## Preservation Jazz Scheduled Tuesday

Dee Dee Pierce, blind leader of the Billie and Dee Dee Band as he appeared in concert last year in the Student Union Ballroom. Pierce, his wife, Billie on piano, and the other four members from the famous

Preservation Hall Jazz Bands of New Orleans will perform Tuesday, September 26, at 7:30 p.m. in the Ballroom. All except Jaffe on tuba are over 60 years old, being original artists from the jazz era.

The world famous Preservation Hall Jazz Band will appear here in a concert at 7:30 p.m. Tuesday, September 26, in the Student Union Ballroom. The band is on tour from its home in legendary New Orleans where the members of the group all took part in the birth of our most American art form.

Each of the members of the Preservation Hall Jazz Bands has memories of the days when jazz, or jass as they spelled it at the turn of the century, was taking form and shape and becoming a separate kind of music. They were in the bands that marched to and from the cemetery for funerals, they were in the wagons that drove up and down French Quarter streets and battled it out when two bands met at a corner. They were on the river boats, in the saloons and 'sporting houses' and dances. In fact, they were the people who added their names to Freddy Keppard, Buddy Bolden, Louis Armstrong, King Oliver and Jelly Roll Morton in the exciting history of an American art form that grew from many sources in the special culture that was New Orleans.

These are the people who made the history. But their vitality and youthful drive is still apparent in the singing, happy music of New Orleans and a concert today is full of the same spirit that made jazz the uninhibited music of the period around the first world war.

People from all over the world have made Preservation Hall a priority on trips to New Orleans, it has become something like apilgrimage. But the real pilgrims are the musicians who have been traveling the United States and the world to bring the true New Orleans jazz played by the people who have played it for 50 years in the Parishes around New Orleans. They know the music best, and they play it the way it was created.

New Orleans music is happy music, it is simple in technical terms, and complex in performance. It is not the straw hats and display of the "Dixieland" bands, nor is it the "Nicksieland" of New York. It won't cease to exist when these wonderful people are no longer with us, but it will never be the same because New Orleans Jazz is an attitude, a freedom

of the spirit, and a memory of parades and dances and a good life. It is made up of years when a musician had to have the stamina to play several hours after another job on the docks or in the fields because he loved to play his horn.

The Preservation Hall Jazz Bands have been quietly taking their place among the leading American concert attractions for several years. Each year the tours get longer, the audiences get bigger and young and old Americans are finding a happy evening in a theatre or concert hall. The band members are not concerned with a message they are bringing joy and sorrow in their stamps and blues. Feet aren't often still while the band is playing and the everlasting youth and vigor of the players leaps across the footlights into the hearts of everyone in the audience. The line behind the band members as they lead a march through the hall at the end of the concert is testimony to the happiness that fills the hall when the band is there.

The band that will appear here is the Billie and Dee Dee Band.

Preservation Hall is located just

where it ought to be, although it was originally a happy accident. It has just the proper history in its charming old walls, and it is performing a very important function in present day artistic history.

Preservation Hall is 726 St. Peter Street in New Orleans, La. That puts it right at the entrance to the French Quarter, and very near Basin and Canal Streets where Jazz was born. To it come the musicians in New Orleans who walked by it in their youth when jazz music was an infant. After dark when the New Orleans Jazz starts, the visitors are music lovers from everywhere in the world who know that each night at the Hall is an historical moment.

The building was originally a private home, built about 1750. It is known that it was a tavern during the U.S. occupation after the War of 1812. In recent years it has been occupied by many creative people, even including Erle Stanley Gardner. In 1952 it became an art gallery, called the Associated Arts Studio and the proprietor invited

UMR Police Department

## Situation Crimes

The majority of the incidents reported to and investigated by this Department in the last few years have been larcenies of private property from rooms, desks, lockers and other areas where such property is normally kept. Items reported missing have ranged from an electric typewriter down to a few dollars in change. The patterns of all these crimes are similar in one respect. In almost every case the victim has reported that he had not locked his door, locker or drawer before leaving. This seems to indicate that the perpetrators of most of these crimes are "situational criminals".

The "situational criminal" is the individual whose loose ethical code permits him to take advantage of a situation, such as an unlocked desk or locker to steal something of value or which he can easily convert to cash. He is not a professional criminal and will seldom take the risk involved breaking a window or picking a lock.

Crimes of this type are extremely difficult to solve. The side range of people with access to areas in some cases complicated investigative procedures, renders fingerprinting techniques infeasible and results most often in an unsolved case. When access to an area is limited the case may be more easily solved, but even in these cases apprehension of the culprit and recovery of the stolen property is rare.

Ironically enough the "situational crime", although the most difficult to solve, is the easiest to prevent.

If every student, faculty and staff member would keep cash and valuables under lock, situational crime rates would decrease dramatically. This fact was borne out during investigation of a series of petty thefts from one department during 1971. The department chairman placed heavy emphasis on locking of desks, offices, and laboratories. The thefts, which had been occurring regularly, stopped

completely, indicating that the thief had been taking advantage of unlocked doors and desks but would not attempt to break into these areas to commit his crime.

This department highly recommends that each individual on the campus take advantage of this knowledge by not only locking their room door but also keep some locked device such as a small cash or tackle box for small amount of cash or other valuables. Items of great value such as diamonds, large sums of money, etc., should not be left in rooms at all, but placed in safe deposit boxes or checking accounts.

Thefts from men's lockers at the Multipurpose Building was a very real problem last year. The attendant at the equipment room will keep watches, rings, wallets, and other valuables for students upon request. Please take advantage of this assistance.

If you have a car, keep it locked. Do not use the passenger area of the car for storage of valuables. Thefts from automobiles, even lock automobiles, remain at a high rate from year to year and accounted for 18 percent of total larcenies reported to police in 1971.

When you use locks and other security devices to protect your valuables, you render a service not only to yourself but also to the person who might take advantage of your laxity. The "situational criminal" is basically a person easily tempted to low risk crime. It has been said that "locks keep honest persons honest". Help yourself, this department and the weak-willed person by locking up.

If you should be the victim of a theft, report the fact to the University Police (341-4300) immediately. This rapid action on your part may assist the department in recovery of your property.

### Hail, Hero!

Hail, Hero from the novel by John Weston, adds a talented newcomer, Michael Douglas (son of the internationally famous actor, Kirk Douglas) to the ever present "generation gap" and explores the sensitive issue of the Vietnam war. This is the story of the moral dilemma of a young man who enlists to fight in the war he denounces. Teresa Wright, making her first screen appearance after a twelve year absence, and Arthur Kennedy turn in striking veteran performances as Douglas' parents. No matter what generation you belong to, you must see Hail, Hero!

### NOTICE

Anyone interested in writing sports for the Miner, particularly Women's Intramurals is, urged to contact Bill Horsford at the Miner office, in T-14 Sunday evening.

A three piece Kazoo band provided entertainment for UMC students protesting during the investiture ceremony of President C. Brice Ratchford in Columbia last Friday afternoon. The protest was against the recent removal of Edwin Hutchins, UMC Dean of Student affairs. One of the band's most requested numbers was "Misery Waltz."

## Urban Vehicle Display at UMR Industry Day

More than 50 companies will have displays at Missouri Industry Day, to be held from 10 a.m. to 6 p.m. Sept. 26 in the University of Missouri-Rolla Multi-Purpose Building.

Company representatives will be on hand to talk about career opportunities and show company products and services. Everyone is invited to attend. There is no admission charge.

In addition to the industrial displays, UMR will exhibit some of the work being done on the campus in environmental areas. UMR displays will include the experimental car which students made for the Urban Vehicle Design Contest

and water pollution, noise pollution and glassphalt exhibits.

Miss Susan Stoner, last year's military ball queen, will act as UMR's official hostess at the event. There will also be door prizes. During the morning a barber shop group and the pops ensemble, both conducted by Ed Scarff under the director of Joel Kramme, will provide entertainment. A duet featuring Neil Compton and Dana Nau will also provide some music. KMSM will broadcast from the display area all day.

Buses will provide transportation to and from the parking lot in back of Parker Hall every half hour.

## Civil Engineer Aides "Eight Week Wonders"

This summer 15 residents of Kansas City spent eight weeks on the campus of the University of Missouri-Rolla learning to become civil engineering aides.

The UMR extension project was sponsored by Kansas City Model Cities Agency and the Missouri Department of Community Affairs. It was designed to train inner city residents to work, under the supervision of an engineer, in survey parties, on construction projects or as draftsmen.

The men, whose ages ranged from 19 to 26, spent eight hours a day on campus. They lived in a residence hall and were in effect, college students for eight weeks.

Jerry Bayless, UMR associate professor of civil engineering, is the program

director. "They attended basic classes in surveying, construction materials testing and engineering drawing," Bayless said. "The students also had developmental reading and mathematics, an hour of physical education every day and a weekly group counseling session."

At the completion of the project all 15 men had either been interviewed or had put in an application to companies or government agencies in the Kansas City area who could use civil engineering aides.

"Right now," Bayless says, "we know that at least seven have either returned to school or are on jobs. But we haven't had a chance to check on the status of the others."

## Employment Picture Improved For This Year's Graduates

A "marked improvement" for new graduates during the coming year is anticipated by Larry Nuss, director of placement and industry relations at the University of Missouri-Rolla.

He bases his predictions on a substantial increase this fall in employer requests for job interviews and in expected needs reported by key employers.

Nuss reports that the 1972 graduate fared somewhat better than his 1971 counterpart. "In spite of a reduction in the number of campus interviews, placements at graduation time were improved for the May

class. Starting salary averages increased four per cent over 1971 at the bachelor's level."

The following fields showed significant increases in average monthly starting salaries, according to Nuss: metallurgical engineering (\$884 vs. \$820), petroleum engineering (\$991 vs. \$930), engineering management (\$904 vs. \$864) and applied mathematics (\$818 vs. \$744). The most significant gain in starting salaries was at the Ph.D. level where monthly averages climbed from \$1,007 in December, 1970, to \$1,498 in May, 1972, an increase of 48 per cent.

"In some disciplines our UMR starting salaries were practically identical with national averages for 1971-72," Nuss adds. "Our UMR rate of gain for engineering and science starting salaries was four per cent, compared to less than one per cent nationally."

The number of offers for employment rose substantially over the previous year, both on the UMR campus and nationally. Both local and national survey figures showed gains ranging from 12 per cent at the bachelor's level to 32 per cent at the master's and 44 per cent at the doctoral.

Chancellor Merl Baker of UMR accepts a \$3,500 check given to the Chem. Eng. Dept. by the Nuclear Division by Union Carbide Corp.

# Editorial Opinion

## Letters

Dear Editor:

In the September 7 issue of the Miner "Our Man Hoppe" gave his opinion on violence in America and that what he fears is apathy and fear. Fear and apathy is a human failing as was the shooting of George Wallace. "Hoppe" though in counter-attacking apathy in himself blamed the whole incident on weak gun controls. All the gun controls in the world would not have prevented it, anything short of confiscation, a situation we are already approaching. Confiscation is suicidal in reality as many people seem to forget the lessons of history and that one of Adolph Hitler's first steps to power was confiscation of all firearms. And there are not too many citizens of the communist bloc countries with guns either. Hungary and Czechoslovakia didn't exactly have a fighting chance when the USSR decided to "tell them" how to behave.

Many, far too many, people react impatiently to jump on the bandwagon for the control of firearms just to display their misguided fear while in the long run it is the worst thing that could be done. Gun controls would not have saved a single Israeli athlete from hand grenades or those eight nurses in Chicago from the maniac's knife. An armed citizen is the only defense against intruders and dictators, and more gun

Sept. 8, 1972

controls will result in more innocent citizens being like Balleau, paralyzed for life due to a federal raid on his home due to a false "suspicion" of illegal possession of firearms. Shot down in his own home, and people keep crying for government to take care of us and pass more gun controls. It has gone too far already.

Bill Stewart

Dear Editor:

Perhaps you will be able to publish this letter in the MINER; perhaps not. However, I feel, as a student here at the University of Missouri-Rolla, some mention should be made of the recent death of the Student Union Director, Mr. W. T. (Kookie) Kratzer. The term "death" is used, because we (students) understand that he is no longer officiating in that capacity. WHAT THE HELL IS AUXILIARY ENTERPRISES?

Mr. Kratzer's ONLY concern has always been the STUDENT! We all know his capabilities and feel it an outrage that he is being denied to function in the capacity of Student Union Director. That brand new Student Center is just great — BUT, it has already lost something in the translation and the doors aren't even open yet, if "Kookie" is not going to be around.

WE (STUDENTS) DON'T LIKE IT.

(Name Withheld by Request)

### The Missouri Miner

The MISSOURI MINER is the official publication of the students of the University of Rolla. It is published at Rolla, Missouri every week during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo., under the Act of March 3, 1879. The subscriptions are \$1.50 per semester. This MISSOURI MINER features activities of the students and faculty of UMR.

# Dear John

Dear John,

Since it takes ten cents of my money to buy a soft drink in the Stud. U. and it only takes five cents to buy a cup of ice then doesn't it make sense that the actual soda that I buy would only cost me five cents if I brought my own cup of ice. Do you think the Stud. U. would go for the idea and if not, why not.

Doug S.

JOHN?

Dear Doug,

Sorry Doug but I'm just real sure that the Stud. U. needs the money real bad. You see the Stud. U. just hired an efficiency expert to cut down on costs and bring up profits, this man's salary depends on those cups of ice, that extra piece of lettuce, and that extra thin hamburger; remember he has a family.

Dear John or Joe,

Why can't I get in the H.S.S. building at night to teach my class. I was told that it was because of "security reasons" and that there was only one door open on each building. What does this mean?

A Professor

Dear Professor,

After taking council with my advisory board I have determined two reasons why you couldn't get into the building except by one door or not at all; my conclusions are that one, your security wasn't high enough and that you should not have been in that area anyway, and two, the campus police did

not want to be caught snoozing on the job. However, I do have a suggestion for all those who have been locked out of the building when it was necessary for them to be there, my

suggestion is this: when you are in this position, don't get impatient, bide your time and when three o'clock in the morning comes around give Merle B. a call or some other sleeping administrator, I guarantee some results.

Dear John,

I have finally figured up all the money I have spent on books this year it was fifty-nine dollars not counting tax. Twenty-five of it was just on one History course. Is this fair or even smart.

I. M. Mad

Dear I.M.,

Really couldn't agree with you more but you must understand that books are the way to knowledge, in this case the knowledge that you and many other students got taken on this year's book prices and on the amount of books.

## Our Man Hoppe

### Will Bresnel Stay Bought?

The Nixon's trip to Moscow, historians now agree, proved a tremendous success — initially.

Mrs. Nixon presented on Russian official with a Mickey Mouse wristwatch and Mr. Nixon presented Chairman Brezhnev with a \$9600, two-door, black Cadillac Eldorado.

In return, the Russians signed the critically important Nuclear Arms Pact, which provided that henceforth they could only blow us up 17 times over while we could only blow them up 19 times over. Or perhaps merely 15.

(The bitter nationwide debate over the precise figure — with conservatives accusing Mr. Nixon of leaving the country defenseless — almost scuttled the treaty in the Senate.)

But Mr. Nixon and his staff were extremely happy with the deals they'd made. As he said at the time: "No we have well begun the long journey that will lead us to a new age in the relationships between our countries."

The long journey lasted until Mr. Bresnev got the Cadillac home.

"Look, dear!" proudly cried Mr. Bresnev like any husband bringing home a newly-acquired car. "Look what I got from Mr. Nixon!"

Mrs. Bresnev shook her head, aghast, and said what all Communists always say: "Would you buy a used car from that man?"

"It's a brand new car," said Mr. Bresnev defensively. "And the price was right. Don't worry, as a tough old Communist bargainer I got the best of the deal."

"I'm sure ylu did, dear," said Mrs. Bresnev, looking the car over, the way wives will. "And I suppose two doors are really enough, if you don't mind scrunching up to get in the back seat. Of course, the Kosygins have a beautiful new four-door Samovar-8 (cq) that ..."

"Forget the doors! Isn't it beautiful?"

"It's very nice, Leonid. And I'm glad it isn't flaming flamingo like the Podgornys' new Mark IV Borscht. Black's a much more suitable color for a man of your age."

"My age? What's my age got to do with it?" And for the next couple of days, Mr. Bresnev kind of gloomily drives his new car to work. He does, that is, until the muffler falls off.

Now Cadillacs are one of the finest cars made. But all new cars have bugs. And Mr. Bresnev angrily calls General Motors. "Don't worry, sir," says Customer Relations. "All you need is No 167-B scrimshaw bolt. Just bring it in. As we say in our ads, 'An authorized Cadillac dealer is just a few iron shots away.'"

Well, it's eight weeks on the bus to work while the part arrives by sea mail. Then word gets around Mr. Bresnev is driving a Cadillac. "Capitalist revisionist," is the kindest thing that Mr. Kosygin and Mr. Podgorny (who are really jealous) whisper about him.

So there's Mr. Bresnev, engaged in an awesome Kremlin struggle for power, when a letter arrives from General Motors: "Dear Mr. Brissnoff; (cq) As the proud owner of one of our 1972 models, you may be interested to learn of a minor malfunction we've discovered in the guidance gudgeon (cq) that could, at speeds in excess of 42.5 m.p.h., cause the steering wheel to fall off. We hope our thus recalling your car to the factory in the interests of safety will not inconvenience you in any ..."

It was an hour later that World War III opened with a massive Russian first strike. Fortunately, damage was somewhat limited.

All 2137 Soviet missiles — the entire Russian arsenal — were targeted, for reasons not yet clear, on Detroit, Michigan.

## SPEED READING COURSE SET TO BEGIN IN ROLLA

Dr. George Woodward of National Speed Reading Schools announces a summer session of speed reading classes in Rolla.

The skills taught in this course will enable a person to read any average length book in less than an hour and understand it better. In addition to rapid reading the course also emphasizes improved study techniques, better test taking skills, and increased concentration and retention abilities.

The class schedules require a person to attend one class per week on the evening to his choice.

Classes are limited to 12 students. Graduates of the

course are guaranteed a reading speed over 1,000 words per minute with a definite increase in comprehension.

For those who would like more information, without obligation to enroll, a series of free one hour orientation lectures have been scheduled.

Attend the one most convenient for you.

Thur., Sept. 21 at 6:30 or 8:30 p.m.

Fri., Sept. 22, at 6:30 or 8:30 p.m.

Sunday, Sept. 24 at 2:00 p.m. only

All meetings will be conducted at Howard Johnson Inn in meeting room 114

## SEE THE U.S.A. IN YOUR CHEVROLET...

BUT BE CAREFUL ON THE TURNS.

If you drive a 1965 to 69 full-size Chevrolet or Nova V-8, or a 67 to 69 Camaro V-8, you're in serious danger. Those cars were built with faulty engine mounts. If one breaks and the engine shifts, it can jam your accelerator wide open and knock out your power brakes at the same time. The greatest dangers are fast starts and turns. Several thousand accidents and injuries have been reported.

and some deaths have been alleged. General Motors has announced they won't give you new engine mounts. But they have agreed to install a free safety cable that'll hold the engine in place. That way if a mount goes, you won't. If you're driving one of these cars, get it to a Chevrolet service department... slowly.

## Placement Office Using Computerized Service

The University of Missouri-Rolla is one of the 157 college and university placement offices in the nation specially selected for an expanded, computerized program designed to aid seniors and graduate students in their choice of employment interviews, it was announced today by the placement office.

Known as GRAD II, the program is being conducted by the College Placement Council (CPC), the non-profit organization best known for its College Placement Annual. Last year, GRAD II was conducted on 132 campuses, and was so successful that it is being expanded to operate on 157 campuses. These campuses have been recommended for the system by the 113 employers in last year's program as the institutions with enrollees and placement programs best suited to the system. The number of participating employers is expected to be even greater this year.

According to L.R. Nuss, director of placement, the program will offer over 1,000 students an opportunity to see the full range of opportunities offered by employers in the program. Student participation is free and entirely voluntary.

"One of the main purposes of GRAD II is to assist students to better identify employers with opportunities matching the individual's qualifications and interests," according to Mr. Nuss. "The program should cut down on the number of wasted interviews on the one hand and on the other should bring to the attention of students some employment opportunities which might go overlooked without the benefit of this type of system."

Nuss emphasized, however, that neither GRAD II nor the placement office can create jobs; they merely help identify employers with openings the student should explore.

Nuss explained that the process has already begun with the input of employer job descriptions. Immediately ahead is collection of information from students here and from other campuses. Special forms are available at the placement office. Using this form, which takes only a few minutes to complete, the student can indicate the factors which are important in his or her job search. Selector factors include career field, degree level, academic major, type of employer, and geographical preference. The last two are weighted by the student in terms of their importance to the individual's career intentions.

Subsequently a personal report of the matching between employer offerings and student qualifications will be distributed by the placement office to each student who has signed up for the program. The report of the matching between employer offerings and student qualifications will be distributed by the placement office each student who has signed up for the program. The report will provide the student with names of participating employers sending interviewers to the campus and the dates of their scheduled interviews.

Similar printout reports will be provided to employers and placement offices. Employers will receive "mini-resumes" with pertinent information about students matching their job descriptions. Placement offices will be advised of the various matches and in addition will be provided results of the weighting system which indicates the degree of match, enabling the placement officer to do a more realistic and meaningful counseling job with individual students. Another major counseling benefit will be the supply-and-demand information generated by the program, giving placement officers and students an over-all picture of the employment market early in the college qualifications. However, there is no obligation for a candidate to interview an employer with whom he or she is matched or to take a job if one is offered. Unmatched candidates, as well as those who do not use GRAD II, will still be able to sign up for interviews of their choice.

The Council, considered the authoritative source of data on placement and recruitment, represents the placement directors of the nation and their counterparts, the directors of college relations in business, industry, and government.

The Manual of Information for the 1972-73 academic year incorporates several changes which were passed by the faculty last year in the section on academic regulations, pages 62 through 73. Some of the rule changes affect all students and some of them affect only those newly entering students beginning in the fall of 1972. Copies of the new Manual of Information are available in the Registrar's Office.

### Honors At Graduation

Effective for the December commencement there will be a new set of rules governing who receives honors at graduation. These rules are contained on page 66 of the Manual and it should be pointed out that a student with a cumulative average of more than 2.75 but less than 3.20 will no longer qualify for honors at graduation.

### Honor Roll Requirements

During the fall semester a change will be in effect concerning the honor roll which will be prepared at the end of the fall semester. In order to qualify for the honor roll a student must complete twelve or more semester hours of work during the fall semester with no failing

grades and earn at least a 3.20 semester grade point average. Students meeting these requirements will be designated as honor students at the end of the 1972 fall semester.

### Calculation of cumulative G.P.A.

Newly entering students in the fall of 1972 will have all hours which they attempt included in their cumulative grade point average as computed at the end of each semester. Previously, failing grades were included on in the calculation of the semester grade point average; however, failing grades will also now be a part of the cumulative grade point average for newly entering students. Also, when a course is repeated both grades will be used in the cumulative grade point average rather than using only the last grade earned. Students who were enrolled at UMR prior to the 1972 fall semester will have their cumulative grade point average figured under the old system.

### Scholastic Probation

Newly entering students in the fall of 1972 will be under a new set of regulations governing probation and general deficiency as outlined on the bottom of page 71 of the 1972 Manual of Information. Students who were enrolled at UMR prior to the fall semester 1972 will be governed under the same rules as contained at the bottom of page 71 in the 1971-72 Manual of Information.

### Registration Under "Pass-Fail" Option

The following rule changes regarding registration for a course on a pass-fail grading option applies to all students regardless of when they first entered UMR. It is now left up to the undergraduate student's major department to designate those courses (lecture or laboratory) which may be taken under the "pass-fail" grading option. As in the past, a student may enroll for no more than one of these courses per semester. Under this option, instructors report, and the registrar now records, a grade of "S" or "U" for the course taken. Credit for courses taken under the "pass-fail" option will not be used in calculating grade point averages. One final enrollment has been completed in the course, changes cannot be made in the grading option.

### ALL FOR ONE AND ONE FOR ALL

(CPS) — A herd of wild elephants in India surrounded a locomotive after the train struck one of their compatriots on a cross-country run. The elephants forced the train to retreat in reverse to the nearest station, then returned to the scene of the accident and stood vigil around the stricken elephant until it died.

## Cellar Door - Place To Go On Party Weekends

Scene at Cellar Door this past All-School Party Weekend. This coffeehouse will be back for Homecoming.

An increasingly popular form of entertainment is the coffeehouse. Students in Rolla are indeed fortunate to have a fine coffeehouse here — the Cellar Door. The All-School party weekend marked its opening for this year and it is scheduled to operate on three remaining party weekends: Homecoming, Military Ball, and St. Pat's. On these weekends the "Door" is open from 9:00 to 12:30 Friday and Saturday nights in the "Cellar" of the Episcopal Church at Tenth and Main. To get in the "Door" you pay fifty cents. For four bits you get entertainment by a variety of professional and local talents.

You also get free refreshments and snacks and old films featuring W. C. Fields and others.

The Cellar Door is sponsored by the campus ministries of the Presbyterian, Methodist, Catholic and Episcopalian faiths.

## Revised Appropriations Bill Now Before Senate Committee

The Missouri House of Representatives passed the substitute appropriations bill shortly before noon Thursday, September 14, by a vote of 101 to 37. The bill was then sent on to a 4 p.m. session of the state Senate.

The substitute bill contains in part a possible reduction in student fees in the University of Missouri system. The student fee increase, initiated this summer, raised out-of-state tuition \$40 and in-state tuition \$20 per semester.

A proposed refund of this semester's fee increase died in the House last week when \$800,000 was cut from the University's budget.

According to legislative leaders' plans, the Senate will report the appropriations bill back to the House for consideration Thursday. If the bill is acceptable in the Senate form, final adoption and adjournment could come this Friday.

The Appropriations Committee originally tabled the bill last Thursday in a secret session by a 17-10 vote. The tabling touched off a flurry of maneuvering over the next week, culminating in the final approval of the amended bill Wednesday evening.

House Democrats opened caucus and committee meetings Tuesday to summon support for the measure, followed by an appropriations committee meeting.

Legislators were close-mouthed about the actions taken and all of the meetings were conducted in secret. However, committee members' objections to being called into special session during a campaign year for measures not considered necessary, and the fear that a large number of non-emergency amendments might be attached to the bill were believed to have been among the reasons for the tabling of the bill.

The bill now before the Senate Appropriations Committee amounts to about \$21.1 million, some \$2 million less than Gov. Hearnes' original request. The cut in the appropriations bill of interest is \$800,000 of a \$1.6 million request for rescinding student fee increases at the University of Missouri. The effect of the remaining portion of this request is that second semester fees will revert to previous levels, if the appropriations bill is approved in amended form.

## Greenhouse Every Weekend Happening

"I'd just like someplace to go on a Friday or Saturday night that wouldn't cost much, a place where I could go and just be myself."

With this in mind seven students came together last spring and began the Greenhouse Coffeehouse. It was an experiment to determine if a weekly coffeehouse could succeed in Rolla. The Greenhouse Coffeehouse was successful, successful enough that this year a school organization named Greenhouse is being established to continue the coffeehouse.

The main fare of the coffeehouse has been folk and popular music and guitarists from UMR and the Rolla area. No one is paid and anyone with the courage to perform before a crowd can come in and play his or her particular instrument and kind of music. Frequently guitarists get into jam sessions and sing-along numbers. Last

Friday evening and again this Friday, the coffeehouse is featuring Latin American music performed by UMR Latin American students.

Several speakers from campus and community organizations will be featured within the next several weeks. As part of their entertainment program, the Greenhouse Coffeehouse also provides blacklight paints and candle-making materials for use as self-expression media.

The is open from 9 p.m. to 1 a.m. on Friday nights with hopes that operation can someday be extended to Saturday nights, too. Admission, coffee, tea, and popcorn are free. Donations and membership dues of Greenhouse members are at present being used to cover expenses. Until better facilities are available, the coffeehouse will occupy the basement at 1706 Pine St.

## New Orleans Jazz

Continued from page 1

musicians to come in and "rehearse" with a freewill offering at the door for his friends who came to listen.

Soon the music took over the building and the art gallery moved next door with a studio upstairs where the Noel Rockmore Preservation Hall portraits were done. A club was formed and attendance at the "rehearsals" was increased.

The neighbors didn't always like this upstart in the area. In

fact, for awhile members of the band, black and white alike, spent some very unpleasant hours before less-than-sympathetic magistrates on the joint counts of disturbing the peace and violation of white supremacy.

In 1961 the club, like almost all jazz clubs, began to have its frictions. It was dissolved and Sandra and Allan Jaffe took it over to operate as a business. That was the beginning of the

## House of Atreus to Perform Ozark Mountain Music

Dick and Anne Albin displaying the various instruments they will play in the Student Union Ballroom.

The House of Atreus, Dick and Anne Albin, are coming again to UMR to give two days of workshops and concerts. This will be the fourth time that the group has appeared before a Miner crowd. The last time, the House of Atreus performed before a capacity crowd. The concert entitled "Makin' Do With What You Have" is about Ozark and Apalachian folklore. The concert features traditional folk tales, superstitions, home remedies, and songs from these mountain regions. The Albins accompany their songs with dulcimers they designed and built themselves and with banjo, guitars, and auto harp.

The House of Atreus is a music-theatre company specializing in college concerts, lectures, and special events. They have toured campuses across the country, performed at many folk festivals including the 33rd and 34th National Folk Festival, and appeared with the National Humanities Series. They have, also, appeared at the National Music Festival in

Cleveland, the SMS Ozark Folk Festival in Missouri and the Belknap Folk Festivals at the University of Louisville.

In conjunction with the concert, the Albins plan to give two workshops Thursday afternoon, Sept. 21. One of the concerts, "Evolution and Development of American Ballads", traces the American ballads and songs from their European beginning to the present. The other workshop, "Building the Mountain Culcimer", describes the way in

which the Albins built their instruments and gives hints for interested students.

chance to bring this great music, played by its originators, to the hearts of audiences every night and later to all of the United States, to Europe and to the Orient.

Today Preservation Hall is maintained and operated just as it was in the beginning. Benches and kitchen chairs accommodate about half of the nightly audience. Some of the floor is loose and the front is off the old upright piano. Sandra Jaffe still keeps the historic wicker basket at the front door for the patronage donation which pays union scale to the musicians at work. It is clean and swept, but the charm of Preservation Hall remains. The atmosphere of New Orleans is not vilated by chorme and fancy lighting and rushing waiters. It is a place to hear the great people play their great music.

Preservation Hall is a school, too. Young musicians come from Japan and Europe as well as America to learn how to play New Orleans Music. To shed the misunderstandings that have grown as jazz was made commercial, and to preserve the music into the future as it should be preserved. There is nothing formal about the school, it wouldn't provide the link if it were structured.

Preservation Hall is a state of mind for many as well. The state of mind is happy because the music is happy and the setting is right. There are no cults and factions. The musicians are past that now, they are secure in the tradition and their own consummate skills. The musicians are the leaders, the Jeffes steer the ship and Preservation Hall becomes the true Preservation of what might pretentiously be called an "art form".

If you would like to have a cheerful argument, just drop in at 726 St. Peter any time and

announce that one of your favorites is the greatest band or that an individual performer is the "best". The loyalties are there and you can be surrounded by adherents to every band and loyalists for every performer. The vitality of jazz infects all of the people, musicians and listeners alike, at the Hall. But the total result inspires everyone.

This will be the third time a Preservation Hall Jazz Band has played at UMR. In their last appearance two years ago, they played to an enthusiastic audience that spilled into the cafeteria.

# Miners Drop Opener to K-State, 21-7

## Kenton Hupp Scores Miner's Lone Touchdown

The 1972 Miner football season is off and running. The Miners running game looked good in a tough 21-7 loss to powerful Kansas State College of Pittsburg.

The Miners drew first blood by taking the opening kickoff and driving 77 yards to paydirt. Quarterback Rick LaFollette used his running backs, Chatman and Hupp well, running them inside and keeping the ball himself outside. The only pass thrown by LaFollette in the drive was a nine yard toss to senior wide receiver, Tim Holcer.

Give special credit to the Miner offensive line for their blocking up front. It seems that the linemen, offensive and defensive are often overlooked, but tackles Ray Christ and Carl Pelech, along with guards Mike Millard and Gary McAlpin flanking center Gordon McFerron did a great job opening the holes for the running backs. These players are

the ones who take the beating in "the pit," and really determine the outcome of the game.

The game was a defensive battle most of the first half. The only offensive thrusts came on the Miner's scoring drive and a Pittsburg threat late in the second quarter. Pittsburg defensive back Steve Benigno returned a punt 30 yards to the Miner 37 setting up the tying touchdown.

The second half started badly for the Miners and rapidly got worse. Pittsburg returned the kickoff to their own 48 yard line. The Miner defense held tough and the Gorillas were forced to punt. A booming 42 yard punt by Bari put the ball on the Miner one yard line. The Gorilla defense held the Miners with the help of two penalties. Geveker's punt went only 19 yards to our own 24. Pittsburg quarterback Charles Smith ran the ball three times and with fourth down and

(Continued Page 10)

Fullback Jim Chatman carries the ball for a short gain in Saturday's game against KSC. He was met and downed by Gorilla

left end, Roger Newton. Trailing the play is Miner guard Gary McAlpin.

Linebacker Jeff Carter of the Miners runs back an interception late in the fourth quarter of Saturday's game. Carter

returned the ball to the Gorilla 23, but the Miners were unable to capitalize on the opportunity.

## Gorillas Whip Miners

(Continued from Page 9)

five yards to go, threw 19 yards to end Neal Beasley to make the score 14-7.

The ensuing Miner drive was halted by a 15 yard penalty. The Gorillas came right back, driving to the Miner's six yard line where they had first and goal. But the Miners famed goal line defense held once again. The Gorillas tried four times to penetrate it, but failed. The Miners took over on their own one, but couldn't get moving. Pittsburg got good field position on the exchange and this time

made no mistakes, uping the score to 21-7.

After another offensive failure, the Miner defense came to life and intercepted a pass, giving the offense its last chance to score. Give credit to a strong rush and the quick thinking of linebacker Jeff Carter, who picked off the pass. Again the offense failed on a fourth and eight pass from LaFollette to Holcer in the end zone, that was just overthrown with three seconds remaining.

Miner split end Tim Holcer goes up for the ball against Gorilla defender Steve Benigno. The pass fell incomplete as LaFollette was only 3-15 in the air.

## MIAA Action

### Five MIAA Teams Suffer Losses

### At Hands of Non-conference Foes

MIAA teams found the going extremely tough in non-conference play this weekend as they posted a composite record of 1-5. The only winner was Lincoln University, the Tigers' James Lang passed 47 yards to Phil Doolin for one touchdown and Willie Burks raced 60 yards on a punt return as the Lincoln team downed visiting Langston of Oklahoma 15-6. The game was the season opener for the Tigers.

In other MIAA action, Nebraska-Omaha demolished the Bearcats of Northwest Missouri State by a one-sided score of 45-29.

The Mules of CMS fell short in a second half comeback attempt as they dropped a 21-14 decision to Arkansas State Conway. The Mules trailed 21-0 at the half, but came back to make the game close.

The Indians of Cape Girardeau, favored to win the MIAA in a pre-season poll of writers, dropped a heart-breaking 7-6 thriller to Missouri Southern. Central Oklahoma State beat Southwest Missouri State 39-18, as Central Oklahoma scored twice in the last six minutes to put the game out of reach.

The University of Missouri-Rolla dropped a 21-7 decision to K-State Pittsburg. The game was the season opener for the Miners.

Defending MIAA champion Northeast Missouri State, which has a 2-0 mark in non-league play this season was idle.

MIAA teams currently have a 5-6 record in non-conference action, led by the Bulldogs' 2-0 perfect slate. The league teams have been outscored by their foes at the rate of 209-137. Once again champion NEMS leads the way as they have scored 69 points while holding their opponents scoreless in two ball games.

## Miners Travel to S. Dakota; Look For Season's First Win

The key saying on the football field this week is: "Don't Look Back." After their opening seasonloss, the Miners are looking ahead to this week's game which is at South Dakota State University, against the tough Jackrabbits.

The South Dakota offense is centered around a 6' 4" 244 lb. tackle named Boden, who as just a sophomore is already mentioned as prospective pro material. The fullback slant is run behind him or the slant is faked and he will pull and lead a pitch to the left. The slant to the fullback and pitch to halfback comprise 75 percent of the

Jackrabbit offense. Their passing game is set up to attack the middle of the field underneath the safety and behind the linebackers, with the favorite receiver being the slot back. But still, the key to stopping their offense is to stop the fullback slant and contain the pitch.

Defensively, South Dakota plays a 5-2-4 defense, with man to man coverage in the secondary. They are big and strong, and can't be run over. Thus, the Miners will use more balanced sets than they did last week, and they will use

the counter pass which is hard for a man to man defense to cover.

So far this season South Dakota is 1-1, beating Eastern Monana 73-0 and losing to Mankato State 24-17 in the last minute of the game. Coach Finley described them as a tougher opponent than Kansas State, which doesn't seem too encouraging. But he added that the Miners were very close to really being good and hoped they will come around for a victory this weekend.

## Bernie Givens Ruled Ineligible by MIAA

Bernie Givens, the preseason favorite for starting halfback on this year's Missouri Miner football squad, was declared ineligible and could not play in last Saturday's game against Kansas State-Pittsburg. Bernie, a junior college transfer, did not meet MIAA's regulations for transfer students and declared ineligible by the MIAA's Credentials Committee.

The MIAA regulation states that a transfer student must pass 24 hours in the 12 months prior to playing any sport on any MIAA team. Bernie, who

attended Longview Junior College in Kansas City, passed only 20 hours.

Givens was given an incomplete for a math course last semester at Longview, with the final grade to be based on make-up work. Bernie received work that the work had been received, but that his grade for the course was an "F".

The 5' 11", 185 lb. halfback was missed by the Miners, but Kenton Hupp, a junior stepped in to take his place and scored the only Miner touchdown of the afternoon.

## Phi Kap Edges Sig Pi In Top Mural Action

In this week's intramural game of the week, Phi Kappa Theta downed Sigma Pi in overtime, 14-14. Phi Kap opened the scoring as they clicked on a 35 yard bomb on their first play from scrimmage. Sig Pi tied the score on a pass from Kent Vance to Chris Caspar. Both teams added touchdowns in the second period to run the score to 14-14.

The second half was a defensive struggle as both offensive units were stymied. The game ended in a tie, and went into sudden death. Phi Kappa Theta intercepted a pass on Sig Pi's first play in overtime, and then their offense gained two yards in three plays to cap the victory.

In other Monday night intramural action, Lambda Chi whitewashed Tech Club 29-0. The big Green Machine of Kappa Sig continued to roll as

the crushed Theta Xi by the score of 35-6.

Acacia upset Alpha Phi Alpha 13-12, as missed extra points hurt the A Phi A's.

Next week's game of the week will feature Pi Kappa Alpha against Delta Tau Delta. The game will be Thursday, September 21.

### NOTICE

The UMR Varsity Rifle Team will be holding tryouts for this year's 12 man squad during the month of September. The tryouts will be held every afternoon from 1:00 p.m. to 4:30 p.m. at the rifle range in the basement of building T-2 which is located behind the library. All students are welcome to tryout.

Sig Pi's Bill Horsford is chased by Phi Kaps' Chuck Flaminio and Dave Rinas while returning a punt in this week's IM

game of the week. Phi Kap won the game in overtime by two yards.

## CMS, AAU To Sponsor Water Polo Clinic

The first season of UMR water polo gets under way this weekend as the Miner squad journeys to Central Missouri State University. The team will participate in a two-day clinic and tournament with college teams from all over Missouri.

The clinic will be run by the National Chairman for AAU polo who is coming in from California. The tournament will be among those participating in the clinic and the Miners don't even know who else will be there. Warrensburg wasn't even sure they would enter a team, so UMR is really going in blind.

This will provide the Miners their first opportunity to play under pressure, and will really be their first full scrimmage. As far as predictions go, one really can't make any. The team has good size and speed and have been working extremely hard

ever since school started. It is hard to realize the great difficulty present in learning to play together, to learn each others moves, and to master the correct timing of passing and shooting. But the Miners seem impressive in their workouts, and their speed, size and determination are all big plusses for them.

A regular team consists of a goalie and six players. The Miners have no starting lineup as the ten team members besides the goalie will all see action, especially this early in the season. The players making the trip to Warrensburg include: goalie Mark Mateer, Tim Blood, Larry Molina, Paul Vetter, Jim Entwistle, Bill Greiser, Bill Kroeger, Tom Kreutz, Phil Henry, Tom Wenger and Dave Beem. It is hoped that all the hard work will pay off this weekend.

## Harmon Highlights

Our first ratings of the Top Twenty for the 1972 season are somewhat different than we thought they would be. . . most of the names are the same, just juggled around a bit. Didn't think we would see Oklahoma at the top of the heap, at least not this early in the season. Nor would we have figured Southern Cal and Tennessee to be so soon. That's football.

All the returns are finally in from the games of the September 9th weekend, and everything came up roses. Of 143 games we had 110 winners, just 22 losers, and there were two ties. So a fat .833 forecasting average starts off 1972. (the roof caves in very shortly.)

Oklahoma goes after win number two, meeting Oregon in Norman. The Ducks may wish

they'd stayed in bed. . . the Sooners are favored by 36 points.

On the rebound after losing its opener to UCLA Nebraska will meet the Cadets of Army at West Point. The 9th rated Cornhuskers will probably give the Cadets a long afternoon. Nebraska to win by 34 points.

Top game of the day? 5th ranked Michigan plays 8th rated UCLA. If the Wolverines plan to redeem themselves for their Rose Bowl loss, this is the game. And if the Bruins are going to prove that their upset of Nebraska was not a fluke, this is also the game! So with an extra long peek at the crystal ball, we'll pick Michigan to win the big one by eleven points.

Texas and Notre Dame are both missing from the ratings of

the Top 20 simply because they haven't played a ball game.

The Longhorns will open their season with a 26 point win over Miami, and the Irish will just nudge Northwestern by 2 points.

Next, the Buffalo tramples the Gopher: 6th ranked Colorado will muss up Minnesota by 25, and LSU, rated 7th, will beat Texas A and M by 22. Alabama will give Kentucky all kinds of trouble, whipping the Wildcats by 26 points. Michigan State a little too tough for Georgia Tech — the Spartans are favored by 12. Alabama is rated 4th and Michigan State is 13th.

The Trojans of Southern Cal meet Illinois in Champaign, and this will be defeat number 2 for the Illini. The second rated Trojans will win by 28 points.

## tie one on

In Jeanials... the jeans shoe

by Thom McAn

There's more than one way to enjoy life. Take Thom McAn's new Jeanials. for instance — shoes just for the fun of it. Jeanials are light on your feet and all done up in the latest lace-up styles, shapes and colors. And like the jeans you wear them with, they're rugged and funky and incredibly comfortable.

And just one more thing. when you tie one on with Thom McAn, you won't regret it in the morning. The only thing about Jeanials that might make you a little lightheaded is the price.

Only \$60.00
