University Officials Receive Raises

University President C. Brice Ratchford was given a \$5,000 per year raise Aug. 3 by the Board of Curators in a closed session, it was learned this week when minutes of that meeting were released.

Ratchford's new salary of \$47,500 per year makes him the second highest paid state official in Missouri. Only Joseph White, UMC provost for health affairs earns more money. White receives \$57,500 a year.

Along with Ratchford, members of the resident's staff and three University chancellors received salary increases. UMC Chancellor Herbert W. Schooling received a \$3,000 raise, making his yearly salary \$38,000.

"The raises cover a two-year period," said Guy Horton, director of University Information Services. "Last year Ratchford did not put his staff on the list for raises."

All University employees are normally scheduled for raises during each year, Horton said.

"The president and his staff are focused on by the Board when salary increases come up. Other employees are given increases on a departmental basis," he said.

The information concerning the raise was made available Monday after the Curators approved the minutes of the August meeting last Friday at the Board's September meeting.

"this is normal procedure Horton explained. "Since it is a personnel matter, it was discussed in a closed session. In this instance no one asked the Curators if they had raised the president's salary after the August meeting and none of the Curators volunteered the information. Sometimes the information is revealed before the minutes are released."

Jack Hamilton, assistant to the president for communications, said the raises were granted "on the basis of inflation and merit."

Other salary increases, which went into effect Sept. 1 included: Kansas City campus Chancellor James C. Olson, from \$38,500 to \$41,500.

Ardath Emmons, vice president for research from \$34,500 to \$37,500.

Dale O. Bowling, vice president for business management, from \$34,000 to \$36,000.

A. Lee Belcher, assistant to the president, from \$27,800 to \$29,800.

Joseph L. Saupe, University director of institutional research, from \$25,800 to \$27,800.

A. G. Unklesbay, vice president for administration, from \$36,700 to \$38,700. Rolla campus Chancellor Merl Baker, from \$34,000 to \$36,000.

Carl Scheneman, vice president for

extension, from \$30,000 to \$31,800.

Stirling Kyd, assistant to the president, from \$29,300 to \$30,500.

R. H. Bezoni, vice president for finance and treasurer, from \$34,000 to \$35,000.

Phil E. Connell, assistant to the president, from \$24,000 to \$25,000.

Guy Horton, director of University Information Services, from \$19,500 to \$20,500.

Paul Nagel, vice president for academic affairs, from \$32,000 to \$33,500.

Two other persons, not on the president's staff, but directly responsible to the Board were given salary increases. University Council Jackson Wright's salary increases from \$35,000 to \$37,000 and Mary Robnett, Board secretary, was given a \$1,000 raise to make her salary \$16,000.

Rolla Delegation To Student Union Conference

Why do Student Union Boards across the nation belong to an organization such as ACUI, Association of College Union International? One very strong reason is their annual Regional Conference, this year held in Edmond, Oklahoma. The Student Union Board, lead by President Dave Barczewski, drove the seven-hour journey last Sept. 29 and became a most important factor in this conference's success.

Among the numerous events scheduled during the two-day convention were group learning and workshop sessions which encompassed every aspect in the functioning of boards in our four-state region. Not only did UMR actively participate in these discussions, but two of our delegation served as group leaders: Mark Kassing, V-Pres., gave a presentation on the subject of "Films"; Mrs. Berna Harvey, SUB Program Director, lead the discussion in "Fine Arts." Other Group Sessions held included Art, Speakers, Concerts and Coffeehouses, Indoor Recreation, Public Relations, Outdoor Recreations and Travel, and Special Events and Hospitality.

Another important duty of the conference was to elect a State Coordinator who will be in charge of organizing the communications among the unions all over Missouri until next year. Our state caucus also divided Missouri into 4 districts, each having an elected district coordinator to direct com-

munications to the State Coordinator. D'Arcy Holt, SUB Special Events Chairman, was elected District Coordinator, an honor to UMR.

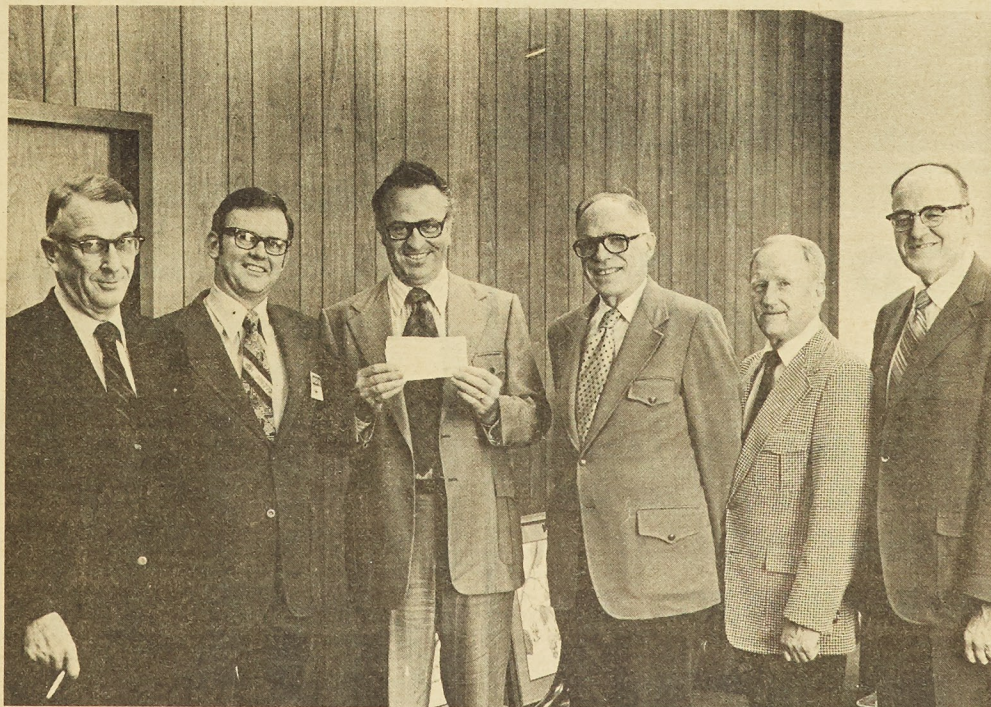

John Biggs celebrated the closing of the conference along with a keg of Coors Monday night. "The only bad part in the whole thing," said Steve

Rau, Sec.-Treas., "was getting up so early to drive back to Rolla."

The remainder of our delegation, Tom Miesner, Carol O'Rourke, Bill Lueckenhoff, Steve Peppers, Scott Winfield, and Union Director, Jess Zinc, gained valuable experience and some brand new ideas to present to the

students here in Rolla. It's going to be a good year!

Anyone with new ideas of their own for planning activities for the students are always welcome. Applications for membership in SUB may be picked up at the candy-counter of the new University Center.

Dr. Merl Baker (third from left) chancellor of the University of Missouri-Rolla, accepted checks totaling \$5,000 from the Atlantic Richfield Foundation on campus Friday Sept. 5. \$3,000 was for the chemical engineering development fund with development funds for mechanical engineering and petroleum engineering each receiving \$1,000. Present at the ceremony were (left to right): John Govier, professor and head of petroleum engineering; Larry Gater, regional recruiting manager for Atlantic Richfield; Dr. Baker; Dr. J. Stuart Johnson, dean of UMR's School of Engineering; Dr. Thomas R. Faucett, chairman of the mechanical and aerospace engineering department, and Dr. Mailand R. Strunk, chairman of the chemical engineering department.

Friday, October 19
Governor Bond will speak at 9:45 a.m. to the College Government Conference in the University Center. Also speaking will be Chancellor Danforth, Washington University, after lunch followed by workshops throughout the afternoon.

Student Jobs Index

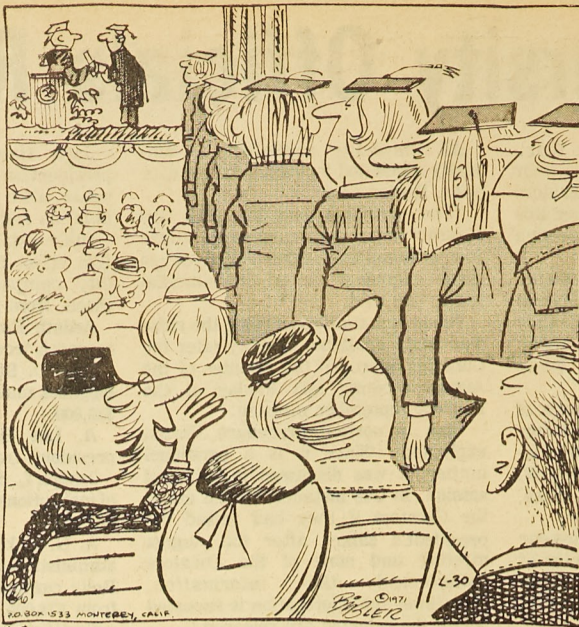

ROLLA, Mo., Oct. --Lots of students and their wives need jobs. And, lots of Rolla area businessmen and residents need workers. Getting them together is the goal of a new job referral service in the UMR Student Financial Aid Office.

Director Ray Pendergrass says that the office tries to fill requests for part-time or full-time workers, either for regular or occasional work. "Several Rolla firms have already hired students or student wives through our office," Pendergrass says. "Right now employers wanting workers and workers wanting jobs are just about equal. The only trouble is

that not all of the jobs available are the ones students have registered for and vice versa."

Students and student wives are available for all sorts of jobs. These include construction work, service station work, painting, yard work, chauffeuring, sales work, baby sitting, housework and church organist.

There is no charge for the service to either students or employers. The only restriction is that student applicants cannot have already received aid through the financial aid office. Interested employers and workers should contact Mrs. Katie McDaniels, 106 Parker Hall, phone 341-4282.

"THANK GOODNESS OUR MODERN PROFESSORS DON'T REQUIRE ATTENDANCE, STUDY OR PERFORMANCE OR MY FREDDIE MIGHT NOT BE GRADUATING FROM COLLEGE TODAY."

SENIOR GRADS

All who plan to complete requirements for a degree on December 16, 1973, and have not signed an application for a diploma - please check in the Registrar's Office.

The Missouri Miner

The MISSOURI MINER is the official publication of the students of the University of Rolla. It is published at Rolla, Missouri, every week during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo., under the Act of March 3, 1879. The subscriptions are \$1.50 per semester. This MISSOURI MINER features activities of the students and faculty of UMR.

Movie Review

GODFATHER

The Godfather is a multi-million dollar movie about the life of the mafia. The Godfather is a very dramatic story of the inside of the underworld in the late forties and early fifties. A powerful New York mafia family loses its power through drugs and bullets only to be saved by the young hardened minds of the junior members of the dynasty. Also, "Lady Sings the Blues" which will show at the drive-in this week.

TOGETHER

Marilyn Chambers stars in her original, uncut, x-rated film "Together" which thrust her into the public eye.

ROMEO AND JULIET

Franco Zeffirelli's production of "Romeo and Juliet" has become this generation's definitive version of the timeless tale of history's most famous star-crossed lovers.

Shakespeare's play was first performed in 1597 by his Globe Theatre company on the south bank of the Thames.

This immortal tale starts Thursday at the Uptown Theatre with one showing nightly at 7:30 p.m.

SUB Presents Clarence Darrow

"With my last breath," Clarence Darrow once wrote, "I shall probably be trying to take another" on Oct. 17, at Centennial Hall. At 8 p.m. the famed crusading lawyer will do just that as the Student Union Board presents John Chappell in a living portrait of "Clarence Darrow: Defender of the Damned." Clarence Darrow was not only the greatest criminal lawyer of our time... he was also a constant fighter against injustice, privilege, and the power of the mob spirit. In this dramatic reincarnation Darrow looks back over his life, describes some of the many great cases in which he participated, and in the simple candid style that he made famous, states his opinions on the nature of crime, rebels, American life, evolution, death and immortality.

Darrow's cases have fascinated audiences before.

Orson Welles recreated his defense of Leopold and Loeb, with its classic arguments against the death penalty, in the feature film "Compulsion"; while Spencer Tracy played a character based on Darrow in the motion picture "Inherit the Wind." THE Pulitzer Prize-winning story of the notorious "Monkey Trial." Now Darrow speaks for himself in the very words that rocked the courtrooms of America for over fifty years. He cries out again for truth and justice, and for the oppressed. The part will be played by John Chappell, whose characterization of Mark Twain was so well received here in the spring of 1972. He packed the house once and consented to give a second show where he again played to a standing room audience only. Don't miss this outstanding performance on Oct. 17 at 8 p.m.

IK Slave Day

The Intercollegiate Knights Service Fraternity will hold a Slave Day on Saturday, October 20th, from 9 a.m. to 5 p.m. During the past two years, Intercollegiate Knights have worked on various improvements at the Rolla Diagnostic Clinic, and they have completely renovated the interior and exterior of the Skill Builder's School, located at 9th and Rolla Streets, which has classes for mentally retarded children.

The purpose of our Slave Day

is to raise money for the upcoming projects of this year. We would like to work for the Faculty on any jobs that they may want done, such as raking leaves, cleaning, painting, or whatever they may have. Call Dave Dunavant at 364-4289, or Dave Antal at 364-9969 anytime between now and October 20th, and the number of people will be ready to work at the time you need them. The charge for the job is whatever you think the job is worth.

Scuba Diving Course Offered

Do you think scuba diving is profitable or fun only when you can do it in warm, tropical ocean waters?

How about spear fishing (for rough fish) in many of Missouri's lakes? What if you somehow lost some expensive tackle or even a motor in 20 to 30 feet of water? It might even be fun to explore some of the under water entrances to some of Missouri's caves.

The University of Missouri-Rolla is offering a scuba program of 24 hours of pool and

classroom training. It covers all aspects of safety, watermanship and scuba equipment. Classes will be held each Saturday from 9 a.m. to 4 p.m. for four weeks (Oct. 20 through Nov. 10) in the UMR Multi-Purpose Building.

Each Saturday participants will spend three hours in the pool and three hours in the classroom. Instructor for the course is Claude Robertson of West End Diving and Salvage Co., Inc., St. Louis. Upon satisfactory completion of written, pool and open water tests, students will be certified by the Professional Association of Diving Instructors (PADI). Students will need to furnish mask, fins and snorkel for pool sessions and safety vest and a knife for open water dives at the end of the course. Equipment will be available for purchase in the classroom.

Anyone 12 years or older is eligible for the course. Average swim skills are necessary. The course fee of \$55 includes rental of tanks, regulators, packs, textbooks, learning aids and instruction.

This program is an extension activity of UMR's physical education department.

For further information or to enroll, write or call Norma Fleming, Extension Division, University of Missouri-Rolla, Rolla, Mo. 65401 (314-341-4201).

University of Missouri - Rolla

Dr. Wesley Suspended

Dr. James Wesley, associate professor of physics, has been suspended by the University of Missouri-Rolla. Wesley was notified of his suspension at 4 PM, Thursday, October 4. Action was taken by Dr. Dudley Thompson, dean of faculties, on the recommendation of Dr. Adrian Daane, dean of the College of Arts and Sciences. Dean Thompson was unavailable for comment on the

subject but will return to campus sometime this week. When Dr. Daane was asked last Thursday about the suspension of Dr. Wesley, he could only comment on the fact that Dr. Wesley had not yet made a response to his suspension. Since Dr. Wesley is a tenured professor on this campus he is allowed a 15 calendar day time period in which to respond to his suspension. Should he respond,

however, the University is prepared to present a case against Wesley. Dr. Wesley's response will allow him a hearing before the Tenure Committee where the case presented by the University will be heard. Should the committee find Dr. Wesley guilty of "moral turpitude" he will be permanently suspended from the University.

GDI

For the people of UMR the fall season is here and so is the time to help GDI in adding a crisp to the autumn air. Memberships are still being asked for here at the GDI office and activities are picking up. There's an outing Sunday, October 21 which deserves your attendance. The only way you can get in free to GDI functions is by being a member. Plan on being a part of the new thrust of GDI on campus; join up and join in.

Don't let it escape your mind to be at the National Guard Armory on Fairgrounds Road on Saturday night, October 27. From 9 p.m. to 1 a.m. the place will rock to the sound of Diamond Jim. Plus, the admission is free for members; non-members will pay \$2 per person if you're by yourself, \$2 per couple if you bring a friend. The St. Pat's edition of the Sixty Miner needs articles. These should be submitted well before deadlines start approaching, something neglected in the past. Any literary creation is considered.

For everyone on the ball, you can sign up for intramural sports, or come to the games and support your combatants. Now our players will soon have official GDI shirts to wear during the game.

At All U. of Mo. Campuses Energy Conservation Program

Rolla, Mo., Oct. — The energy conservation program for the University of Missouri-Rolla was submitted to Governor Christopher (Kit) Bond Sept. 17, along with those of the other three campuses of the University of Missouri.

Victor E. Robeson, superintendent of physical plant, has been designated by Joe Wollard, business officer, to monitor UMR's energy con-

servation program and evaluate the results. It will be Robeson's responsibility to administer the program and develop procedures to keep faculty, staff and students informed of the progress made in conserving energy.

The UMR program lists 11 procedures recommended to faculty, staff and students to conserve fuel and electricity.

To Appear In November Engineering Magazine

A new magazine, the "UMR Engineer", will be appearing on campus this fall, with the first issue to be distributed sometime in November. Sponsored by the School of Engineering, the magazine will be published by and for the engineering students. Articles of a general technical nature, discussions of future technical trends, and a variety of other articles will be featured. The various student professional organizations will also have space to describe their activities and forthcoming events. The staff of the "UMR Engineer" is: Richard Schafermeyer, Editor; George

Dolson, Associate Editor; Phil Panagos, Managing Editor; Wayne Carlson, Business Manager; and Dave Hardin, Photo Editor. Dr. Daniel Babcock, Engineering Management, and Dr. Gary Patterson, Chemical Engineering, are the faculty advisors.

Staff offices are located in room 102, T-1 (temporary building next to Harris Hall.) Office hours are 3-4:30 p.m. Monday, Tuesday and Thursday and 2:30-3:30 p.m. Wednesday. Staff meetings are held each Monday at 3:30 p.m. Anyone interested in joining the staff is invited to stop by.

Tau Beta Pi Announces Officers

ROLLA, Mo., Sept. — Fall semester officers have been announced by Tau Beta Pi, national honorary engineering fraternity, at the University of Missouri-Rolla.

They are: President, Marvin Borgmeyer of 1153 Phalen, St. Louis; vice president, Leonard Laskowski of Route 1, Villa Ridge; treasurer, Harry Ammons of Rutledge; corresponding secretary, Neil Lewis of Route 3, House Springs; recording secretary, John Campbell of 516 Bender Ave., East Alton, Ill.; cataloguer, Don Cartwright of Route 1, Camdenton.

Sensored

By ANDERSON AND ELVEN

Exam time.....Sensored has established a long running tradition stretching back into last year. Coinciding with the fun that every student endures in the middle of the semester we give you your mid-term quiz. Don't cheat now, cause we want this to be an honest evaluation of your accomplishments this half-semester. Check your answers at the bottom when you're done, and enjoy yourself, just like in a real class.

Our Man Hoppe

New Religion Sweeps Nation

It was in the spring of 1974 that a new method of achieving self awareness swept America. It was called "Trans-Astral Glosling."

In every city and suburb Glosling Groups met nightly to perform religiously the basic Glosling Ritual, which consisted of (1) sloshing each other with raw egg yolks; (2) beating each other with boiled ginseng roots; while (3) chanting the Glosling Mantra: "shhhhhhh!"

Within months all the scores of various esoteric therapies into which millions of Americans had plunged to prove they were neurotic and interesting became things of the past.

Gone were Gestalt, Jungian and (for old fuddydiddies) Freudian therapy. Gone were sensitivity awareness sessions, where you tickled each other with feathers; encounter groups, where you beat each other with pillows and screamed at each other; primal scream therapy, where you screamed at yourself; and even Rolfing, where you got the bejabbers beaten out of you to relieve mental tension.

"If you aren't into Glosling," as one matron happily put it while wiping the egg yolk out of her left ear, "you aren't into

anything."

Trans-astrol Glosling was, of course, the self awareness technique expounded by the famed 9-year-old Tibetan psychologist, Kom Wot Mai, reputedly the son of an Indian Maharshi and a Paraguayan llama. (cq)

"The egg is the symbol of rebirth," as he explained in his famous work, Slosch & Glosch, "the ginseng root cures all, and 'Shhhhhh!' represents the ultimate goal of human achievement. In a month, the dedicated Glosler can reach the Astral Plane.

The immediate success of Glosling was apparent from the testimonials of its millions of practitioners.

"I always had frustrating dreams of being a demolition expert," said Miss M.W., a 57-year-old spinster. "But now I'm content to be waht I am — a simple steam shoevel operator."

"Glosling cured my dan-druff, my delusions of persecution and my angst over my backhand," said Mr. K.E.W. "True, I still can't hit a backhand. But now I don't worry about it any more."

It was soon apparent that in their desperate search for a

panacea, uptight Americans had finally found one that worked. By mid-summer, everyone was Glosling. By fall, the entire Nation was content, serene and free at last of every single personal problem and nagging worry. Nirvana had been achieved!

Of course, cocktail parties became a thing of the past. No one needed cocktails and no one needed parties, because without problems, no one had anything to talk about.

There being no more problem-driven writers and artists, there was no more writing and art. People didn't buy big cars, fancy clothes or television sets any more because they didn't need things to take their minds off the problems they didn't have. It was very quiet.

"It's nice being serene," said one formerly gossipy housewife. "But it sure is dull."

The Nation was saved when Kom Wot Mai was revealed to be a 42-year-old midget from Brooklyn who'd cornered the market in egg futures. Everybody angrily renounced Glosling as a fraud and returned to striving, nagging, back-biting and dreaming once again.

ENGINEERING • COMPUTER SCIENCE • MATHEMATICS

UNPRECEDENTED WORK ...

UNPARALLELED OPPORTUNITY ...

CAREERS AT THE NATIONAL SECURITY AGENCY

"The cipher disk, one of the world's oldest cryptographic devices, is a crude forerunner of the sophisticated communications security systems being developed and tested at NSA today."

Because of the nature and scope of the National Security Agency's mission, we can offer job challenge and career opportunities that are impossible to match.

At NSA, we are responsible for designing and developing secure/invulnerable communications and EDP systems to transmit, receive and analyze much of our nation's most vital information. The advancing technologies applied in this work are such that they will frequently take you beyond the known and accepted boundaries of knowledge. Consequently, your imagination and resourcefulness are essential qualifications for success.

The Career Scene at NSA: Engineers will find work which is performed nowhere else . . . devices and systems are constantly being developed which are the most advanced in the Western World. As an Agency engineer, you will carry out research, design, development, testing and evaluation of sophisticated, large-scale cryptocommunication and EDP systems. You may also participate in related studies of electromagnetic propagation, upper atmosphere phenomena, and solid state devices using the latest equipment for advanced research within NSA's fully instrumented laboratories.

Mathematicians define, formulate and solve complex communications-related problems. Statistical mathematics, matrix algebra, and combinatorial analysis are but a few of the tools applied by Agency mathematicians. Op-

portunities for contributions in computer sciences and theoretical research are also offered.

Computer Scientists participate in systems analysis and systems programming related to advanced scientific and operational applications. Software design and development is included, as well as support in hardware design, development and modification.

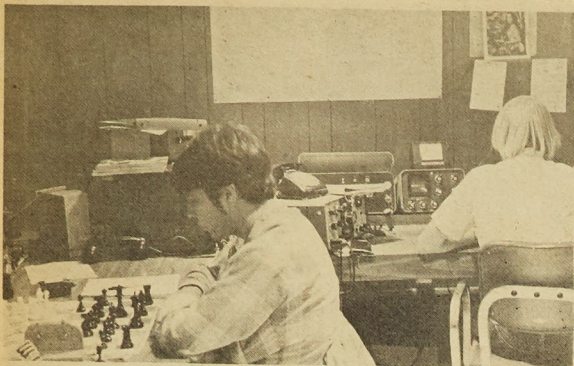

Starting salaries are based on education and experience, and increase as you assume additional responsibility. Further, you will enjoy the varied career benefits and other advantages of Federal employment without the necessity of Civil Service certification.

Check with your Placement Office for further information about NSA, or write to: Chief, College Relations Branch, National Security Agency, Ft. George G. Meade, Md. 20755, Attn: M321. An equal opportunity employer, M/F. NATIONAL SECURITY AGENCY
Our representative will be on campus

Chess and Radio Join Forces

The UMR chess club has come up with some innovative ideas this year to increase its membership and importance. First the club began the year with about thirty members, seven of them having U.S.C.F. (national) ratings. Every Tuesday night the members would be matched against each other. A rating system was build up for a UMR tournament to be held later in the semester. With the rating system, classes could be set up so that even the inexperienced players would have a chance to win prizes.

The second important move was the club's affiliation with the United States Chess Federation (USCF). By being recognized by USCF the chess club can obtain discounts on books and equipment. Also the club will have the right to hold USCF rated tournaments which should increase the level of competition.

The third and most significant move came about because the club wanted to play team matches against other colleges but could not afford the transportation costs. To solve this problem the chess club combined forces with the radio club

in new innovation, radio chess. The first match was against the College at Warrensburg, Missouri. Out of eight games the chess club won four of them with four yet to be played. The match against Warrensburg proved that radio matches were feasible so the club organized two more matches against Purdue University and Indiana University. The matches were played on the nights of October 5th and 12th. Despite exceptionally tough opposition, the chess club's four man team managed to tie both matches. More matches are planned later against Dubuque, rematches with Purdue and Indiana, and matches against several other colleges.

The chess club wants more players so they can solidify their first team and possibly field a second and third team. If you are interested in playing other colleges or in playing in a UMR chess tournament come to a meeting on 7:30, Tuesday nights at the old student union. You will have a warm welcome and have a good time playing opponents of many different strengths. Come Now!

Letters

TO THE EDITOR:

Having read Anderson and Elven's column of October 3 ("Drip, drip, drip..."), my first reaction was to reread it to see if I had interpreted it correctly. Unfortunately, I had.

I must preface any further remarks by stating that I am assuming A and E's reportage is correct in substance, if not detail, and that if I am proven to be in error, I will publicly apologize to those concerned through this newspaper. The assumption is made purely on the basis of my personal experiences with Auxiliary Enterprises as an undergraduate student patron and nothing else.

It appears, in my opinion, that Mr. Musick has been seduced by the words of the rules governing food consumption in University buildings rather than in intent of those words. Obviously, Rolla's hot tamale vendors should not be allowed to set up their carts in the St. Pat's Ballroom at lunch time. However, I find it hard to justify Mr. Musick's attitude in dealing with the Red Cross.

Even if Auxiliary Enterprises' charter does compel it to make great hunks of money and grow like an octopus without regard to the quality of product and service rendered (which I doubt, but its administrators seem to believe), it would seem that a small concession is not unreasonable for a Red Cross blood drive. General Motors and ITT make magnanimous civic contributions every day. Why not UMR's Auxiliary Enterprises? Perhaps the problem can be rethought by those in positions of responsibility, and this unfortunate encounter can be forgotten.

In any case, the Red Cross should be encouraged to return to UMR on the next regularly scheduled date. If Mr. Musick and his superiors and associates can resolve the oversight that caused this last misunderstanding, so much the better. If not, I propose to take the following actions and I encourage other Miners to do the same:

1. I will not patronize any Auxiliary Enterprise Facility on the days of the blood drive.
2. I will actively support and contribute to the collection and distribution of donuts, cokes, and sandwiches in an area (such as the sidewalks) that is out of the grasp of Auxiliary Enterprises.

Perhaps the above, with the participation of a substantial number of concerned Miners, would take the edge off the glorious profits to be had on twenty-eight dozen sandwiches. If rules are rules, so be it.

Booze And The College Student

The consumption of alcoholic beverages has been and will continue to be, for many years, as favorite past time of college students everywhere. What could be better than relaxing in the sun with a beer in one hand and your favorite girl in the other. Unfortunately, state laws prohibit anyone under twenty-one years of age from engaging in this sport. However, this law has stopped very few people I've known who wished to drink. Slowed down, perhaps, but seldom stopped.

It seems there are many ways this law could be changed to make it more realistic and easily controlled. This meets with much opposition from many sectors, especially the twenty-one year olds who had to wait so long for this privilege. A bill which would lower the drinking age was introduced at Jefferson City some time ago but did not pass the Senate vote.

If you are from a city lying along the Missouri border, you may have noticed or heard about a recent, strange influx of traffic on bridges crossing the Mississippi River. This mysterious phenomenon, occurring every weekend, is the result of a new, more lenient liquor law which went into effect October first in Illinois. The state has chosen to follow a plan already used with success in several states—lowering the drinking age to eighteen (Kansas, Colorado) or nineteen (Illinois) for beer and, in Illinois, wine. This plan has

benefited many and hurt very few. As anyone from Kansas City can tell you, there are few better places to meet members of the opposite sex than in a teenage bar, especially if the bar has a band. If you're not in the mood to find a partner, you can sip on a few beers, shoot a little pool, and check out the times. Others also enjoy the benefits of this plan. Bar and liquor store owners like the increased income; policemen don't have to waste their valuable time confiscating and emptying beer cans; and parents sleep better knowing their son or daughter is in a reputable institution and not out roaming the streets. People worrying about intoxicated drivers, need not worry. At the prices most bars charge for a pitcher, it's too expensive to get too drunk. Who knows, maybe even some of those marijuana smokers will put down their pipes and pick up their mugs.

Missouri, I'm sure, will now think much harder about adopting some form of this law; it's embarrassing for many officials to see revenue from our two biggest cities pouring into adjoining states. To quote an old line, money talks. In fact, Chicago youths traveling to Wisconsin to imbibe was a factor in the changing of Illinois laws.

Sometimes only a small change is needed the answer to the problem of minors drinking. For instance, at the University of Illinois, in the past even before the law changed,

Many bars in Rolla such as Top Hat Lounge above could provide a place to go for all UMR students instead of just the lucky one over 21. Photo by Zimbelman

nineteen year olds were allowed in campus bars if they showed their college ID's. This enabled students to drink beer to their heart's desire, but kept the hometown kids safely at home. Unfortunately, a rule such as this stands little chance in Rolla—a town which does not allow liquor by the drink.

Any of these changes would lend credibility to a law which is now easily overlooked and ignored. Think of it, students could retire their fake ID's forever, bar owners could forget pressing state liquor inspectors, and there could actually be somewhere to go on a dull, uneventful night.

Bearcats Down UMR, Miner Rally Falls Short

The Miners started too late as Northwest Missouri University of Maryville defeated them 31-21 Saturday. At one point in the third quarter the Bearcats had a 28-0 bulge over UMR, but the heroics of freshman quarterback Greg Haug gave them one touchdown at the end of the third quarter and two in the fourth, to come within 10 points of Maryville.

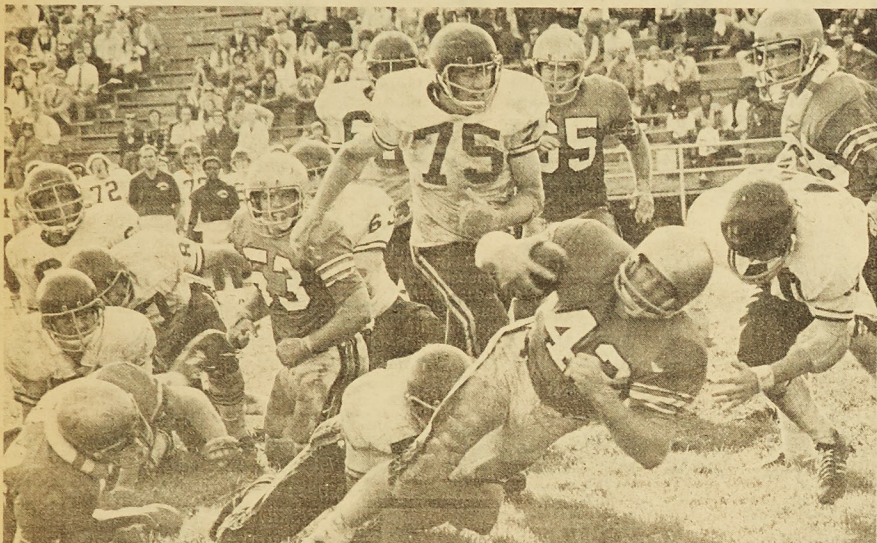

In the first half the Miners were tantalizingly close to touchdowns three times, but

failed to put the ball in the endzone. A somewhat rare missed fieldgoal attempt by David Wisch, after the Miners had moved to the six early in the first quarter, and an interception of Rick LaFollette's pass on the Bearcats four late in the half, nullified UMR's scoring drives.

The Bearcats' Jim Albin, the premier runner in the MIAA and an All-American candidate, kept up his reputation in

Saturday's game. Albin seemed to be unstoppable against the Miners (as with any other teams Maryville faces) in gaining 139 yards rushing and one touchdown. However, Albin was injured in the fourth quarter with a pinched nerve in his neck. If the injury proves to be serious, the Bearcats may be in trouble this year in their bid to repeat as the MIAA defending co-champions.

Continued on Page 8

Halfback Kenton Hupp, the leading rusher for the Miners so far this year, is dragged down from behind by a Maryville linebacker.

UMR Water Polo Team Edged by SIU, 10-6

The UMR water polo team played its last home game of the year this past weekend, and even though they lost, the result was still a tremendous moral victory. The Miner's opponent was Southern Illinois University, a team that probably had the best swimmers on it that the Miners had ever faced. They weren't hurting for water polo players either, as their top man was the second leading scorer in the Pacific Coast League this summer. With all of this going for them, SIU should have blown the Miners right out of the pool. But the Miners took the game to SIU, losing 10-6.

The vicious Miner attack really surprised SIU and at half the Miners were only down by one, 3-2. The third quarter told the story however, as SIU upped their lead to 8-4. The Miners still lack a little finesse when on the offensive; they have to shoot while moving — something that isn't as easy as it sounds. Even though seemingly out of it, the Miners kept up the fight and played SIU even for the final period, making the final score 10-6.

Goals were as follows: Mike Norberg three, Jim Entwistle one, Paul Vetter one, and Larry Molina one. Bill Kroeger had two assists. Overall, the Miners played extremely well. In fact, if they had played this well the week before against Cape, they would have massacred the

Indians. The difference really didn't come in the water polo part of the game, it was just that the Miners couldn't keep up with the strong swimmers on the SIU team.

The key to the Miners' success was their stiff defense. The big man mentioned above was held completely in check, and finally got so frustrated he was ejected for fighting. If the Miners could keep this up and refine their shooting a little, they would really be touch. Slight lapses on defense lost a few of the Miners' earlier games, but they seem to have straightened that problem out.

This coming Saturday the team travels to Conway, Arkansas for an eight team tournament at Hendrix. They will play the University of Arkansas at Little Rock in the first round, and then the winner of the Cape-Texas A9M game.

Soccer Club Plays

First Night Game

Miner kickers will take on Drury College of Springfield, the first night game played here in Rolla. The game will be played at the intramural field this Friday, October 19th at 6:00 p.m.

The Miner soccer team will be looking for their first winter season, come out and cheer them to victory.

Miners Lose MIAA Opener

Continued from Page 7

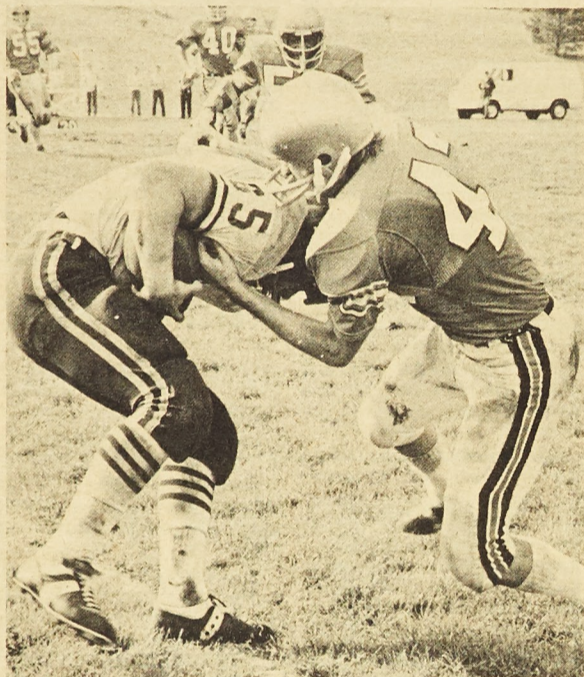

As if Albin wasn't enough, Maryville got a splendid performance from their quarterback John Beeson. He threw for 235 yards and two touchdowns and was complete in 11 of 18 attempts.

Once again the leading runner for UMR was Kenton Hupp with 31 yards total. The Miners ended up with 55 yards on the ground. For those fans who stayed, the fourth quarter was a real show. Coming off of one touchdown strike to wide receiver Stu Dunlop (a 65 yarder), Greg Haug and Merle Dillow succeeded in connecting for two more touchdowns in the fourth quarter. David Wisch converted the extra point after each score. Haug ended up with 174 yards passing, completing 8 of 18 attempts.

The Miners seemed to have "plain bad luck". Just missing

a score twice in the first half, and coming close to another one—they couldn't make up the difference in the second half against the potent Maryville offense. Typical of the way things went at first was the 35 yard pass from LaFollette to Rodney LeGrand which was called back. Later a fantastic diving catch by Jack Gevecker went for naught.

Next week UMR takes on Southwest Missouri State there. They are now 1-3-1 and 0-1-0 in MIAA play. The week after is the Central Mo. State game; homecoming the MIAA season is obviously in full swing now. The Miners keep looking strong—they've just played nothing but absolutely top-notch competition so far. They've shown that they have what it takes to win, so keep up the support—they can always use it.

Safety Calvin Curdt drags down a Maryville Bearcat receiver in Saturday's 31-21 Miner defeat. Terry Logan moves in to help out.

Three Unbeaten Teams In IM Football Finals

Regular season play in the Intramural football program ended last week. In League Two, Kappa Alpha earned a berth in the playoffs by scoring twice and completely shutting off the Sigma Pi offense to win by a score of 12-0. Also in League Two, Lambda Chi Alpha defeated Newman 20-16.

Kappa Sig captured the championship of League Three by winning two games last week. One was a 35-0 win over Triangle, and the other a 27-0 shutout over Sigma Phi Epsilon. This ended their season with a perfect 5-0 record.

In the only other game played last week, Sigma Tau Gamma took first place in League Four by defeating Phi Kappa Theta 20-6.

Pairings for the playoff series show Sigma Tau Gamma meeting Beta Sigma Psi, and Kappa Alpha going against Kappa Sigma. The two winners

will meet for the championship, and the two losers will play for third place.

Tennis and swimming have also been completed. In womens tennis, WRHA won first in both the Upper and Lower Brackets. Singles champion was Debbie Gower and the Runner-up was Peggy Cohill. Both girls are from WRHA.

In mens tennis, Pi Kappa

Alpha and Tech Club finished in a tie for first place. Lambda Chi, TKE, and GDI finished third, fourth, and fifth, respectively. Individual winners were, in singles, Seiler from MRHA, and teams, Buchannon and Barewski from Pi Kappa Alpha.

Kappa Sigma won the mens swimming with 49 points. Second place was taken by Kappa Alpha with 26 points.

SUB Sponsors Trap and Skeet Tourney

Sunday, November 4 has been set as the date for the Student Union Board sponsored UMR Trap & Skeet Tournament which will be held at St. James. This semester we have been shooting at St. James for very minimal prices and there will be no additional charge for the

Tournament. The purpose of the Tournament is to give everyone the opportunity to shoot Trap & Skeet, be he a novice or an experienced veteran.

Sign-up sheets for anyone interested in practicing, or in the Tournament will be posted in the University Center.
