## Outstanding Achievement Award To John Heagler

John B. Heagler Jr., professor of civil engineering and director of continuing education for the School of Engineering at University of Missouri-Rolla, received University Extension's outstanding achievement award here on (Oct. 25).

The award is presented annually by Dr. Carl N. Scheneman, vice president for extension, to one individual in the University's statewide extension operation.

Prof. Heagler is the fourth person to receive the award since its inception in 1970. The presentation was made during University Extension's annual in-service education conference.

This year's recipient became involved in extension activities on the Rolla campus in 1966 when he developed and presented a series of statewide courses on land use problems. Since then these programs have been expanded to include many UMR resources for providing statewide technical assistance in community problem-solving.

One project completed this year was a demonstration model for helping

county governments develop an acceptable plan for solid waste disposal, which must be done in all Missouri counties by June 30, 1974, according to state law.

Prof. Heagler worked with the University's Southeast Missouri area community development specialist in helping St. Francois County develop an acceptable plan a year ahead of the deadline. It already is attracting statewide attention among county officials.

The Rolla professor also has been involved in providing extension programs aimed at urban and inner-city problems as well as those in the rural areas. He has developed training programs for inner-city youth who show an aptitude for mathematics and engineering and he is presently involved in urban transportation problems, the most recent being mass transit in Kansas City.

In addition to these extension activities, Prof. Heagler still teaches civil engineering courses on campus and coordinates all on and off-campus

extension programs for the UMR School of Engineering, where he received his B.S. and M.S. degrees in 1951 and 1954 respectively. He joined the UMR faculty in 1951, was appointed full professor in 1965, and named director of continuing education for the School of Engineering in 1969. He is a Registered Professional Engineer.

Previous winners of the vice president's award have been Lorene Wilson, associate professor of agricultural economics at UMC now retired, 1970; Gail W. King Jr., director of the Kansas City Metropolitan extension area, 1971; and June Lamme, continuing education programmer, Green Hills extension area, 1972.

## Enrollment On Increase

COLUMBIA, Mo.—Continuing its steady growth in enrollment, the University of Missouri this fall has enrolled a record 48,681 students (head count) at its four campuses at Columbia, Kansas City, Rolla and St. Louis, according to University President C. Brice Ratchford.

The enrollment represents an increase of 1,254 students over the 47,427 enrolled a year ago. This makes this year's increase the largest single year gain in enrollment at the University since the fall of 1969 when the increase was 3,285, President Ratchford said.

Enrollment this fall by campus and the change from a year ago is as follows:

Columbia campus: 22,815, an increase of 714 from last year's 22,101. (This figure includes 128 students enrolled in graduate programs conducted by the UMC College of Administration and Public Affairs under a contract with the U. S. Air Force at Whiteman Air Force Base.)

Kansas City campus: 10,087, a gain of 268 over the 9,819 of a year ago.

Rolla campus: 4,190, a decrease of 162 from last year's 4,352.

St. Louis campus: 11,589, an increase

of 434 from the 11,155 of a year ago.

While the Rolla campus enrollment declined by 162, President Ratchford noted the decrease was substantially smaller than earlier had been expected. He said this may indicate that enrollment in engineering is beginning to make a comeback, just as many have believed it would.

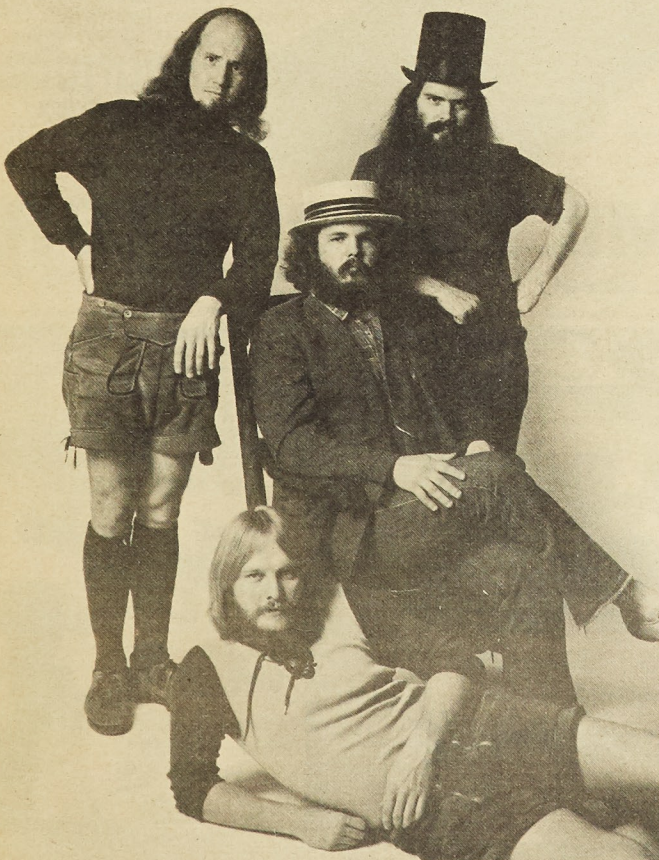

The campus enrollment figures, when broken down into several categories, show the following (excluding the 128 students in the Whiteman AFB program):

By classes, the figures show: freshman, 10,795; sophomore, 8,396; junior, 9,115; senior, 7,654; special and unclassified undergraduate, 1,700; graduate professional (includes students in dentistry, law, medicine and veterinary medicine), 2,350; masters, 6,882; and doctoral, 1,688.

Missouri resident students, 42,090, an increase of 1,693 from last year; Out-of-state students, 6,463, a decrease of 464 from a year ago.

Male students, 30,410, a gain of 381; Female students, 18,143, an increase of 848.

First time freshman students, 7,276, an increase of 264 from last year.

The Howard Hanger Trio will perform tonight at 8:00 p.m. in Centennial Hall. The presentation will be for the "Joyful Jazz Theatre" which will be a potpourri of music, film and drama oriented toward audience involvement.

## Howard Hanger Trio

"Joyful Jazz theatre" a refreshingly unique total experience will be presented by the Student Union Board on November 7 at 8:00 p.m. in Centennial Hall.

The group is the Howard Hanger Trio, since its organization in 1965 has been an experiment in audience involvement.

The program, itself, is composed of multi film and environmental light sequences, bits of drama taken from Shakespeare to Ionesco, awareness games, and culture simulation games (in which the participants are invited to take a role in solving a "community" problem—the community being what otherwise might be called an audience.)

All of this, then, is set in a context of the mass with music which ranges from polytonal Gregorian chants to Bach inventions to Beatles to Bluegrass to strongly progressive jazz-rock.

In essence, this is an attempt to break down the performer-spectator roles.....an establishment of a sense of community.....an awakening of individual expression.....a celebration!

Rather than merely watching and listening as the music happens, the audience is opened up to the possibility of becoming part of the music. "People music" is the result; a shout, a dance, a meditative clam, a concentration of another's eyes: a human expression.

Don't miss this outstanding performance on Wednesday, November 7.

## Jericho Harp

Coincidence and perhaps a touch of fate brought together the two singer-guitarists who are Jericho Harp.

The spring of 1971 found both Jim Thomas and Tom Schmidt alone, musically speaking. The folk trio with which Thomas had been playing clubs and coffeehouses for four years had broken up; Schmidt's five-man rock group had disbanded — and both musicians were considering new possibilities. Though they lived in cities 150 miles apart, an introduction by a mutual friend at a party resulted in their slipping off to a basement room to play guitars and sing until early the next morning. They've been together ever since.

Thomas brought to Jericho Harp a background that includes years of singing in various choirs, folk-groups and even an occasional rock band. He began playing the guitar at 13 (he's now 25) and gave his

first solo concert at 14 for over three hundred people.

Rock music was the main ingredient in Tom Schmidt's background until about a year before Jericho Harp was formed. His fluent guitar style owes a great deal to his years as an electric bassist. Schmidt, 24 years old, began his professional career at age 17.

Jericho Harp began by playing small clubs and college coffeehouses in the central Minnesota area, and as their abilities and reputation grew, started traveling throughout the Midwest. They have just completed a tour that took them to Missouri, Illinois, Iowa, Wisconsin, Michigan, and South Dakota.

Their music? It's clean and bright, full of rich vocal harmonies and sweet, smooth guitar. Their show consists of all original compositions except for a few select numbers by other songwriters.

## Student Council Holds Busy Session

The Student Council will hold its next meeting, Tuesday, Nov. 13 to choose the basketball cheerleaders at 7:00. All coeds are urged to attend the clinics and tryout as many new cheerleaders are needed.

### Bitch Box

The new Bitch Box should appear soon in the New Student Union. Anyone having a "bitch" they would like aired in the Student Council should write it out and drop it in the box.

### Pom-Pom Girls

Pom-Pom Girls are also a scarce commodity on our campus. All girls interested in participating in pom-pom should attend the cheerleading and pom-pom clinic Nov. 6, 8 and 12. Pom-pom girls will be chosen with the cheerleaders November 13.

### Constitution

The Student Council made several minor wording amendments to its constitution. See your council rep for the exact wording or drop by the Council office in the Old Stud U.

### Rolla City Council

Mike Ragan, student council president, has established indirect political ties with the student body and the Rolla City Council. We will now have a student representative to sit in

on the City Council meetings. Although he will have no power, he will be recognized by all members and is entitled to express student ideas. The Council voted Steve Romerman to this post under advice of Mike Ragan. All future reps will be chosen by the Council in its spring session.

### Who's Who

The Student Council voted to foot the bill for the Who's Who banquet unanimously. The Council has traditionally supported the banquet and requisition money for 34 candidates at \$4.50 a meal in the New Student Union.

### Campus Police

The council decided to let the Campus Police Review Board look into the allegations that rose in the petition that was printed in the Miner on the drug arrest on campus. The petition was also sent to the Council,

who decided that a report would be satisfactory under the circumstances available.

### Chancellor Search

Four Miners were chosen by a special Council committee to choose four members for Pres. Brice Ratchford's Search Committee. Although applications were numerous and qualifications ran high, they were narrowed to Larry York, Gerald Meyer, Floyd Harris, and Henry Berek. The Council voted these recommendations on the Chancellor Search Committee.

Any non-affiliated student who is not going to graduate or isn't already represented by the council is eligible to become a council rep. All it takes is 50 non-affiliated student signatures to get on and work for the student body. Come to the Council office on the top floor of the Old Stud U.

## The Missouri Miner

The MISSOURI MINER is the official publication of the students of the University of Rolla. It is published at Rolla, Missouri, every week during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo., under the Act of March 3, 1879. The subscriptions are \$1.50 per semester. This MISSOURI MINER features activities of the students and faculty of UMR.

## DIEHL MONTGOMERY FORD SALES

Rolla, Missouri  
(The Originator of the Student Finance Plan in this Area)

This plan allows the students upon approved credits and job, to buy a new car with nothing down and payments of \$25.00 per month until you are on the job. This plan is not new, Diehl Montgomery Ford has sold over 750 new cars and trucks to graduating students this way. See us for all the details. Also you can use your own insurance or ours.

FORD LINCOLN AND MERCURY

This allows the graduating students to have a new car before he graduates when he really needs it.

"This is a special discount program for students. We will be glad to quote you a price on any Ford or Mercury product."

## APO Helps Rolla Sheltered Workshop

On Thursday, November 1, 1973, the Alpha Phi Omega Service Fraternity engaged in one of its regular work projects. The project took place at the Rolla Sheltered Workshop off of Highway V, behind the Switzer Plant. Cliff Mahar, committee chairman for service projects, was responsible for setting up the activity. Among the different types of work that the sixteen men did, were sort soda cases, transport boxes full of merchandise, load trunks and help fix a water heater. Also some of the members helped with projects that the people were working on. Those few hours worked in the afternoon by the members and pledges were rewarding indeed.

Another project that Alpha Phi Omega has been active in, is helping the Rolla Diagnostic Center by doing general repairs and upkeep of the grounds and facilities.

## NSF Grants Over \$300,000 To UMR

A National Science Foundation (NSF) grant of \$311,200 to the University of Missouri was announced Oct. 19.

The grant is a continuation of an investigation of environmental pollution by lead and other heavy metals from industrial development in the "New Lead Belt" of Missouri.

Dr. Bobby G. Wixson, professor of environmental health at the University of Missouri-Rolla, is director of the research project. "This is an intercampus program utilizing research efforts of faculty in several disciplines," he says.

"It is also a cooperative effort among University personnel and personnel of the industries and governmental agencies located in the 'New Lead Belt.' We are pleased that the Research Applied to National Needs-trace contaminants

section (RANN) program within NSF respects the project's value enough to continue the funding. Last year's grant was \$300,000," he concluded.

Other University personnel conducting research programs related to the project are: Rolla campus — Dr. Ernst Bolter, associate professor of geology; Dr. Nord Gale, associate professor of life sciences; Dr. Charles Jennett, assistant professor of civil engineering; Dr. Krishnier Purushothaman, associate professor of civil engineering; Dr. William Tranter, associate professor of electrical engineering. Columbia campus — Dr. Delbert D. Hemphill, professor of horticulture; Dr. Roy Koertyhonn, associate professor of agricultural chemistry. University-wide — Dr. James Pierce, associate professor of bioengineering and community health.

## Informational Notice

A fire which occurred in a fire-resistive, partially sprinkled auditorium of an Eastern University some time ago, although discovered early by custodians and reported to the fire department, caused extensive damage. The major reason for the extensive damage was the fact that fire equipment did not reach the scene for some time after receiving notification because of blocked fire lanes.

UMR, because of the arrangement of its main campus, is extremely vulnerable to incidents of this nature. Although fire lanes are clearly marked, University Police are very often required to issue Traffic Violation Notifications to vehicles parked in these lanes. In the interests of safety and preservation of University assets, please remain clear of fire lanes when parking on campus.

## Roll Another One

T. P. Roth

Well a lot of things have happened since the last time the column was printed. The biggest event was the Grateful Dead concert last Monday and Tuesday nights. I went Tuesday night and saw a few fellow Miners at the concert thoroughly enjoying themselves. It was, I thought, an excellent concert.

Looking ahead to future attractions in St. Louis we have the Doobie Brothers, Wishbone Ash, The Who and the Beach Boys. I'm waiting on a list of concerts from K. C. and I will try to get it in next week's paper. I had a list for K. C. concerts in October but since my column wasn't printed it didn't appear.

All of you National Lampoon freaks, which would probably include most of this campus,

will be interested in the concert they will perform Saturday, December 1, 1973 in the Kiel Opera House. They will perform off of their album "Lemmings", which if you haven't heard you should find somebody with the album and beg, borrow or steal it from the person and listen to it.

Also in December, John Mayall, Poco and the Eagles will appear at Kiel. All of these should be well worth the time and expense to see.

One problem with my column not coming out until now is the fact that The Who, who are coming November 28, are all ready sold out. Can you believe it? Try and find some scalpers for that concert. It should be really intense.

# Missouri Miner

University of Missouri - Rolla

## University Day November 17

How would you like to...fly a moon landing simulator?...see music in living color?...see a laser demonstration?...see a fiery display where iron oxide and aluminum are turned into molten iron?...play a game of tic-tac-toe with a computer?...see a quicksand demonstration?...make sound go through rock?...see an actual canoe made of concrete?...see a car designed specifically for an urban environment?...try to walk a crooked line while carrying an ordinary suitcase?...receive a souvenir which has been cast out of liquid lead while the student watches?

These are just a few of the exhibits and demonstrations which high school or junior college students can see or participate in Saturday, Nov. 17, on the campus of the University of Missouri-Rolla.

University Day at UMR is an open house where students, their parents, counselors and teachers are invited to come and take a look at the campus.

UMR students will conduct tours of classrooms, laboratories and research facilities. UMR faculty, staff and students will answer questions about enrolling, housing, student organizations and what courses are necessary for the different degree programs.

Registration will be from 8 a.m. to noon in the UMR Student Center. Faculty, staff and students will be at the Student Center from 8 a.m. to 1 p.m. to answer general questions. Guided campus tour groups will leave from the Student Center periodically from 8 a.m. to noon. Every department on campus will hold open house from 9 a.m. to 1 p.m. Faculty and students within each department will answer the more detailed questions about the individual disciplines. Demonstrations and displays will be found within the departments. Luncheon will be served at the University Center from 11:30 a.m. to 1 p.m.

In addition to research facilities, classrooms and laboratories will be open in the departments of chemistry, computer science, geology and geophysics, humanities, mathematics, physics, social sciences, ceramic engineering, metallurgical and nuclear engineering, mining, petroleum and geological engineering, chemical engineering, civil engineering, electrical engineering, mechanical and aerospace engineering, engineering management, engineering mechanics, aerospace studies (AFROTC) and military science (ROTC).

At 1:30 p.m. the Rolla Miners face the Northeast Missouri State University (Kirksville) Bulldogs in a football game on UMR's Jackling Field. All University Day participants are invited to attend the game.

There will be a special program at UMR the day before University Day (Friday, Nov. 16) for National Merit Scholarship semifinalists.

### THE CONCERT LIST

NOVEMBER 22, 1973	8 PM	WISHBONE ASH FLASH
NOVEMBER 28, 1973	8P.M.	THE WHO

DECEMBER 6, 1973	8 PM	POCO
DECEMBER 13, 1973	8 PM Opera House	EAGLES

ALL CONCERTS AT KIEL AUDITORIUM  
OTHERWISE NOTED.

## EDITORIAL OPINION

Much of the turmoil in our national government is unparalleled in our short but illustrious history. No other era has had a list of corruption quite like this one — headed by a vice-president being convicted for a felony and followed by a long list of indictments (some still pending while many others have been followed by sentences) of the most trusted men in top executive positions.

When and if we have a "return to normalcy" the nation should turn its collective mind to how to change our political system and our thinking about prerequisites for being elected to high office. Not only will this be an opportune time for reform on the national level, professional engineers should make an effort to clean up its ranks. Engineering societies should use the Agnew fiasco as an impetus to purge the consulting engineers, especially in construction, and architects who have engaged in graft.

On the national level Americans should question whether or not the red, white and blue balloon pageantry of our political conventions for nominating presidential candidates is really fulfilling the nation's needs. The delegates who really want to know what is going on down on the floor beneath the thirty-five piece brass band and fifty circus clowns watch much of the convention on television anyway. One can't help but wish that a U.F.O. will land during a convention and ask about what is going on there. Universe

politics will undoubtedly be in for radical changes when a Martian is given the answer, "We are selecting our leader."

A convention where a member of that particular party is already president and is up for renomination is particularly interesting. A few contenders throw their hats in the ring; but the president doesn't have to — he owns the rig. The opposing party trying to get into power is usually just as interesting with its mish-mash of muddled rules and regulations. How well attuned to the entire electorate were the procedures of the last two conventions? How much voice did the American people really have in deciding who should run for the top two offices of the land? State primaries in all states would be more equitable, but a national primary seems better. If we aren't going to be more careful, especially with vice-presidential nominations, we might as well abolish the office. Probably nobody would notice the difference anyway.

How much difference is there between our political system and that of the Soviet's? Basically it seems that we know go through almost the same process twice that the Russians go through only once.

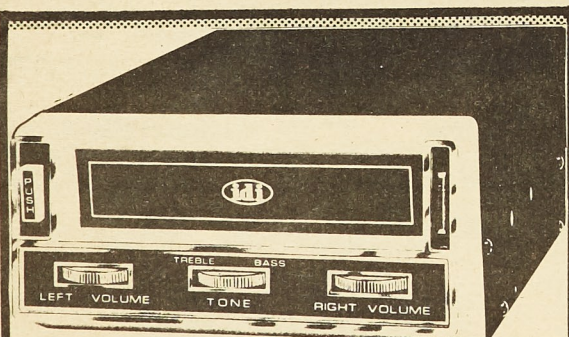

Over here after the presidential nomination is completed, the nominee goes through some sort of slapdash procedure to select a running mate. In Mr. Agnew's case, he

## Benefits Of Auxiliary Enterprises

On the UMR campus, we have a structure known as Auxiliary Enterprises. For those of you who are not familiar with this organization, it consolidates some of the old campus services into one administration. The five branches of AE are: University Center Food Service, University Center Programs and the Student Union Board, University Housing, Housing Food Service, and U. Housing Building Service. Within these branches many benefits are provided for the student. With a Student Union fee of \$17.00 per semester we can see we are being taken care of well. As one visitor stated, "Here in Rolla you have the best University Services per student in the state." With a limited amount of personnel, increasing prices and dropping enrollment, they are doing an outstanding job. One good example of this is pool

tables, pinball machines, air hockey, and football games enjoyed by many students on campus. Their recently initiated check cashing service has helped out many. In one day last week over \$2400 in checks were cashed. At the request of a few students, the University center now sells trap targets. The University Food Service is one part of AE that lately has been under attack by a few that feel their food is not worth the price you pay. With enormously increased food prices the snack bar and cafeteria have increased their prices very little. In fact, it is about the best place in town to get the best food. During lunch hour even some Rolla business men eat there. Plans are even being considered to set up a formal

dining area on an order basis. This would give companies a good place to take some students interviewing them out to lunch.

Auxiliary Enterprises also controls University Housing. Despite increases operation cost and increased food prices the dorm contract still remains at a low \$940.

AE is trying hard to satisfy the UMR student and faculty and make UMR a more desirable place to want to go to school at. If anyone ever has any suggestions or complaints, you should feel free to present them. A staff meeting is held every Monday morning at 9:00 a. m. in Room 218 of the old Student Union. Director, Jess Zink would also be glad to talk to anyone any time. His office is in the old Student Union.

## Let's Talk About 1980

We offer you a bright future in satellite communications, a vigorous new industry that will just begin to hit its stride in 1980. And we're the acknowledged leader. Whenever you see "Via Satellite" on your TV screen, the satellite was built by Hughes.

Of course, we also offer everything else an engineer could want. The dynamic Southern California environment. We pay top dollar. Our offices are modern and attractive. Our laboratories are loaded with the latest equipment.

But most of all, we offer you a chance to grow. We're expanding rapidly. We need new graduate engineers who can step up to new responsibilities. We have a well-organized program to help our engineers keep their skills up to date.

This year we need MEs at all degree levels and advanced-degree EEs in our hardware design and system analysis areas. Some of the activities include communications, controls, propulsion, and structures.

It may be that more than one employment area of our company will be recruiting on your campus on the same day. Please try to sign up on the schedule that is most appropriate for you. It will not be necessary to have more than one interview, although you may if there is time.

### Campus Interviews November 15

# Sensored

By ANDERSON AND ELVEN

Dear disgruntled student.....So are we. But being closer to the situation than you are we are probably even more disgruntled. We know you've heard it all before: Sept. 1, Sept. 20, Oct. 1, Oct. 15, and Nov. 1. Now you hear the week of Nov. 12 is the magic time. During all this time you've sat beside your FM-stereo radio and sadly watched it crank out hours of nothing. Consider how we feel sitting beside a non-existent transmitter cranking out songs for nobody. To sum it all up in a nutshell, we got screwed by Gates Radio Company. They promised delivery of the new transmitter in August and it finally came on October 25. Now we wait, along with you, upon the all-powerful FCC to pass out their blessings in the form of program authorization for 89.7. We feel that because we were screwed you got screwed even worse. We want to make it up to you. To start off there is the Greater Rolla and Vicinity Rock and Roll Revival and Greaseball. This will slip and slide your way Saturday night, November 17, from 7:30-11:00 p.m. in the St. Pats Ballroom. You've paid enough, this is free. Meanwhile, we'll have been going 24 hours and we'll stay that way for as long as possible. So you'll never have to be without your kind of music. Other goodies are in store to live up the area and get good vibes back in the air. It's been hard for you to listen to nothing; it's been hard for us to play it. There's a light at the end of the tunnel—the stereo light of KMNK.

Searching for searchers.....We're not quite sure how far along the University is in finding a search committee to pick our new chancellor. We feel, however, that a few qualifications for the committee should be set down so that the President of the University, the Right Honorable Brice C. Ratchford, has some basis in choosing the members. First he must decide what kind of new chancellor we want. Do we want an old stodgy middle age medicare, or a young dynamic? After all, he has to choose a committee that will select the kind of guy he wants, right? The first qualification is their height. It is a proven fact (details available upon request) that tall men, on the average, are more successful than short men. Because of this fact we have two reasons for wanting to see Brice pick tall men. They need to be successful in their search and they need to be able to see our new successful chancellor when they pick him out of the crowd of applicants that is sure to show up. How about their eyesight? It must be good in order to see beyond their noses. All too often in situations like this committees get the idea that "the right man is

## Our Man Hoppe Who's Afraid of UFO's?

Report from Ymtk Xptl, (cq) Commander, Starship MC-CXXIII, to The Council on Interstellar Colonization.

Fellow Betelgeuseans: Pursuant to your instructions, I voyaged to the planet, Earth, to determine whether the inhabitants were of sufficient intelligence to be enslaved and put to work on treadmills in order to manufacture our much-needed beverage, shlock. (cq)

During 16 revolutions of the planet, I made numerous landings to gain a working knowledge of the history, culture and social structure of the subjects. And while their intelligence seemed relatively high, my suspicions were aroused. For though I was sighted repeatedly, no one seemed surprised. Indeed, for some reason they appear to have lost their capacity for surprise.

To determine why, I approached an inhabitant later identified as Joe Sikspak, American, and issued the greeting required by Interstellar Law: "Take me to your leader!"

"I'm glad you asked me that question," Sikspak said, opening a beer, "this week. I think this week it's Nixon again on account of he's won the country's admiration by going back on his word about never handing over the tapes to Judge Sirica.

"Now a couple of weeks ago I would've said it was going to be Agnew. Everybody sure thought highly of his dignity, integrity and courage when he said he wasn't a crook and would never resign. But he turned out to be a crook and resigned.

"So Nixon nominated Gerry Ford to take his place, which everybody figures is good insurance against Congress impeaching him. This Congress wants to do because Nixon swears he'll never give the tapes to the Watergate Committee.

"Instead, Nixon finally says, he'll have Senator Stennis launch 'a full and vigorous investigation' of the tapes. And the Senator's just the man for a vigorous investigation. Because while he's 72 years old, he's only got two bullet holes in him.

## EACH YEAR AIR FORCE ROTC PRODUCES THOUSANDS OF HIGHLY TRAINED DEDICATED CIVILIANS

Air Force ROTC's basic job is producing officers for the Air Force. And it does. These thousands of young men and women each year, fresh from college campuses, bring new approaches and new thinking to the United States Air Force. Many of these men and women will make a career in the Air Force.

But something else happens each year. Thousands of young men and women trained and commissioned through Air Force ROTC return to civilian careers, after one tour of active duty. They bring maturity, technological know-how, and leadership ability to the economy. They are welcomed by employers, government agencies, and anyone else needing men and women who know how to organize jobs and get things done.

Our Air Force ROTC Corps at the University of Mo. at Rolla is a vital part of this national program leading to a commission in the U. S. Air Force for young men and women. Members of the Professional Officer Course receive \$100.00 per month tax free subsistence. Three and two year scholarships are available in competition.

When you think of AFROTC as a proven way to produce good officers, remember something else. It's also a proven way to produce good civilians.

Drop by AFROTC at the State Land Survey Building and visit about the program—sit in on a class if you like, or call 341-4750.

# Hoppe Editorial Opinion

Editorial Continued From Page 4

"Now I don't wish you to think from this we don't have no honest men in Washington. We had three, Richardson, Ruckelshaus and Cox. So Nixon gave then the old heave-ho for wanting him to give Sirica the tapes which he gave him.

"But I got confidence the tapes will prove Nixon clean—mainly because he was the only guy in the room who knew he was bugging himself. And..."

"Excuse me, Mr. Sikspak," I interjected. "But don't my 16 claws, pointy head and green skin surprise you?"

"We got a lot of weirdos around here," he said with a shrug. "The only thing that's surprised me lately was the Mets didn't cop the Series."

I immediately took off for Vega III to enslave the Globbs instead. While they devote every waking hour to flagellating themselves with their tentacles, they at least demonstrate a rudimentary sense of order.

As for these Earthlings, their obvious irrationality and incapacity for surprise makes them clearly unfit to work on a shlock treadmill.

## NOTICE

The 1974 St. Pat's Parade theme is 'movie hits'. All organizations are invited to enter floats. Give the movie hit which your float will depict to Jim White at Lambda Chi Alpha, 1705 Pine by December 10.

had been elected governor of Maryland by running as a liberal, strongly advocating civil rights. After being elected he was anything but either one. After becoming vice-president he criticized the courts for their leniency with convicted felons. The courts leniency later kept him out of jail. Not long before he was indicted he said that our system of protecting individual liberties had never been working better. After his indictment he said that he couldn't receive a fair trial. Apparently some of our contemporary jargon has gone by the wayside. What you see is not always what you get.

On one point Mr. Agnew has remained steadfast. He has never given up his attack on the press. Agnew's vituperations against the press after the 1968 election should have been a harbinger of his downfall. Without a free press we would never have had Watergate revealed before our eyes. Agnew and all of the rest of the administration would still be in business at the same old stand.

Some argue that all politicians accept some form of graft. Even if this is true staunch backers of the administration shouldn't stress this point too much. Congressmen might try to make their constituents believe that they are different from the rest by dissociating themselves from such activity by impeaching the President.

This administration might really become known as the "what you see is not what you get" administration as far as

the Watergate tapes are concerned. With prosecutors being fired, attorney generals and assistant attorney generals resigning, who knows what will actually get into the courts as Watergate tape evidence.

The story is circulating that during his younger years Richard Nixon was captain of his high school basketball team. In one game after being called for his fifth personal foul the referee told him to leave the floor. Indignantly, Nixon immediately demanded that the referee be fired and his license suspended. He and his teammate H. R. Handyman flatly stated that that rule was true but that it didn't apply to captains, and they made it perfectly clear that Nixon was the captain with a capital "c".

The opposing team protested vehemently and after a series of appeals the case ended up before the state athletic commission, which demanded to see the game film that Nixon's school had made of the game. Captain Nixon adamantly refused to turn over the film, contending that the film clearly showed a rip in his shorts. Showing such a film before a state athletic commission would cause irreparable injury to both his reputation and the school's prestige. After demanding the film the commission had to throw out the case (the commission pleaded nolo contendere) after getting it because Nixon's figure was hidden on it by a black square. It has been hanging over him off and on ever since then.

# Anderson and Elvin

Continued From Page 5

right here if we can just find him." Along the same line the members should also be anemic and in need of fresh new blood. Hopefully they also will be partially deaf, preferably in the left year. That way when they make their morning dedication to the rising sun, thunderings from the north will not disturb their concentration. Another qualification could be hemorrhoids, since that would keep the committee members on their feet. Keep these qualifications in mind, and once the search committee is picked you can compare each of them against the ideal committee man. Meanwhile, just forget that a ship without a captain is like a fish without water—floundering.

D.O.A.....Lots of people have written lots of things about what it's like to live in Rolla, how dull and listless it is to attend UMR, and comparing it all to hell itself. Well, after columns of print and hours of talk and jokes and skits and everything, the perfect example of mid-Missouri living has finally been discovered. It's a Broadway play called Rosencrantz and Guildenstern are Dead, and the UMR Theatre Guild is throwing it your way come the end of November. You remember the Theatre Guild? Their those same people who brought you the entertaining productions of "Charlie Brown" and last spring, "Sweet Charity". You'll roll over dead from laughter when you see R and G are Dead, so plan on taking it in, and see Shakespeare twisted right into Rolla, Mo.

Credits.....The search committee will appear eventually, though what they do then remains a secret.....KMNR appears to be ready to give it all they've got, as soon as the FCC says they can give it. Don't worry, they'll put out.....that's all.

## Miners Lose To Wash U. In Offensive Battle

LaFollette did his thing again but it wasn't enough, as Washington University capitalized on offensive mistakes in the last half to inch out UMR. For the second week in a row Rick LaFollette, senior quarterback, came on in relief and was able to move the Miners for two touchdowns.

UMR had jumped out to a 14-0 lead in the opening minutes of the game on a 14 yard pass from Greg Haug to Merle Dillow, and a 79 yard run by Mike Keeler. Haug was effective, as usual, but not so much as in some of his previous games. He was dropped three times for 25 yards. The Miners did no more scoring until the third quarter when LaFollette came in. In the meantime, Washington U. had four touchdowns.

After they had tied the score, 14-14, the Bears got two lucky breaks. Halfback Mike Joshua, who otherwise had a fine day, fumbled the ball on his own ten yard line. Wash. U. put the ball in from the five a few seconds later. The defense, who looked good for most of the game, held them for another fifteen minutes. Then Mike Keeler fumbled a fair catch on the Miner two, and Bear quarterback Marvin Crider scored on the next play.

LaFollette then went to work as he did against Central Missouri State and moved UMR 74 yards for a score. He then came back with 64 yards scoring drive, capped by Kenton Hupp's one yard touchdown plunge. On all four touchdowns, Mike Hobick converted the extra point. He has not missed a conversion yet in seven attempts.

Senior defensive tackle Steve Suellentrop had an outstanding second half. In the fourth quarter, Wash. U. was threatening another touchdown, until Suellentrop got to Crider for losses of three and four yards. As it was, the Bears' field goal was enough to win.

Merle Dillow was everywhere once again and has emerged as a key part of the Miners' offense. He had a total of 108 yards receiving, and caught two Miner touchdown passes.

UMR kept up its reputation as one of the nation's leading passing teams. Haug completed ten of fourteen passes and he and LaFollette teamed up for a total of 202 yards by the air. The Miners had 125 yards on the ground, aided by Keeler's 79 yard run; one of the longest in Miner history.

UMR is now 2-5-1 and Washington University is just the reverse, 5-2-1, for the year.

## Harriers Finish Season With Fine MIAA Showing

With the MIAA Conference meet Saturday the Miner cross country team finished the season on a fine note. In a meet totally dominated by Southwest Mo. State, the Miners captured sixth place with a fine performance in the always tough MIAA meet. SMS easily took first place with a total of 17 points which is a new winning team score for the meet. In a battle for the next three places and up-and-coming Central Mo. State squad took second place with Northeast Mo. and Northwest Mo. taking third and fourth. Finishing fifth just 18 points ahead of the Miners was Southeast Mo., and Lincoln University took seventh.

The winning individual honors went to Norton of South-

west who ran the five mile Central Mo. course in 25:22. Finishing first for the Miners was Junior Mike Schepflin who finished 25 in a time of 27:17. Other Miner runners where Bill Maples who finished 29, David Craycraft who finished 35, and Paul Andrews and Lance Jensen.

With the sixth place finish in the conference meet, the Miners capped one of their finest seasons ever. With a 6-2 record in dual meets and their third place finish in the SIU Invitational Coach Algood was extremely pleased with the fine season that the team had, and the fine season that many of the squad had. Overall the prospects look even better for the years to come because of the extreme youth of the team.

## Columbia Mauls UMR Rugby Club

The UMR Rugby Club slipped to 4-2 on the season as the Mizzou Rugby Club blitzed by them 34-4. The game was out of control by the end of the first half as M. U. led 14-0.

Rolla's only offense came in the start of the second half as they worked the ball down the field on a series of plays in which they controlled the ball. The try came as a Missouri player was swarmed over on the five yard line and Rick Scola placed the ball down for the score. The conversion was wide to typify UMR's afternoon.

The Missouri control of field play was not expected since they had lost three weeks ago to Central Missouri State, 12-8,

who Rolla had defeated 10-7 last week.

The second team looked better as they are gaining experience. They held the Mizzou second side to only one try and a penalty kick. M. U. scored first as they broke loose in the early moments and converted the kick. Rolla came back in the first half as Jack Greenley covered a ball in the end zone for a score, but the kick was low. In the second half, M. U. converted a penalty kick for a final score of 9-4.

This weekend, UMR plays Kansas City Rugby Club Saturday and River Quay Rugby Club Sunday in Kansas City to end the season.

## Kickers Fall Early At Evangel College

The Miner Kickers are back home in Rolla this weekend to face Southwest Missouri State Sunday at 2 p.m. UMR had scoring problems in the Evangel College tournament last Friday. In their first game, the Miners controlled the ball more than Cwntral Methodist but one of the Fayette players had a knack for finding Rolla's goal nets, he had 4 goals. The final score was 5-0 putting Rolla in the consolation bracket against season foe Lindenwood. Now that second game was the most exciting yet. Both teams were tired from the morning round of play, countless shots were taken at both goals with only Lindenwood finding a single score. Trailing 1-0 with only three minutes left the

Miners pressed everybody except the goalie forward. With a minute remaining, Ken Jenkerson found the upper right hand corner of Lindenwoods nets. The referee informed both teams to remain on the field in the event of a tie. But Lindenwood apparently didn't want to participate in a battery of penalty kicks and instead scored from their center off to beat Rolla for the second time by the same score of 2-1.

The winner of the Evangel tournament was Southwest Missouri State so Rolla will have their hands full when Springfield rolls into town this Sunday at 2:00. Springfield had to beat Oral Roberts of Tulsa, Oklahoma, Southern Cal., and Evangel to win the tournament.

## IM Basketball Play Continues

Twenty-four games were played in Intramural basketball action last week. Four games were played in League One. Kappa Alpha defeated Wesley 33-24, Kappa Sig trounced Alpha Phi Alpha 52-26, BSU eked out a win over Triangle 33-32, and PiKA defeated 36-24.

Action was heavy in League Two, with six games being played. Engine Club was a double winner for the week. Their first win was 36-31 victory over Delta Sigma Phi, and their second was a 44-34 win over Sigma Phi Epsilon. Sigma Tau Gamma handed Sigma Phi Epsilon their second loss of the week by a 37-24 score. TKE split in their two games last week. They crushed the International students 51-21, but were upended by Beta Sigma Psi 29-22. The International students also lost twice last week as

they were beaten by Liahona 38-32.

Six games were played in League Three last week. Tech Club and Campus Club were both double winners. Tech defeated Theta Xi 41-33, and mauled Phi Kappa Theta 55-32. Campus Club won a hard fought victory over Acacia 41-34, and then just barely squeaked by GDI 53-52. Also in League Three, Phi Kappa Theta gained a split for the week by defeating Alpha Epsilon Pi 52-13, and GDI smashed Newman by a score of 67-38.

Five games were played in League Four. Delta Tau Delta defeated the Mates 35-30. MRHA handed Sigma Nu a 52-25 defeat. Lambda Chi Alpha handed the Mates their second loss by a score of 44-38. Pi Kappa Phi forfeited twice, once to Lambda Chi Alpha, and once to Sigma Pi.
