## B.J. Thomas Concert Highlights Homecoming

B.J. Thomas will appear in concert Saturday evening of Homecoming. He will appear from 6:30 to 8:00 p.m. at the multi purpose building. Admission will be \$1.50 per person and a blanket should be brought to sit on.

Billy Joe Thomas was born 29 years ago in Houston. At the age of 14 he joined the church choir and subsequently the choral group at High School, of which he became President. He decided to make singing his career because of his admiration for Roy Head, who was the leading singer in the area.

B.J. Thomas and the Triumphs ( a group of high school boys) first record, "Lazy Man" was an immediate hit in the Houston area and was quickly followed by several more local hits.

Scepter Records signed B.J. Thomas in 1966 and his first record for the New York based label was the million seller, "I'm So Lonesome I Could Cry." The rest is history, "Lonesome" was followed by "Mama," which also made the top of the charts in this country and was number 1 in Australia. Then, B.J. had big hits with "Billy and Sue," and "Tomorrow Never Comes," which were top 20 records, and in the short span of a year, he chalked up a half-dozen chart records and albums. As a matter of fact, he was voted "The Most Promising Male Vocalist" in Bill boards 1966 year-end edition.

His recording of "The Eyes of a New York Woman" soared to the top 10 on record charts all over the country and paved the way for his second million-seller "Hooked On A Feeling."

B.J. was then chosen by Burt Bacharach and Hal David to sing their tune, "Raindrops Keep Fallin' On My Head", in the Paul Newman film,

"Butch Cassidy and the Sundance Kid." Since then, "Raindrops" has sold over three million copies, was the number one record in the country, won the coveted Oscar for the "Best Song of the Year" and was chosen by almost every poll taken as the "Record of the Year" for 1970. B.J.'s "Raindrops" album shortly followed and quickly became his first million selling LP.

Again keeping with his hit-making style B.J. quickly followed "Raindrops" with his fourth million seller, "I Just Can't Help Believing", hit again with "Most of All", and is currently climbing the charts with his latest hit, "No Love At All."

Finally in December of 1970, B.J. Thomas was proclaimed by Record World Magazine "The Top Male Vocalist of the Year on Record."

B.J. has played the Copacabana in New York, the Venus Club in Baltimore, the Forum Club in Mexico City. He has appeared on the Johnny Carson, Mike Douglas and the Merv Griffin Shows. He was on the Ed Sullivan Show, Johnny Cash Show and the Glen Campbell Goodtime Hour amongst many others. He recently finished a very successful four day engagement at the "Houston Livestock Show and Rodeo," in the Astrodome, where he broke several existing attendance records. He has been re-booked to headline the Copa in New York and the Century Plaza in Los Angeles. He will be playing every major college in the country in addition to state fairs and concerts.

B.J. Thomas is a tried and tested performer. He has sold over twelve million single records and four million albums, and has thrilled audiences all over the world with his performance.

## M U Straw Vote Chooses Nixon

A straw vote election by students on each of the four University of Missouri campuses indicates a close presidential race and a substantial Republican gubernatorial victory for Kit Bond.

But the validity of the Missouri Student Lobby mock election came under attack when the results were announced Friday by Gary Belis, program coordinator.

Belis said the results from all four University campuses showed voter participation was not in proportion to campus populations. He said UMSL and UMKC both had a five per cent student turnout, while the smallest campus, UMR had 40 percent student participation.

The voting procedures at the Rolla campus came under attack from the College Young Democrats. Kurt Hansel, president of the Young Democrats, said ballots were taken to all the eating clubs and fraternities while only one voting booth was provided for off-campus students. There was little publicity to let the off-campus students know about the elections, where he feels the majority of Democratic strength lies. He feels that the organized living units that were approached for the ballot are generally a more conservative element and would tend to arise as a stronghold for the Republican party. Another one of his major complaints was that no identification was required for voting in the election which means no records were kept of who voted and allows the possibility of individuals voting more than once for their favorite candidate.

Because of these techniques, Hansel feels that the results were unfairly biased in favor of the Republicans (Nixon 1248-McGovern 510, Bond 1235-Dowd 469). He also believes that if the straw ballot would have been held under normal election condition, McGovern would have fared better and might have even carried the UMR campus.

The significance of the voting results obtained at the Kansas City and St. Louis campuses are also being questioned. Election officials at those campuses conducted the polling by telephone, reaching only 5 per cent of the students at each campus. Dan Viets, president of MSA in Columbia, said that students voting at UMC had their student IDs checked and each student number was recorded.

Results of the straw vote election for each campus were:

For President: UMC: Nixon 1,211 McGovern 1,561; UMSL: Nixon 200 McGovern 390; UMKC: Nixon 385 McGovern 540; UMR: Nixon 1,248 McGovern 510. Total: Nixon 3,044 McGovern 3,001.

For Governor: UMC: Bond 1,853 Dowd 783; Dowd 783; UMSL: Bond 270; Dowd 218; UMKC: Bond 554; Dowd 355; UMR: Bond 1,235 Dowd 469. Total: Bond; 3,911 Dowd 1,825.

For Lt. Governor: UMC: Phelps 821 Schramm, 1,791; UMSL: Phelps 37 Schramm 314; UMKC: Phelps 336 Schramm 544; UMR: Phelps 1,923 Schramm 544. Total: Phelps 1,923 Schramm 3,435.

For Secretary of State: UMC Kuehle 817; Kirkpatrick 1,760; UMSL Kuehle, 48 Kirkpatrick 222; UMKC: Kuehle 275 Kirkpatrick 594; UMR Kuehle 426 Kirkpatrick 1,141. Total: Kuehle 1,566 Kirkpatrick 3,761.

For State Treasurer: UMC: Parker 1,003 Spainhower 1,627; UMSL: Parker 46 Spainhower 233; UMKC: Parker 559 Spainhower 337; UMR: Parker 662 Spainhower 849; Total: Parker 2,270 Spainhower 3,046.

# SU Board News In the Movies

SUNDAY, OCTOBER 22

ANY WEDNESDAY

With Jane Fonda and Jason Robards. Directed by Robert Ellis Miller

Is it immoral to accept the gift of a Manhattan townhouse from a hardworking millionaire who simply asks that you spend Wednesdays in bed with him? Obviously not — from the uninhibited fun that made millions laugh at Muriel Resnik's long-running Broadway comedy, a spirit that has been transferred expertly to the film version of Any Wednesday. Certainly no one could so perfectly fit the role of Ellen Gordon, bachelor girl and mistress every Wednesday, as the beautiful and talented Jane Fonda. Jane throws herself into the action and creates a warm and comic character who believes her behavior should be adopted by all women — serve the male when he needs you and serve yourself when he's not around Any Wednesday is great fun. "Here's a funny movie! It has good lines, the amusingly human and sex situations of the play and movie performers of the top bracket to bring it in laughingly!" NY Post.

Administrator Hopfnagel (PETER SELLERS) is outnumbered, but not outmaneuvered by irate patient Hammon (RICK LENZ) and Alice (JO ANN PFLUG) in WHERE DOES IT HURT?

Lester Hammond (Rick Lenz), an unemployed construction worker, having nothing more pressing to do, wanders into Vista Vue Community Hospital for a chest X-ray. He has also entered the realm of Albert R. Hopfnagel (Peter Sellers), the wheeler-dealer hospital administrator. Discovering that Lester is solvent enough to own his own home, Hopfnagel sells him on a complete physical. This is where the fun begins! Everyone is trying to get a cut of the patients bill. Alice (Jo Ann Pflug) even resorts to (under covers) espionage to get to the crux of the mess. It proves to be a running satire on the hospital system.

## University Enrollment Up Rolla Drops 8.5 Per Cent

Enrollment this fall on the University of Missouri's four campuses increased by 1,032 students over last year, President C. Brice Ratchford reported recently.

This year's total enrollment of 47,427 also exceeded the projected enrollment made by the University of 164 students.

On-Campus enrollments as compared to a year ago are:

Columbia: 22,101, an increase of 159 or 0.7 per cent.

Kansas City: 9,819, a gain of 309 or 3.2 per cent.

Rolla: 4,352, a decrease of 403 or 8.5 per cent.

St. Louis: 11,155, an increase of 967 or 9.5 per cent.

In noting the Rolla campus decrease, Dr. Ratchford said the decrease was not unexpected and cited several factors which may have contributed. He said recent nationwide publicity showing manpower surpluses in the science and engineering fields may have discouraged students from entering these areas. The President said the decrease in graduation requirements at Rolla from 142 to 132 semester hours also is being felt as less time is needed for the students to complete their course work.

Detailed University-wide enrollment figures will be released as soon as available.

Jose' Greco, the famous Spanish dancer, will appear at UMR for a lecture-demonstration-recital. Nana Lorca will accompany him in his presentation. They will appear in the S.U. Ballroom Oct. 18 at 7:30 p.m. Jose Greco is sponsored by the Student Union Board.

## Jose' Greco to Present Multi-Program in Ballroom

In November, 1971, the National Endowment for the Arts chose Jose' Greco and his Dancers with Nana Lorca's Dance Theater as one of more than forty dance companies to participate in the Endowments 1972-73 Coordinated Residency Touring Program.

"Spanish dance is rich and very alive in our modern world — the only classic form to survive through the centuries."

With this brief statement Jose' Greco sets the stage for a new, exciting, educational, and entertaining experience for students at colleges and universities throughout the country — Jose' Greco and Nana Lorca in a lecture-demonstration-recital program. Accompanying Jose' Greco and Nana Lorca are his maestro at the piano and lead guitarist.

For his material Jose' explores with his audience the character and history of the Spanish people to capture the

feeling, beauty, and grace which are so much a part of Spanish dance and music. In the lecture-demonstration-recital period Greco discusses and then demonstrates with Nana Lorca the various techniques and characteristics of dance from the regions of Aragon, Basque, Valencia, Castile, and Andalusia.

Jose' Greco was born of Spanish Italian parentage, in the small village of Montorio in the Abruzzi Mountains of Italy.

After several years of dance study and training under the guidance of Spain's foremost teachers, his inherent talents and rapid development were brought to the attention of the immortal Argentinita, who engaged him, despite his youth, as her partner. Subsequent to the untimely decease of Argentinita, Greco appeared throughout Europe as co-star with Argentinita's younger sister, the famous Pilar Lopez.

Following his association with Pilar Lopez, Greco organized his own company for an extended tour of Europe and Great Britain. Greco brought his company to America where success was instantaneous. Since that time the Company has made annual concert and theater tours both in America and abroad.

Nana Lorca was born in Lorca, Spain, in the province of Murcia. She was already an accomplished dancer at the age of nine, when she won the Grand Award for her interpretation of the "Jota" at Zaragoza. She is a graduate of the Royal Conservatory of Music and Declamation in Madrid.

Jose' Greco and Nana Lorca lecture-demonstration-recital will appear in the Student Union Ballroom on Wednesday, October 18, at 7:30 p.m. They are sponsored by your friendly Student Union Board.

## Now It's Phone Calls To The Computer

Over the past few years there has been much discussion throughout the University system of centralizing the computer facilities. There is a committee set up to discuss and work for just this purpose. The stated goal of the committee are: to control the cost involved in computer service, to provide standard levels of service, to provide equal service to all students, to maintain administrative and accounting techniques required to monitor, and to control growth of all University computer facilities.

The present plan under review by the committee calls for locating all computer facilities in Columbia and providing access to the other three campuses through terminals. The proposed date of implementing this plan is July 1973. However, details are not yet final and the proposal has not gone to the Board of Curators as yet. It is expected the Board will start their review of the plan soon, perhaps even as soon as their next meeting.

If the plan goes into effect this July, the computers on the St. Louis, Kansas City and Rolla campuses will be returned to the company they are being leased from. Terminals will be used to communicate with the central computer. These terminals will be connected through telephone lines and will therefore be subject to the same breakdowns as the telephone system.

With the UMR IBM-360 being sent back to IBM, all of what is now on storage will be transmitted to Columbia's central system through the telephone lines. This means that about 80 per cent of the present storage will transmit successfully. The 20 per cent that won't transmit is the high speed information stored through the Novas, the mini-computers used in many departments and in research. This information cannot physically make the transition and it is also this information that, in one professor's opinion, gets UMR its thousands of dollars in grants every year. According to the source, this

information is "vital to UMR's academic program."

Some of the departments whose research is connected to the 360 through the high-speed system include Chem. Eng., Cloud Physics, Nuclear, Civil, Electrical Eng. and more.

One plan that is also possible and is as cheap or cheaper, is to connect the 360 itself to Columbia. This would leave Rolla with the exact same services it has now and still provide the other University campuses with access to our computer facilities, thus keeping the Novas and the information they contain.

In checking on why Columbia was chosen as the location of the central computer system, it seems as though the number of students and the geographic location were primary considerations. However, it is also true that of the students within the University system who make use of the computer, 38 per cent are located on the Rolla campus. This has led several sources to term the plan "a political move." These same sources say that a deeper look reveals control of the computer facilities by University administration to be the primary reason for suggesting such a plan.

The creation of a single computer system for the university was a topic of discussion at the Board of Curators meeting last Friday in St. Louis. Dr. Ardath H. Emmons, University vice-president for research, said the network would be operated through the newest computers available which are to be located in the Columbia campus Mathematical Sciences building January, 1973.

Right now the Computational Services Center on the Columbia campus handles the needs of the St. Louis and Kansas City campuses and for the most part that of the Columbia campus. "The effects of the centralization so," Dr. Emmons said, "have been to reduce costs and provide much better services to the metropolitan campuses.

University of Missouri - Rolla

## Chuck the Duck to Make Rare Appearance at Grease Ball

KMSM will present the second annual ROCK 'N ROLL REVIVAL AND GREASE BALL this Friday, October 20, in the Student Union Ball Room from 7:30 till 11:00 p.m.

The ballroom will be decorated with bright, multi-colored streamers draped from the ceiling, creating a scene much like a 1950's senior prom. Posters and other decorations will heighten the illusion and create an atmosphere of nostalgia.

The entertainment will be provided by all your old favorites. All the best songs of the 50's and early 60's will be played by the original artists. The entire grease ball will be aired live on KMSM for those

who can't get into the Ballroom! A large sound system with all the qualities of a 1958 jute box will provide the music for those attending.

Special activities of the Grease Ball include Spotlight dances, a Limbo contest, introduction of the homecoming queen candidates, and announcement of the winner of KMSM's Rock 'n Roll quiz. The highlight of the evening will be the crowning of Miss Grease Ball 1972. Her majesty will be selected from the audience. The judges will consider appropriateness of costume and ability to fit the theme in making their final decision.

Proper attire for the Ball will be 1959-1962 high school casual

dress. For Guys: tight, peg legged jeans cut off too short, white socks, white shirt with a short collar — plus a narrow string tie if you must come formal. Girls: long pleated skirts no more than 2 inches above the knee, bobby socks, white tennies, and a sloppy turtle neck sweater—add a letter jacket if you're going steady. Guys, grease your hair back, duck tails are the in thing. Girls, a pony tail is appropriate and be sure to apply just a little too much makeup. Bright red lipstick is a must!

Make your plans now to attend the Grease Ball! It will be an event you and your date will never forget.

The Drifters, the UMR stage band, will play at the Homecoming Coronation Dance on Saturday, Oct. 21 from 8:30 to 11:30. Coronation ceremonies will begin at 9:30 in the S.U. Ballroom. Dress for this occasion is coat and tie.

Yours-Theirs - Ours

# Editorial Opinion

## Give A Damn

What is a newspaper? It can be many things. An educator, a persuader, a demagogue; a tool of the "people", a tool of the "establishment".

A newspaper is what people put into it—literally. It reflects the diversity of interest of its staff and its readers. It represents all their dreams and petty interests. A newspaper is a microcosm, a scaled down copy of the society it represents.

What is the Missouri Miner? Many things—some of them good, some of them bad. It represents the interests of its staff and attempts to represent the interest of the rest of the university community.

Obviously it does not always succeed; or, on some points, come close! Not all campus events are covered well, not all viewpoints are represented on the editorial page.

With each succeeding issue there are cries of "why don't they ever put anything interesting in there," or "it sure was better last week". Probably the Miner cannot hope to please everybody every issue, but it still continues to try.

A newspaper reflects the diversity of both its staff and its community. In a relatively homogeneous university community such as exists here in Rolla, there will not be as many controversial things to put in the newspaper as there might be at some other school. More importantly though, there is little interest among the students in working on the paper.

Indeed, among some groups on campus there is a kind of negative social prestige associated with working on the Miner. People practically have to be dragged off the street before they join the staff.

Is it any wonder that the Missouri Miner sometimes appears to have a rather narrow scope? The humanities and social science students are practically unrepresented, there are no foreign students, and only two beginning writers represent all the women on campus.

The Missouri Miner represents you. If it is boring sometimes it is because you, the students, are boring. If it is disinteresting it is because you, the students, are disinterested.

Before you criticize an article try writing one yourself, try writing two or three—every week. Make them all interesting.

Then come up and see us—because you've got a job on the paper. Office hours 2:30-4:30, Monday to Thursday.

## Our Man Hoppe

### Mr. Nixon's Sex Life

Everyone's conceded Mr. Nixon the election. Yet there is an all-powerful force at work on the minds of the voters that has never been probed, polled or even discussed. It could easily cost him the Presidency.

This all-powerful force is, of course, sex.

With incredible foresight, Mr. McGovern recognized the problem early on. Before announcing his candidacy, he carefully grew sideburns, purchased a mod wardrobe and, rumor has it, got his teeth capped.

In an incredible blunder, the usually astute Mr. Nixon ignored the challenge and blindly plodded on with the same short haircut, narrow ties and stuffy, if dignified, mien.

Now that the problem's at last been bared, it's probably too late for Mr. Nixon to grow sideburns. The problem was bared by a reporter named Betty Garrett.

When it comes to choosing candidates, Ms. Garrett admits in a New York Times article, "I'm sure sex does influence my judgment, and that doesn't

strike me as terribly wrong. After all, I wouldn't go to bed with someone I didn't like and respect, and the same holds true when voting for a man."

Ms. Garrett undoubtedly reflects the secret feelings of millions of Americans. And it's certainly as good a way to choose a candidate as any. But when it comes to Mr. Nixon, she adds:

"What I can't visualize is Mr. Nixon in an intimate situation of any sort. I confess I bought 'The Making of the President' in the frail hope that someone had. He'd seem infinitely more human."

Ms. Garrett's difficulty envisioning Mr. Nixon in such a situation is shared by many. I know. I tried.

Scene: The bedroom of the Nixon's San Clemente home. Mrs. Nixon in a quilted bathrobe is standing by the window. Mr. Nixon, wearing a grey suit and tie, enters, humming, "Hail to The Chief." Mr. Nixon: Good evening, my fellow American. (cq) Let me say at the outset what a deep personal pleasure it is for me to be with you here on this glorious occasion.

Mrs. Nixon: Thank you, dear. Come look at the moon. Isn't it beautiful (shyly) Does it make you think of anything?

Mr. Nixon: Yes. I say to you with great sincerity that it makes me think of the greatest day since the Creation when a brave American astronaut,

during my Administration, first set foot on its surface, thus assuring we would never be number two to the Russians in outer space.

Mrs. Nixon: But the way it shimmers on the water. Doesn't that thrill you?

Mr. Nixon: Yes. It thrills me to realize that because I have determinedly brought our boys home across that water, I have prevented the power-mad Communists — not our Communist friends in China, but our Communist enemies in Vietnam — from invading our beloved California.

Mrs. Nixon (near tears): Oh, please, dear, to save our marriage, couldn't you just once perform an act of, forgive me, intimacy?

Mr. Nixon (frowning): I am for saving the free world. I am for saving the country. I am for saving our marriage. Close your eyes. All right. There!

Mrs. Nixon: Oh, this is the happiest day of my life! Just think, I've never seen you without your necktie on before. (hesitantly) Would you consider going all the way and unbuttoning your collar?

For the life of me, that's as far as I can envision. It isn't just Mr. Nixon's image. It's that he's our President.

We Americans just can't believe our President, even as you and I, puts his trousers on one leg at a time. After all, first he'd have to take them off.

## Letters to the Editor

To the Editor,

The idea of the university wide straw ballot was to simulate an actual election and in doing so, familiarize the students with voting procedures.

In Rolla, before the actual balloting on Monday, ballots were taken to all the fraternities on campus, to the eating clubs, and to the dormitories. I objected to this for three main reasons.

This, in essence, is taking the polls to the voter. I'm sure that Mr. Nixon and all Republicans would like to do this, but it is a violation of election regulations.

Secondly, these areas on campus are mainly conservative Republican strongholds. The base support of the Democratic party on this campus are those students who live off campus and are not associated with any organized living unit. These voters were ignored in this mass voting effort and I was not notified of the way in which they were to go about getting votes.

A third objection that I hold to the way the straw ballot was conducted was that there was no identification required of the

voter. No record was kept of those who voted before the actual balloting and there was no way of preventing people from voting as many times as they wished.

Mike Ragen of the UMR Student Council put in a fine effort in trying to organize the straw ballot in Rolla. However, there apparently is a lack of publicity on the balloting as evidenced by many of the people not even knowing that the straw vote was being taken. This resulted in a very light turnout of the off-campus voters. This, combined with the violations of voting procedure unfairly biased the results of the

vote in favor of the Republicans. Had this been conducted as a normal election as was intended the Democratic Party would have made a much stronger showing and the McGovern-Shriver ticket would possibly have carried the UMR campus.

If there is anything else that I could be of help on I will be at Democratic Headquarters from 2:30 to 4:30 Friday, October 13 and can be reached at 364-4264 in Rolla after 6:00 p.m.

Kurt Hansel

# Dear John

Dear John,

I read in last week's Miner the article on birth control benefits at the UMR clinic that says "although the clinic primarily serves women, there are several services available for men."

I was wondering if that sentence contained a typographical error and should have read "the clinic primarily serves men..." which would be a much more efficient method of birth control.

Lon Pearson  
Humanities Professor

Dear Lon,

What can I say to you to make you understand that in today's modern world we must all either give up a lot to reduce population or suffer the consequences (besides why isn't she on the pill or using a diaphragm).

Old Equality John

The reason for leaving one door open is that if we locked all the doors—how would we get in. Last year at the dedication I lost all the keys for the new HUSS building, also the Physics Building, etc., etc.

K. Gibberish  
Campus Cops

Dear K. Givverish,

Sorry to hear that so many buildings have been stolen in the last year (all with their doors open) but we the students, really need to get to our late night classes and meetings. Also I happen to think that if you lose your keys you will probably lose your guns (it is a well known fact that you have lost the bullets).

Dear John, What happened at the play, The Tempest, a couple of nights ago. I went there early just to get a front seat and do you know that they wouldn't let us sit on the first two rows—because they were saved for the SUB and the drama club at the Rolla High School. No maybe I can see the SUB saving a few chairs on the front row for themselves since they worked hard to get us the Play, but I can't see saving chairs for the drama clubs of local schools. They should have had to take their chances on getting there early and getting a good seat just like the rest of us.

Couldn't Hear

## Coeds Dateless

It has come to the attention of the Miner staff that many of the girls attending UMR haven't got dates for the upcoming party weekend. Knowing that the male to female ratio is approximately nine to one; we felt it would be worthwhile to get some varied opinions to explain this unusual situation.

Trying to obtain an overall male viewpoint we interviewed fraternity members and independents; they all seemed to agree on several points:

The guys are faced with the difficulty of meeting coeds because "there are so few girls in classes and it is difficult to talk to them during a lecture."

Once this bridge has been crossed there seems to arise the problem of asking the subject coed out. Apparently guys are often too shy to ask or are afraid of being turned down.

Several sophomore independents felt that dating here takes time away from studies. They've already faced the fact that dating will be a rarity. Generally male Miners feel the girls at UMR are stuck-up coeds. Apparently there are

very few girls the guys want to ask out.

We also spoke to a number of girls and discovered that the majority of them did not have a date for Homecoming. They also volunteered a few reasons for this.

Several girls feel funny because they are outnumbered and feel that the guys resent them being on campus. They also agreed that the only place to meet the opposite sex is in class.

The general opinion is that it's not easy to be a girl at UMR. Or "How would you feel being whistled and yelled at on your way to class?"

It appears that both sexes have natural hangups about dating. Since mixers aren't the answer, the students might try joining some organizations on campus, like the Student Union Board, the Student Council or a student chapter of an organization like AICHE. Perhaps if guys could try to see the girls as more than just a coed and the girls would break out of their shells everyone could live happily ever after.

I THOUGHT YOU SAID GREECE BALL

## The Missouri Miner

The MISSOURI MINER is the official publication of the students of the University of Rolla. It is published at Rolla, Missouri every week during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo., under the Act of March 3, 1879. The subscriptions are \$1.50 per semester. This MISSOURI MINER features activities of the students and faculty of UMR.

Dear John,

People have been complaining to me that I kept having my boys lock the doors on the buildings and leave only one door open. Well I am writing to answer these charges and refute them as nothing more than distortions of the truth.

The buildings are locked; because it is a well known fact that 99 per cent of all the buildings stolen in the last year had their doors open at the time. Do you know how much those buildings cost?

## Curators Approve Pay Increase Deny Cusumano's Appeal

The University Board of Curators Friday approved a \$369,000 expenditure for wage increases for non-academic personnel.

The action by the Curators means that those non-academic employees earning less than \$10,400 will receive salary increases of about five per cent this fall. A four per cent pay increase had been budgeted earlier.

In executive session before the monthly meeting, the Curators voted to deny the appeals of two University of Missouri at Rolla professors who claim they are being dismissed without due process of law. The Board took the action after hearing a report from the Board's committee on Academic Affairs.

Dr. Sidney Harmon, associate professor of mathematics, and J. Victor Cusumano, instructor in engineering, had filed a suit asking the court to require the University to specify in writing the reasons for the tenure denial. The suit was ruled premature and dismissed in U.S. District Court in St. Louis since appeals to the Board had not been exhausted.

Curator Irvin Fane presented a report on student wage rates. He said the curator finance committee, of which he is chairman, finds the wage rates "ridiculously low" in some cases.

He added that he feels there are unjustified differences in wage rates between the campuses. For instance, he said student teaching assistants on the Columbia campus are paid more than student assistants on other campus.

However, Fane said he does not favor equal wage rates for all campuses on some jobs. He said the competitive labor market at the different campuses should determine the wage rate of some jobs.

A recommendation for action by the board on student wage rates will be submitted in the near future, he said.

Brady, commenting on the differences in student wage rates, noted that a nude model for art classes at MU makes \$1.30 an hour more than a draped model.

"We'll look into that," an administrator replied.

A scene from "The Tempest", performed by the Everyman Players Tuesday, October 10. It is one of the Everyman Players most magnificent productions. Now in their sixth national tour the company is following its tradition of producing plays of hope and faith. The performance was enjoyed by over 300 grateful miners.

## UFO Expert Speaks At ASME Meeting

Do you believe Unidentified Flying Objects come from beyond our solar system? Are they manned by machines or monsters, like Mo-Mo, or are they the craft of intelligent beings seeking information and possible contact with the men of this planet?

No matter which theory you agree with, or even if you think it's all a farce fabricated to undermine our intelligence, you will have a chance to hear the unbiased facts concerning UFO's in this country, in this geographical area.

Coming to Rolla to represent the UFO Study Group of Greater St. Louis, Inc., is Mr. John F. Schuessler, the President-Director of this group, which is a non-profit corporation composed of many men and women in the academic, professional, and aerospace community of St. Louis, as well as many interested lay people and students. This local UFO study group was established in 1969 with the aim of investigating UFO reports in the surrounding St. Louis geographical area. The local group operates in close cooperation with the 20-state Midwest UFO Network (MUFON) and many other responsible UFO organizations throughout the world united and dedicated towards solving the global UFO phenomenon. One of the principles of this group is

to utilize the scientific method in its approach to UFO investigations, examination of UFO related evidence, and generally to approach the UFO phenomena in a positive manner without bias or discrimination.

Mr. Schuessler himself is well qualified in his position: he is an Aerospace Engineer, a specialist in spacecraft life support system equipment design, and is also a staff member of Skylook, the monthly publication of the Midwest UFO Network. He has per-

sonally investigated and researched the UFO phenomena for eight years, and his personal files contain more than 40,000 UFO reports, incidents, and case histories.

Mr. Schuessler will be a guest of the American Society of Mechanical Engineers, on Wednesday, October 18, at 7:00 p.m. in the Mechanical Engineering Auditorium, Room

104 in the M.E. building. All interested persons are invited to attend this free, educational program, entitled "UFO's-A Product of Alien Intellect?"

## Letters to the Editor

from page 4

To the Editor:

As a resident of the MRHA, I would like to express my hope that the residents of McAnerney Hall enjoy the curtains in their stairwells, the sun screens and carpeting in their lounges, the draperies in their rooms, the curtains on their shower stalls, and the freshly painted appearance everywhere; all of which has been provided to them by housing office funds, 87 per cent of which were paid by men.

(Name Withheld by Request)

To the Editor:

Please inform those attending UMR who are Ritenour alumni that the annual Ritenour Homecoming will be Saturday, October 28, 1972. Starting the day off there will be a parade, then the game against River-view. The climax of the day will be the Homecoming Dance.

All Ritenour Alumni are invited to come. Hope to see you there!

Suzy Clark  
Alumni Contact

## Dear John

from page 5

Dear Couldn't Hear,

When I inquired about the two front rows of seats (I went to the play) I was told the same thing and boy was I mad. Especially because I came early to get a good seat. Well, I told the SUB people who I was and boy did they come up with some seats fast. The reason I got to sit in the front row was because I told them that if I didn't I would write something nasty about them. Well SUB, I broke our deal but I feel that when the school puts on something like a play for the students, that the students should have the first or at least an even chance of getting good seats. So lets not make any more good PR with the locals if we know that

maybe some of our own people will not be served in their own best interest.

Dear John,

Tell me the truth is C. Brice Ratchford really going to put our IBM 360 in his basement? If so where would he put the terminals?

Complex 16

Dear Complex 16,

I know the rumors you have heard but all of them are false. The truth is that the 360 and the terminals are staying and the Computer Center will probably raffle off computer time to raise more money. As far as to where C. Brice can put the Terminals, well I really couldn't answer that in this paper.

# Sensored

By ANDERSON and ELVEN

Greetings....Here we are, popping up again where least expected. This is our first (and very well may be our last attempt at journalism, and probably many people are anxiously awaiting to prove that we have no business being here, or anywhere else. We could snow you under by writing all the typical garbage about this being your column, but its not. In any case, if the winds of rumor ever blow your way, and wish to share the wealth, we will be more than happy to throw a log (or a newspaper, as the case may be) on the fire, thanks to Mike Chiles and The Miner for risking the future of free press by taking us in.

TONIGHT....The real show is in the seats of the Uptown Theater at 6:30 and 9:15, and the title "The Wild Bunch" is most appropriate. If you want to see gross Miners at their best, a St. Pat's Benefit movie is the place to be. Lust, sex, obscenity, violence and obnoxious behavior will fill the theater from the screen to the balcony. The movie's not bad, either.

HOMEcoming....Eat, drink, and make merry for on Monday you die (in class). This weekend there's plenty of opportunity to do all three, and we all know that Miners are great opportunists. The price is right on such entertainment values as KMSM's Grease Ball. For a few laughs there's the football game and the queen coronation. The Student Union Board presents B.J. Thomas (they finally got somebody?). With Friday a free day (doesn't cost a cent), there's no excuse not to have the Homecoming of your life, if there's any left after midterms, so go out and get some this weekend.

OVERHEARD....On a Greyhound Bus zooming down I-44, "You are now entering Rolla, Missouri. Please set your watch back ten years."

UP TO SOMETHING....What's the matter? Always feel like you're being taken advantage of? You're probably right. With girls coming to visit for the First Party Weekend, we needed football tickets. So Darrell goes to the Athletic Office in the Use-it building to get them. Next day at the football game the visiting lovelies try to use them and are informed they are the proud possessors of last year's tickets. Can you see it now? "Hey, Delbert, here comes another sucker wanting football tickets. You still got last year's roll?" "Right here Elmer; do your stuff." (Another true story from the annals of UMR. We're all in this together. But you know that.)

BLOW BY....Ever notice the smokestacks when they belch? Did you know that UMR has a government contract to test air pollution? Nothing like creating a market for your own product.

LOOKING BACK....One year ago, Homecoming 1971, marked the dedication of Merl Baker Memorial Bridge across the utility trench to the new Student Center. This fabulous edifice of civil engineering structuring heralded the start of construction of this latest edition to our beautiful campus. Today, the building stands, a gleaming example of modern construction and lousy windows. If not for the window screw-up, we would probably be dedicating the entire building this weekend. Moral: People with glass windows shouldn't schedule dedications.

DUG UP....The latest from the con guys in the Quad is that a natural first has occurred in Rolla (where nothing natural ever happens). For the first time ever in the Show it to Me city, water is coming up from the ground instead of down from the sky. Watch it, conguys, you can't fool with Mother Nature (or the infamous steam tunnels.)

CREDITS....The St. Pat's Board appears because of a great tradition—Homecoming appears in focus because you're still sober—New chem building, con guys, and smokestacks appear through the courtesy of U of M—The New Student Center appears through the hard work of Kookie Kratzer....That's all.

I sure hope this strike lasts through the World Series.

## 1951 Miner Reveals The Ghost of Homecoming Past

The following excerpt is from the November 9, 1951 issue of the Miner and shows that Homecoming has remained about the same throughout the years.

What a week end! This is about the only way the past weekend can be described. All the rustic alumni started to roll in the fair town of Rolla late Friday night, with their trunks loaded to capacity with the latest in the line of boot-leg material. It didn't take these guys long to get back in the old groove again, as they continued to give the local law officials trouble all night long. The football game, Saturday afternoon, found many of the old timers well on their way, as they tried to spread school to the whole student body (we even got a shot of it ourselves). After the game and a good cold shower, they were on the party road again and could be found leading the song fest in the various houses on the campus. On Sunday with heads bending low, they took to their various paths in life, and were leaving with a lighter trunk and a heavier head than they had when they made their triumphant entrance Friday night.

# 1972 Homecoming

MARY SUE MARKWAY  
Acacia

The men of Acacia Fraternity are proud to present Miss Mary Sue Markway as their homecoming queen candidate. Mary Sue, a vivacious five-foot-one-inch brunette, is presently working in St. Louis at Venture Central Office and attending secretarial school part-time. Some of Mary Sue's hobbies are participating in sports and attending Rolla's party weekends. Her escort will be Randy VanDeven.

JOYCE WEHDE  
Campus Club

Campus Club is pleased to present Miss Joyce Wehde, a 5'7", green-eyed, brunette as their 1972 Homecoming Candidate. Joyce is a senior at Northeast Missouri University, majoring in special education. She is a member of Alpha Sigma Alpha Sorority, where she holds the office of president. She is also a member of Cardinal Key and secretary of Alpha Phi Sigma, both honorary organizations.

Some of her other activities include the Student Council for Exceptional Children and the University Chorus. Joyce's most recent accomplishment was being selected the Who's Who Among Greek Fraternities and Sororities. Before enrolling at NEMU, she attended St. Mary's Jr. College and was chosen to Who's Who Among American Fr. Colleges. In her spare time Joyce pursues her hobbies of swimming, sewing, and writing poetry. She will be escorted by Mr. Dick Rothermick a UMR senior majoring in applied math.

We, the men of Alpha Phi Alpha, have chosen Miss Pamela Ann Bakewell as our Homecoming Queen Candidate. She is a student at Lindenwood College, majoring in Economics. She is also a very active member in student government, as well as a coordinator for the National Student Association.

A beautiful woman, with a unique personality, emulating the spirit and ideals of this fraternity, Pamela fulfills in every respect our expectations as queen, and that of our people as well. Pamela's escort will be William Burch.

PAMELA BAKEWELL  
Alpha Phi Alpha

We, the brothers of Delta Tau Delta, are proud to present Mrs. Debby Woods as our candidate for Homecoming Queen 1972.

Debby was recently married to Delt brother Gary Woods, a senior in mechanical engineering. She comes from Lubbock, Texas, where she graduated from Monterey High School and attended Texas Tech University majoring in child development.

As a hobby, she enjoys playing the piano and decoupage. She also likes horseback and motorcycle riding, and most every sport.

Debby has joined the University Dames here on campus. She will be a full time student at UMR next semester, taking humanities courses to supplement her major.

DEBBY WOODS  
Delta Tau Delta

MARGIE MEYER  
Delta Sigma Phi

Delta Sigma Phi would like to present Margie Meyer as their Queen Candidate. Margie is a brown-eyed, fun-loving girl from St. Genevieve, Missouri. Margie teaches first grade there at present and says she really loves her kids. Margie is teaching at Valle, the same school she graduated from in 1969. This pretty brunette is 21 years old and has attended Southeast Missouri State, Cape Girardeau, Missouri.

Margie was born and raised on a little farm just outside of St. Genevieve and lives there now with her folks and one sister. She has two married sisters and a brother and a sister away at college.

This 5'5" tall, schoolteacher, says she loves party weekends and float trips and is proud to be Delta Sig's Homecoming Queen Candidate. The brothers of Delta Sig are even happier to have her as their Candidate and especially her escort, Michael Eugene Sims.

MARLA WADDINGTON  
Alpha Epsilon Pi

The men of Alpha Epsilon Pi Fraternity are proud to present Miss Marla Waddington as their 1972 Homecoming Queen Candidate. Marla, a lively blue-eyed brunette, hails from Creve Coeur, Mo. Where she is a senior at Parkway Central High School. She enjoys art and is planning to be an art major in college. She will be escorted by brother Craig Goldstone, a junior, majoring in civil engineering.

The men of Beta Sigma Psi are proud to present Julie Myers as their Homecoming Queen Candidate. Julie is a 5'3", blonde, blue-eyed, petite, 21 years old senior at the University of Missouri-Columbia. Her hometown being the big Rolla, Mo. She is majoring in home economics and hopes to go into dietetics upon graduation. Julie's hobbies include golf, water skiing, swimming, sewing, and hopes to try downhill salom skiing this winter in Colorado. She's a member of Alpha Phi social sorority and also a member of Beta Beta Beta Honorary Biology Fraternity. Julie will be escorted by Paul Pederson.

JULIE MYERS  
Beta Sigma Psi

The sisters of Kappa Delta Sorority proudly present their candidate for the 1972 Homecoming Queen, Miss Cathy Dulin. Cathy, a striking 5'9" blonde freshman, comes as a welcomed addition to UMR from St. Louis.

In the short time she has been at UMR, Cathy has become very active in campus organizations. She is a pledge of Kappa Delta Sorority, a member of the Student Union Hospitality Committee, the Baptist Student Union, girls intramurals, College Young Republicans, and served as vice-chairman for the Kit Bond youth campaign. Cathy lists her interests as "practically all sports", especially synchronized swimming and tennis. Her escort will be Jim Bowie.

CATHY DULIN  
Kappa Delta

JANE DICKERSON  
Kappa Alpha

The brothers of Beta Alpha Chapter of Kappa Alpha order are proud to present Miss Jane Dickerson as candidate for Homecoming Queen. Jane comes from Mt. Vernon, Ill., where she is presently enrolled as a freshman at Rend Lake Jr. College. She is currently on the "Pressing Times" newspaper staff, and hopes to become involved in other activities.

Jane has a striking personality and her beauty speaks for itself. She has been elected to positions of authority such as auditor & counselor to Illinois Girls State, and secretary of the National Honor Society. She was elected as the Elks Most Valuable Students, designated an Illinois State Scholar, and was noted in "Who's Who in American High School Students". She was also recipient of the Mt. Vernon Citizenship Award, and was president of the Mayor's Youth Advisory Council for two years.

Jane enjoys outdoor sports, especially swimming, water skiing, and tennis, but her favorite pastime of all is "just getting to know people", particularly her escort Dan Block.

DEBBIE DOHERTY  
MRHA

We, the men of MRHA are proud to present Miss Debbie Doherty as our Queen Candidate for the 1972 UMR Homecoming. Debbie is majoring in theater arts and is a freshman at the University of Missouri-Columbia. Debbie's escort will be Richard Buck.

# Queen Candidates

The Brothers of Lambda Chi Alpha social fraternity are proud to present their Queen Candidate for the 1972 UMR Homecoming, Miss Gail Gregory.

Gail is a 1970 graduate from Cor Jesu Academy in St. Louis and attended Bradley University, Peoria, Illinois. Miss Gregory is majoring in political science and will complete her studies at the University of Missouri at St. Louis.

Currently, Gail is employed as a legal secretary for the law firm of Thompson, Mitchell, Douglas, Neill, Guerri, and Elbert located in St. Louis and Clayton, Missouri.

While at Bradley, Gail was active as a little sister of the National Engineering Fraternity, Sigma Phi Delta, and still found time to achieve "A" honors. Her escort will be Dan Hunyer.

**GAIL GREGORY**  
Lambda Chi Alpha

.....

Representing the brothers of Kappa Sigma is Susan Hittler. Sue, a statuesque brunette, is an active sports enthusiast, participating in several bowling leagues in St. Louis and playing on a Bell Telephone softball team. For the last three years, sue has been working for Southwestern Bell Telephone in St. Louis. In addition to her sports interests, one of Sue's favorite pastimes has been Rolla party weekends. She will be escorted by her fiance Tom Pelger.

**SUSAN HITTLER**  
Kappa Sigma

**MARILYN D. ALBERS**  
Tech Club

Tech Club is proud to present Marilyn D. Albers as their Homecoming queen Candidate for 1972. She is married, living in Dixon, Missouri, and presently teaching home economics at Dixon High School.

Marilyn graduated from Southwest Missouri State College with a B.S. degree in education in January, 1972. While attending SMS, she was active in the Sociology Club, Alpha Delta Phi Sorority, member of Church Choir and president of her church's training union. Honors bestowed upon her were: PIKE Calendar girl, Military Ball Attendant and Dean's list.

During high school she was a member of Future Teachers of America, Pep Club, and Student Council. She was second vice-president her junior year and president her senior year of the Future Homemakers of America. Her honors were "Most Talented Senior Girl" by the student body, football queen by the football team and National Honor Society by the teachers.

Marilyn will be escorted by her husband, Dennis.

.....

**JAN JOHNSON**  
Triangle

The brothers of Triangle are proud to present as their '72 Homecoming Queen Candidate Miss Jan Johnson. Jan is a lovely freshman at UMR this year majoring in geology. Already Jan is quite active on campus having joined Wesley — P.E.O., UMR Drama Club, and UMR Concert Choir. Escorting Jan will be Mark Bauer.

Gracing the scene this homecoming, is Pi Kappa Alpha's lovely Lynn Ferguson, their candidate for Homecoming Queen of 1972.

Lynn, a charming 5'4", 19 year old, has long light brown hair and hazel eyes. A native of Sikeston, Mo., but raised in the St. Louis area. Lynn is presently employed at Help Unlimited Inc., in St. Louis as office manager.

Some of her interests include painting, making Christmas ornaments, and thinking of things to do to make people happy. Her future plans envelope the field of modeling, having worked 6 months as a model. Lynn's escort will be Charles Yocom.

**LYN FERGUSON**  
Pi Kappa Alpha

.....

The brothers of Sigma Pi Fraternity are proud to introduce as their 1972 Homecoming Queen candidate Miss Becky Killian. Becky is a 1971 graduate of Rolla High School and is presently pursuing her nursing degree from St. John's School of Nursing as a sophomore. After completing her studies at St. John's in Springfield she is planning to enter specialization.

Included in Becky's activities is the Phelps County branch of the American Cancer Society of which our candidate is the publicity chairman. Her favorite pastime is roaming the Ozark countryside in search of antiques, a trait inherited from her mother. Escorting Becky will be Greg Zweig.

**BECKY KILLIAN**  
Sigma Pi

**KIM HAPGOOD**  
Theta Chi

The brothers of Theta Chi are proud to have Miss Kimberly Hapgood represent them as their candidate for 1972 Homecoming Queen.

Kim is an attractive 5'7", blue-eyed, brunette from St. Louis. She is currently a freshman attending UMSL and working toward a degree in Special Education. Because of her interest in young children, she is also teaching at a nursery school, where she hopes to gain useful experience for her degree. Besides her educational aspirations, Kim is also working part-time and is an avid and experienced dancer. Kim's escort will be Steve Tattich.

.....

**PAT PIJUT**  
Independents

Miss Patricia Pijut has been selected by the Independents to represent them during the Homecoming festivities. Having been the first woman to ever hold office in GDI, her work won for her the Outstanding Committeewoman Award two years ago. She is the past secretary of GDI and now serves on the Board of Governors.

Patty, a slender 5'11" beauty, is a junior from St. Louis and is studying electrical engineering. Her campus activities include SWE, WRHA, and Honorary ROTC Brigade Sponsor. Patty's escort will be Bob Miodunski.

The brothers of Sigma Tau Gamma are proud to present Miss Paulette Thompson as their 1972 Homecoming Queen Candidate. Paulette is a nursing student at Jewish Hospital and is employed by Farmin Desloge Hospital in St. Louis.

Outside of nursing, Paulette's interests include singing, ballet, and baton twirling. Her activities in these areas have included dancing in the St. Louis Municipal Opera, participating in baton contests and was named Miss Majorette of Missouri in 1968. In addition she was a finalist in the Miss Teenage St. Louis contest. For realization from these demanding activities Paulette enjoys swimming and hiking. Paulette's escort will be Mike Niehoff.

**PAULETTE THOMPSON**  
Sigma Tau Gamma

.....

Sigma Nu is pleased to present as their Homecoming Queen Candidate Miss Janet Barklage from St. Charles, Mo. She is a 1970 graduate of St. Charles High School. After high school she attended the Missouri School for Doctor's Assistants and Technicians. She is presently employed in St. Louis as a dental chairside assistant. She has also spent time working with social groups such as the Youth Association for Retarded Children. Janet will be escorted by Dave Shepers.

**JANET BARKLAGE**  
Sigma Nu

**COLLEEN COLLINS**  
WRHA

The girls of WRHA are pleased to announce Miss Colleen Collins as their candidate for Homecoming Queen of 1972.

Colleen, a 5'7", brown-eyed brunette from St. Louis is a math major at UMR. She comes to Rolla as a junior, transferring from Meramec Junior College where she was on the Dean's Honor Roll.

Along with participation in WRHA intramurals and the Marching Minorettes, Colleen enjoys sewing, painting, and sports. Her escort will be Bill Nichols.

.....

**JANICE REID**  
Pi Kappa Phi

Once again as autumn approaches, it is heralded by cool breezes, bright colored leaves and college football. Autumn is also the time for Homecoming at UMR. To the beauty of this season and this celebration the brothers of Pi Kappa Phi wish to add the charm of their Homecoming Queen Candidate, Miss Janice Reed.

Janice is 22 years old, is 5'6" tall, has dark brown hair and hazel eyes and is a native of Vulcan, Missouri. She attended Southeast Missouri State College where she earned multiple B.S. degrees in math and psychology. While at SEMO, she served as president of the religious fraternity Chi Alpha and was also active in the math and psychology clubs. Janice is presently living in St. Louis where she is employed by the reliance Insurance Co.

Janice enjoys a wide variety of sports which range from softball to kite-flying and frisbeeing. She has a pleasant outgoing personality and a refreshing smile. The brothers of Pi Kappa Phi are honored and proud to present Janice as their candidate for Homecoming Queen and are sure that she will add a touch of warmth to the chill of autumn and the festivities of Homecoming 1972.

The men of Tau Kappa Epsilon are proud to present Miss Debra Slivka as their 1972 Homecoming Queen Candidate. Debbie is an active member of Gamma Sigma Sigma Sorority at Southern Illinois University - Edwardsville where she is majoring in music. She participates in many other activities at SIUE including the Concert Chorale and was recently crowned Miss SIU-E. Her escort will be Jordan Brock.

**DEBRA SLIVKA**  
Tau Kappa Epsilon

.....

Representing Phi Kappa Theta is Miss Sally Tanner. Sally is a junior at the University of Missouri - Columbia majoring in special education. She is a volunteer worker at the Mid-Mo Health Clinic tutoring the mentally retarded. Her major interests include most sports, in particular gymnastics, and most outdoor activities. Sally will be escorted by Joe Rupp.

**SALLY TANNER**  
Phi Kappa Theta

**CINDY ROSEN**  
Theta Xi Fraternity

Theta Xi is proud to announce the selection of Miss Cindy Rosen as their 1972 Homecoming Queen Candidate. Cindy is a 1972 graduate of Clayton High School in St. Louis. She is currently attending Webster College in St. Louis and majoring in Theater Arts.

Cindy loves Rolla party weekends and is very fond of the members of Theta Xi. Her escort will be pin-mate Rob Garrett.

.....

**DORELEN CROCKER**  
Mates

The Association of Married Students (MATES) is proud to present Dorelen Crocker as their Homecoming Queen Candidate. Dorelen, an active member of MATES, is a 5'2" green-eyed brunette from Springfield, Mo. She is presently working in the Counseling and Testing Center here at UMR. Her escort for the day and every day is Pat Crocker, a senior in Engineering Management.

Miss Fay Schubert of Affton, Missouri, is a freshman at UMR majoring in nuclear engineering and she is 18 years old.

Fay is a 1972 graduate of Affton High School where she was a recipient of the Senior Scholarship Medal. She was also a member of the National Honor Society and the International Thespians.

Currently Fay is holding several scholarships at UMR including the Curators Award and scholarships from the Missouri Society of Professional Engineers and the American Business Women's Association. On the Rolla campus Fay is a member of the American Nuclear Society, the UMR Theater Guild, Pershing Rifles and the colony of Zeta Tau Alpha Fraternity for Women. Fay's escort will be Mike Beake.

**FAY SCHUBERT**  
Zeta Tau Alpha

.....

The men of Sigma Phi Epsilon are proud to present Miss Donna Thomas as their candidate for Homecoming Queen. Miss Thomas is a graduate of McCluer High School and is presently working for Hussman Refrigeration. She is engaged to brother Michael Phelan and is serving as president of the Little Sisters of the Golden Heart.

**JAN NOLAN**  
Thomas Jefferson Hall

The residents of Thomas Jefferson are proud to present Miss Jan Nolan as their candidate for Homecoming Queen.

Jan is a 5'2" nineteen year old sophomore at UMR majoring in Computer Science. She has long, dark brown hair and a very radiant personality.

Jan is very active on campus as a member of the Student Union Board's Social Committee, G.D.I., the Society of Women Engineers and Women's Intramurals. She also presides as Chairman of Thomas Jefferson's Social Committee and is an Assistant P.A. During her free time Jan enjoys horseback-riding and sewing.

Miss Nolan will be escorted by Mr. Glenn Kmezc, a UMR alumnus.

## Political Campaigning Open to UMR Faculty

With this being an election year all Federal and State employees take special interest in just what political activity they can legally participate in. These limits have been established in the Hatch Act, a Federal Law and in Missouri by Vernon's Annotated Missouri Statutes, Sec. 36.150. Of particular interest to this campus would be the views of the Board of Curators and upper level administrators versus the local UMR administrators, and the views of the local UMR administrators to the teachers of this school. These laws have been written to protect the candidate, as well as those wishing to support or rebuke said candidate.

According to the Hatch Act a Federal employee includes among other people, officers or employees of an educational institution or system that is supported by the United States or District of Columbia. Permissible activities of Federal employees by Sec. 1621 of the Hatch Act are:

- 1) register and vote in any election
- 2) express opinions freely in private and in public on any political subject or candidate.
- 3) join a political party or other organization and actively participate in its affairs, while not on duty except to serve as an officer as defined in Section 1602 (d).
- 4) contribute money voluntarily for political purposes
- 5) become a candidate for and serve in a local office as provided in Section 1623.
- 6) serve as a delegate to a political or constitutional convention so long as such service does not interfere with the time and attention required as Federal employees.

Section 1602 states: "officer" of a political party or party organization means the chairman, vice chairman, or treasurer of any national, state, county, or city political party whose primary purpose is to

elect candidates, and the national, state, county, city (ward and precinct committeeman and committeewoman) or any positions having equivalent responsibility.

In brief Sec. 1623 states a Federal employee submits a request to run for office on any government level to his agencies head and if determined that this post is not adverse to the best interest of the United States, the head should approve such request unless:

- 1) the duties create a conflict of interest
- 2) these duties will interfere with time to be devoted to work of the employing agency
- 3) the campaign for office will interfere with time to be devoted to work of the employing agency

As for Missouri State Rulings, the points of interest are as follows:

- 1) no person shall solicit political funds from any classified person
- 2) may not be a member of any political committee
- 3) may not take part in management or affairs of any political party or campaign
- 4) may express opinion
- 5) if violation occurs will forfeit office.

According to the committee reviewing the Hatch Act, Missouri is a state considered to have laws similar to the Hatch Act. The committee states the main difference being employees who become a candidate for political office may choose either to resign or go on leave of absence without pay.

## Jane Fonda Knocks Establishment In Anti-War Speech At Wash U.

Jane Fonda, noted movie starlet and anti-war leader, gave a shaking, down-to earth speech at Washington University Sunday afternoon.

She ripped the establishment verbally throughout her talk and particularly lambasted President Nixon. She pointed out how under his current reign the country went through a turbulent "witch hunting" for McCarthy's Communists and the current FBI persecution of anti-war organizers and social reformers. She specifically expounded on the U.S. bombing North Vietnam into oblivion and the heavy intentional bombings of the rice-paddy dikes.

Fonda's main thought was that every American must find the truth for himself and work to correct them through political elections. "They must not believe me," she said, "Nixon, McGovern, and especially Henry Kissinger (as he is a 'persuasive orator with all the slanted answers'), but must become concerned and find out through political and social work. After all, I went from Barbarella to my present self in four short years. Many men think that the only thing a woman can change is sheets, and not her mind." The crowd applauded and cheered her humor and down-to-earth comparisons.

Jane also conveyed that although she and the "Vets Opposing the Vietnam War" do not back McGovern, he is the most welcome change since the 1940's.

The program also featured lesser orators who spoke on local candidates and how to protect your rights from being infringed upon by the FBI and law officials. A young lady also sang and strummed the guitar to a few very good politically oriented songs.

The anti-war gathering was a very rewarding and interesting feature for a cool autumn afternoon. People from all walks of life undoubtedly from all sides of the political fence overflowed from the hall onto the lawn equipped with a large speaker.

Jane Fonda

## Standard Oil Announces \$8000 Award to M U

SAN FRANCISCO — Standard Oil Company of California announced that its scholarship grants to the University of Missouri Columbia and Rolla campuses for 1973 will total \$8,350.

The local gifts are part of the San Francisco-based oil firm's overall program of aids to American education for next year totaling more than \$2 million. A spokesman for Standard of California said the company's direct financial

assistance to education during the past decade alone amounts to more than \$11 million in research grants, aid to students and gifts to schools.

The scholarships will be awarded in the fields of geology, electrical engineering, mechanical engineering, petroleum engineering, chemical engineering and civil engineering by Standard of California and its subsidiaries, Standard Oil Company (Kentucky) and Chevron-Calco, New Orleans.

## Theta Tau Initiates Eleven Spring Pledges

Theta Tau Professional Engineering Fraternity is proud to announce the initiation of their Spring '72 pledge class. The new members are Dave Barczewski, Ray Christ, Jack Costello, Dave Kroeter, Dennis Larson, Gary McAlpin, Dan

McBride, Al Sanuskar, Stu Scott, Bob Touzinsky, and John Weekly. Theta Tau will continue to sponsor the Ugly Man Contest, The Freshman of The Year and the selling of mums on this year's Parent's Day and Homecoming Party Weekend.

## Wind and Waves Cause Oil Spill in ME Dept. at U.M.R.

A hurricane half an ocean away has some effect on the movement of an oil spill from one point in that ocean to another. Just how much it affects this movement is being studied, far from any ocean, at UMR.

Directed by Dr. Ronald Reisbig, associate professor of mechanical engineering at UMR, the project is supported by a grant of \$35,397 from the U.S. Coast Guard. Dr. Darryl Alofs, assistant professor of mechanical engineering, is co-investigator.

This grant enables the research team of two professors and three graduate students to study the coupled effects of both waves and wind on the movements of an oil spill.

"One of the basic reasons we need to be able to predict the movement of an oil spill with accuracy," says Dr. Reisbig, "is not only to determine where and when the spill will hit a shore line, but also to know where and when it can be intercepted with equipment designed to recover the oil.

"One thing most people forget when they read or hear about a spill is that there is a limited amount of oil in the earth's underground reservoirs. It is a valuable natural resource.

"If the spill remains in the ocean long enough, living organisms within the water eat and destroy all of it. It is just as much of a disaster to lose this source of energy as it is to let the spill hit land and pollute the beaches and wildlife."

The U.S. Coast Guard has equipment that can salvage the oil in case of a major spill. Using airplanes and seagoing vessels, the oil is surrounded by a mechanical barrier and can eventually be sucked up off the surface of the water into tanks. This is called "harvesting."

Harvesting equipment, however, is never on the scene when oil is spilled. So authorities have to be able to determine how long it will take to transport the equipment to the general vicinity, how far the oil will have moved and in what direction.

"If local surface wind were the only factor determining the rate and direction of oil

movements," the UMR professor explains, "figuring where a spill would be at a certain time would be easy. But different winds, miles from the spill, can have other effects on waves. The wind tunnel we have constructed for our wave-simulation tank can blow air at various speeds which travel with, against or at fixed angles to the waves. Now we can study all aspects of oil movements in order to create a computational scheme for oil path predictions."

Earlier research on wave movements and oil spills has been going on for more than a year with limited equipment. The new 32-foot long wave simulation tank with a wind tunnel is now ready for use. By next July studies of the effects of both wind and waves on the speed and direction of an oil spill will be completed.

Eventually, all the information gathered will be fed into computers which will then be able to make predictions of the oil spill movements. That is, if the UMR research team doesn't get sea-sick.

ME faculty members, Dr. Darryl J. Alofs (left) and Dr. Ronald J. Reisbig (right), study the coupled effects of both wind and waves on the movements of an oil spill.

## Miner of the Month - Dave Barczewski

**EDITOR'S NOTE:** Miner of the Month is selected from nominations made by UMR student organization presidents. The nominations are made on the basis of some outstanding effort made by an individual during that particular month. The person receiving the award is chosen by the members of Blue Key, a national service fraternity.

Blue Key's Miner of the Month for September is Dave Barczewski. Dave, a member of the Pi Kappa Alpha Fraternity, is from Florissant, Missouri, majoring in Petroleum Engineering. He was selected Miner of the Month for showing an active interest in campus welfare and improving the campus during the month of September. Dave was nominated by the Student Union Board, for running a leadership seminar for the members of all SUB committees. The members who participated in the seminar became aware of the problems that must be coped with by leaders, and various ways to over come them. For acquainting so many people with the methods of leadership, we feel Dave deserves the honor of being chosen the first Blue Key Miner of the Month for the 72-73 school year.

DAVE BARCZEWSKI

## Homecoming Marks Ninth Anniversary of Cellar Door

The Cellar Door, Rolla's original coffeehouse, will celebrate the ninth anniversary of its opening on UMR Homecoming weekend, with a highly varied program. The Webster Hills Youth Choir, which has sung at national and state-wide conferences, will be featured in two performances of popular folk music on Saturday evening. On Friday evening, singing and dancing groups from India, China, Latin America, and the Arab States will help UMR students celebrate the upcoming United Nations Day.

In addition Friday evening will be "Old Flic" night. Such stars of the past as Buster Keaton, the Keystone Cops, Wallace Berry, Gloria Swanson and Charlie Chaplin will be presented on the "silver screen." As always the popular local talent of Greg Schmittgens, Sondra State, Judy and Joyce Vickers will be presented on both evenings.

The Cellar Door, located in the Parish House of the Christ Episcopal Church at 10th and Main Streets, will be open from 9 p.m. to 12:30 a.m. It is sponsored by the campus ministries

of the Episcopal, Presbyterian, Methodist and Catholic Churches of Rolla.

## Bearcats Rip Miners, 46-21

### Albin Spearheads Potent Ground Attack

The Missouri Miner football team lost their fifth game in a row last Saturday to a strong Northwest Missouri State team. The game was an offensive orgy; with both teams moving the ball at will. The difference in the game was the inability of the Miner offense and defense to take advantage of the Bearcat mistakes. There were several instances where the Miner offense had opportunities to score, but could not.

Yet the Miner offense did shine. For the first time this season they were able to move the football on consistent drives. Quarterback Rick LaFollette returned to action against the Bearcats after sitting out the Wisconsin game with a knee injury. Rick got the offense rolling with tosses of 75, 25, and 50 yards to Jack Gevecker. Combined with the outside running of Mike Joshua and the inside bulldozing of Jim Chatman and Kenton Hupp the Miner offense began to click.

The defense was the Miner weakness this time. Their inability to stop the Bearcat offense was evident as the Bearcat fullback, Mike Albin, rushed for 142 yards in 15 carries. Albin ran through the Miner defense with almost no effort. The Miner cornerbacks

also had troubles throughout the night. Dropping two sure interceptions and possibly a third surely hurt the Miners. The interceptions would have given the Miners excellent field position, and robbed Maryville of scoring opportunities. The cornerbacks were also picked apart by the Bearcat passing attack.

The Miners will have to make an abrupt turnabout in their performance if they are to avoid yet another loss against SMS. The offense has been sporadic all year, despite the addition of the heralded wishbone. Defensively, they have yielded points in every conceivable way, the bomb, long sustained drives, against the run. Yet both units have also performed capably in brief spurts.

Plagued by injuries, the Miners face a tough opponent Southwest Missouri State next week. With LaFollette back in the lineup, and the Miner offense finally rolling, maybe Homecoming will be the day for the Miners to break loose for a win. Let's all go out and back the Green as they go for their first win. And what better time to do it than at Homecoming.

A horde of Miners, led by defensive end Dennis Doering, gang tackle a Bearcat ballcarrier. The Miner offense generated 21

points, but the Miners were unable to contain the Maryville offense.

## Water Polo Team Wins Two At Cape; Blood, Entwistle Lead UMR Scoring

This past weekend the UMR water polo team went to Southeast Missouri State University for a meet with Cape, Hendrix College and Westminster College. And although the Miners did lose one of the three games they played, their overall performance was excellent.

The first game was against Cape and this was the one that UMR suffered its loss in. The final was 16-11 and as the score indicated, there wasn't much defense played at all. In fact, when asked about the defense, swimming coach Bob Pease called it poor. The difference in the game was that Cape moved the ball better on offense than did the Miners. Another factor was that one of Cape's players was consistently pushing off of the bottom when he shot, something that is supposed to be a foul. But this wasn't called on him until the second and third round of games. Also, the Miners had gone two weeks without opposition which seemed to be evident during the first game. Scorers for the Miners were: Blood with 5, Molina 2, Beem 2, Vetter 1 and Kroeger 1.

The second game was almost

a joke. The Miners took on Hendrix and wiped them out 14-5. What was really amazing was that Hendrix had forfeited the first game because they arrived late in Cape Girardeau and were completely fresh, whereas the Miner had just finished their first game. And still the Miners had a 10-0 lead at half. A tough man-to-man defense was shown this time, a big improvement over the first game. And although the offense wasn't sharp as it is thought they could be, they still did a pretty good job. Scorers were: Blood 6, Vetter 2, Molina 2, Beem 2, Kreutz 1 and Entwistle 1.

The third and final game was the one that made the long trip down to Cape really worthwhile. The opponent was Westminster, a team that had beaten the Miners earlier in the year, 7-5. But this time a beautiful team effort by the Miners was just too much as they beat Westminster, 11-9. And this was the same team that had beaten the Miners before, plus two outside players. The two extras were from the University of Missouri-Columbia's swimming team and members of the 800 relay team that had gone to nationals.

Tom Kreutz led the offense as he kept it moving, something that isn't very easy to do. Blood, along with Entwistle, Vetter and Molina all turned in standout defensive efforts. The manner in which the game was won deserves mention. The Miners scored four times in shallow end, something that just isn't done, to build up their lead in the second period, and scored one in the final period to clinch the victory. The goal in the fourth period came with the pressure really on as the Miners were protecting a 10-8 lead and were defending the deep end. But they shut out Westminster for 5 minutes with some sterling defense.

Overall, the Miners got better with each game. Also Mark Mateer, their goalie, was the talk of the tournament as he was obviously the best goalie there.

This week, University of Tulsa comes to Rolla for two games on Saturday. The first game will be at 9:30 that morning with the other game to be announced. Water polo is a very exciting game and it is hoped a big crowd will be in attendance to watch the birth of water polo here are UMR this Saturday at 9:30 a.m.

## Big Green Machine Takes Fourth Straight

# Kappa Sig Wins Swimming; Sig Pi Finishes Distant Second

For the fourth consecutive year, Kappa Sigma has won the top spot in men's intramural swimming competition, beating second place Sigma Pi by a 52-39 score.

Overall, three new records were set in the men's competition. Need of Phi Kap recorded a 55.9 in the 100-yard freestyle, beating McCammon of Lambda Chi. Laneman of Tech set the record in the 50 yard freestyle with a 25.3 edging Need. In the 50 yard butterfly, McCammon took the record with a 28.0 time. Wohlert of Tech was second.

In other events, the Kappa Sig team of Allen, Greise, Houghton and Kassing beat Sig Pi in the 200 yard medley relay. Houghton also won the 100 yard individual medley with Lewis of Theta Xi taking second. Allen captured the top spot in the 50 yard backstroke over Warfield of Tech. Greise completed the Kappa Sig log of firsts by edging St. Peters of Sig Pi in the 50 yard breaststroke. In diving, Brinton of Pi Kappa Alpha took first, with Sanuskar of TKE finishing second. And in the final event of the meet, the Sigma Pi team of Zweig, Deprat, Deddens and Cortopassi won the 200 yard freestyle relay, narrowly beating Kappa Sig.

In the women's division, WRHA won the championship over TJ, coming out with a 53.5-50 victory. Lapp of Zeta Tau Alpha and Klender of WRHA were double winners, with Lapp winning in the 25 yard butterfly and the 25 yard backstroke. Klender took victories in the 25 yard freestyle and the 25 yard breaststroke, besides teaming with Schmidt, Kerr, and Blankenship to lead WRHA to win in the 100 yard freestyle relay. In the 75 yard individual medley Breidert of TJ won over Blankenship. In the diving competition, Hall of Wesley won, with Beck of TJ taking second place.

### Archery — Badminton

Also decided last week were the archery and badminton championships. Lambda Chi once again won the archery title, with the team of Congiardo and Key competing. The Engine Club team of Justus and Taylor was the runner-up. The individual marksman was Congiardo, while the runner-up was Millon of Campus Club. In Badminton, Tau Kappa Epsilon came out the champs, with Delta Sig and Sig Ep tying for second. TKE won on the

strength of a fourth place finish by Miera in singles and a second place finish by Lang and Steinman in doubles play. The singles champion was Moehlmann of TJ, with Njus of Pi Kappa Alpha the runner-up. The doubles champs were Greenly and Byars of Sig Nu.

### Football

In intramural football, Kappa Sig took the game of the week over MRHA, winning in overtime, after a score of 0-0 at the end of regulation time. Mike Barbaglia led the Kappa Sig defensive to their shutout. In other football action, Liahona beat Theta Chi 46-6. Lambda Chi took Mates 26-6, Delta Tau edged Engine Club 14-7, Sig Pi rapped Acacia 33-19, and Tech defeated Sigma Nu, 19-7.

With the league championships decided, the four teams that emerged as league champs now head into final play. The championship game will be held Thursday night, with the winner of the Phi Kappa Theta and Beta Sigma Psi game meeting the winner of the Kappa Sigma and Lambda Chi contest. The consolation game will also be played Thursday night.

Timers judge the finishing order of a close race. Four intramural records were broken in the competition.  
Photo by Larry Marklin.

## Harriers Lose To UMSL; Season Record Drops To 1-3

The UMR cross country squad dropped two meets last week to bring their record to 1-3. The team lost a dual meet to John Brown College and a double dual meet to the University of Missouri at St. Louis and Greenville College.

There are six members on the varsity cross country team, with only two returning lettermen. The two returning from last years are Mike Shepflin and Denny Mertz. Shepflin's best time for the five mile course is 27:13, when he set a course record at Evangel College.

Mertz' best time is 28:13. The other four members of the squad are Gene Carney, from Rolla, Robin Harris, from Licking; John Herman, from St. Louis; and Bob Schmit, from Kirkwood.

The next meet will be a double dual with SMS and Lincoln University on Saturday, October 28. The meet will start at 11:00 a.m. There will be another home meet on Tuesday, October 31 with Westminster College and CMS.

The MIAA conference meet will be held here Saturday, November 4.

Kappa Sigma took their fourth consecutive swimming title last week, as they outdistanced second place Sigma Pi by a wide margin. The Kappa Sig tankmen com-

pletely dominated the meet, as they were strong in virtually every event.

# Bears, Homecoming Hex Threaten Winless UMR

This week the UMR football team hosts the Southwest Missouri State University Bears in what is traditionally the biggest game of the season for the Miners. Besides being the traditional rival, the Bears are also coming to try to beat the Miners on Homecoming. So the Miners are really going to be up for the game.

Coaches Chuck Finley and Bud Mercier will pull all stops for this game: for the powderkeg is at stake. For those of you who don't know what the powderkeg is, it is a powderkeg with a bronze plaque on it that has scores of each SMSU-UMR football game on it. The winner of the game each year gets to keep the powderkeg until the game next year. The Miners have kept the powderkeg for the past three years and don't want to give it back now. The powderkeg is on display in the trophy cases in the Multi-Purpose Building.

As far as the Bears are concerned, they are a much improved team over last year. The Bears lost five of their eight

games last season by margins of six points or less and Head Coach Don Cross thinks that his team has matured a lot in the last year, both mentally and physically. Although the club isn't senior-dominated, Coach Cross feels they have gained enough experience to be a mature ball club. As a result, he feels those close losses of last year can be turned into wins this season.

Leading the Bears offensively will be senior quarterback Frank Miller, who was the conference's top passer last year and received second team all-conference honors. Miller is a scrambler, who likes loop and flare passes and who has a knack for hitting the open man. Leading the great power running attack of the Bears is junior Fred Tabron who was number two in the MIAA last year with 808 yards.

Defensively, the Bears should be much improved over last year. They play a five-man front and mix their secondary between a man-to-man and a

zone. They held powerful Cape to just ten points two weeks ago.

The Miners are pointing to this game with more enthusiasm than any other thus far in the season. They will be working very hard on their execution and their mental attitude. But SMSU will be favored as they are 2-3 on the year, having beaten Pittsburg and Warrensburg. But even so, records won't mean too much when two traditional rivals get together, especially on one of the rival's homecoming. The game will be a rough one, but the entire coaching staff is hoping that the large, excited homecoming crowd will provide enough advantage for the Miners to win their first game of the year and keep possession of the powderkeg.

## LITTLE MAN ON CAMPUS

"WARM UP ANOTHER QUARTERBACK, TOR. I THINK THEY'VE ABOUT HAD IT WITH PHILIPSON."

Miner fullback Mike Joshua crashes through the middle for a short gain in the game against Maryville this past weekend.

# Rugby Blacks Crush Flo. Valley, 25-0

## Schenke, Weber Tally for Miners

The UMR Rugby Club traveled to St. Louis last weekend to battle Florissant Valley Community College. The Blacks romped to an easy victory over Florissant Valley's first team 25-0. The win boosted the Blacks record to 2-1.

The first ten minutes of the game was touch and go as neither team was able to make a good offensive drive. Rolla scored first when Carl Schenke knifed through the Florissant Valley defense for a try and four points. Weber, however missed the two point conversion. The Miners continued to apply pressure on the host team and soon scored again as Charlie Weber picked the ball up and rambed 20 yards for another try and another four points. Rolla scored again in the first half when Weber connected on a 25 yard penalty kick and three more points.

The Florissant Valley team threatened early in the second half as they broke loose for 80 yards but were caught from behind by Jeff Wilkes on the one yard line. The Miner defense held fast and took the ball back. Dominic Granda kicked the ball into the endzone where it was covered by Weber for another four points. Weber also made the two point conversion.

Rolla's next two scores came about in the same manner. The Rolla scrum at its best won a five yard scrum both times and the backs worked the ball out to Ron Martin at wing. Martin scored twice for eight points. Both conversions were missed to give the Ruggers a rousing 25-0 win.

The Golds were also able to shut out their opponents 10-0. The first score came as Jack Vance ran 20 yards for the try and four points with the con-

version being missed by Jim Greer.

In the second half the Ruggers over-ran the Florissant Valley backs and drove for a score with Roger Hicherson carrying it over from the three. Wes Watkins connected for the two point conversion.

## Schedule

Oct. 28	University of Missouri-Columbia
Oct. 29	Westminster College-Fulton
Nov. 4	St. Louis Ramblers-Rolla
Nov. 11	Rockhurst College-Rolla
Nov. 11	Independence Ramblers-Rolla
Nov. 19	Kansas City Rugby Club-Rolla.
