UMR engineer runs for office

By KEN HARDY

One of the politicians running for office this year is a UMR engineer.

Steve Gardner, who is

running for the Eighth Congressional District seat from Missouri, received a degree in mechanical engineering from Rolla in 1970.

Speaking at the Phelps County courthouse last Thursday, Gardner stated a belief that technical answers are needed to many of the problems of today. He backs

increased investment in research and development and favors continued development of nuclear energy.

October 4

Parents' Day scheduled

SOURCE: OPI

A full slate of activities is planned for Parents' Day at the University of Missouri-Rolla Saturday, Oct. 4.

The schedule is as follows:

Friday, Oct. 3 — Concert, Jazz I, 7 p.m., St. Pat's Ballroom, University Center-West.

—Board of directors meeting, UMR Parents' Association, 7 p.m., Missouri Room, University Center-East.

Saturday, Oct. 4 — Registration, 8:30 to 11 a.m., St. Pat's Ballroom, University Center-West.

—Music. UMR Wind

Ensemble, 8:30-9 a.m. and 10:30-11 a.m., Miner Lounge, University Center-East.

—Board of directors meeting, UMR Parents' Association, 9 a.m., Missouri Room, University Center-East.

—Campus tours, from University Center, 9 to 11:30 a.m.

—Faculty Reception-Refreshments, 9 to 10:30 a.m., Chancellor's Welcome, 10 a.m., Centennial Hall, University Center-East.

—KUMR Radio openhouse, and gallery exhibit of arts and crafts, Wilson Library, 10 a.m. to 5

p.m.

—Varsity Soccer Game, Miners vs. Missouri Baptist College, UMR Athletic Field, 10:30 a.m.

—UMR Parents' Association buffet luncheon, 11:30 a.m., Bullman Multipurpose Building.

—Varsity Football Game, Miners vs. Lincoln University, 1:30 p.m., Jackling Field.

Academic departments, residence halls, fraternities and sororities will be open, and all events except the football game and luncheon are free. Families and friends of UMR students are invited to attend.

Research project needs males

SOURCE: OPI

The legendary colonial hero, Miles Standish, was so timid around women that he sent his friend, John Alden, to do his courting for him. And Charlie Brown of the "Peanuts" comic strip, worships the little red-haired girl from afar, and finds himself agonizingly tongue-tied in her presence.

These are extreme examples of shyness in the presence of the opposite sex. It's called "dating anxiety" or "heterosexual anxiety" by psychologist.

Such shyness is felt by almost everyone at some time or other, says Dr. Dee Haemmerlie Montgomery, clinical psychologist at the University of Missouri-Rolla, a researcher on the subject.

"Only 7 percent of Americans interviewed in a 1977 survey said that they had never experienced shyness," she says. "The person who is shy in ordinary social contacts may be even more anxious in a

dating situation."

The problem is common among high school and college students, according to extensive research done during the past decade. A preliminary survey last spring indicated that UMR students were no exception: Dr. Haemmerlie reports. But she adds, no one needs to remain shy.

This fall she is working on the second phase of her project to study methods of reducing heterosexual or dating anxiety and methods of building social and dating skills. She feels that there is a need for such a study.

"Young people can get training in academic and vocational subjects and such activities as dancing and tennis. But there is no formal training in handling emotional anxiety or in learning social-dating skills," she points out.

Students will learn specific social skills. These include non-verbal communication (eye contact, gestures, posture, facial expression,

giving attention) what to say in different situations, and how to say it (voice, tone, fluency, volume).

The UMR psychologist expects the students to apply what is learned to more than just helping them to be more at ease with the opposite sex.

"In learning the techniques to cope with dating anxiety, the student should learn how to handle emotions and anxiety in other situations. And the techniques used to build dating skills, which are really basic social skills, can be applied to building any skill," she adds.

UMR male students who are interested in participating in the research project in improving social-dating skills should contact Dr. Haemmerlie, 110 Humanities on Social Studies, 341-4810, as soon as possible to get a form to fill out. Sessions in improving social skills will begin this month.

On Oct. 1 at 8:30 a.m. two men died at UMR's GROW (Gasification Research on Wood) project. They were Kurt Hekamp, a UMR student, and Don Allison, a UMR employee. Hekamp had climbed into a tank to scrape loose a build up of sawdust. Allison climbed in to help, when he apparently saw Hekamp overcome by gas. A study is being made to determine the nature of the gas. (Photo by Joel Goodridge)

Calendar Of Events Calendar Of Events Calendar Of Events Calendar Of Events Calendar Of Events

THURSDAY

TONIGHT'S MOVIE

The Great Films Series presents "Great Northfield Minnesota Raid," directed by Phillip Kaufman, at 7:30 p.m. in the Miles Auditorium in the ME Building. Season ticket or \$2 at the door.

A.C.M.

On Thursday, October 2, the Association for Computing Machinery will hold a meeting at 7 p.m. in the Humanities-Social Sciences Building Room G-5. Mr. Don Hall, of Arkansas Best Corporation, will speak on "Teleprocessing in the Transportation Industry." All members are urged to attend. Refreshments will be available.

ETA KAPPA NU

Eta Kappa Nu business meeting and pledge smoker will be on Thursday, October 2nd. The meeting will start at 6:30 in EE 105, and the smoker at 7:00 in EE 104. Today is the last day to decide prospective members, join today! There will be refreshments after the meeting!

M-CLUB

There will be a short meeting for all members tonight at 7:00 in the M.E. building Room 121. All members please attend.

FRIDAY

LAMDA CHI ALPHA

The Lambda Chi Alpha Fraternity is sponsoring its second annual Night at the Fights boxing match for charity, to be held on Friday, October 3 at 8 p.m. All interested boxers are invited to attend workouts at the UMR Multi-Purpose building, Tuesday and Thursday evenings at 7 p.m. All equipment is provided. For more information you may call the Fraternity house at 364-9901 and ask for Kenny Strope.

LECTURE ON ALGERIA

A slide presentation and lecture about Algeria will be held at 7:00 p.m. on Friday, October 3, in the Mark Twain Room of the Student Union.

The speaker will be Dr. Marshall Findley of the Chemical Engineering Dept. This is the first of a series of lectures planned by the International Students Club, and all interested persons are invited to attend. Coffee and donuts will be served.

TUESDAY

A.C.M.

On Tuesday, October 7, the Association for Computing Machinery will hold a meeting at 7 p.m. in the Math-Computer Science Building Room 209. Mr. Steve Smith, of Tennessee Eastman, will speak on the "Development and Implementation of an On-Line Application System." All members are urged to attend. Refreshments will be available.

Missouri Miner

The Missouri Miner is the official publication of the students of the University of Missouri at Rolla. It is published weekly at Rolla, Missouri. The Missouri Miner features activities of the students and faculty of UMR.

THE MISSOURI MINER
T-1, 341-4235
University of Missouri-Rolla
Rolla, MO 65401

SEG

There will be a brief business meeting in Room 305 Norwood on Oct. 7 at 7:00 p.m.

COUNCIL OF GRADUATE STUDENTS

The Council of Graduate Students will hold a meeting on Tuesday, October 7, 1980 at 3:30 p.m. in the Missouri Room of the University Center East.

All departmental representatives and other graduate students are urged to attend. Business to be discussed includes confirmation of new treasurer, the fall picnic, a new payroll system, review of the faculty bylaws, committee reports, and new business from the floor.

KAPPA MU EPSILON

There will be a meeting on October 7, Tuesday, at 6:30 p.m., Room 209. The guest speaker will be Dean Robert Davis, speaking on "Finite Element Methods". Refreshments will be served.

COMMUNICATIONS CLUB MEETING

There will be a Communications Club meeting next Tuesday, October 7, 1980. The meeting will be held in 204 Humanities-Social Sciences, and all members and interested persons are urged to attend.

UMR MOTORCYCLE CLUB

The UMR Motorcycle Club will meet Tuesday, the 7th of October, at 6:30 p.m. in Room 104 of the Humanities Bldg. Anyone who likes to ride motorcycles is encouraged to attend.

ANS

The UMR student branch of the American Nuclear Society will have a meeting on Tuesday, October 7, 1980, with guest speaker Ray Bono, UMR Health Physicist. He will discuss decontamination procedures and ionizing radiation. The presentation will begin at 7:30 p.m. in Room 104 of the Mechanical Engineering Building. Anyone interested is invited to attend.

WEDNESDAY

SPELUNKERS' CLUB

The M.S.M. Spelunkers go cavin' almost every weekend. Come by one of our meetings any Wednesday at 6:15 in Room 305, Norwood Hall.

WESLEY

Dr. Bob Barefield will discuss stress and anxiety on Wednesday night at 6:00 to prepare UMR students for mid-terms. Everyone is invited. Wesley is located at 403 W. 8th, across from the post office parking lot.

V. H. McNUTT COLLOQUIUM

The V. H. McNutt Colloquium presents a lecture entitled "The Michigan Basin" by L. L. Sloss on Oct. 8 in Room 305 of Norwood Hall. There will be no charge or registration fees. Light refreshments will be served.

NODAY

DECEMBER GRADUATES

If you will be completing requirements for a degree at the end of the fall semester, you should make application for that degree by going to the Registrar's Office at your earliest convenience. The Registrar's Office will not be able to include you with other students finishing undergraduate and graduate degrees on December 21 unless you make application with Lauren Peterson.

WANTED

Reporters & Writers

The MISSOURI MINER is looking for students interested in working part-time as reporters and writers. Apply in person at MINER Office in Building T-1, Monday night at 9:00 p.m. Experience is helpful but not necessary.

BLUE KEY MINER OF THE MONTH

Applications for Aug./Sept. Blue Key Miner of the Month may be picked up from the candy counter. Deadline for return is Monday, Oct. 13, 1980.

A.C.M.

Attention all A.C.M. members: Resume forms for the A.C.M. resume book are now available in the computer science office room 325 M-CS. Please return your TYPED resumes to computer science office by 4:30 on October 17.

S.W.E.

The Society of Women Engineers is now accepting resumes for our annual resume book. Forms may be obtained at the Student Union candy counter, at the S.W.E. office in Building T-23. This service is free for S.W.E. members and costs \$1.00 for non-members. The deadline for completed forms is October 7.

CHANCELLOR'S OPEN OFFICE

The chancellor's open office hours will be 8 to 9 a.m. and 4 to 5 p.m. Monday through Friday as always. This is a time for faculty, students and staff to come in and discuss matters of concern with the chancellor.

FINANCIAL AID

The Student Financial Aids Office at UMR is constantly trying to improve our methods of informing students about what types of Financial Aid are available. One idea would be to meet with any fraternity, sorority, dorm, or group to discuss questions or problems you have about Student Financial Aid.

Mr. Bob Whites and Mr. David Carr will be present at these sessions if there is sufficient interest. These sessions will be held during the month of November. Please contact the Student Financial Aids Office, 106 Parker Hall, 341-4282 to discuss times which can be mutually agreed upon.

SUB Scripts

This Sunday the Indoor Recreation committee of SUB will present the movie Murder by Death. It will be shown in Centennial Hall at 4:00 p.m. and 6:30 p.m.

For all you future Minnesota Fats, or if you just enjoy playing Billiard, SUB will sponsor a Billiards tournament beginning October 15th. Sign ups for the tournament will begin on Wednesday, October 1st. The sign up sheets will be posted in the University Center.

On Friday, October 10th the Social committee will

have a Coffeehouse featuring Jasmine. It will be at 8:00 p.m. in Centennial Hall.

The Special Events Committee of SUB is holding a campus wide voting for Homecoming Queen. It will be Wednesday, Thursday, and Friday, October 15, 16, 17 and 9:00 a.m. to 2:00 p.m. near the hockey puck. Everyone with a valid UMR ID is encouraged to vote. Last year there were 4,000 votes compared to 1400 votes for the year before. Let's have a good participation again this year!

New psychologist at UMR

SOURCE: OPI

Dr. Debra Robinson, new psychologist in the University of Missouri-Rolla Counseling Center, has such a wide range of interests in psychology that it has been hard for her to narrow them down to one specific field.

"In general, my interest and experience are all oriented to life planning and development," she says. That's the field she will pursue as a counseling psychologist at UMR.

She has had experience in a variety of fields. She has been a counselor and psychology instructor at the

University of Illinois, Champaign-Urbana, where she received her M.A. and Ph.D. degrees. As a graduate student, she worked as an intern in the psychiatric ward of a Veterans' Administration Medical Center. She has been a counselor at Parkland College, a community college in Champaign, where, she says, "The counseling office did everything from admissions to placement."

Before coming to Rolla in August, she was coordinator of outreach programs in a mental health agency in her hometown, Danville, Ill.,

where her responsibilities ranged from coordinating an early intervention program for children under three to developing comprehensive community services for the handicapped.

She has found UMR students bright and highly motivated. "Because they are so intelligent, it is usually easy to work with them to help them find their own answers," she says.

She also likes what she has found in Rolla.

"One of the first things that I noticed when I came to Rolla was that everyone is so friendly. And I was pleased to find that there are

numerous things to do and see, which is unusual in a town this small," she adds.

She especially loves the hills, trees and waterways, and her husband, J. Kent, agrees. He's a lawyer, also a Danville native, who plans to open his office in Rolla in the near future.

"We're from the flatlands — corn country — so we really appreciate the scenery," Dr. Robinson explains. "Besides that, we enjoy the many opportunities for outdoor activities such as canoeing and backpacking."

Dr. Debra Robison.

(OPI Photo)

Coal can be America's future energy source

SOURCE: OPI

Coal, a fuel largely overlooked in recent years in favor of gas and oil, can be the fuel of the future and ease this country's energy shortage, believes Dr. R.V. Ramani, visiting professor of mining engineering at the University of Missouri-Rolla.

"Coal represents more than 80 percent of the proven energy reserves in the U.S.," says Ramani, a professor of mining engineering at The Pennsylvania State University. "More important, it is widely distributed around the states, including parts of Missouri."

"We need a policy decision to use coal and to stop depending on someone else for our energy needs. It must come soon, but even if that decision for a strong commitment to using coal were made today, self-sufficiency would not happen overnight," he continues.

The professor points out that it takes about seven or eight years to put an underground mine into production, three to four years to put in a surface mine.

The commitment to coal should be easier for the

government to make because of the commitment in the past two decades by government at all levels to environmental protection and improving the health and safety of miners. "Many environmental and health and safety issues related to the use of coal have already been addressed," he says.

At the same time, he takes issue with coal's widespread reputation as an environmental polluter.

"Air, water and land pollution from the 'greenhouse syndrome' to acid rain are all attributed to coal. Actually we do not know yet what is the real problem, how much is attributable to coal and how much to auto emissions and other sources that go into the atmosphere," he explains.

According to the visiting professor, coal alone will not solve the energy problem. "We have to use all available sources, and increase the availability of every source," he says. "At the present time we are using about 74 quadrillion BTUs a year; in the year 2000, it may be up to anywhere between 120 to 150 quadrillion BTUs."

One of the problems in using coal is that it is a solid. Liquefaction and gasification of coal are two

processes which will make coal more attractive as a fuel. "The technology for these processes is already known; it is simply a matter of improving and adapting techniques to make them economically feasible," he adds.

Ramani is internationally known for his pioneering work in computer applications to many different mining operations. He says that the computer has a great place in helping decision makers, but that appreciation of what the computer can do for the mining industry requires a knowledge of mining and the limitation of computer use in that field.

"In mining, we are dealing with a complex material in a complex environment. We can't always predict what will happen; we have to analyze alternatives and computing can be extremely helpful here," he explains.

During his week-long stay at UMR, Dr. Ramani met a busy schedule. He lectures to one or more classes each day, gave a public seminar, and conferred with faculty and students.

This is his first trip to UMR, although he has known all the mining department faculty members previously through professional contacts. He says that he has been impressed with the department — its students and faculty, and with research, such as the hydrominer, which has been developed at UMR.

He has found that being a visiting professor is a rewarding experience.

"I think such visits are very useful to both the visiting professor and the institution he visits in helping us understand and appreciate the work each is doing," he says.

Placement office provides low cost service to students

By SUZY BRUNER

"Placement is a service provided by the University and there should be no cost for the student to receive that service," said Larry Nuss, Director of Career Development and Placement. Nuss was explaining the services offered by UMR's placement office, located downtown in the Buehler Building.

One of the services provided is an interview seminar for students, where they learn how to conduct themselves in an interview. Another positive factor of the placement office is the

availability of audio-visual cassettes that contain guidance and information about different companies. These topics are available at the Wilson Library.

Each student pays a fee of \$3.50 to the placement office which covers the cost of duplicating resumes to be used by the various companies, but this is just a handling fee. The interviews themselves are set up free of charge.

There is a Placement Advisory Committee consisting of a faculty member from each academic department and five Student Council representatives. The

purpose of this committee is to suggest improvements for the way the placement office is run. They meet two or three times a semester, and one of their recent ideas was to set up a priority system. This allows a student to pick four preferred companies, and when these companies come to interview, the student can sign up for his interview one day early.

The placement office also offers counseling and career guidance for students who aren't sure about the type of job they want.

Nuss says that for every class, the placement office finds jobs for ninety-five percent of the students that are seeking employment. The office also handles placement of alumni that are changing jobs.

Dr. Sitton returns to UMR

SOURCE: OPI

Dr. Oliver (Ollie) Sitton, who holds three degrees from the University of Missouri-Rolla, has returned to campus this fall as an assistant professor of chemical engineering.

"I wanted to get into teaching and basic research in biochemical engineering, and, because UMR has an excellent reputation in industry for its engineers and scientists, I thought it would be the place for me to work," he said.

Sitton, who was awarded the Ph.D. degree in chemical engineering in 1978 and was subsequently employed as senior research engineer for Monsanto, will work with

UMR undergraduates and graduate students on fermentation and reactor design studies. He's finding students in his biochemical engineering and heat transfer classes "interesting and full of ideas."

Sitton earned his B.S. and M.S. degrees in chemical engineering in 1975 and 1976 respectively from UMR. He is a member of the American Institute of Chemical Engineers, Sigma Xi and Phi Kappa Phi honorary and professional societies.

He and his wife, Marilyn, and one son Benjamin (six months), live on Route 2. For fun, they bowl, do wood-working and hope to float and camp when Benjamin is older.

Beta Sigma Psi wins awards

Submitted By
BETA SIGMA PSI

On the weekend of September 27, 1980 Eta Chapter of Beta Sigma Psi of Rolla sent its delegates to Omaha, Nebraska for the Beta Sigma Psi National Convention. Eta came away with three out of five awards given and

an honorable mention. They were the Baehr Award for outstanding Scrapbook, Edwards Award for outstanding Chapter Management, Aionios Award for outstanding Recruitment and membership education, and an honorable mention for scholarship.

Year after year, semester after semester, the college plan from Fidelity Union Life is the most accepted, most popular life insurance program on campuses all over America.

Find out why.

Letters To The Editor

Dear Editor:

Congratulations to TKE for once again finishing first — this time beating all competition combined in yearbook photos. Years from now, when we want to reminisce about our days at UMR, what will we have to remind us? A TKE rush book, that's what! We can't understand how the yearbook editor could allow such an obviously biased volume roll off the presses into the hands of the UMR students who paid plenty for this keepsake.

This is especially evident in the intramural photos. One could scarcely determine whether any other organizations participated in volleyball other than TKE (although, disregarding the winners, TKE's got their fair share of shots in sports they somehow didn't win). It also appears that TKE was the only participant in badminton, softball, racquetball, and a plethora of other events.

Even disregarding the presence of many photos of TKE's, we feel better judgment could have been exercised in determining

which pictures to use. Where are the photos of the football champions, Sigma Phi Epsilon? TKE's are shown under a sign proclaiming their #1 status among TKE chapters, yet where is the recognition of other fraternities holding the same honors from their national organizations? Sigma Pi won in the Greek Week games (granted, TKE won overall), yet we see no Sig Pi's in the photos of the Greek Games. Instead of seeing the Phi Kaps pulling their winning chariot, we're treated to TKE's pulling theirs. Common courtesy dictates that we should be treated to photos of those who rightly deserve them.

Hopefully, the present editorial staff of the Rollamo will use better judgment when assembling the material for next year's yearbook. As we have shown, there are vast discrepancies in this year's Rollamo. Whether the abundance of photos of TKE's was intentional or not, it represents a staff with many shortcomings. Hopefully, the people with whom we entrust that por-

tion of our activity fees will not disappoint us next year.

Signed by 40 UMR students.

Dear Editor,

The prospect of cheerleaders at UMR has long been a standing joke

(Cont. on pg. 5)

I support the agriculture movement

AUTHOR UNKNOWN

Jimmy Carter is my Shepherd; I shall not want. He leadeth me beside still factories and abandoned farms. He restoreth my doubt about the Democratic party. He anointeth my wages with taxes and inflation so my expenses runneth over my income. Surely poverty and hard living shall follow the Democratic party, and I shall work on a rented farm and live in a rented house forever. Five thousand years ago Moses said, "Pack up

your camel, pick up your shovel, move your ass, and I will lead you to the promised land." Five thousand years later, F.D.R. said, "Lay down your shovel, sit on your ass, light up a Camel, this is the promised land." This year Jimmy Carter will take your shovel, sell your camel, kick your ass and tell you he gave away the promised land. I'm glad I am an American. I am glad I'm free. I wish I were a dog and Jimmy Carter was a Peanut tree.

GEOPHYSICISTS Join The Leader!

Amoco Production Company is a dynamic, growth oriented subsidiary of Standard Oil Company of Indiana, and our achievements have made us a leader in oil and gas production:

- Amoco is among the nation's top three gas producers
- In Texas, Amoco ranks second in crude oil production
- We're one of the top drillers in the country.

Accomplishments like these have caused us to grow, and with growth comes opportunities for you to become a part of Amoco's success. If you desire a position as an entry-level Geophysicist, we're the company for you. We offer:

- Excellent starting income and top-notch benefits
- True potential for career advancement
- One of the petroleum industry's best training programs

Not to mention that you'll be with us in Houston, a city you've no doubt heard a lot about, and one that lives up to its reputation as an attractive and exciting place to be.

Please check within your department for more information.

Standardized exams

Access amendments suspend GRE testing

The Graduate Record Examinations Board has announced that, as a result of the new amendments to the New York State law regulating standardized testing, it will be necessary to temporarily suspend administration of all 20 GRE Advanced (subject) Tests in New York State effective immediately. At the same time, certain testing services for the handicapped,

for students needing makeup administrations, and for Sabbath observers can now be restored. The amendments were adopted on June 30.

Although the amendments to the New York law were designed to give students easier access to tests already administered, they made compliance more difficult by extending the law to include public

disclosure of one form of each of the 20 GRE Advanced Tests (tests in different fields) every three years. As a result, the GRE Board is suspending the administration of these tests in the state until the full impact of the requirement can be assessed.

On the face of it, "the public release of one test form every three years may not appear to have major

implications," said Dean Alfred Sussman, of the University of Michigan, and chairman of the GRE Board. "But the disclosure of one test form very directly affects all others because we must equate scores between different editions of the test. For this, and other reasons, including the cost of preparing new exams more frequently for a small number of test takers, we

have to consider the effect on the expense for test takers and upon the quality of tests before making a further decision."

Educational Testing Service develops and administers the GRE Aptitude and Advanced Tests for the GRE Board.

Letters to the Editor

(Cont. from pg. 4)

with the students here. But now we have the people and the talent to have a good squad.

In our opinion, two things must be present to have school spirit for the UMR athletic program. First of all, we need support. Twelve voices shouldn't be expected to voice the spirit of the school. What's more we can't do it. Our job is to lead cheers. Your job is to follow them. Which brings us to the second factor of spirit, which is unity. The Twelfth Man Award is a fantastic contest, don't misunderstand us, but it has its drawbacks. With all of the organizations competing for this award, they soon started yelling separate cheers and even organizational cheers, when the object of the game is to support the Miners. I think the judges, too, should take this into consideration: how much does so and so organization actually try to invoke school spirit, or how much do they just try to be

recognized as competing for the award.

While it is true that the St. Pat's Board has always called for cartwheels and the like they are the only organization that has continually yelled with the cheerleaders this year, rather than against us. To us, they are entertaining. They help us when they clown around, but they are hastled from all sides. They are constantly being watched and needled by the authorities and ridiculed by portions of the student body, when all they are trying to do is attempting to bring about enthusiasm; about St. Pat's, about the Miner's, about anything, as opposed to dull lumps with their eyes glued to the field.

Again, we want to stress the fact that we are not cutting down the Twelfth Man Award. We would just like to see the student body pull together as a whole to support the Miners. Anyway ... keep up the good work, Miners!

Sincerely,
The UMR Cheerleaders

Graduating Engineers Put your education to work. With Sperry.

A career with Sperry Flight Systems will make real use of the time and energy you've put into the last four years. The result: we both profit. The more innovative our engineers, the more opportunities they create for themselves. We appreciate that. After all, that's what makes us a growing company.

Speaking of growth, we're the fastest growing of all Sperry Corporation divisions. We're an industry leader in the design and development of high-technology control systems and electronics for air and space applications.

We're looking for BS and MS graduates in Electrical, Electronic and Aeronautical/Aerospace Engineering or a related engineering discipline. You may be involved in:

- Research & development
- Product design
- Control systems
- Design analysis
- Electronic design

Interested? If so, let's get together. We'd like to talk to you about our business and the Phoenix life-

style that offers you a vacation climate and outdoor recreation year-round.

**We'll be on campus
Mon-Tues, Oct 13-14.
See Clyde Rea.**

Investigate the opportunities at Sperry by talking to us while we're on campus. We'll fill you in on our competitive salaries and comprehensive benefits. Contact your campus Placement Office to arrange to see us.

The Missouri Miner

Page 6

The Looking Glass

By DAVE WILLIAMS

His name is Geza Kisvarsanyi.

I sat and talked with him about his past, and was treated to a journey filled with adventure, travel, good fortune, learning, and discovery.

Here at UMR, he is known as Dr. K. This is his story.

Dr. K was born in Tokay, Hungary, and attended high school in nearby Eger. Immediately following his graduation in 1944, at the age of 18, he was drafted into the German army.

"I was a machine gunner on the Russian front," he recalled, in a dialect he described as being Finno-Ugric, the language of his country. "The war ended in 1945, and I became a prisoner of war. I spent 3 years in Gulag, a Russian concentration camp, installing and building military roads from Russia to Iran. These same roads now give Russia relatively easy access to Iran through previously difficult terrain.

"I contracted malaria in 1947 and was discharged. I was extremely fortunate — only 10 percent of the people in these labor camps sur-

vived."

After his "recovery," Dr. K went to Budapest, the capital of Hungary, where he obtained his Master's degree in Geology. He left the country in 1957, when the Hungarian revolution against communism failed. "We wanted our freedom, but our strength was nothing compared to that of the Russians."

This led to his migration to the United States, where he was hired by the Kennecott Copper Corp. He was instrumental in the discovery of the "new" lead belt, and other minerals research led him to the discovery of nickel, copper, and cobalt in Minnesota. So far, these mineral discoveries have produced close to 25 billion dollars worth of revenues.

"I was very impressed when I first saw America," he said. "It seemed dynamic, young, with tremendous potential. Easily, the richest country on earth."

"I still think this. But there are, of course, many problems. We use many of our resources wastefully. Social problems plague the country.

"We are a very fortunate

country, though. No other nation comes close to our 'universal state.' We are, indeed, a 'melting pot' of nationalities, which greatly contributes to the output of the country."

He pauses, and reflects on what he has just said.

"I miss the culture that Europe offers, however. My high school was built in 1765. It was very beautiful. The big cities in Europe are built for work, art, pleasure. Here, big cities are built mainly for work, which creates an alienating environment at times."

In 1962, Dr. K came to Rolla, and obtained his Ph.D. in Geology.

"When I was in Europe, there were three schools in the United States which were highly respected for their geologic-related fields — Columbia University in New York, the Colorado School of Mines, and the Missouri School of Mines (now UMR). Of these, I felt that the school in Rolla best suited my needs. Here, we are accessible to all parts of the country, with many different sources of mineral study close by. We are in an excellent location."

Dr. K. has used this fact to

Southwinds Magazine

We want you

Larry — "Hey, Joe. Didn't see you are the Southwinds meeting Monday night."

Joe — "Well, ya know I didn't promise anything. I just said I'd think about it."

Larry — "I know. I know. I see you've got a copy of Southwinds there though."

Joe — "Yeah, I looked it over, and it's not too bad. Besides, I thought my mother might like a copy."

Larry — "Sure, Joe. Now listen man, I'd sure like to

Joe — "I don't know, Larry. But I'll think about it some more."

(All UMR Students: Larry's invitation to Joe goes for you, too. If you missed the meeting last Monday night leave your name, address, and phone number in the Southwinds box, Humanities. Be a part of publishing UMR's Literary Magazine. Join Southwinds (formerly GRUMLS).)

get you to come to one of our meetings. I already told you that you don't have to write poetry to be in the club. We want people with all kinds of art interests. I know you're good with that camera of yours. And don't worry about missing the meeting Monday night. If you're interested you can still get in the club as a charter member if you join by October 6th. That's this Monday."

Pat's Facts

Little did you know that you can pay 12½¢ to see a stooge and get to watch another movie at no extra charge. Well, the St. Pat's Board is showing, tonight, at the Uptown theater twice (7 & 9:45 p.m.) two Three Stooges flicks — That's six stooges at 12½¢ equals 75¢ — plus, by popular demand, Silver Streak ith your star and mine Richard Fryor. I do hope everybody out there in this reading audience saved 25¢ and bought their ticket to the St. Pat's Benefit Movie in advance (\$1.00 at the door) and plan to start the weekend off right at the movies. You can kill two birds with one stone: relieve your mental frustrations of a

week's worth of studying and support the best celebration ever.

As of today there are only 161 days until St. Pat's 1981. Unfortunately, some of you freshmen haven't ever experienced St. Patrick's day as it is celebrated in Rolla, Mo., and maybe some of you can't understand why somebody in a dirty high school jacket is trying to sell you something that's green.

Well, it's you people that I feel sorry for because you have not yet lived! And there's only one way you will ever live and that is to experience St. Pat's as it is celebrated nowhere else. Anyway, the Septemberfest and this benefit movie both benefit St. Pat's 1981 (The 73rd annual celebration). So try to live and to see the stooges and Mr. Pryor so St. Pat's 1981 will be "The Best Ever."

The enigmatic "Dr. K", Geza Kisvarsanyi.

Dick Elgin**Surveying's importance is on the rise**

OPI RELEASE

When Richard (Dick) Elgin joined the civil engineering faculty at UMR this fall, he began his fourth stint on the Rolla campus.

A native of St. James, he entered UMR as a freshman in 1966, but left after two years for a tour of duty with the U.S. Army, including a year in Vietnam as a helicopter pilot. He returned to civilian life — and UMR — in the fall of 1971, and received his B.S. degree in civil engineering in May, 1974.

Elgin worked in Higginville for Riddle Engineering, Inc., a Kansas City consulting engineering firm, before taking leave in the fall of 1975 to come back to UMR for graduate work. He received his M.S. in civil engineering with an emphasis in public works engineering in December, 1976.

Since then, he has worked as Richmond office manager for Riddle Engineering and has completed course work toward his Ph.D. at the University of Arkansas in Fayetteville.

This year, back at UMR, he is teaching surveying courses, his main area of interest and research. The "father" of civil engineering, surveying is a field that is enjoying renewed interest these days, Elgin finds.

"The demand for well-

educated surveyors has really increased within the last five to ten years," he says. "Two major factors contribute to this — new technology and the recognition of the importance of land resources and the resulting rise in land values."

QUALITY CLEANERS

EXPERT CLEANING REASONABLY PRICED
108 W. 7th Street Rolla, Mo. 65401

Will you like Alcoa? Ask the people who work there.

"Alcoa is very concerned with safety and environment. We're proof that large companies can be people-oriented too."
Larry Carlson, R&D,
Massena, New York

"I love where I work. The environment is conducive to my personal growth and the job is challenging."
Joyce Asahi, Personnel,
Wenatchee, Washington

"I'm encouraged to give input. And I've seen some of my ideas used, which is very rewarding."
Carlton Holley, Mechanical Engineering,
Davenport, Iowa

Alcoa recruiters will be on campus October 8, interviewing people with background in ME, EE, IE, METE., EDP, R&D and Production Control Traffic. For career information with Alcoa and to sign up for an interview, check your Placement Office.

If you like to think,
we think you'll like Alcoa.

Independents Weekend-1980

Submitted by I.W.C.

After an awfully long wait, it's finally time for another Independents' Weekend. For the uninitiated, Independents' Weekend is a party weekend sponsored by the dorms, eating clubs, and G.D.I. Planning and coordination of the weekend is done by Independents' Weekend Committee (I.W.C.) which consists of representatives from each sponsoring organization.

There have been some changes in the weekend. Most notably moving it from

spring to fall. It's also bigger this year, three days instead of two, and each organization participating is responsible for sponsoring an event rather than I.W.C. running the whole show.

Enough of the bull, let's find out what actually is going to be taking place. On Thursday, October 2nd, R.H.A. is sponsoring a hayride and bonfire. The wagons will be running from 7 to 9 and the bonfire all four hours. A \$2.00 ticket will be required for the hayride but the bonfire is free. The location for all this is the

George Pietsch farm about two miles south on Highway 72, watch for fliers with more detailed information. Tickets go on sale Monday, September 29.

At 1:30 p.m. Friday, October 3rd, at Lions Club Park, G.D.I. is sponsoring the Games. Besides some old traditional St. Pat's style games, there's going to be a Beer Drinkers Obstacle

Course, Chug Checkers, and a mushball tournament starting at two. Plenty of beer will be available and whether you plan to participate or just watch, you'll have a good time.

Friday night, Tech-Engine Club is planning an After-the-Fights party. At this writing, details are a bit sketchy, but you can be sure there will be plenty of fun

and "refreshments" at 312 W. 16th St.

Saturday afternoon at Lions Club Park, from 3:30 p.m. to six is the famous Independents' Weekend B.B.Q. I.W.C. will be offering pork steaks, beans, and chips for \$1.50 a plate with beer and soda on the side. Entertainment will be provided by the KMN Roadshow. So after the Miners beat Lincoln, gather up Mom and Dad and bring them to the barbeque. Tickets will go on sale Monday and we would appreciate if they were bought

in advance.

Saturday evening, October 4th, at 9 p.m., Campus Club will cap the weekend with a party featuring mixed drinks. At 10:30 p.m. I.W.C. will have a short awards ceremony and crown the Independents' Queen. The party will then continue to 1:00 a.m. Campus Club is at 1304 Pine Street.

By next week this time everything will be ready and all that will be needed is people ready for a good time. All events are open to all students, so grab a friend and come party.

Franziska Malsy - MHAE

Motel Housing Association East is proud to announce Franziska Malsy as their Independent Weekend Queen Candidate.

Ziska, the charming daughter of Mr. and Mrs. K.J.J. Malsy of Lincoln, Missouri, is a junior in civil Engineering with a preference in Hydraulics.

Ziska is very active in intramural sports, playing basketball, soccer, softball, track and racquetball. She also has hobbies including horseback riding, motorcycling, hunting and crocheting.

Ambitious? "I want to receive my B.S. at Rolla and then travel."

Kay Runge - RHA

We the residents of R.H.A. (better known as the quad), are pleased to present as our own 1980 Independent's Weekend Queen Candidate, Miss Kay Runge. Kay is a freshman majoring in

Engineering Management. Her hobbies and interests include writing, water skiing, and swimming. Her hometown is Hughesville, Mo.

Kathy Conally - TEC

Elaine Meyer - GDI

Elaine — beautiful, creative, cunning, spirited, Electrical Engineering major, member of T.E.C.,

enthusiastic participant of Independents Weekend; a proud supporter of G.D.I., simply charming — Elaine.

Colleen Condon - Campus Club

Campus Club is proud to announce Miss Colleen Condon as their Independent Weekend Queen Candidate.

Colleen is one of five lovely daughters of Mr. and Mrs. Thomas P. Condon of Imperial Mo. Colleen is pursuing a career in the nursing profession at Deaconess Hospital School of Nursing.

Colleen loves all sports, especially softball, and enjoys motorcycling, hiking, fishing, and visiting Rolla.

Colleen is the obvious choice for Independents Weekend Queen, based on her beauty, charming personality, and independent spirit.

Cynthia Strouse - T.J.

Thomas Jefferson Hall presents Cynthia Strouse as their 1980 Independents Queen Candidate. Cynthia is a junior majoring in Computer Science. She is a true

Independent, being involved in various organizations, and intramural sports for T.J., each of her three years at UMR. Cynthia calls Mexico, Mo. home.

Schedule of Events

THURSDAY, OCTOBER 2
HAYRIDE & BONFIRE
7-11 p.m. — Hayrides at 7 and 8, \$2.00; bonfire free. Take Highway 72 two to three miles south; pass Highway F on left; 200 feet past F turn left on Fairview Road East (gravel); follow to end. Operator not responsible for injuries. sponsored by RHA.

FRIDAY, OCTOBER 3
GAMES 1:30 p.m. — Lion's Club Park. Sponsored by G.D.I.

FRIDAY EVENING
"AFTER THE FIGHTS" PARTY — Tech-Engine Club. Sponsored by T.E.C.

SATURDAY, OCTOBER 4
BARBECUE 3:30-6:00 p.m. — Lion's Club Park. \$1.50/plate. Sponsored by I.W.C.

SATURDAY EVENING
PARTY AND INDEPENDENTS' QUEEN CORONATION 9:00-1:00 — Campus Club. Sponsored by C.C. and I.W.C.

Students talk on, unaware of companion overcome by sinister alien forces. (Photo by Schaeffer)

The "Gang Green" baits the Grey Jackets

The Green Challenge

Let it be known that on this day, Thursday, October 2 in the one thousandth, nine hundred eightyth year of our Lord, the organizers of the best Celebration since St. Patrick drove the snakes out of Ireland, do hereby ordain and establish the challenges of the sexes: the men from the St. Pat's Board vs. the gay greys - in the great Irish tradition of Rugby (American football). If this challenge is accepted by the IFC (Insidiously Fallible Chumps), the St. Pat's

Board — the ultimate in power and sexual prowess — will demean, destroy, deface and deport these worthless chicks to Iran! Where they will be lucky enough to escape the overpowering domination of "The Gang Green."

Unfortunately, due to the arrival of cold weather you have seen the Grey Jackets miraculously appear on campus, but this will be no more when we will leave the judgment upon you, the students of UMR — the brilliant engineers of the future, to observe this

dangerous mutilation of the "ego Sodumus Chickenus."

If any of you Grey Weaselschmitz can comprehend these green words of distinction which will translate into TOTAL DEVASTATION, maybe you will crawl on your bellies out to the green fields of Lions Club Park on Friday, October 17 at 4 p.m. to eat the dirt beneath our feet. So now it's upon your shoulders, you losers in grey, to respond to our challenge and put Joe Rynski on the line! Don't be cooped up and come on out and prepare to meet your doom.

"Why not? I have the inches for it!"

Koenig revealed as UMR porn star

By BOB KOENIG

Recently I fulfilled a long-standing desire of mine. The location of my satisfaction was a supermarket and the instrument of my gratification, a newspaper. Simply put, I bought a copy of the National Inquirer. Now don't look at me that way. Don't tell me you haven't been tempted by those headlines. You know the ones I mean.

"FAMOUS PSYCHICS PREDICT 47 THINGS THAT WON'T HAPPEN IN 1981 (Now You Don't Have to Worry)."

AT LAST MIRACLE WEIGHT LOSS: ANTI-GRAVITY.

SECRET AFFAIR REVEALED: JACKIE O. DATING JOHN F. 16 YEARS AFTER DEATH, "You Can't Keep a Good Man Down".

TINY TIM TO MARRY AMELIA EARHEART IN PSYCHIC WEDDING. Johnny Carson Hails Media Event.

This particular issue (that I chanced to buy) attracted me with a most unusual headline: CUBAN REFUGEE CRISIS SOLVED, University Chancellor Recruits TA's. "They don't have to understand them, just accept them." This turned out to be about some Ohio campus.

This was followed by two "normal" headlines: "HIGHWAY MINIMUM

SPEED RAISED TO 110 M.P.H. (Figures Prove Additional Deaths Save Energy)", and "FRATERNITY PLEDGE DIES OF CANCER (Hazing Suspected)".

The "hook" that finally got me to reach down for that "hard-earned" cash was as follows "COLLEGE STUDENTS BEWARE (Scientist Uncovers Proof of Alien Assault on Students' Minds)". Just so you won't have to run out and buy a copy (and I can get paid for more inches) what follows is a reprint of the article and the accompanying photo.

Recently John Doe Smith, professor of botony at Central Druid College, presented the Inquirer with proof that aliens, disguised as common plants, have invaded the earth. These creatures, who drain the mental powers of animals for food, have been living among us, perhaps for centuries. We tell this twisted tale in the doctor's own words.

My accidental discovery of these creatures came about due to their high concentration around universities and colleges. Where concentrations of massive mental activity by men (i.e. "should I skip this class, or maybe I should't. Their could be a shotgun, but today's an odd Monday and he hasn't given ...") draw them like flies. I also discovered that in the course

of the draining of human minds the demons exert an attraction that draws the students closer in order to make the draining process easier.

These vampires begin their long lives in the form of blades of grass or weeds, praying at this stage on the minds of insects and mice. In their final form they manifest themselves as large trees.

My first clue of the existence of this menace came while performing a statistical study of student performances. Carefully kept statistics showed that students' academic performance plummeted sharply a few weeks before the trees began to bud on campus. Looking for a cause and effect relationship I administered a battery of tests. The results were incredible. The subjects seem unable to concentrate on anything but the opposite sex during the early spring. This

interest, created in their minds by the aliens, ends with unsuspecting couples sitting under "trees" where they are most susceptible to the drain. A massive increase in the alien's needs occurs when they emerge from the dormant state and brings about these attacks of spring fever.

I also noted that student scores begin to rise again in the fall while the "trees" are still very active. I feel that these aliens store mental energy for the winter and during late fall as their "tanks" become full they begin to drain off only enough energy for day-to-day existence.

Reaction to my findings by my colleagues has been mixed. I made the mistake in my original report of pointing out that most faculty seem unaffected by the "trees" and many of them felt insulted. Others pointed out Newton's famous apple tree and suggested

that minds are "drained" only in order to make them receptive to superior knowledge the "trees" broadcast. One fellow in biology noting the effects on young lovers suggested that the plants (?) could be necessary for human reproduction.

Here the article drifted away from the facts off into a bunch of mindless speculation that I won't reprint. Needless to say we've been warned about

these beasts. I don't know about you, but the next time I see a student lying unconscious beneath a tree I'm going to smell his/her breath to make sure.

One more note: Don't ever buy a magazine called the Mid-night Sun. They run stupid articles with headlines (I've never opened one up) such as: DERANGED DENTIST STALKS POTOSI, MO. (Twelve Bodies Found Cleaned and Flossed).

Groundwaves

The heights of things
we have proven is
narrowed by our ways
a pit yawns and opens wide
across our learning prism;
chasms creep across our minds;
and a fire burns within us.

Enough B.S. Time to move on to my M.S. While we are speaking of Jerry Lewis, do you remember France? That's where the Eiffel Tower is which reminds me of KMN. Your only 24 hour alternative (well, at least we try!).

Those of you who attended the Missouri concert last Saturday experienced a band and road crew in combat with a musically useless structure — the Gale Bullman Building. If you were loaded beyond caring about the sound, you were fortunate. Unfortunately, getting loaded (unless it was on a socially acceptable substance - alcohol) became somewhat of a hazard due to the actions of a few (not all) of UMR's finest. It is any wonder the S.U.B. has difficulty in obtaining and retaining performers when they know where they will be playing and under what conditions?

Anyways, at least the Godfather's pulling for us lately. After purging the system of all dissidents, stroking the upper echelon and increasing the number of bootlickers - he stopped (at the encouragement of some very industrious students) the superficial renovation of Rayl Cafeteria. Is it any wonder that students rebel against an administration which normally has so little regard for students or faculty? A university should not be an environment of parent-to-child relationships. Yet, the university structure itself tends toward developing a "do as you're told" attitude. An attitude which inhibits proper communication and personal growth. We, as students, are forced into a "do as I say, not as I do" situation. Student groups become irresponsible, at times, being afflicted by youth and inexperience.

However, the idesease of youth is something everyone has suffered through, for even administrators were born.

A problem we can deal with now is the general election in November. The political circus has presented us with two major candidates with nothing to say. One will not speak and the other thunders bland rhetoric. Give the man who has something to say a chance and register to vote today. Even though he does look like Dennis the Menace's father, remember that in the 1860 presidential election, Douglas refused to debate an unknown Illinois congressman.

Dealing with so much reality is difficult (remember I work at KMN), so let us move on to more pleasant escapism.

Thursday — The New Rack - features Elvis Costello at 5 p.m. Im-

provisations - features Joe Venutti in Chicago at midnight.

Friday — Gee-Debs Request Show from 4 to 7 p.m.

Sunday — Blues for Rolla featuring "BB King Live in London".

Monday — Jazz for a Monday features pat Longo & his Super Big Band between 3 and 6 p.m. First cuts features Mama's Pride at 8 p.m. The Rolling Bozo Revue will feature Rare Bird's LP "Born Again".

Tuesday — The Artist Feature - Brewer & Shipley with Shipley in Studio, 6-8 p.m. The New Wave Show, 8 to 10 p.m.

Wednesday — The Bluegrass Variety Show brings you: The red clay ramblers from 3 to 6 p.m. Bedtime stories presents Rich Wakeman's "White Rock" at midnight.

Goodnight,
Dave Strahorn

NOTICE

Inasmuch as the book stores are closed on Saturday afternoons, SCOTTS OFFICE PRODUCTS in downtown Rolla will remain open all day on Saturdays to take care of UMR students' requests for supply items such as battery packs for calculators, graph paper, engineering pads, pen refills and the like.

For 75 years, SCOTTS has served students on the MSM-UMR campus. In fact, you'll find SCOTTS advertisement in the first Rollamo published in 1905. Stop by SCOTTS on Saturday afternoons, or any other time...

Blue Key

Miner of the month announced

Dr. Don Myers has been selected as the Blue Key Miner of the Month for April-May.

Dr. Myers, an alumnus of UMR, returned to UMR in Aug. 1979 as an assistant Professor of English-Mgt. As an avid running enthusiast and veteran of six

marathons, he began last Dec. to organize what evolved into the Rolla College-Community Fun Run held at the close of the spring semester. Dr. Myers spent many hours organizing and obtaining the necessary items which included obtaining the services of Olympian Craig Virgin,

equipment from the St. Louis Track Club, and Grellner Distributor as the sponsor of the more than 150 trophies that were awarded. As a result of Dr. Myers efforts, more than \$1000 was raised for the Rolla Community Track Fund.

Congratulations, Dr. Myers.

ELECTRICAL ENGINEERS

We are a leader in fast, exciting fields... aircraft, missiles, electronics, automation. Electrical Engineers play a vital role in our continued growth and industry leadership. Opportunities for future-minded Electrical Engineers are available in these challenging career fields:

Guidance and Control Mechanics

- Digital Flight Control Design/Analysis
- Inertial Navigation System Analysis
- Software Design Development and Validation
- Trajectory Analysis
- Redundant Digital Signal Processing
- Filtering and Control Techniques

- Forward Looking Infrared, Television, or Laser Technology

Avionics Test Requirements Analysis

- Radar
- Displays
- Inertial Systems
- Flight Computers
- Communication

Reliability

- Data Analysis
- Circuit Analysis
- Part Stress Analysis
- Failure Mode and Effect Analysis

Electronics

- Automatic Test Equipment
- Embedded Microprocessor Architecture/Design
- Digital, Analog and RF Equipment/Circuit Design
- Hardware and Software

Fire Control Systems

- Radar

**Tuesday & Wednesday,
October 14 & 15**

If you're ready to get your career off the ground, McDonnell Douglas would like to talk with you. Sign up at your placement office for a personal interview. Here is the date we'll be on campus:

Wayne Carson: Is it true that you are the illegitimate son of a tsetse fly?

FOR SALE: HP-19C (continuous memory) programmable hand-held printing calculator in excellent condition. Has a spare battery pack, extra paper. I am also willing to give lessons on how to use the calculator to your best advantage. Price: \$135, complete with owner's manual and applications book. Willing to bargain. Call 364-7176 and ask for Al Diamant.

FREE — Five thousand, low quality Teke scrapbooks. Inquire in basement of the Rolla building.

MINER,

Could you please tell me when the real UMR yearbook will be available. The TKE version was really nice but the rest of us students should have a yearbook also. The yearbook makes it look like every student who participates in student activities is a TKE. There is more than one organization at UMR.

Signed, UMR Student
(Not a TKE) surprised?

The fun and games show comes to town

Game show fans in the St. Louis area who have dreamed of winning color televisions, a car, stoves, refrigerators, and gifts galore may have their wish come true when Bob Barker, the emcee of Television's "The Price Is Right," comes to the St. Louis Checkerdome on October 24.

"The Bob Barker Fun and Games Show" features Bob Barker, the handsome host of CBS's "The Price Is Right" and one of television's more popular personalities.

The show, which has broken attendance records in previous engagements, is based on audience participation. Barker personally selects members of the audience and involves them in stunts, games and all sorts of gags.

The show is fast moving and excitement runs high when Barker goes out into the audience. Much like their television counterparts, the contestants at the St. Louis Checkerdome will scream and wave their arms to get attention.

In "The Fun and Games Show" there is no pre-screening of the contestants. Everyone has a chance to participate. To select his contestants, Barker will go right into the audience, walking up and down the aisles and picking people at

random. Many gifts he will hand out on the spot, other people will have to answer questions and still others will be selected to compete in stunts.

Barker is enthusiastic about the show. "This is the sort of thing I've always wanted to do," he said. "I enjoy getting out there with the people and having a good time — not to mention all those kisses — from the women, of course."

"The Fun and Games Show" is great fun and entertainment," said Dr. Robert G. Rowe, Jr., one of the promoters. Evidently the people like it too. When "The Fun and Games Show" premiered almost three years ago, Barker was uncertain as to how it would go over. "My first thoughts were that working with an audience of 8,000 would be very different than working with a studio audience of 300 people," explained Barker.

Much to his delight — and that of the audience — he found the larger crowds are just as much fun. "This is the most fun I've had in 20 years," he added.

Since that first show, "The Bob Barker Fun and Games Show" has had phenomenal success. Barker has broken attendance records in hall after hall, many of which records were held by the late Elvis Presley.

The show attracts a wide range of people. In one show in Virginia a woman told Bob she had ridden a bus all night from New York City to be there. In Nashville a 92-year-old woman came 200 miles to see the show. She won a gift, too.

"This is the first time, as far as we know, that a show such as this has played in the St. Louis area," said Barker. "The guy in the back has as good an opportunity of winning as anyone else."

The "Bob Barker Fun and

Games Show" will take place at the St. Louis Checkerdome on October 24 at 8:00 p.m.

Tickets are \$6.50 adults and \$3.25 for children under 12 accompanied by an adult and will go on sale September 15 at the following ticket outlets:

Checkerdome Box Office
All Sears Outlets
(Mail Orders: Send Money Orders along with stamped, self-addressed return envelope)

1979-1980 School year Financial Report

The Missouri Miner is operated by the UMR undergraduates and is published every so often by engineers who can't think of any other reason for a beer blast. As a new school year begins, we offer to our subscribers and other enemies (Deadly Grass and Vito Marshmello) the following account of our financial dealings for the past year.

EXPENSES

Printing costs	\$ 27,921.81
Peanuts for campus squirrels	2,849.31
Advertising commissions	3,830.15
Typing paper	.24
Staff salaries	12,768.13
Payment of staff parking tickets for alleged illegal parking in Faculty areas	60.82
Payment of official business speeding tickets to city of Rolla	688.12
Vagrancy charges against managing editor	93.81
Spring staff party	
beer	437.01
food	1.08
Private secretary for assistant editor	5,123.91
Fee to re-enter school (Bill & Joe Miner)	300.00
Telephone Business	.20
Personal	5,147.21
Private detectives for blackmail operations	2,051.65
Used tire for editor's bike	1.35
Paid to 209 Tavern for damages caused during staff meeting	1,721.08
Engraving of editor's signature	19.03
Donation to Alumni Scholarship fund to further higher education	77.49
Unaccounted for	11,369.07
Total expenditures	74,461.47

INCOME

Total income	66,516.80
Deficit	7,944.67
	74,461.47

Midwestern Literature

It is alive and well

SOURCE: OPI

The study of Midwestern literature is alive and well, according to Dr. David D. Anderson, professor of American thought and language at Michigan State University.

And Anderson, who recently was a visiting professor in English at the University of Missouri-Rolla, is certainly in a position to know about such things. In 1971, he founded the Society for the Study of Midwestern Literature.

Anderson believes that in the past there has been a tendency on the part of some critics to look upon Midwestern literature as "some

sort of literary bad joke."

"It's a regional literature to be sure," he says, "but to call it regional is not to imply that it is second rate. All one has to do is look at a list of Midwestern authors and their works to see that it is really a major movement in American fiction."

"Mark Twain, for example, provides a foundation for all of the writers who followed him" he continues. "In fact, with

'Huckleberry Finn,' Twain began what we like to think of as modern American fiction."

"I'm optimistic about the future, too," he adds. "There's a tremendous boom in terms of study and a great many subjects that still need to be looked into. There's also a greater availability of funds for such projects than there was 10 years ago."

Bill's reprieve

(Photo by Bee)

A born loser is forgiven by Dean

By AL OAKES

Here it was, Monday morning, and Bill was getting psyched for his appointment with Dean Robertson. He also had to make up his calculus test at 8:30 and was not yet prepared. This was mainly due to the fact that Bill's study habits were not the greatest.

The night before Bill had tried to study. Sitting down at his desk to study he looked at all he had to do, just to catch up. It looked like an awful lot so he figured he'd better go get a soda before he started. Coming back to his desk he wrote down the first problem and then decided he had to go to the bathroom. Finally after walking down and back up the hall he was ready to get started.

Then came a knock on the door, "Hey Bill, you got a phone call," said the voice

from outside. "Alright," said Bill. He was on the phone for half an hour and then returned to his desk. "Now, where was I," he thought to himself. It was getting kind of late so Bill figured he'd better go to bed and get up early in the morning and study.

Well here it was, the next day and Bill had overslept. Not only would he be unprepared for class he would also be late. Bill hurried to the H-SS building and ran to the bathroom and wrote all his formulas on the wall.

Arriving in class he was 10 minutes late. The teacher handed him the test told him to sit in back and that he would only have 50 minutes to take the test. 5 minutes had elapsed and Bill requested to go to the bathroom. When the teacher said yes Bill ran out like he was in a real hurry. Running down the hall he ran over the janitor who had just

finished cleaning the bathroom. Bill knew what had happened, sure enough, it had all been washed clean. So Bill went back to the test and conceivably bombed it.

After class Bill was heading to his meeting with Dean Robertson when he decided to stop by the Rolla building and pick up a TKE Scrapbook. Oh, excuse me, I meant University Yearbook.

Coming to Dean Robertson's office, Bill found he was out to lunch and wouldn't be back for 15 minutes. Bill sat down by his door and tried to think what he would tell him. He decided to try and make the Dean feel sorry for him.

After awhile Dean Robertson arrived and they

each took a seat in his office. "Well, tell me Bill, just what is your problem?" asked the Dean.

Bill replied, "I think it all started when I was born, I was a loser from the start. When I was born the doctor slapped my Mom and later they caught him trying to put me back in. My Mom wouldn't breast feed me because she said she just wanted to be friends. She fed me with a slingshot because I was so ugly. I had to sneak up on a glass of water just to get a drink. Later on in life my Dad tied a piece of meat around my neck so the dog would play with me. When I was older he took me to a psychiatrist.

psychiatrist told me I was trouble prone. I wanted a second opinion so he told me I was stupid too. McDonald's doesn't even think I deserve a break ... So you see, its not my fault, right?"

Dean Robertson was so enthralled by Bill's panacea

that he decided to give him one last chance. But next time there would be no meeting. Bill would be out.

Bill was so happy he could shit a railroad. He went back to the quad. If my Mom could only see me now, he thought to himself.

Gridders beat Evangel, 40-20

Miner offense key to victory

By DAVE ROBERTS

UMR head football coach Charlie Finley is happy the Miners are entering their MIAA season opener with a 40 record but warns, "The biggies are coming up."

The Miners, ranked ninth in the NCAA Division II, begin their conference schedule by hosting the Lincoln University Blue Tigers Saturday on Parents Day. Kickoff is set for 1:30 p.m. at Jackling Field.

Last year the Miners got off to a good start (3-0-1) but

then lost three conference games and finished tied for third in the league.

UMR has been able to get off to the fast start this season largely because of a marked improvement in the offensive attack. The Miners ranked in the middle of the league in overall offense last year. UMR was held under ten points six times and under five points three times a year ago.

It has been a different story so far this season. UMR is the conference's top rated team in both rushing

and total offense and is second in the passing department.

Sophomore quarterback Dennis Pirkle is connecting on 62 percent of his passes — by far the best in the conference. He has thrown for 498 yards and three touchdowns while being intercepted only once. The conference's top-ranked quarterback, Northeast Missouri State's Craig Towbin, has been intercepted ten times.

Oddly enough the Miners do not have a receiver

among the league leaders. There are 11 players who have caught at least one pass for UMR, junior fullback David Fischer leading the way with eight.

The Miners have five running backs who are averaging over four yards a carry. Senior tailback Jimmie Lee leads the way with 299 yards and a 5.2 average. He had his biggest game of the season last week in UMR's 40-20 victory over Evangel College. In that contest Lee gained 118 yards and scored three touchdowns on 17 attempts and was named the MIAA's offensive player of the week.

Lee's starting mate in the backfield, junior fullback David Fischer, has 272 yards for a 4.5 average. Freshman tailback Randy Shed is averaging 4.5 yards a carry while junior fullback Mark Anderson is averaging 4.4 and junior fullback Brian Paris 4.3. The Miners have rushed for 887 yards in the first four games while their opponents have been held to 191.

UMR has no less than 12 people who have scored. Kicker Craig Thomas leads the team in scoring with 19 points followed by Lee with 18.

On defense UMR is ranked second in the nation against the rush allowing an average of 90 yards a game. UMR is allowing 143.2 yards through the air but that is a little misleading. Teams have been forced to go to the air against UMR when its

running game has been taken away. UMR opponents are completing only around 35 percent of their passes and have been intercepted nine times.

Against Lincoln Finley is looking for anything. "Lincoln runs a little of everything," Finley said. "Once they get started on something and have some success with it, they seem to keep doing it."

Finley said the Blue Tigers will start senior Don Dunning at quarterback against the Miners. Dunning came on in the second half and rallied Lincoln from a 23-0 deficit against Arkansas-Pine Bluff, although the Blue Tigers wound up losing the contest, 23-16.

Dunning has had a controversial career with Lincoln. Two years ago he showed signs of developing into a fine quarterback. But last year he had some off-field problems and didn't play much. He was tried at different positions before being moved back to quarterback.

Lincoln, 2-2, has shown a good running attack at times. "They've been moving the ball well against a lot of folks," Finley said. Lincoln's top runner is freshman Victor Thorne, who took the league's offensive player of the week honors the first week of the season but has struggled since. He is the ninth ranked runner in the conference, averaging 44.5 yards a game.

The Miners got a scare

from Evangel for one half last week. Evangel scored two first-half touchdowns and trailed only 20-13 entering the third period. But the Miners got on track in the second half, scoring three touchdowns to put the game out of reach.

UMR marched 81 yards for a touchdown on its first possession of the second half. Lee scored the touchdown on a 20-yard run.

After a bad punt later in the third period UMR got the ball at the 50 yardline period and scored again on a four-yard run by Pirkle. Anderson ended the scoring with an eight yard run in the fourth period.

UMR's touchdowns in the first half came on runs of four and three yards by Lee and a seven-yard run by Chris Nisbet.

The Miners rolled up 316 yards on the ground in the contest compared to 78 for Evangel. Fischer backed Lee's sparkling performance with 63 yards on ten carries while Paris added 42 yards on nine carries, Anderson 39 yards on six attempts and Shed 37 on 12.

Pirkle hit on 11 of his 17 passes for 180 yards, his longest pass a 33-yard toss to senior Jeff Walters, who would have missed the game if he had went ahead and had the knee surgery he was scheduled to have last week. He has postponed that operation until after the season.

The Missouri Miner

Page 14

Lee honored by MIAA

MIAA RELEASE

KIRKSVILLE — Missouri-Rolla running back Jimmie Lee, a catalyst in his team's fourth straight football win last Saturday, is this week's "Offensive Player of the Week" for the Missouri Intercollegiate Athletic Association. Southeast Missouri linebacker Rich Borman and Southwest Missouri tackle Keith Odehnal shared "Defensive Player of the Week" honors for the conference.

Lee, a 5-9, 181-pound senior from Rolla, scored three touchdowns in unbeaten UMR's 40-20 victory over Evangel. He gained 116 yards on 18 carries in only three quarters of playing time.

Borman and Odehnal charted impressive defensive statistics, although Southeast dropped a 14-3 decision to Delta State (Miss.), and Southwest bowed to Northeastern Oklahoma State, 25-7. The 6-0, 220-pound Borman, senior from Mountain View, was

credited with 13 solo tackles and 15 assisted stops, throwing opponent ball carriers for losses three times. Odehnal, a 6-3, 235-pound junior from St. Louis-Affton, logged seven unassisted and 13 assisted tackles, two quarterback "sacks" and one fumble recovery.

Other top contenders for "Offensive Player" recognition were Northeast Missouri senior flanker Eric Holm, who caught eight passes for 103 yards and a touchdown in the Bulldogs' 41-7 setback to Eastern Illinois; Northwest Missouri sophomore running back Donald Lott, 18 carries for 96 yards and one TD in the Bearcats' 13-6 loss to Central Arkansas, and Lincoln senior quarterback Don Dunning, who gained 78 yards on the ground, passed for 65 yards, scored a pair of TD's and one two-point conversion in only one half of action Saturday. With Lincoln trailing 17-0 at halftime, Dunning was installed at the signal-calling

slot and guided a Blue Tiger (Cont. on pg. 15)

Cross Country

By JOHN DANIEL

The UMR Cross Country Team continued their winning ways with a 21-40 dual meet victory over Westminster College on the UMR home course last Saturday.

The cooler weather allowed for improved performances from several Miner runners, but Pete Jude of Westminster won the race over the hilly five mile course in 25:50.7.

David Moore led an assault of Miner harriers in 25:55, just ahead of Brent Haefner. Freshmen Jim Bullard and Dan Marley followed in fourth and fifth place, while Kevin Stock, Dan Brown, and Joe Henze completed the scoring for the Miners.

The harriers will travel to Columbia tomorrow for the All Missouri Meet, and will return home to host the Miner Invitational on Oct. 11. Northeast Missouri, Central Missouri, Southeast Missouri, Lincoln University, UMSL, Westminster College, Washington University, and national powerhouse Eastern Illinois are expected at the invitational. Murray State's national caliber team may also be here for the meet.

Miner kickers split pair

By GERRY SCHNITZLER

The Miner round ball kickers, also known as the UMR NCAA Division II Soccer Team, lost at Avila College last Friday but won in their game at William Jewell College Saturday. The final score of the Avila game was Avila 4 UMR 0. The Miners downed William Jewell 5-1.

Against Avila the Miners played a scoreless first half with good defensive performances. All four goals came in the second half for Avila, a team with deceptively quick forwards.

Against William Jewell the Miners fell behind 0-1 on a well-placed corner kick-headball combination by Boettchen at 3:00 min. Donny Anselm knotted the score at 1 apiece at the 10 minute mark. Chris Philipp made it 2-1 Miners at 15 min. Dan Blaes touch-kicked a well-placed pass into the

Jewell goal at 21 min. Anselm and Blaes got their second goals of the game at 29 and 30 minutes, respectively. Miner domination was evident in the 32-2 shooting tally rolled up in the match.

According to Coach Mc-

Nally, "We've been together long enough to understand what Intercollegiate Soccer at this level is all about... we should be competitive with everyone we face." The team's next competition is UMSL, NEMO, and Avila in the MIAA tournament.

M-Club

Athlete of the week

This week's M-Club Athlete of the Week is Miner running back Jim Lee. Jim ran for 118 yards on 17 carries for an average of

almost seven yards per carry. Jim scored three of the Miners six touchdowns in the 40-20 win over Evangel. Congratulations, Jim.

Intramurals

Football and tennis head toward climax

By JOHN DANIEL

The playoff picture for intramural football is taking shape and tennis action is in quarterfinal play. Billiards

and racquetball play started this week, while swimming competition will be held next week.

The Division I football finals will be held on Oct. 13-14 and several teams are in

the running for berths in the finals. In League I, Phi Kappa Theta defeated Beta Sigma Psi on the final play of the game Monday night, to set up a first place showdown with Sigma Phi

Epsilon last night. In League II, TKE appears to be in the driver's seat for a playoff position and met equally tough Sigma Pi last night. Kappa Sigma also remains in the playoff picture.

In League I of Division II, GDI and Sigma Tau Gamma appear to be the favorites, however, Alpha Epsilon Pi could also gain a spot. In League II, Campus and Triangle are deadlocked for

first, but Delta Tau Delta cannot be counted out.

The standings, as of last Thursday, and the results from last week are listed below.

RESULTS

Tankmen sweep SEMO Invitational

By GERRY SCHNITZLER

The UMR water polo team is now 5-2 on the season. Last weekend at the SEMO Invitational the Miners topped the University of Arkansas-Little Rock 21-6, SEMO 16-10,

and SIU-Carbondale 17-8. The current team record and play statistics follow.

At the SEMO tournament the following statistics were recorded for the tankmen from Rolla:

The UMR Invitational Water Polo Tournament, renamed the Coors Invitational Tournament, will be held this weekend. The

first game will begin 9:00 p.m. Friday evening and features UMR and SEMO. Come on out to see another Miner sweep!

MIAA (cont.)

rally that fell short by seven points, 23-16, to Arkansas-Pine Bluff.

Beside Borman and Odehnal, three players were nominated for "Defensive Player of the Week." They were junior linebacker Chip Gregory of Northwest Missouri, who had seven solo and 13 assisted stops; UMR sophomore tackle Bob Pressly with five unassisted and four assisted tackles; and Northeast freshman cornerback Freddy Thompson with one assisted stop, two pass interceptions, one fumble recovery and one kickoff return for 23 yards.

Six of the seven league schools will start their MIAA schedules this Saturday, all in 1:30 p.m. games. Central

Missouri, which blanked Arkansas-Monticello, 17-0, last weekend, will entertain Northwest, while Lincoln will be at UMR. Southwest will travel to Southeast. Northeast has one more non-conference commitment, an encounter at Western Illinois, starting at 1:30 p.m.
