SUB hosts "Sex on Campus" symposium tonight

By Bill McCrary
Staff Writer

Today over 400 colleges, including UMR, will participate in a live-via-satellite discussion on changing sexual attitudes.

The live broadcast is called "Sex on Campus" and is being organized by the Student Union Board. The event, sponsored by Toyota and the College Satellite Network, will give students an opportunity to express their views and ask questions to such celebrities as Assistant Secretary of Health, Robert Windom; Dr. Richard Keeling of the American College Health Association; actresses

Alexandra Paul ("Dragnet", "American Flyers"), and Mariel Hemingway. There will also be previously taped comments from the US Surgeon General, C. Everett Koop.

UMR students will be able to discuss the changes in sexual attitudes, peer pressure, and the impact of aids with panelists over special telephone lines.

The host of the broadcast will be Hadding Carter of PBS's "Washington Week."

The program can be seen and participated in at the Miner Recreational Building tonight at 7 pm. For more information, please contact SUB at 341-4220.

StuCo launches Student Admissions Ambassadors program

Submitted By
Student Council

The Student Admissions Ambassadors (SAA) is a newly formed student recruiting organization, subsidiary to the Student Council Recruiting Committee, whose primary long-range goal is to recruit a significant amount of excellent new students for the University of Missouri-Rolla for the academic year 1988-89.

The SAA is desperately seeking

a diverse group of students in academic class, age, sex, race, and national origin to serve on and initiate this newly formed organizations growth.

The goals of SAA are to attend regional college fairs, visit hometown high schools, attend "Rolla Night" in St. Louis, and send letters to national merit scholars. At these events members will talk to incoming prospects about the University of Missouri-Rolla. They

will discuss the facts about academics, housing, athletics, social organizations, and anything else pertinent to the University. In dealing with this tactic we hope to give the incoming prospects a student's point of view of the University.

Members would benefit from this organization in that they would be taught recruiting tactics and communication skills and put them to a practical use. Other benefits include attending the chancellor's recruitment banquets, meeting and speaking to many interesting people and getting the personal satisfaction of recruiting quality students.

SAA is asking for your help. We need intelligent, hard working people to fulfill the goals of SAA. Remember, you can help determine the quality of incoming students and the future enrollment at the University of Missouri-Rolla.

Applications are now available at the Student Council office (202 University Center-West). All applications must be returned by October 9, 1987 by 3:30 pm. For more information call Rick Perry at 364-2331.

UMC's Stucky gets new job

Source: UM University Relations

Focusing the University of Missouri's growing array of economic development activities on serving the state and its people will become the responsibility of Dr. Duane Stucky, it was announced today by UM President C. Peter Magrath.

Stucky is currently vice chancellor for administrative services at the University's Columbia campus. He was interim chancellor of the Columbia campus between the resignation of Barbara Uehling in late 1986 and the arrival of Chancellor Haskell M. Monroe in mid-1987.

"This is a tough, challenging and extraordinarily significant assignment—one uniquely suited to Dr. Stucky's experiences, talents and creativity as an engineer and an administrator," Magrath said.

"We are breaking new ground in both Kansas City and the St. Louis area by establishing University-linked research parks. I am convinced that the economic future of Missouri will be greatly benefited by the activities of the University of Missouri and these research park initiatives," Magrath said.

Stucky, who will assume his new post as executive director for economic development and associate vice president no later than Nov. 1, will be paid \$84,000 per year.

"I am excited about the opportunity to make a contribution not only to this University but to the economy and future of this state. I am equally pleased that the president has expressed his confidence in my ability to meet this challenge," Stucky said.

Monroe expressed regret that Stucky would be leaving his campus administration and confidence in his ability to contribute to a program benefiting the state.

"I deeply regret losing the benefit of Stucky's advice and counsel to me and other key leaders on this campus because his understanding of this University is so thorough. However, I am confident his experienced wisdom will be of great benefit to the entire state of Missouri in this new and significant assignment," Monroe said.

Stucky's duties will include coordinating economic development activities across the University campuses in Columbia, Kansas City, Rolla and St. Louis; providing liaison with state

IFC donates with LOVE

By Alex Scott
Staff Writer

On September 15, the IFC presented their yearly donation to LOVE, ABLE, and the Rolla CP School. Each organization was presented with a check for one thousand five hundred dollars.

The money was raised at last year's Greek Week Carnival. The IFC would like to thank everyone who participated in last year's carnival. Without the support of the

students, these donations would not have been possible.

This weekend is the annual IFC Fall Clean-up. The clean-up will start at 8:45 Saturday, October 3rd at the Multi-Purpose Building with the Trash Can Race. At 9 am the cleaning of Rolla shall begin. For those who participate there will be a Bar-B-Que at Kappa Sigma at 12:30. It promises to be a fun filled day. Therefore, come out and help clean up the town of Rolla.

IFC members Ken Holdener and Tim Beckerle (far right) present a check to (left to right) Bonnie Lewis of the C.P. School, Nita Yelton of the ABLE Commission, and Ruby Elmore and Jack Weiner of LOVE. (Photo by David Libiez)

Assessment report being sent to curators

Source: News & Publications

The Educational Assessment Committee at the University of Missouri-Rolla, which is under the direction of 1986-87 Chairperson Patrick W. Hamlett, UMR associate professor of political science, is finishing its report and recommendations based on last year's assessment activities.

Dr. Frances Haemmerlie, UMR associate professor of psychology, who will be the committee's 1987-88 Chairperson, said, "This task is nearly complete, so the committee will devote its efforts towards setting up UMR's 1987-88 Assessment Program.

"Our proposals will be based on the Board of Curators' recent decisions concerning the essential components for assessment programs on all four UM campuses," Haemmerlie said. "These require-

ments include a general education test to be administered to a sample of juniors and departmental tests to be given to all graduating seniors in all departments on campus."

Haemmerlie explained that the committee is dedicated to developing an assessment program for

UMR that meets the Board's requirements while working with available resources and existing testing technology.

"This is intended to reflect and enhance the excellent undergraduate program that UMR currently has," Haemmerlie said.

Rolla Public Schools seek UMR students

Submitted By Susan Linde

A new program has been developed in the Rolla Public School system to involve volunteers to assist in educating Rolla's students. Volunteers may be UMR students, parents, and others with a sincere interest in improving the learning environment for students at all grade levels, kindergarten through twelfth grade. Volunteers may help the teacher provide individualized

instruction by tutoring students in all content areas, aiding in the libraries or computer labs, and providing enrichment.

Needed are interested UMR students who have time and skills to share, the desire to work with students, or a field experience class which requires aiding in a school. If interested, call M.s. Susan Linde, Coordinator for Volunteers, Administration Building, 364-7370.

calendar of events

Wednesday

Blue Key meeting at 6:15 p.m. in the Ozark Room. (Actives and pledges.)

Thursday

The GDI general membership meeting is at 7 p.m. in CE 114. There will be the usual party afterwards.

Intercollegiate Knights will meet in the University Center's Ozark Room.

UMR Film Series, *Round Midnight*, 7:30 p.m., Miles Auditorium, Mechanical Engineering Building. Admission by season ticket or \$3 at the door.

Intervarsity Christian Fellowship is holding a weekly Bible study at 627 TJHA at 7 p.m. Everyone is welcome to attend.

Physics colloquium, "Electronic Energy Transfer in Small Domains," Dr. Stephen Arnold, Polytchnic University, 4 p.m., 104 Physics.

Friday

Intervarsity Christian Fellowship will have a study on the subject of prayer at 7 p.m. on Friday in Chemical Engineering 139. Everyone is invited to attend.

Tau Beta Pi members—outing at Lions Club Park beginning around 2 p.m. Food and beverage will be served. Sponsored in conjunction with Omega Chi Epsilon and Alpha Chi Sigma.

OCF (Officers Christian Fellowship) Bible study and meeting will be at 7 p.m.

Saturday

Officers Christian Fellowship float trip. All are welcome. For more information please call Craig at 364-5019.

The International Students Club is planning a picnic at Schuman Park (lower pavilion) starting at 1 p.m. Come for an afternoon of outdoor games. ISC will provide refreshments.

UMR Cross Country, Miner Invitational, Women—10:15 a.m., Men—11 a.m., UMR Golf Course. Free.

Men's Soccer, Westminster College, 7 p.m., soccer complex. Admission charged.

Sunday

The UMR Dames, the student spouses' organization at UMR, will hold a meeting at 2 p.m. at the Wesley House, 403 West 8th St., Rolla. The meeting is free and all UMR student spouses are invited to attend.

Monday

Chemistry seminar, "Calorimetric Observations of the Sphere-Rod Transition of Tetradecyltrimethylammonium Bromide and Sodium Dodecyl Sulfate: Effects of Electrolytes and Nonelectrolytes at 25° and 45°C," Dean Nguyen, UMR, 4:30 p.m., Room G-3, Schrenk Hall. Free.

Tuesday

TBP electee quiz, 7 p.m., G-3 Chem E.

State Representative Chris Kelly will be speaking in Room 321 of the Chemical Engineering Building at 6:30 p.m. Everyone is invited to attend. Kelly is the vice-chairman of the House Budget Committee. He will discuss the budget process, with emphasis on the University's budget appropriation.

Next Thursday

All prospective college students and their parents, teachers and counselors are invited to attend UMR's annual "Rolla Night," to be held at the Engineers' Club of St. Louis, 4359 Lindell Blvd. at 7:30 p.m. UMR Chancellor Martin C. Jischke will provide welcoming comments to those attending the program. Also included as part of the evening's agenda will be presentations about UMR that will touch on admissions, financial aid, the cooperative training program, placement, housing and mathematics entrance requirements, and a slide show about UMR. An informal reception will follow the program. UMR faculty and students from all departments and representatives of such UMR offices as admissions, financial aid, Minority Engineering Program, Women in Engineering Program, housing, athletics, career development, and Army and Air Force ROTC will be available to answer questions.

Noday

If you will be completing requirements for a degree next May, you should make application for that degree by going to the Registrar's Office at your earliest convenience.

Blue Key Miner of the Month applications are due October 13.

Tau Beta Pi members—Those of you who never received your keys and/or membership certificates can get them now. We have a bunch we need to deliver. Call Bill Schuman at 364-4714 to pick yours up.

Tau Beta Pi members—A schedule of meetings and events for Fall 1987 can be picked up from Sue Hills, Room G-4 H-SS. Some committees need extra help. Please stay active in Tau Beta Pi!

EIT Review Sessions

Review sessions for area covered on the Fundamentals of Engineering Examination for Engineers in Training (EIT) will be held at UMR beginning Tuesday, Sept. 29. The examination will be given Thursday, Oct. 29. Review sessions will be conducted by UMR faculty members. The schedule is:

Thursday, Oct. 1—Mathematics, Dr. Charles A. Johnson, professor emeritus of mathematics and statistics, 7-10 p.m., G-3 Chemistry.

Tuesday, Oct. 6—Strength of Materials, Dr. Kenneth B. Oster, assistant professor of engineering mechanics, 7-10 p.m., 114 Civil Engineering.

Thursday, Oct. 8—Engineering Economy, J. Kent Roberts, professor emeritus of civil engineering, 7-10 p.m., 114 Civil Engineering.

Tuesday, Oct. 13—Fluid Mechanics, Jerry R. Bayless, assistant dean of engineering and associate professor of civil engineering, 7-10 p.m., 114 Civil Engineering.

Tuesday, Oct. 20—Heat, Power, and M.E., Dr. John W. Sheffield, associate professor of mechanical and aerospace engineering, 7-10 p.m., 114 Civil Engineering.

Thursday, Oct. 22—Statistics and Dynamics, Dr. Edward E. Horney, associate professor of engineering mechanics, 7-10 p.m., G-3 Chemistry.

A list will be posted in the first floor lobby of the Engineering Research Laboratory at noon Oct. 27 indicating where to report for the examination.

financial aid

All students who wish to be considered for additional need-based aid (work and/or loan) for the 1987-88 academic year, F-87 and/or W-88 semester) should sign up in the student financial aid office, 106 Parker Hall, from now through Oct. 1. This assistance will be distributed based upon a student's remaining need, and in order to be considered for this aid, you must have completed a 1987-88 ACT Family Financial Statement.

The 1988 CECMo Scholarship Competition: Number of scholarships: Three. Amount of each scholarship: \$1,000 (the top winner will be enrolled in the ACEC competition to compete for up to a \$5,000 scholarship award). Requirements for entry: Be entering the junior,

senior or fifth year (in a five-year program) in the fall of 1988; not eligible if graduating in December 1988; attending an ABET-accredited university or college working toward a B.S. degree in engineering; in the upper half of his/her engineering class; interested in pursuing a career in consulting engineering; a U.S. citizen.

Additional criteria which are helpful: Work experience in a CECMo/ACEC member firm, extra-curricular activities in high school and college.

Deadline for receipt of completed entry form: January 15, 1988.

Where to obtain entry forms: CECMo Scholarship Program, 205 East Dunklin, Jefferson City, MO 65101, or call 314-634-4080.

Harry S. Truman Scholarship. University of Missouri-Rolla sophomores interested in a career in government service at the federal, state, or local level are invited to apply for a 1988 Harry S. Truman Scholarship.

Established by Congress in 1975, the Harry S. Truman Scholarship Foundation operates an ongoing educational scholarship program designed to provide opportunities for outstanding U.S. students with potential leadership ability to prepare for careers in government service.

In April 1988, the Foundation will award 105 scholarships nationally. The deadline for all 1988 applications is **December 1, 1987.**

The University of Missouri-Rolla can nominate three students for the 1988 competition.

The scholarship award covers eligible expenses up to \$7,000 per year for the junior year, the senior year, and two years of graduate study. To be eligible, a student must be a full-time sophomore working toward or planning to pursue a baccalaureate degree, have a "B" average or equivalent, stand in the upper fourth of the class, and be a U.S. citizen or U.S. national heading toward a career in government.

Interested students should submit a letter of application, a statement of career plans, a list of past public-service activities or other leadership positions, a current transcript, and a 600-word essay discussing a public policy issue of their choice to Donald B. Oster, Truman Scholarship Faculty Representative, Dept. of History/Political Science, 136 H-SS Building, by Oct. 30, 1987.

Income Contingent Loan Program. The University of Missouri-Rolla is one of 10 colleges and universities to issue the first federal loans with paybacks tied to a student's future income. Features of this loan pilot program include:

Eligibility Requirements: Available to students who do or do not have a demonstrated financial need. An ACT Family Financial Statement must be completed to determine eligibility. Available to U.S. citizens and permanent residents only. Available to undergraduates only. Must be at least half-time enrolled.

Annual Maximum Loan Amounts: \$2500 for a freshman or sophomore; \$3500 for a junior; \$4500 for a senior or fifth year student.

Interest: A variable rate based upon the equivalent rate of the 91 day treasury bills for the quarter ending September 30 of the preceding calendar year plus 3 percent. Will start to accrue the day the students receives the funds. Unpaid interest is added to the principal annually. Recommended that student pays interest on a monthly or quarterly basis.

Repayment: Begins 9 months after students ceases to be enrolled at least half-time and will be based on percentage of opening ICL balance, not to exceed 7 percent. Future payments would then be based upon the student's (and spouse) adjusted gross income on the most recent federal income tax return. (Payments will be no more than 12 percent of the adjusted gross income.) To inquire about receiving funds under this loan pilot program, contact UMR's Student Financial Aid Office, 106 Parker Hall, phone 341-4282.

The National Consortium for Graduate Degrees for Minorities in Engineering Inc. (GEM) is accepting applications for its 1988 Fellowship competition which will provide 130 awards to minority students in engineering.

Designed for members of ethnic groups that are underrepresented in engineering, the program's goal is to increase the pool of minority students who receive master's degrees annually in engineering. Persons applying for the program must be American Indian, Black American, Mexican American, or Puerto Rican, and must be citizens of the United States. At the time of application, the minimum academic requirement for the student is enrollment in the junior year of undergraduate study in one of the engineering disciplines. Those presently in their senior or recently graduated are also encouraged to apply.

As a GEM Fellow, each participant must be free to work during the summer as an intern for a member employer and must complete the academic work for the master's degree at one of the member universities. In all, there are 52 member employers and 52 member universities.

Each Fellowship pays tuition, fees and a stipend of \$5,000 per academic year, as well as provides summer employment with a sponsoring member employer. The total value of the award is anywhere between \$20,000 and \$30,000 and depends upon which member university the Fellow elects to attend.

Applications must be received by Dec. 1, 1987. Awards will be announced Feb. 1, 1988. Information on the program, as well as application materials, may be obtained from: GEM Program, P.O. Box 537, Notre Dame, IN 46556.

Missouri Miner

The Missouri Miner is the official publication of the students of the University of Missouri-Rolla. It is published each Wednesday at Rolla, Missouri and features activities of the students of UMR.

Submissions for publication must be in our drop box (first floor of the Rolla Building) by 4:30 p.m. on the Thursday before publication or may be brought to the staff meetings at 6:30 p.m. on the same Thursday.

Advertising information may be had by contacting the Advertising Director at 341-4235.

Essays sought extolling "Parents of the Year" nominees

Source: News & Publications

The University of Missouri-Rolla Parents' Association is seeking nominations for its 1987 "Parents of the Year." This year's winners will be honored during halftime of the Parents' Day football game Saturday, Oct. 24.

According to Larry Allen, assistant director of Alumni and Constituent Relations, the UMR Parents' Association is expanding its Parents of the Year competition for 1987 by opening up the nominating process to all interested persons or organizations.

"The only requirement is that the nominees be the parents or legal guardians of a student attending UMR full time during the 1987 fall semester," Allen explained.

Entries, which must be limited to 500 words or less, should detail the parents' qualifications—what they have done for their hometown, UMR, UMR's students or a

campus group. The entry must include the name, address and telephone number of the parents being nominated, as well as the name, address and telephone number of the person or organization making the nomination.

All entries must be sent to Allen, Parents' Association, Alumni/Development Office, 107 Harris Hall, UMR, Rolla, MO 65401, by 4:30 pm Monday, October 12. No late entries will be accepted.

The Reagan Revolution: Coming to an End?

By Paul Morris

Some people, particularly certain factions of the UMR Nuclear Engineering Department who attended last week's Dick Gephardt rally, may be familiar with the name, if not the ideas.

The Reagan Revolution has been nice, but the future demands ideas which break the mold. Enter Pete du Pont. The former three term congressman and two term governor of Delaware started the race for the Oval Office last September by announcing his candidacy for the Republican nomination.

At a time when the Democrats are scrambling for themes to excite the American people, and the Republicans are skittish about stepping from Reagan's shadow, Pete du Pont is running a campaign on what he calls "damn right" issues, issues which he hopes the average American will think about and say, "Damn right!"

It does take some courage to go to the heart of Iowa and say you want to end farm subsidies. Nonetheless, Pete du Pont wants to do this. Du Pont's reasoning: farm subsidies have increased from \$4 billion in 1981 to \$26 billion last year, with the farmers' lot not improving. Farm subsidies would be phased out over five years, with payments made directly to farmers during that period. After that, farmers would be free to make their own choices in a free market.

Similar opportunities for personal choice need to be given to the nation's poor. Welfare has done nothing but trap the poor in a cycle of

poverty. Pete du Pont believes those receiving government assistance should work for it. They should be given training, an extensive job search, and if all else fails, should work for the government at 90% of minimum wage. Such created jobs would have the attributes of "real" jobs: a paycheck, a boss, responsibility for mistakes, rewards for initiative, and opportunities for advancement.

Then, there's Social Security. The baby boom generation will either bankrupt the system or force massive tax increases in the future. Pete du Pont thinks Americans should have a choice. Under his proposed Financial Security Accounts, the current Social Security system will be there for those who want it. However, if a person wants a higher rate IRA, a dollar-for-dollar tax break would be given. That is, someone paying \$3000 to Social Security could put \$3000 into the IRA, and receive \$3000 back from the government.

In foreign policy, the "Evil Empire" is a nice catchphrase, but it should not dictate foreign policy. Pete du Pont believes that expanding freedom should be our objective, whether it be in Nicaragua or Chile, Afghanistan or South Africa. "We ought to be consistent and we ought to be forceful."

Permit me several points in closing: First, yes, he is one of the du Ponts. Second, I have drawn upon many sources for this article, from du Pont's campaign to a column by George F. Will. I do not intend to repeat the "Biden Blunder" of not acknowledging sources. And last, but by no means least, I urge all, regardless of ideology, to study all candidates and make an informed choice before going to the polls next year.

Gephardt: The good, the bad, and the unfeasible

By Denny Henson, News Editor, and Jim Reed, Assistant News Editor

If you are a Democrat or a Gephardt supporter you may want to flip a few pages to Bloom County, because you won't enjoy this commentary. When writing the article about Richard Gephardt in last week's edition, Jim left several things unsaid which didn't belong in a news story but which we felt ought to be made known. These paragraphs are the result.

During the Congressman's speech applause starters were scattered around the crowd to ensure its positive response. While this tactic is not wholly unacceptable to us, applause started for the most minor of points and continuing until the audience grudgingly responded with a smattering of its own applause became quite irritating as the candidate paused time and again for the clapping to be forced upon the crowd.

Candidate Gephardt expressed his admirable goal of making the United States the best educated nation in the world by the year 2000, but failed to indicate how he planned to bring this about. We realize that there was little time to go into detail during the Congressman's remarks, but stating a goal without a corresponding policy to achieve it leaves one wondering if the goal is feasible in the first place.

During the press conference after his speech Mr. Gephardt was questioned about his Congressional attendance record, which is among the worst in the House. The candidate responded that in our political system campaigns must be long and require extended absences of politicians from their posts. It seems to us that a Congressman is elected to represent his district and not to spend time furthering his own career.

In the final minutes of his press conference Gephardt spoke of a plan to restrict production in certain industries to help raise prices and control overproduction. His example was the farming industry where such a program could reduce government subsidies. This policy would require the creation of a new federal agency to institute it and smacks of a great deal of governmental control of private enterprise. Since this was the last topic Mr. Gephardt addressed in his press conference he left very little time for questions about this plan. We don't blame him--no one wants to stay too long in a minefield.

Reactions to the Presidential hopeful's speech from students we spoke with indicated that it delivered what we have come to expect from political speeches in general--there was a lot of talk but not much was said.

Extremism not necessarily in the public interest

By Marcia Waggoner
Staff Writer

I've always loved to hear a good extremist. Such people, so unreservedly dedicated to their cause, allow no mediators like reason or practicality to intervene. I like them because they provide a good example. Without them, we could have no moderation. In most cases, the extremist's cause is feasible, and may even appear to be practical, if you look at the evidence for it. However, an unfortunate side effect--and one to be watched out for--is over-polarizing to the other side.

If you strongly fear, for whatever reason, being identified or associated with the extremists on any particular issue, you may find yourself working with the extremists on the other side. Often this is just as bad. Polarizing is a false dilemma, giving the impression that you can only be either black or white.

To counteract this, it is often best to show all (not just both) extremists on an issue. If you only hear the extreme 'liberal' side every day, you will likely begin to feel that the conservatives are much better people. However, if you're exposed to both sides, you can see that each extreme is ridiculous and start looking for a moderation of the views or even a completely

different viewpoint.

This leads me to the editorials aired at least twice daily on KMNR, deceptively titled 'In the Public Interest' (IPI). These are often boring, but are delivered in a voice and tone which makes them impossible to tune out. If you're studying, you have to stop until the editorial is over. You then find yourself listening to a liberal diatribe which shows all the dangers of polarizing an issue. Particular examples include the Sept. 14 edition, which characterized Mr. Inouye as the 'hero' of the Iran-Contra trials, rather than Oliver North, and praised him and others for their courage in standing up to that mean monster, the Reagan Administration. Another example was heard on Sept. 23, declaring that the American public's right to keep and bear arms is definitely not 'in the public interest.' These daily editorials offer no moderation and probably do the liberal side more harm than good by characterizing them as extremists.

To counteract this, rather than getting rid of the editorials, I feel it would be worthwhile to read an editorial by William Rusher, who writes columns under the heading, 'The Conservative Advocate.' This would show the extremists on both sides and allow some room for moderation, rather than extremism.

Football

Miner's offense sparkles against Evangel

By Mark Buckner
Staff Writer

The Miner football team is back on the winning track as they ended their two-game losing streak with a 29-14 romp over Evangel College. This was a victory the Miners desperately needed because the last thing they wanted was to have a three-game losing streak heading into their first MIAA Conference game of the season.

The Miners played their best defensive game this year on Saturday. The Crusaders had a total of minus 39 yards rushing. That's no misprint.

Their two quarterbacks completed only 18 of 49 passes and were twice intercepted, one by Tom Oberle and the other by Kevin Lanier.

Freshman noseguard Kevin Riggs led the Miner defense with five tackles, while both linebacker John Hentges and defensive back Ted Bubien had four each. Crusader quarterback Don Decker had minus 51 yards rushing on seven carries. Again, no misprint. The Miner defense was that good last Saturday at New Jackling Field.

The Miner offense wasn't too shabby either. As a team, they had 209 yards rushing and 150 yards passing. Fullback Mark Paris led the Miners with 85 yards rushing on just fourteen carries while Lafayette Gatewood had 53 yards on ten carries. Quarterback David Andrzejewski completed 10 of 19 passes for 126 yards. Chris Hawkins led the Miners with seven catches for 79 yards. Both Paris and Andrzejewski had touchdown runs and Hawkins caught a TD pass. Here's how the scoring went.

Hawkins' nine-yard TD reception was the first score for the Miners. The key plays of the drive were a ten-yard halfback pass from Craig Colvin to Hawkins and a seventeen-yard pass play from Andrzejewski to Colvin.

The Miners made the score 14-0 in the second quarter on Paris' two-yard run. Paris made the key plays himself to set up his touchdown run, as he had two rushes of 12 and 25 yards, respectively.

Late in the first half, Miner kicker Jim Zacny connected on field goals

from 27 and 42 yards. The Miners led 20-0 at halftime.

On the Miners' second possession in the third quarter, Andrzejewski had a five-yard TD run to give the Miners a 27-point advantage. The Miners closed their scoring with a safety. With their victory over the Crusaders, the Miners evened their record at 2-2.

The Miners don't have a game this week, but will have one Oct. 10 against CMSU, the defending MIAA champion. The game against the Mules is Homecoming.

Ladies take 3 of 4

By Tracy Boland
Asst. Sports Editor

The Miners enjoyed a full and fruitful schedule this past week, taking three of the four games in which they played.

The women suffered their only loss of the season to date on Wednesday, falling 3-1 to Northeast Missouri State. The teams were evenly matched throughout most of the first half, as both teams missed on several scoring opportunities, and the game remained scoreless until Lisa Tieber took in a goal for the Miners. With roughly 3 minutes left in the half, she breezed past the lone Northeast defender for a one-on-one play with the keeper, who went into a slide-tackle to strip the ball from Tieber. Lisa popped the ball over the prone goalie, chased the ball to the end line and then pulled it back into the net to put UMR up by one.

The Lady Bulldogs managed to wear the women down in the second half

by making use of their almost unlimited supply of substitutes. Northeast chalked up two similar goals by having forwards Leslie Armstrong and Deidre Brennan available due to mis-marking by the UMR defense. In both scoring plays, the unmarked forward was fed the ball, was then able to pull keeper Greta Stromberg out of the goal, and chip the ball in past her.

The UMR defense was dealt a serious blow late in the match when sophomore Gina Dressel was involved in a yellow-card play. In an attempt to prevent a breakaway, Dressel was tugging on the jersey of a Northeast player, who then worked out her aggression by taking Dressel down with a full-body slam. The Bulldog was given a yellow-card, and Dressel was given a trip to the bench with an injured hip.

Water Polo

UMR finishes second in Indiana

By Scott Clark
Staff Writer

The UMR Water Polo Club travelled to Bloomington, IN this past weekend to participate in the Indiana Invitational. The Miners placed second in the five-team tournament, losing only to Clayton in the first game.

So far this season, Clayton has been the Miners' only nemesis. This time, the Miners almost had them beat. Two of Clayton's goals were scored on penalty shots. The final score was Clayton 6, UMR 5. The Miner goals were scored by Mark Wuttig (2), Scott Carney (2) and Doug Imrie.

The second game was against Indiana. The two teams were tied all the way into the fourth quarter, but the Miners pulled it out 7-5.

Scoring for the Miners were Doug Imrie, Scott Carney (2), Mark Wuttig, Tim Streb, and Rich Berger. A strong defense won the game for UMR as they scored three goals to the Boilermakers' one in the final period.

The third game was against SIU-Carbondale. This game gave the first-string players a chance to rest and the second-string a chance to show off their talents. The Miners were led by two fast-scoring freshmen, Scott Sandvoos and Doug Cordier, who added six goals each to lead the Miners to an incredible 19-1 victory. Lance Stark, the starting goaltender for UMR, also tallied goals of his own. With Clark out of goal, starter Scott Carney was called upon to try his hand at goaltending. He was able to completely shut off the Saluki offense in the fourth quarter. Other goal scorers were Tim Streb (2), Joe Lunden, Kurt Koelling and Doug Imrie.

The Miners rounded off the tournament with a 13-4 victory over Purdue. In this game, Rich Berger displayed his power when, on a penalty shot, he wedged the ball into the

back of the goal where it had to be forcibly removed. Scoring for the Miners in this game were Scott Carney (4), Tim Streb (3), Mark Wuttig (2), Rich Berger (2) and Doug Imrie (2).

The Miners' home tournament is this weekend. Matches are scheduled as follows:

Friday
7:00 pm UMR vs. SIU-C
8:15 pm Indiana vs. Springfield
9:30 pm Northwestern vs. UMR
Saturday
9:00 am SIU-C vs. Springfield
10:15 Indiana vs. Northwest
11:30 UMR vs. Springfield
1:30 SIU-C vs. Indiana
2:45 Northwest vs. Springfield
4:00 UMR vs. Indiana
5:15 SIU-C vs. Northwest

The Polo team hopes to see a lot of fans in the stands for this tournament.

Intramurals

Raquetball tourney starts

Submitted by
Lenny Meers

There is only one week left in the regular season for flag football. Playoffs start Oct. 1 with the first and second place teams in each division getting berths.

There were many fine performances during this past week of football. Mike Ellis from Sigma Nu won Athlete of the Week honors by leading the Snakes to an undefeated season so far. He has thrown for thirteen TDs as Sig Nu's quarterback.

Team of the Week was won by the PiKA golf team which came from six

shots down to win the golf tournament.

Raquetball starts Oct. 2. The tournament will be held at Vessell's. There is a special rate for practice time at the club if anyone wants to practice before their first match. Any forfeits for this tournament will be fined, so please show up when you are scheduled to play.

Swimming entries are due Oct. 2 and volleyball entries are due on Oct. 7. If your organization plans to participate in these sports, be sure to get your entries in.

UMR hosts Water Polo, Cross Country

By Tom Duggan
Sports Editor

Although there's no football game this weekend, UMR sports fans still have some unique events to choose from.

The UMR Invitational Water Polo Tournament is Friday and Saturday (see water polo story for schedule). The UMR team has only been beaten twice this season and the action promises to be wet and wild. This event will take place at the UMR pool (obviously).

Also on Saturday is the Miner Invitational Cross Country Meet. The meet starts at 10:00 am at the golf course. UMR fields a strong team and hopes to have many fans to cheer them on.

These are the only 'home' meets for Water Polo and Cross Country, so be there.

Saturday night, the men's soccer team takes on Westminster College in a 7:00 pm matchup. The soccer season is more than half over, with six home games left.

Admission to all these events is free with a UMR student ID.

Rugbers kick Southwest

By Chip McDaniel
Staff Writer

In a closely-contested match, the UMR Rugby Club opened its home season last Saturday against Southeast Missouri State. The game was held at Fraternity Row field.

First-half action in the game featured a see-saw struggle for the lead. UMR drew first blood, but missed the conversion attempt, which left the lead open to a SEMO score later in the half. Despite taking the lead, however, SEMO failed to capitalize on opportunities to widen the point gap given them by several UMR penalties. This failure would later come back to

haunt them.

As the second half opened, the UMR players quickly established their ability to use the wind to advantage. UMR kicks with the wind, coupled with the difficulty SEMO faced as they attempted to attack into the wind, kept the opponents at their own end of the pitch for most of the half.

Unable to effectively muster an offensive attack, SEMO also faced a UMR scrum that seemed to overcome some of the difficulties they had earlier in the game. With the forwards

Baseball's secret shame

By Tom Duggan
Sports Editor

Warning: Some readers may find some scenes in the following article disturbing and offensive. They are necessary to the content of the article. We apologize for the horrors about to be described.

The following story was related to this bureau by someone deep within the Cardinal organization. He has asked us to withhold his name. We'll call him Gene.

"I was surprised to be called down to the locker room at midnight. I thought maybe Tony Pena had injured himself during one of his frequent late

night batting practices. When I got there, I smelled incense.

"I was horrified as several higher ups in the club and some of the veteran players set a cauldron boiling in front of Vince Coleman's locker. The chanting was almost unbearable.

"As I watched, the ingredients were added, one by one: a picture of Vince, a lock of Jack Clark's hair, a ball autographed by Hank Aaron, and, last of all, one of Billy Hatcher's favorite bats."

With the crackdown on drug use and the increased vigilance of umpires towards tampering and cheating, an

Septemberfest proved a success Homecoming Events

By Chris Layton
Staff Writer

Two weekends ago, the St. Pat's Board put on the 10th annual Septemberfest—"A Decade of Living it Up." You couldn't have asked for a better time; a sunny day, a cool breeze, a live band, and all you could drink from 11 am until almost five in the afternoon.

There was also a new event added to this year's Septemberfest. The

new event, "The Obstacle Course," consisted of running through tires, climbing a rope and many other grueling tests. Pi Kappa Alpha was awarded 25 points towards St. Pat's 88 for completing the obstacle course in the shortest time. Triangles took second place and Phi Kappa Theta took third place, each receiving 10 and 5 points, respectively.

The live entertainment was provided by "Alpha", a rock and roll

band from St. Louis. As the day was coming to a close, the beer was going down smooth and the band was on break there were a few lovely young ladies who volunteered to show their "Sexy Legs" on stage, which was an added or extra attraction for the guys in the crowd.

Overall the Septemberfest celebration turned out to be "The Best Ever" with the help of a sunny day, a good crowd and lots of fun for everyone.

Wake up UMR, because the biggest and best Homecoming yet is less than a week away! Homecoming is not just a night to go to a dance, it's a week-long celebration full of great entertainment and activities for you to enjoy. This year's Homecoming has been in the works for over a year, and as you can see in our ads throughout the paper, we have come up with a lot of great Rolla "blues busters," such as Fred Stoller, an outstanding comedian whose humor will make you forget about those nasty tests our professors enjoy giving to us. Speaking of our beloved professors, how would you like to poke a little fun at them?? If so, maybe you need to sign up for the "prof look alike contest" being held on Tuesday, October 6 at 12:30 pm on the hockey puck. This is your chance to imitate your

favorite professor, or least favorite, and possibly win a prize. Another great little contest that will get your mind off your troubles is the scavenger hunt which begins also on Tuesday. This a two day event in which you have to find the strange items on your list, and the person who finds all or most wins. As you can tell, there are many relaxing and enjoyable events

to participate in and spectate during this year's Homecoming Week. All of us here at the Student Union Board hope you will be able to enjoy as many of these activities as possible. If you have any questions about any Student Union Board activity or entertainment program please come by and see us in room 217 of the University Center West, or call us at 341-4220. Enjoy your Homecoming UMR, that's what it is for.

Air Force Band performs at UMR

By Chip McDaniel
Staff Writer

As part of its fall concert program, the Student Union Board presented the US Air Force Band last Wednesday at the Multi-Purpose Building. The event also featured a performance by the Air Force vocal group, the Singing Sergeants. Assistance in arranging and organizing the concert was provided by the UMR Air Force ROTC.

The Air Force band is always a popular program, and the Rolla performance was no exception. The MP building was filled for the concert. A large portion of the audience was from the Rolla community, many of whom said they had either heard the band before or knew of its reputation and wanted to listen firsthand.

The Rolla performance was

given by the Washington, DC detachment of the Air Force Musical Command. This command unit's sole responsibility is the production and performance of musical concerts. Generally each major Air Force post has a detachment of this command.

While it may seem unusual for the Armed Services to have a command dedicated to musical performance, the band's function relates to the overall goal of the military to providing security, peace and order. Believing that music can bridge the gap between nations and cultures, the Air Force band is founded on the philosophy of peace through music.

The Air Force Band has played in many foreign countries and across the United States. The 1987 season includes twenty-one performances.

Board announces contest winners

By Chris Layton
Staff Writer

On Thursday September 17, the St. Pat's Board gathered to vote on the sweatshirt designs received in the past few weeks. We would like to congratulate everyone who entered the contest. There were many good designs received and we had to make some hard decisions.

Joe Jones, a sophomore in Electrical Engineering and member of Phi Kappa Theta, took first place in the contest. He was also award-

ed \$200 for his entry. Anna Hess of Rolla took home \$100 for her second place entry. Third place was given to Steve Munday, a senior in Aerospace Engineering and a member of Kappa Sigma. He received \$50 for his entry.

Now that we've decided on our design, we will be receiving our green early in October. The first day of green sales will be the day before Homecoming, October 9. So get psyched for St. Pat's 88. Only 176 Daze til the "Best Ever."

Gray accepts Green Challenge

Submitted by: IFC

We, the Interfraternity Council, do graciously accept the feeble minded challenge of the St. Pat's Board to the annual Gray-Green football game. We also accept the time, October 9 at 3:30 pm, and place, Fraternity Row Fields.

Unlike the St. Pat's Board, the IFC will win without the infraction of rules. To put it plain and simple, we do not need to threaten and cheat to achieve victory. Usually,

this kind of behavior is caused by an inferiority complex. Is the St. Pat's Board afraid of something?

The IFC would like to invite friend and foe alike to come and observe the afternoon struggle, which will end in the second victory in a row for the IFC.

In closing, we would like to say that our girlfriends will be there because they like watching their majestic gray gladiators prove their superiority.

Good Grief.

Whether you're into business, science or engineering, TI has all the right calculators with all the right functions for you.

Every year, thousands of hapless students watch their course load become an overload. And every year, the smart ones among them pick up a TI calculator and take a load off.

TI offers everything from advanced scientifics that clock your performances, to programmables that speak your language, to a solar-powered financial calculator that highlights your answers even in lowlight conditions.

And the large, color-coded keys and simple keyboard layouts mean you'll spend less time figuring out the calculator and more time figuring out your problems.

Nat'l Reserch Council sponsors programs for study

Source: National Research Council

The National Research Council announces the 1988 Resident, Cooperative, and Postdoctoral Research Associateship Programs for research in the sciences and engineering to be conducted in behalf of 28 federal agencies or research institutions, whose laboratories are located throughout the United States. The programs provide Ph.D. scientists and engineers of unusual promise and ability with opportunities to perform research on problems largely of their own choosing yet compatible with the research interest of the supporting laboratory. Initiated in 1954, the Associateship Programs have con-

tributed to the career development of over 5000 scientists ranging from recent Ph.D. recipients to distinguished senior scientists.

Approximately 450 new full-time Associateships will be awarded on a competitive basis in 1988 for research in: chemistry, earth and atmospheric sciences; engineering and applied sciences; biological, health, behavioral sciences and biotechnology; mathematics; space and planetary sciences; and physics. Most of the programs are open to both US and non-US nationals, and to both recent Ph.D. degree recipients and senior investigators.

Awards are made for one or two years; senior applicants who have

held the doctorate at least five years may request shorter tenure. Annual stipends for recent Ph.D.'s for the 1988 program year will vary from \$27,150 to \$35,000, depending upon the sponsoring laboratory, and will be appropriately higher for senior Associates.

Reimbursement is provided for allowable relocation costs and for limited professional travel during tenure. The host laboratory provides the Associate with programmatic assistance including facilities, support services, necessary equipment, and travel necessary for the conduct of the approved research program.

Applications to the National

Research Council must be postmarked no later than January 15, 1988 (December 15 for NASA), April 15, and August 15, 1988. Initial awards will be announced in March and April (July and November for the two later competitions) followed by awards to alternates later.

Information on specific research opportunities and federal laboratories, as well as application materials, may be obtained from the Associateship Programs, Office of Scientific and Engineering Personnel, GFI Room 424-D1, National Research Council, 2101 Constitution Avenue, N.W., Washington, DC 20418, (202) 334-2760.

Former Student Freeman posted in Germany

Submitted By: Richard L. Freeman

Lieutenant Colonel Richard L. Freeman, son-in-law of Mr. and Mrs. James L. McKibben, has recently been assigned to the Federal Republic of Germany. LTC Freeman, a Corps of Engineer officer in the United States Army, is assigned as the Directorate of Engineering and Housing, Horddeutschland. In this capacity, he is responsible for all maintenance and repair of US facilities, minor construction less than \$200,000 and family and bachelor housing in the Norddeutschland Military Area, an area covering approximately 22,000 square miles. LTC Freeman has previously served in Southeast Asia and Germany in addition to several assignments in the United States. His awards include the Bronze Star Medal, Meritorious Service Medal (3rd Oak Leaf Cluster) and the Vietnamese Cross of Gallantry (2nd award). He is a graduate of the University of Missouri—Rolla with a Bachelors Degree in Civil Engineering and a Masters Degree in Engineering Management.

LTC Freeman, his wife Barbara, daughters Heather and Stephanie and son Landon currently reside at Grubke 2, 2850 Bremerhaven, Federal Republic of Germany.

Good News.

The TI-60 Advanced Scientific features such built-in functions as hexadecimal/octal conversions, integration using Simpson's rule, statistics (including linear regression), trend line analysis and metric to English conversions. There are also 84 programming steps for repetitive calculations.

The TI-74 BASICALC™ Programmable Advanced Scientific is TI's BASIC language programmable calculator.

In addition to offering a full range of scientific, mathematical and statistical functions, the TI-74 offers a 113 BASIC keyword set with a special function key that gives direct 2-keystroke access to 41 BASIC commands. The TI-74 also has subprogram capability for advanced programming flexibility.

The TI Business Analyst Solar features TI's exclusive Anylite Solar™ technology, so you can use it in any

light. Preprogrammed formulas help you speed through business problems such as interest, loans, real estate, bonds, pricing and profit.

The TI-65 Advanced Scientific offers all of the built-in functions of the TI-60, plus a stopwatch/timer for lab-work, eight physical constants for use in thermodynamics and physics as well as Decision Programming (if...then) capabilities. There are also 100 programming steps for repetitive calculations.

The TI-95 PROCALC™ is keystroke programmable and also offers a full range of scientific, mathematical and statistical functions.

Featured in the TI-95 is TI's exclusive Power Windows™ Operating System, which provides easy access to the functions and flexible file management system. Both the TI-95 and the TI-74 offer optional equipment such as Solid State Software™ modules, an 8K constant memory module, a portable printer and cassette interface.

So pick up a TI calculator today. It'll save you a lot of grief and it might just save your skin.

Coppermine,

Thanks for the card! The snakes was a paradox, but anyway, I liked it. Bye!

Rugby from page 4

joining in many of the offensive movements, UMR showed moments of rugby brilliance that resembled play often seen in the best club sides in the state.

With the newly-awakened force of the UMR forwards, the backs were able to open the game up, running the score decidedly to UMR's favor, where it was to remain for the rest of the match. In spite of some missed passes and ball-handling mistakes that practice will cure, the end of the match had UMR posting a 22-12 victory over SEMO.

UMR's scoring efforts saw a big day for winger Ralph Peterson, who managed to post two tries and had a possible third taken from him by a questionable referee's call.

The day's action also featured scores posted by younger members of the team, who deserve recognition for their outstanding efforts. Club president John 'JK' Pope managed to slip past SEMO defenders with a nice move close to the try-line. New-starter Dan Redington showed strong support and effort on a UMR penalty play when he took a short pass from team captain Al Bess and punched

1987 Homecoming Queen Candidates

Julie Keogh
Lambda Chi Alpha

The Brothers of Lambda Chi Alpha are proud to present Miss Julie Keogh as our Homecoming queen candidate. Julie is a senior in civil engineering and is involved on campus as corresponding secretary of ASCE and a member of AGC. Julie is the daughter of Jim and Joan Keogh of Weston, Mo. Julie's many interests include aerobics, camping, water skiing and all sports. We feel Julie's exceptional charm, lively personality and beauty make her an ideal choice for Homecoming Queen.

Elizabeth Huggins
General Delegation
of Independents

The General Delegation of Independents is proud to present Elizabeth Huggins as their 1987 Homecoming Queen candidate. Liz is the daughter of James and Caroline Huggins of Clinton Corners, New York, and is a senior in engineering management. She is secretary of GDI, and has worked on various committees, including advertising, publicity and our monthly newsletter. She is also managing editor of the *Missouri Miner*, and has been involved in her professional societies, ASEM and SME. We feel that Liz not only represents GDI, but UMR as a whole with her enthusiasm and involvement on campus.

Catherine Alofs
Delta Tau Delta

The men of Delta Tau Delta proudly present Miss Catherine Alofs as our Homecoming Queen candidate for 1987. Cathy is the daughter of Dr. and Mrs. Darryl Alofs of Rolla. She is a sophomore and plans to receive a degree in mathematics. She is active as an editor of the *Rollamo* yearbook, a member of the Chancellor's Leadership Class and Phi Eta Sigma, and a General Honors Mentor. Cathy's warm personality and charm convinces us that she should be your Queen.

Teresa Hamm
Theta Xi

The men of the Alpha Psi Chapter of Theta Xi fraternity proudly present Miss Teresa Hamm as our 1987 Homecoming Queen candidate. Teresa, a junior in metallurgical engineering, is the daughter of David and Mary Langston of St. Louis. Teresa's campus involvements include being secretary of Kappa Delta sorority, a member of Alpha Phi Omega, Order of the Sun, and Met Society/ASM. We are confident that Teresa's charming personality and campus involvement make her the best candidate for Homecoming Queen 1987.

Jennifer Sommer
Tau Kappa Epsilon

Jennifer Sommer is the daughter of Mr. and Mrs. Loy Sommer of Salem, Missouri. She is a junior in psychology. Jennifer is the current program director at the student radio station, KMNR. She was the past president of the Daughters of Diana, and is a member of Psi Chi. She enjoys traveling and meeting people.

Tamara Neudecker
Sigma Nu

Sigma Nu is proud to present Miss Tamara Neudecker as their Homecoming queen candidate. She is currently president of our little sister organization, where she has also been secretary and rush chairman. Tammy is also a member of Chi Omega sorority where she is currently intramural manager. Tammy is the daughter of Dave and Mary Neudecker of Alton, Illinois. The men of Sigma Nu think Tammy would be an ideal choice for the throne of Homecoming Queen.

Lea Ann Shackles
Residence Hall Association

The Residence Hall Association is proud to present Ms. Lea Ann Shackles as our 1987 Homecoming Queen candidate. Lea Ann is a sophomore transfer student from Independence, Missouri. She is majoring in engineering management and is a member of Phi Theta Kappa, SWE and ASME.

Kathy Mahoney
Beta Sigma Psi

The men of Beta Sigma Psi are proud to present Kathy Mahoney as our 1987 Homecoming queen candidate. Kathy, the daughter of James and Janice Mahoney, is a senior in engineering management from Belleville, Ill. She is a member of Zeta Tau Alpha sorority and has been an officer in APO, Intercollegiate Knights, and the Sisters of the Gold Rose. She is also involved in ASEM and IIE. We feel that these qualities, along with her beauty and charm make Kathy a perfect candidate for Homecoming Queen.

Anita Bhatia

Chi Omega

Chi Omega proudly presents Miss Anita Bhatia, daughter of Dave and Heidi Bhatia of Chesterfield, Mo. as our 1987 Homecoming Queen candidate. Anita is a graduating senior in mathematics. She has been active in Chi Omega and the Daughters of Lee at the Kappa Alpha fraternity. Some of her campus activities include Kappa Mu Epsilon and an involvement with the Intercollegiate Knights. We feel that Anita's striking good looks and dynamic personality make her the ideal choice for the honor of presiding as Queen at the Homecoming festivities. Chi Omega wishes you the best of luck!

Marilyn Peebles

Alpha Phi Alpha

The Alpha Phi Alpha Fraternity, Inc., Epsilon Psi chapter is pleased to present the charming Ms. Marilyn E. Peebles. Marilyn is a junior electrical engineering major from St. Louis, Mo. She enjoys listening to jazz, reading and meeting interesting people. Marilyn currently reigns as Miss Epsilon Psi and Miss Black and Gold for the state of Missouri.

Linda Desilet

Kappa Delta

Kappa Delta sorority is proud to present Miss Linda Desilet as our date. Linda is the daughter of Larry and Suzan Desilet of Independence, Mo., and is currently a senior at UMR majoring in aerospace engineering. Linda is active on campus with involvement in Sigma Gamma Tau (AE honor fraternity), Gold Miners, Phi Eta Sigma, Kappa Mu Epsilon, AIAA, and Phi Kappa Theta Little Sisters. At our house, she serves as vice president, and she has also held the offices of social chairman and intramurals chairman. We feel that Linda's warm personality and numerous activities would make her an excellent choice for Homecoming Queen.

Christine Uzzell

Phi Kappa Theta

The men of Phi Kappa Theta are proud to present Christine Uzzell as their Homecoming queen candidate. Christine is a sophomore majoring in electrical engineering. She is a member of Chi Omega and serves as a mentor in the honorary society Phi Eta Sigma. Christine is also the social and intramural representative of the Phi Kappa Theta Little Sisters.

Julie Pennycuik

Pi Kappa Alpha

The men of Pi Kappa Alpha proudly present their 1987 Homecoming Queen candidate, Miss Julie Pennycuik. Julie is the daughter of Gen. and Mrs. Robert Pennycuik of St. Louis, Mo. She is a junior this year, majoring in electrical engineering. Julie is a member of the Special Events committee of the Student Union Board and is an active member of the IEEE. She is a member of the Zeta Tau Alpha sorority and also of Pi Kappa Alpha's Sister of the Shield and Diamond, where she has held the offices of treasurer, secretary and vice president.

Michele Meyer

Alpha Epsilon Pi

The men of Alpha Epsilon Pi proudly present Miss Michele Meyer as our 1987 Homecoming Queen candidate. She is the daughter of Mr. and Mrs. Orville Meyer of Monett, Missouri, and is a graduating senior in civil engineering. She has held past offices in the Society of Women Engineering as president and resume book editor; in the Institute of Transportation Engineers as president, vice-president and secretary-treasurer; in the Association of Women Students as an intramural manager; and in the Lutheran Student Group as vice president. She also is a member of the American Society of Civil Engineers. She is an active member and has served as president and vice president for the Little Sisters of Alpha Epsilon Pi. We feel that her many campus activities and winning personality make Michelle Meyer an ideal candidate for Homecoming Queen.

Deirdre McDaniel

Triangle

Deirdre is a junior in the mechanical engineering department. She's an active member in the Chi Omega sorority and is a little sister to the Sigma Phi Epsilon fraternity. A few of the organizations she is involved in are the Toastmaster's International, Student Council, intramurals council, and the mechanical engineering honor fraternity—Pi Tau Sigma. Deirdre also enjoys in her free time volleyball, softball, reading and horseback riding. The men of Triangle fraternity are very proud and honored to have Ms. McDaniel representing us this 1987 Homecoming.

Stephanie Dinwiddie

Missouri Miner

The *Missouri Miner* is pleased to announce its choice of love and beauty, Stephanie Dinwiddie, for the 1987 Homecoming Queen. Her parents are Charles and Doris Dinwiddie from Florissant, Mo. Stephanie is currently the business manager of the *Missouri Miner*. She was previously the assistant business manager. Stephanie is a member of Zeta Tau Alpha. She has served as Panhellenic and scholarship chairperson. Stephanie has also held an office as a Starduster, a little sister organization of Kappa Sigma. Stephanie is a junior studying mechanical engineering. She excels in the classroom as well as in the organizations she participates in. Stephanie is a pleasure to work with and is an instrumental part of the *Missouri Miner*. We are proud to have her represent us, and feel she has the qualities to become the 1987 Homecoming Queen. We wish our candidate the best of luck.

"THE FUTURE'S SO BRIGHT . . .

Sheila Cochran

Delta Sigma Phi

The men of Delta Sigma Phi are proud to present Miss Sheila Cochran as their 1987 Homecoming Queen candidate. Sheila is the daughter of Mr. and Mrs. Dan B. Cochran of St. Charles, Mo. Sheila transferred to UMR from the University of Georgia, where she completed her associate of arts degree in mathematics, and she is currently a junior in mechanical engineering. In her spare time, Sheila enjoys water skiing, volleyball and softball. We feel that Sheila's enthusiasm for Delta Sigma Phi and her outgoing personality make her the best candidate to represent us and UMR as the 1987 Homecoming Queen. All of the men of Delta Sigma Phi wish Sheila the best of luck!

Shelly Donze

Pi Kappa Phi

The brothers of Pi Kappa Phi are proud to present Miss Shelly Donze as our 1987 Homecoming Queen candidate. Shelly is a senior in chemical engineering. In addition to co-op work with Dow Chemical, Shelly has been active in Kappa Delta, Alpha Chi Sigma, AICHE, APO, and SUB. Shelly's fun-loving personality, quick wit, and natural charm make her an excellent choice for UMR's 1987 Homecoming Queen.

Rhonda Dalske

Kappa Sigma

The men of Kappa Sigma are proud to present Miss Rhonda Dalske as their candidate for UMR's 1987 Homecoming Queen. Rhonda, the daughter of Tony and Sherry Dalske of Florissant, Mo., is a junior in mechanical engineering who has been involved in many campus organizations. Rhonda has served as both Service Chairman and Ritual Chairman in the Zeta Tau Alpha sorority, is a member of both APO and AIAA, was voted president of Kappa Sigma's Stardusters, and was selected as a Blue Key Miner of the Month. The men of Kappa Sigma are honored to present a candidate of the caliber and quality of Rhonda Dalske, and feel that she would make an excellent choice for Homecoming Queen.

Karen Ashford

Kappa Alpha

This year's Homecoming Queen candidate representing Kappa Alpha Order is Karen Joann Ashford, daughter of Kenneth and Joann Ashford. Karen has been president of the Kappa Alpha Little Sister organization, and is currently the Rush Chairman for them. While she is a member of Chi Omega sorority, she is also a junior in engineering management. We feel that her exuberance and sincerity has left a lasting impression on the brothers of Kappa Alpha.

Jennifer Lynch

Sigma Phi Epsilon

The men of Sigma Phi Epsilon proudly present Jennifer Ann Lynch as our candidate for Homecoming Queen. Jenny is the daughter of William and JoAnn Lynch of St. Charles, Mo., and is currently a senior in mathematics. While attending UMR, Jenny has been very active in the Sig Ep Golden Hearts and intramurals and was captain of the UMR cheerleaders. Jenny is currently second vice president of Zeta Tau Alpha and has served as fraternity education chairman, judicial chairman, and parliamentarian. She is currently the president of Panhellenic. The men of Sigma Phi Epsilon feel that such complete campus involvement matched with her sparkling personality and knockout smile make Jenny the perfect choice to represent UMR as Homecoming Queen.

Carol Crooks

Sigma Pi

We, the men of Sigma Pi fraternity, proudly present Miss Carol Crooks as our 1987 Homecoming Queen candidate. Carol is the daughter of Jim and Ginger Crooks of Afton, Mo. She is a junior in electrical engineering. Carol has been secretary of the Daughters of the Emerald, and is active in Tau Beta Pi, IEEE, Toastmasters, Phi Eta Sigma, and the Spelunkers Club. In her spare time, she enjoys jet-skiing, running and softball. We believe that Carol's involvement on campus, scholastic success, and outgoing personality make her a wonderful choice for Homecoming Queen.

Meg Marshall

Zeta Tau Alpha

The ladies of Zeta Tau Alpha are proud to present Meg Marshall as our Homecoming Queen candidate. Meg is the daughter of Ralph and Mary Marshall of Ballwin, Mo. She is currently a graduating senior in civil engineering. Meg is president of ZTA and was previously secretary and activities chairman. She was secretary of the American Society of Civil Engineers and an active member of the Association of General Contractors, Institute of Transportation Engineers, Intercollegiate Knights and the Golden Hearts of Sigma Phi Epsilon.

Tracy Perkins

Sigma Chi

The men of Sigma Chi are proud to present Miss Tracy Suzanne Perkins as our candidate for the 1987 Homecoming Queen. Miss Perkins is the daughter of Gary and Carla Perkins of East Alton, Illinois. She is a sophomore majoring in chemical engineering and her current activities include being a member of AICHE, the Little Sigmas of Sigma Chi and teaching gymnastics. We at Sigma Chi feel that Tracy's outgoing personality, charm and beauty make her an excellent choice for UMR's 1987 Homecoming Queen.

Ramona Jennings

Tech Engine Club

The membership of Tech Engine Club proudly nominates Ramona Lynn Jennings as our candidate for Homecoming Queen. Ramona is a sophomore in electrical engineering. She is an enthusiastic and active member of the club, and exhibits these qualities in the Greek society as a White Rose of Sigma Tau Gamma. Her outside interests vary greatly, with hobbies such as bowling, needlework and novels. We, the membership of Tech Engine Club, believe that her genuine kindness, and outgoing, caring personality make her an excellent candidate for Homecoming Queen.

Toyota presents "Sex on Campus."

HAS SEX DROPPED OUT OF COLLEGE?

Some say free love stopped being free when AIDS began. Others say changing attitudes had already altered the role of sex on campus. And then there are those who say that nothing's changed at all.

You're invited to share your views with celebrities and expert panelists, as College Satellite Network looks under the covers to find the truth.

Join us for this live-via-satellite, interactive program featuring actress Alexandra Paul (Dragnet, American Flyers), Dr. C. Everett Koop, U.S. Surgeon General and others. It's an evening sure to touch the student body.

September 30 at 7 p.m.

Stucky from page 1

and federal economic development activities; providing University leadership in the development of the Missouri Research Park in St. Charles County; serving as the president's representative in development of the U-M-Kansas City North Campus Development Project; and overseeing the University Office Patent Development.

Stucky has been administrative vice chancellor since 1983. He came to UMC in 1979 as director of institutional research and planning. Stucky held administrative posts at the University of Oklahoma and Ohio State University. Before entering higher education he was a mechanical engineer.

He holds three degrees in mechanical engineering from Ohio State.

The Missouri Research Park, located in south St. Charles County, is being

developed on 240 acres owned by the University of Missouri. It is being developed and managed by the Trammell Crow Co. When fully developed in an estimated 10 to 12 years, it is expected to be worth about \$250 million. Private firms involved in research and development at the park are expected to employ 4,000 to 5,000 people.

The UMKC North Campus Development Project is planned as a campuslike low-density research and development facility on a 50-acre site north of the current campus. The University has entered into a 75-year lease with the Continental-Kroh Development Group for development of the park. Development is expected to take 12 to 25 years. Construction is expected to cost \$270 million. The development is expected to produce 4,000 to 5,000 new jobs for Kansas City.

Merit Scholars to visit UMR

Source: News & Publications

Semifinalists and commended students in the National Merit Scholar competition are invited to attend National Merit Day at the University of Missouri-Rolla Friday, October 30.

National Merit Day is designed to acquaint the honor students with UMR's academic programs and give them an opportunity to learn about admission, financial aid, housing and campus life in general. Parents, teachers and counselors are also invited to attend.

Registration will begin at 8 am in the Miner Lounge on the second floor of the University Center-East. Students are encouraged to attend 8:30 and 9:30 am classes while parents, teachers and counselors meet with faculty and staff representa-

tives or take short tours of the campus.

A program on "UMR—What It Is and What It Offers" will begin at 10:30 am in Centennial Hall, University Center-East. It will feature talks by UMR faculty, staff and students on different aspects of campus life and a question-and-answer period. It will be followed by a luncheon.

During the afternoon, participants will have the opportunity to visit academic departments, dormitories and campus offices.

Anyone interested in attending National Merit Day or wanting further information may contact the chairman of the event, Dr. Don Askeland, professor of metallurgical engineering, 244K McNutt Hall, University of Missouri-Rolla, Rolla, MO 65401, phone: 314-341-4730.

letters to the editor

Dear Editor,

Mr. Bookout has made a number of allegations about the United States backed Freedom Fighters in Nicaragua that are at best misinformed, and are perhaps a concerted attempt to mislead.

The Sandinista government may have come to power as a result of a popular uprising, but the Communists in the movement took control through murder, threats, and curtailment of basic human freedoms, betraying the revolution. Most of the leadership of the Contras is composed of the people who helped kick the Somoza regime out of power and wanted a democratic revolution. After the successful uprising they were pushed aside by the Communists once they had outlived their usefulness, and democratic government in Nicaragua was dealt a fatal blow.

On a broader front, I find it remarkable that anyone can argue with a straight face that we ought to allow a Soviet-dominated government anywhere in this hemisphere. Like it or not, we are the dominant military and economic power in this part of the world, the only country that can compete with the USSR. We owe it to future generations of Latin

Americans to make sure their right to democracy is not bartered away. This 'watchdog' policy might not be very popular, but that does not change the essential fact that it is the RIGHT thing to do.

The presence of a pro-United States government in another country yields many tangible benefits to us, such as the use of military bases, and solid trade relations. This works both ways: the foreign country's government is stabilized by our military support, and economically revitalized by our aid. But the greatest benefit by far is intangible: the ability of the United States to act as a powerful lever promoting positive social changes. This has been demonstrated recently by the new leadership in the Philippines and the reforms in South Korea. Neither of these changes would have been able to occur had the U.S. not been there to push them along, which is where the critical difference between the two systems comes into play. You see, the Soviet Union, for all its new 'glasnost', would never have given those movements a chance and the countries would have remained totalitarian into the foreseeable future.

George Purcell

Dear Editor,

I would like to direct this article about certain problems plaguing the Democratic Party. First of all, whatever happened to it? This party used to stand for good values and a strong America, but now it seems that anything goes.

Somewhere in the annals of history, men like F.D.R. and Harry Truman represented this political system. Nowadays, anyone in the party is running for President; at least until their past and moral character catch up with them. Gary Hart (or was that Hart-pence?) was telling the country we needed to abandon our tradition and morals and depend on our potentials and, no doubt, him. Joe Biden was verbally attacking the Reagan administration, and said that America needed a new path for the future. While these two candidates might have been appealing to some, they both had serious moral problems. The former with adultery; the latter with plagiarism.

But, are these two incidences characteristic of the Democratic Party? I think so! When a party stands for anything in the name of liberty, moral degradation isn't far behind. The platform of most Democrats includes the

following: protecting the rights of homosexuals and lesbians; pro-choice on abortion; banning prayer from ever being taught in school; passing anti-gun laws; and reducing our national defense budget, not to mention doing away with supporting the freedom fighters in Nicaragua. In reality, the Democratic Party is controlled by special interest groups. The A.C.L.U., the N.O.W., and the N.E.A. all have their grasp on it. And, it's these groups, combined with relaxed standards on values, that have drastically hurt the party.

As far as the 1988 election is concerned, the Democratic Party doesn't stand much of a chance. Babbitt, Dukakis, Gephardt, Gore, Jackson, Schroeder, and Simon aren't contenders; they're jokes. In fact, they're the Republican Party's best allies. And, we as Americans should be thankful; because a party that doesn't have standards doesn't deserve to be represented in the White House.

John Matrix

Dear Editor,

Why can I never find a Miner on campus anymore? I have looked diligently in the boxes at the library and U. Center-East, each week from Tuesday morning through Thursday afternoon. The only one I have seen thus

far was one I found on a cafeteria table.

This is especially important to me this semester because I need to keep up on the placement information.

Please tell me where I might find a paper on campus (even though I won't see the answer because I won't be able to find this week's paper.)

Signed,

Out of touch with UMR events
Dear Out of Touch,

Since you seem unable to find a Miner on campus, we didn't think you would mind waiting an extra week to see your letter in print.

If you are looking diligently for a Miner on Tuesday morning, you won't find one. They are distributed to various locations on campus Wednesday afternoons. As for the box where they are placed in the University Center, it was removed for a while. Upon checking this out, we were told that a janitor didn't like the color of it, so he removed it. Think what you like about that one.

If you need to keep up on placement information, the placement office is two blocks from the UCE, and they can provide you with more detailed information than the Miner can. This information is also available on several bulletin boards around campus.

Missouri Miner Editorial Board

PERSONAL RESOURCE DEVELOPMENT PROGRAM

TEST ANXIETY

Do you sometimes find your performance on exams adversely affected by your anxiety concerning how you will do on the exam? If so, you may be experiencing test anxiety with possible stress symptoms that is lessening your effectiveness as a student.

If you'd like to find out more about test anxiety and what you can do about it if it affects you, drop by the Ozark Room at the University Center-West on Tuesday, October 6, from 3:30 to 4:30 p.m. Dr. Carl Burns of the Counseling and Testing Center will discuss test anxiety and ways of managing it.

Creative Engineers

At Sundstrand, we see engineering as a creative profession. A blend of artist's imagination and scientist's pragmatism. The ingenuity to conceive new technologies and the discipline to make them work.

As a leading supplier of technology-based electrical and mechanical aerospace components, we're in the business of creative engineering. We're looking for creative engineering graduates in most of our programs. Whether you're interested in research, design, project, testing, or manufacturing engineering, we're interested in you.

In addition to openings for graduating engineers, we have a cooperative education program for engineering students.

WE WILL BE ON CAMPUS SOON!

See your college placement office for further information or to arrange an interview.

Ladies

The Miners suffered a confidence lapse with Dressel out of the backfield, and Northeast took it to the ladies again with three minutes remaining in the game. Stacy Erikson fought off Roberta Dressel's attempts to knock the ball from the Northeast forward's feet back to Stromberg, and then pushed the ball past the keeper for the final goal of the match.

Thursday morning, the women left Rolla on a five-hour bus ride to Little Rock, AR., where they were pitted against the University of Arkansas team in an afternoon game.

Apparently, the Miners' scoring motivation arrived at the game forty-five minutes late, because Little Rock had UMR down 2-0 at half-time. Sally Puhlick led the team back into the game with a hat-trick, and Teresa Dickinson's second-half goal made the difference for the Miners as they pulled it out, 4-3.

However, there was no rest for the weary Friday, because Rolla played its third game in as many days, this time against Rhodes College of Memphis, TN. This drive must have been relaxing for the UMR team since they recorded their first shutout of the season versus Rhodes.

The 3-0 Miner victory consisted of a freshman explosion in the first half. Teresa Dickinson scored two goals, one with an assist from Lisa Giblin, who in turn scored the third UMR goal. Keeper Stromberg fended off the opposition for the entire match to reduce her goals-against-average from

2.5 to 2.

The ladies brought their current record up to 4-1-1 by defeating Westminster College Sunday afternoon by a whopping 8-1 score.

Lisa Tieber increased her claim as lead scorer for the Miners by racking up four goals, including a volley kick past the Jays' keeper off of a cross from Lisa Giblin. The goal brings Tieber's total to six for the season.

Giblin brought herself to within one goal of Tieber when she drilled a shot from thirty yards out that floated over the Westminster goalie into the upper corner of the net, while Sally Puhlick has four goals on the season by scoring on a ground shot that bounced post-to-post before rolling into the net.

Coach Paul McNally tried to prevent an all-out massacre of the visiting team by maneuvering UMR players to unfamiliar positions, including moving Gina Dressel and Michelle Ditton up to play forward. Ditton had two shots on goal and Dressel turned the switch to her advantage by pelting the ball left-footed past a beleaguered keeper.

The Lady Jays avoided the shut-out by scoring against Stromberg in the first half, as Chris Hanson accurately placed a strong kick out of Stromberg's reach into the net.

McNally's view on the last four games is that despite the victories, the women are not playing to their fullest capabilities. This was apparent in

Sunday's game, as the Miners were taking advantage of the Westminster errors, but were not working to force those errors. Up to this point in the schedule, UMR has faced relatively easy opponents. The teams that lie ahead this season will be much more of a challenge for the ladies, and won't be making the mistakes that have enabled Rolla to win four matches.

Part of the Miners' problem can be attributed to the shortage of team members. In Sunday's game, UMR was able to field just eleven players, and that was using back-up keeper Sharon Racenas as a mid-fielder. Racenas has been running the field for Rolla in a few games and has been performing well, especially for a player who is primarily a goalie.

But the short roster can't be blamed for everything. In their home games, the women have had some sparkling plays, both offensively and defensively, so the team is obviously capable of high-level soccer. The challenge for the Lady Miners is to make such plays routine, no matter what the intensity level of the opposition.

The Miners' next game is Thursday versus Missouri Baptist in St. Louis, while the next home game is Sunday, Oct. 11 at 12 pm against Missouri Valley College. The men's game follows at 2 pm.

Rugby from page 8

across the try-line for a score. Kickers Greg Schmidt and Chris Reed also had a nice day cleaning up conversion kicks to post six additional points to the UMR total.

The club would like to extend a special thanks to sponsor/coach Lee Kimmel for his help in refereeing our home games.

The Rugby Club will be travelling to Springfield, MO next Saturday to take on the Southwest Missouri State collegiate team.

Home Sports Pictorial- Miners in Action

Football vs. Evangel

Two Miners put the crunch on an Evangel ball carrier. Evangel's rushing total was a negative 31 yards. (Photo by Jim Breitbarth)

Quarterback David Andrżski took this one in himself. The Miners beat the Crusaders 29-14. (Photo by Jim Breitbarth)

Chris Hawkins reaches for a high pass. Hawkins had 7 catches for 79 yards on Saturday. (Photo by Jim Breitbarth)

Men's Soccer vs. Northeast

A Northwest player elbows Curt O'Brien off of the ball. NEMO's coach was ejected after just 10 minutes of play, almost a record.

Kurt Meyer has the jump on his defender as both dash for the ball. UMR drew NEMO 4-4 in a dramatic overtime match.

Bill Steffen strips a Bulldog of the ball as Curt Meyer looks on. (Photos by Jim Breitbarth).

Womens Soccer vs. Northeast and Westminister

Sally Puhlick races a Westminister player to the ball. (Photo by Tom Gerber)

Sharon Racen winds up for a shot downfield. (Photo by David Libiez)

Teresa Dickinson keeps her eye on the ball as the Lady Jay Keeper awaits her shot. UMR beat Westminister 8-1. (Photo by David Libiez)

Voodoo

from page 4

ugly new practice has surfaced. You have just read a firsthand account of sports voodoo. Gene explains what happened next.

"After Vince hit his first out-of-the-park homer, I hoped it was a coincidence. But then he hit another last week. The following game, he blasted one over the 383 mark, about ten rows back. As the crowd cheered wildly, he trotted around the bases...slowly. The unnaturalness of it all gave me a sick feeling."

We asked Gene what he thought was going on. Why is Vince turning into a power hitter?

"He thinks he's Jack Clark. He sits around the dugout with that blank look on his face. He argues with the umpires. Before each game, he puts that black stuff under his eyes. You can't see it, but it's there."

According to Gene, this evil practice was brought in from the winter leagues of the Dominican Republic and Jamaica. How widespread is it? It's been gaining momentum this year, spurred on by the intense competition.

"It's rumored that manager Davey Johnson of the Mets has a set of little dolls, one of each player. When one of them is at the plate, he puts a tiny

corked bat in that doll's hands. You've seen how the Mets are doing this year."

Of course, with baseball managers performing voodoo rituals, there are bound to be some mistakes.

"Last week, right after Vince's two game homer streak, they tried to call back Babe Ruth's spirit from the dead and put it into Terry Pendleton. Since then, he hasn't hit any homers, but he keeps singing 'Heartbreak Hotel' in the showers."

"I think they got Elvis by mistake."

PERSONAL RESOURCE DEVELOPMENT PROGRAM

WANT TO MAKE FRIENDS?

Wednesday, October 7, 3:30-4:30 p.m. Mr. Lou Moss will be discussing how to make friends and develop a social network. Mr. Moss will talk about different types of friends and depths of friendship, as well as dispel some common misconceptions about them.

The main emphasis of this presentation is feeling good about yourself and your friendships, present or future.

10th Anniversary Special

Thurs. Oct. 1 Thru Sat. Oct. 3
open: Mon-Sat 9-9:30 364-1303

Prepared for the future. Yours and ours.

ARCO is meeting the challenges of today's petroleum industry through creative engineering and a drive for excellence. Coupled with the largest domestic liquid reserve base in the industry, our quest to be the best has prepared us for a bright future.

We invite you to investigate making our future yours when our representatives are on campus. Please contact your placement office for details.

CAMPUS PERFORMING ART SERIES AND

THE STUDENT UNION BOARD PRESENTS

THE LOS ANGELES PIANO QUARTET

Tuesday, October 13th 8 p.m.

At the Cedar Street Center

\$6.00 for adults, \$5.00 for retirees and

Free to all UMR students with I.D.

Power tools for the classroom.

The TI-74 offers BASIC programming with a 113 BASIC keyword set. There's 8K Constant Memory and subroutine capability for advanced programming flexibility.

The TI-95 offers powerful 7200-step keystroke programming and features our exclusive Power Windows,™ which provide easy access to the functions and flexible file management system.

TI programmable calculators have all the right functions and enough extra features to satisfy your thirst for power.

To all you science and engineering majors unsatisfied with mere calculators, TI has good news. Your power tools are

here. The TI-95 PROCALC™ is keystroke programmable and the TI-74 BASICALC™ is BASIC language programmable. Each has a full range of scientific, mathematical and statistical functions, and plenty of power extras.

Both have optional equipment such as Solid State Software™ modules,

including math, statistics and chemical engineering, and a module with an additional 8K Constant Memory. Additional power accessories include a separate portable printer and cassette interface.

So if you're into power, look for the display in your bookstore for a demon-

stration of our power tools. They build such a strong case for themselves, our competition doesn't know what to make of them.

We've given our brains to science.

The TI-60 functions include hexadecimal/octal conversions, integration using Simpson's rule, statistics (including linear regression), trend line analysis and metric to English conversions. You can program 84 steps.

The TI-65 has all the TI-60 functions, plus a stopwatch/timer for lab work, eight physical constants for use in thermodynamics and physics as well as Decision Programming capabilities. You can program 100 steps.

TI advanced scientifics have all the right engineering and science functions to help you function better in school.

When we set out to make our most advanced scientific calculators, we gave a lot of thought to what your

science, math and engineering problems are. Then we designed our calculators around them. The result: the TI-60 and the new TI-65 are both packed with built-in functions. Plus, there are programming steps to speed you through repetitive calculations. But even though both can

handle the hardest problems, they're easy to use. Large, color-coded keys and simple keyboard layouts mean you spend less time figuring out the calculator and more time figuring out your problems.

So if you're the kind of student who's got science on the brain, get the

calculators from the folks who've given their brains to science. The Advanced Scientifics from Texas Instruments.
