the Student Union Ballroom and will be sponsored by the Student Union Board.

The second dance will feature "The Steam" from 6:30-8:30 p.m. outdoors in front of the library for a change of scene. This dance is sponsored by the Student Council.

At 8:00 p.m. the Miners will dress with coat and tie for the third dance to make their final impression on their "girl for the day." The last dance will be held in the Student Union Ballroom and music will be supplied by the "Bel Aires."

Between 12:00-1:00 p.m. the girls will depart to return to their respective schools hopefully looking forward to the next UMR Mixer.

OUR MAN HOPPE

The Happy Israelis

Haifa, Israel

"To understand Israel," said my friend, Mordecai Shalom, "you must understand that we are a nation of immigrants -- men who fled terrible conditions to build a better life and..."

I said I'd already read Exodus and I understood that all Israelis were bold, dashing and handsome. What I didn't understand was why they're so happy. What have they got to be so happy about?

Mordecai grinned. "Take the case of any typical bold, dashing, handsome Israeli. Take," he said happily, "me."

Mordecai was born in the little Balkan state of Ethna. (cq) "Times were terrible," he said, shaking his head. "We had to work from sunrise to sunset like animals. It was a very poor country."

"And taxes! A man was lucky to keep half of the pittance he made by the time the authorities were done with him. The authorities, you ask? Awful. Papers for this, papers

for that. Months to get anything done.

"Bandits were everywhere. A man wasn't safe in his own home. All young men were forced to join the army."

"But worst of all, our little country was surrounded by 50 million bloodthirsty Germans. At any moment they threatened to cross the borders and wipe us out. We were outnumbered thirty to one."

"What could a man do? I gathered my courage and emigrated to Israel. When finally I reached The Promised Land, I knelt and kissed the soil. Ah, to be safe and free at last to build a better life."

"So I joined a kibbutz in the Negev. A desert, mind you. We worked from dawn to dusk in the broiling sun, carrying rocks and digging ditches. And at night, we patrolled with rifles, ready to shoot marauding Arabs."

"Then I decided to move to the city. It took me years to get an apartment. The paper work, you wouldn't believe it. It's only a one-room apartment. But what can you do? As you know, Israel is a very poor country."

"Naturally, like all Israelis I had to serve my three years in the Army and I still must do two months active duty each year. But, praise God, I survived the last two wars."

"Of course, you can see why we need a strong Army, surrounded as we are by 100 million bloodthirsty Arabs who outnumber us forty to one. But that's why taxes are so high. A man's lucky to keep 40 per cent of the little he earns and..."

Hold it, I said. I still didn't see what Mordecai had to be so happy about. His life now didn't sound any better than before. He looked surprised. "But," he said, "I'm in Israel."

Maybe so. But it seems that every Israeli talks about how high taxes are, how hard he has to work, how little he earns and how his very existence is constantly threatened. In fact, they all seem to be in the same boat.

"Ah!" cried Mordecai, holding aloft a forefinger in happy triumph. "NOW you understand Israel."

Student Forum

Miner Editor
University of Mo. at Rolla
Rolla, Missouri

Dear Miner Editor:

I have had passive doubts about traffic safety's system of registering cars since I've started school at U.M.R., but finally the last two tickets issued to me in the same week finally have aroused me to action!

The first ticket was issued at the beginning of school, for parking in parking lot 17 (which is between 10th and 9th Streets on Main) without a permit. Under normal circumstances I wouldn't be upset by this ticket, since I DIDN'T have a parking permit. But it was due to traffic safety's ineptness that I didn't have a permit. By their priority listing (although I don't necessarily agree with it), I should be one of the first students to receive one, as I am a graduate student and live six miles out of Rolla. The traffic safety officers are really on the stick when it comes to issuing tickets, but they will make up lots of excuses TO THE STUDENTS for being so late in issuing permits (of course, if one is a teacher, one can get a permit anywhere immediately without paying anything). In the mean time, the parking lots are half full, and students are parking in the trees.

I finally lucked out and got a parking permit (most other students haven't received them yet, however) in good old parking lot 17, and then I was issued another ticket because I backed into the parking lot instead of parking head in. Not just a warning (I did not know this was illegal) but a ticket! I could understand if I was blocking two spaces or something, but I think this

stupid rule was made up simply for the ticket-issuing officer's convenience--so he won't have to get out of his car to issue a ticket for no parking sticker.

The big overall complaint, however, is this: Why does the student have to pay the school money simply for the privilege of owning a car? It would make sense if the students automatically got school parking spaces--then they would simply be renting it--but if the student does not ever park on the school's property, that car is none of the school's business, anymore than this typewriter is. Traffic safety says this money is used for the upkeep of the parking lots. These lots are used mainly by the employees of the school (professors, B&G men, traffic safety officers)--why don't they pay for their upkeep? They get their use. Most of the students are not going to get parking permits anyway, as the "parking lots are not big enough," but they will still be paying for them. I am really lucky, but most of the students will not be.

Sincerely,

Brenda Bronson

Mr. Roger Ellis
Missouri Miner
Univ. of Mo.
Rolla, Missouri

Dear Sir:

In view of the yearly tuition increases at the four campuses of the University of Missouri one must surely wonder, as I do, at the complete lack of financial responsibility shown by this University. Every year it has been said that the cost of running the University goes up. The usual place the extra money

comes from is the students.

As all University students are aware, they received in the mail recently a three page letter from their respective chancellors explaining the University position concerning any disruption of classes, dissent and general student behavior. The letter was sent to every student and his parents. A total enrollment of 50,000 is probably close to the actual total and this would mean 100,000 letters were mailed. At the rate of 6 cents for postage and 4 cents for the three pages, envelope and time consumed in handling, each letter cost about 10 cents or a total cost in the neighborhood of \$10,000.00. This is quite a sum for a university to spend as it complains about tight money.

I would like to suggest that the next time the University wants to reach all of its students that it buy space in each of the four campus newspapers, post its message on bulletin boards and, if necessary, give the information to the faculty and direct them to pass the information on to the students. This would be much more effective, reach just as many students and be less expensive. If the students must be informed by mail, why send copies to the parents? I didn't see too many parents at the peace march here last May 8.

I'm sure I'm not alone in saying I wouldn't mind increased fees if money were not wasted in so many ways on this campus such as 24-hour lighting of the Chemical Engineering Building, but that's another letter.

Sincerely,

John Hiatt
Senior, Chemical
Engineering

Council Briefs

The Student Council met September 22 at 7:00 in the Student Union for a brief meeting. Despite brevity, numerous topics were discussed.

IRANIAN QUESTION:

Chuck La Juenesse said, in his report, that the Student Council officers met with the Iranian students, prior to the Council meeting. The advice of the executive council was that the matter be brought to the direct attention of the Board of Curators. It is not the position to the Council to set themselves in direct and open confrontation with administrative decisions.

HIGH SCHOOL COUNSELORS BREAKFAST:

It was also announced that high school counselors would be on campus the twenty-fourth and twenty-fifth and that they would be guest of the Council for breakfast at 7:30 Friday morning.

CHEERLEADERS:

It was mentioned that, due to certain complaints coming to the Council's attention, a new selection system is being investigated for the selection of cheerleaders. Suggestions were for a cheerleading squad for football and another for basketball, and arrangements that would give incoming freshmen girls a better chance to participate.

WOMEN'S HOUSING:

A proposed committee to investigate women's housing was mentioned. Its purpose will be to investigate the inadequacy of WRHA and Thomas Jefferson Hall to serve the increasing numbers of Co-Ed students.

GENERAL LECTURES:

Dan De Riemer reported that the sale of tickets for the Centennial Party weekend brought in \$3,300. A deficit of \$600 is expected by the end of the semester. He said that this would be off set by charging at the lecture for Homecoming.

TRAFFIC SAFETY:

Jim Mason's traffic committee presented a nine point plan for improving the traffic situation. Petitions were given to representatives to circulate to the organizations. The petition in essence states a dissatisfaction with present traffic conditions. The petition was endorsed by a vote of the Student Council.

Attention Students

STUDENT COUNCIL ACADEMIC AFFAIRS COMMITTEE

For the first time membership on the Student Council Academic Affairs Committee is open to any student at UMR. In the past the committee was composed of only Student Council members and students of high scholastic standing in each department. It was felt that this committee should be composed of students from all ranges of scholastic ability in order to serve all the students. This committee makes recommendations to the Council on such topics as Pass-Fail, the Degree Plan, Double Majors, Minors, and the Six-Week Drop Rule. If you are interested in serving on this committee, please fill in the application blank below and return it to the Student Council mailbox at the Student Union candy counter.

NOTICE!

UMR Dames are sponsoring a "Car Wash" on Saturday, October 3, 1970 from 8 a.m. to 4 p.m. at the Delano Service Station, 101 Hwy. 72E Rolla, Missouri. \$1.00 donation will be accepted at the car wash.

NOTICE!

Application for Blue Key Man of the Month Award may be picked up at the Student Union candy counter. They should be returned to the Blue Key mailbox at the candy counter.

Dear Hortense

Dear Hortense,

I really enjoyed your light-hearted chiding of Traffic Safety in your last column. Because of the sad stories I have heard and from personal experience, I can sympathize with the frustration that led to the writing of those letters. Spurred into action by your column, the UMR Student Council has taken action to correct the situation. We would like to have any of your readers who agree with us that corrections are in order sign the petitions that your Student Council representative is circulating. The purpose of these petitions is to show that students support any future actions of the Council in remedying the present situation.

Keep up the good work!

Sincerely,
Jim Mason

P.S. How would you like a job with the SIXTY-MINER?

Dear Jim,

Thank you for the words of encouragement, and thank you for the proposition. But as I have said before: I try to keep my column clean.

Dear Hortense,

I just got handed a mimeographed letter about some Iranian students. Could you please tell me what this situation is all about, and what is your opinion on it?

Meryl Baker

Dear Meryl,

You do not say whether you are a student or an outside agitator. So all I can say is that no specific information is available on the situation at this

time from the office of Student Personnel. If you wish to pursue this question, I would suggest talking to both the Iranian students who are involved and the people at Student Personnel.

But let me just warn you that if you are only out to cause trouble, you picked on the wrong campus. If you have any of those commie subversive ideas, just go on and get out of here right now.

Dear Hortense,

I was studying with a friend of mine at a fraternity the other night when I noticed several Theta Tau calendars hanging around. I am an unaffiliated student, and I need to know how I can get mine because you can't tell the events without a calendar.

Ismael Tehra Patel

Dear Ish,

I understand your problem completely. I also have trouble keeping track of anything without a Theta Tau calendar. Why, just this morning I got up not realizing that it was deadline time for my column. And before I had finished doing my column, my roommate came in to check on the date and caught a sneak peek. Personally I would like to suggest that more calendars be made available at the Student Union. How about it Theta Tau?

Dear Hortense,

I am a transfer student here in Rolla and because I had a Physics test this past weekend I remained in Rolla for the weekend. Though this is definitely a big problem, my immediate concern involves something else.

Saturday evening at 6:15 p.m. I went to the Student Union for a bite to eat and to my dismay found the cafeteria closed. For \$11 per semester, is this all I can expect?

Albert Jennings

P.S. I've heard about a new Student Union, but do I have to wait two years before I can grab a meal on a Saturday evening.

Hey gang, be sure to pick up on Hortense's newest book, YOU, PIPE BOMBS, AND TRAFFIC SAFETY, available soon at the Student Union candy counter. Bring your own brown wrapper.

NOTICE!

Talk by Raymel Clanton, Administrative Director of the Springfield Regional Red Cross on "The Need for Giving Blood" will be held at 7:00 p.m. in 114C.E. on Thursday, October 1, 1970.

NOTICE!

Flu shots will be given to students October 12 through 15, from 10 a.m. to 3 p.m. in the UMR Infirmary at no cost to the student.

On October 16, shots will be given to any faculty member, school employee or student wife for \$1.00.

SUPPORT THE
MISSOURI MINER

THE MISSOURI MINER is the official publication of the students of the University of Missouri - Rolla. It is published at Rolla, Mo., every Wednesday during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo. 65401, under the Act of March 3, 1879. The subscription is \$1.25 per semester. This Missouri Miner features activities of the Students and Faculty of UMR.

MINERS WIN, 21-7

Missouri

MINER SPORTS

GLENN JENSEN, SPORTS EDITOR

Miners Sink Vikings, 21-7

By Dave Antonucci

The UMR Miners posted their second straight victory in the new season by coming on strong in the second half to top a fired-up Missouri Valley squad 21-7. A tenacious defense and the passing of Pat Godwin ended Missouri Valley's string of impressive wins at two. Missouri Valley scored over 80 points in their first two contests and during the first half looked as though they were a match for Dewey Allgood's squad. During the second half, however, Pat Godwin put on an impressive aerial display and the Golden Horde didn't budge an inch.

Untouched Viking quarterback launches another bomb as Miner defensive back Joe Passantino defends.

The first quarter was scoreless as neither team could move the ball on the slick turf. Neither team could gain much on punt exchange until the Vikings pushed into Miner territory with the aid of a 20-yard punt return and a pass interference call against UMR. Then, from the Rolla 33, Roskelly ripped off-tackle for 18 yards and another first down. However, Steve Walker picked off a Steve Balazik pass and returned it 23 yards to set up the first UMR touchdown. From their own 36, the Miners marched downfield and scored on a 52-yard pass-run play to Bobby Somerville. Somerville took the pass on the Vikings' thirty and danced through numerous defenders for six points.

The Miners received the opening kickoff in the second half but on the first play from scrimmage Steve Kubick fumbled and Missouri Valley used Steve Balazik passes to tally and even the score. On the next series of UMR plays, the running attack sputtered and the Miners were forced to kick. Missouri Valley started to march again but were halted when a fourth down fake field goal attempt failed, turning the ball over to the Miners.

From that point on, Pat Godwin passed almost exclusively and, near the end of the third quarter, passed deep into Viking territory, using short, quick passes. Then, Pat called a draw play to Bob Berry that was good for 18 yards and on the next play threw to Berry for 10, moving the ball to the Viking 3. Bob Berry again got the call as he scored the go-ahead points.

The fourth quarter was uneventful until about eight minutes were left. Then, Pat Godwin passed to Harlan Pyle for 19 yards, to Martin Weekley for 6, to Weekley again for 39, and finally to Harlan Pyle who bulled his way into the end zone for 13 yards and a touchdown. Steve Balazik's late desperation passes did no good as the Miners brought home a hard-fought 21-7 victory.

Pat Godwin amassed an excellent 265 yards passing on 17 of 32 completions, giving him 31 out of 57 for the season, or about 54.5 per cent. Bob Berry led the Miners in rushing as he

totaled 81 yards on 22 carries. Les Clark averaged five yards per carry as he moved 30 yards on six carries. Steve Kubiak rushed for 15 yards on three carries. Bobby Somerville

Miner quarterback Pat Godwin prepares to unleash a pass as the Miner line provides good protection.

snared eight passes for 147 yards, Martin Weekley caught five for 71 yards, Harlan Pyle gained 32 yards on two catches, and Bob Berry caught two for a net of 15 yards. Missouri Valley out-rushed UMR 160-131, but had only 66 yards passing.

Les Clark kept up his consistent punting as he kicked seven times for 246 yards, or a 35.1 average. His first punt in the first quarter covered 50 yards and put Missouri Valley deep in their own territory.

The Miners lost the football twice on fumbles and Missouri Valley lost it once, but the Miners intercepted three Viking passes which helped turn the game in UMR's direction.

Lambda Sigma Takes Girls' Mural Lead

By Steve Jankowski

Lambda Sigma Sorority swept the top two honors in tennis singles to win the first event in Women's Intramurals. Sue Jaggi and Laura Eddelman took first and second place respectively as Lambda Sigma took an early lead in this year's first competition. Thomas Jefferson was second, followed by WRHA, Rolla I, and Wesley.

Thursday the girls will finish intramural golf. Nine holes were played last Saturday and final nine Thursday will determine this year's winner. Since women did not compete in golf last year, this year's winning score will be a girl's intramural record.

Men's intramural golf will be held next Saturday and Sunday. 59er's Club won last year as Ewing fired a 67 to take medalist honors. The matches will start at 1:00 p.m. Saturday and 9:00 a.m. on Sunday.

Intramural Director Burr Van Nostrand hopes to finish flag football in a couple of weeks so that basketball can start about October 19.

Alex Pizza Palace

Alex's Pizza Palace is a restaurant you will find very popular with the UMR student body. They feature Pizza that will appeal to the most discriminating appetite. Cleanliness prevails throughout the kitchen and dining area and every precaution is taken to see that you get food prepared under the most sanitary conditions.

Enjoy yourself, please your friends or entertain business connections at Alex's Pizza Palace.

Faultless service and excellent selection are yours when you dine at "ALEX's." We suggest that for a real dining pleasure you visit Alex's Pizza Palace often. The address is 122 W. 8th Street in Rolla. Open 4 p.m. till 2 a.m. seven days a week. Call 364-2669 for immediate delivery to your door.

Bradley Seeks First Win; Braves Test Air Defense

By Dave Antonucci

The Miners will take a 2-0 record to Peoria, Illinois this Saturday as they seek their second straight win over the Bradley Braves. Last year, the Miners handed the Braves a 42-14 set-back which could just as easily have been a 42-0 as the UMR squad totally dominated the game. Bradley finished last season 1-8 and was somewhat optimistic about this season, but their hopes pivoted around a couple of freshman quarterbacks. Prospects were dimmed as the Braves lost this year's first two encounters by lopsided scores to Evansville University and Western Illinois University.

Bradley's offense centers around two senior ends, Ernie Pierantoni and Tom Whitney. Pierantoni led the team in receptions last year as the 6'2", 195 pounder caught 44 for 595 yards and five touchdowns. Over three seasons he has caught 82 passes for 1240 yards. Whitney stands 6'2" and weighs 185 and has caught 100 passes in three years for 1515 yards. He was second last year as he hauled down 40 passes.

Bradley's head coach Billy Stone is in his 16th year as head mentor and has an overall record of 65-73-5. Stone is a former star in the National Football League, and was named "Rookie of the Year" for the Baltimore Colts in 1949. Bradley's offense reflects Stone's experience as they play a straight pro-type offense with a wide open attack. Since the Braves have 27 returning lettermen, he will have a lot to

work with.

Most of Bradley's returning lettermen are concentrated in the defense and Stone will have experienced defensive half-backs Gary Busse, Dave Edwards, and Mike Kepple to cope with UMR's potent passing attack. A lack of experienced depth on the defensive line could make the Miners' ground game very effective, however.

The Braves do have a big team as three-year letter-man Jack Wiech leads the team with his 255 pounds. Bradley's offensive line won't be giving away too much to UMR's defensive line, so the Miners' front three of Milfelt, Moore, and McAllister will have a battle on their hands to get to Bradley's unseasoned quarterbacks.

Bradley doesn't rely too heavily on their ground game and will have only two seasoned backs returning. Jim Donahue at halfback carried the ball 70 times last year for 285 yards and fullback Tom Stephano carried the ball three times for four yards, so the Braves will have to rely heavily upon their passing attack. Donahue caught seven passes coming out of the backfield for 137 yards last year.

The Miners present a formidable foe for the Braves as they have a balanced attack, bolstered this year by the pass receiving of Bobby Somerville and Martin Weekly.

The Miners on the whole are a more experienced team with much more depth than Bradley and will be aiming for their third straight win in the new season.

Dear Paul,

On behalf of the entire Miner Football Squad and the Coaching Staff, we want to thank you for the tremendous support you, Bob Bruce and Ken Price gave the Miner Football Team last year.

A very special thanks to you and Ramsey Furniture for the carpeting for the locker room -- the squad really appreciated it.

Looking forward to your future support of our Miner athletics.

Sincerely,

Dewey Allgood

Missouri Miners No. 1 With us.

Sidelines

By Glen Jensen

The Miners had their hands full at Missouri Valley College last Saturday and did not look too impressive in the first half. However, the second half was all theirs as they balanced strong running and passing of All-MIAA hopeful Pat Godwin.

Pat Godwin

It looked as though Pat decided to go to the air a third of the way through the third quarter and just picked apart the Missouri Valley secondary. When Somerville and Weekly were covered, Pat threw effectively to tight end Harlan Pyle, who proved nearly impossible to tackle. Missouri Valley had a surprisingly strong team, but the Miners showed good team discipline in what was a more impressive victory than last week's win.

Some mention must be made of the Miners' cheering section.

Lambda Chi Alpha social fraternity chartered a bus and traveled en masse to Marshall to cheer the Miners. They provided spirit throughout the contest and out-cheered the entire Missouri Valley congregation. The Lambda Chi's deserve a big vote in determination of UMR's Twelfth Man Award to the organization which provides the most spirit at home games. Even though this was an away game, Lambda Chi should be given special consideration.

The Miners travel to Peoria this weekend to participate in what should be no contest. The Bradley Braves have gotten stomped in their first two games and the Miners just seem to keep getting stronger. My guess this week? Miners 35, Bradley 0.

Just about every MIAA team predicts that they will win the Conference football title. Kirksville, Cape Girardeau, Warrensburg, and the Miners all return strong teams, and Springfield and Maryville have shown that they have a few things to say this year. Only newcomer Lincoln has not promised to win the MIAA title, and they could still provide a challenge. Last year Lincoln battled co-champion Kirksville to a 22-22 tie.

Coach's Corner

By Ernie Cagle

. . . . Jerry Kirksey

The Miner Cagers will open the 1970-71 season with a new assistant coach. Mr. Jerry Kirksey will take over the position behind head coach, Billy Key.

Coach Kirksey hails from Buffalo, Missouri, where he had a very illustrious high school career. In four years of varsity

Jerry Kirksey

play as a quick shooting guard, he won the praise and respect of his teammates, fans, and opponents as well.

As he continued his education, his basketball prowess stayed in step. While doing undergraduate work at Southwest Missouri State at Springfield, Coach Kirksey was all conference guard three years running, from 1958 to 1961. Then at the University of Missouri at Columbia in preparation for his Masters, Coach Kirksey played

on the Tiger traveling team. He then completed his education at Central Missouri State College in Warrensburg, receiving his degree as a specialist in education.

COACHING CAREER

Coach Kirksey first experience in coaching came when he took a job at Stockton High School in Stockton, Missouri. In his years at Stockton the teams he coached never had a losing season. He then packed and moved to Houston High in Houston, Missouri, where he coached until coming to the Miners. In nine years as a coach, Coach Kirksey rolled up 162 wins, while losing only 44 games.

WINNING PHILOSOPHY

Coach Kirksey is an ardent believer in the art of winning. He hopes to keep that belief

during his stay with the Miners. As preparation for the nearing season, Coach Kirksey has the players on weight programs to get them in shape, in addition to tours around the track to build stamina. He said the attitude of the ball players is excellent. With the coaching staff behind them, which Coach Kirksey praised as the finest anywhere, the cagers will be a tough opponent to face. Along with the coaching staff, he praised the Miner fans. To Coach Kirksey, they did one of the greatest jobs of supporting a team that he has seen in his long involvement with the game of basketball.

In closing, Coach Kirksey said the team would be a very interesting one to watch. He hopes to see all the Miner fans in the gym for the first home game, and the rest of the games throughout the season.

Keats has a big, bold collar.

Reminiscent of the nineteen twenties. This trim tapered Gant shirt. With a flamboyant big collar that keeps its composure right through the day. Thanks to a new Gant stay. Tailored with singular precision in a "no iron" Fortrel polyester-cotton. Exuberant colorings.
