University of Missouri-Rolla

From Rolla with love: Campus has hosted spies

By Randy Richardson
Staff Writer

On January 29, 1979, Lt. Col. Werner Stiller of the East German State Security Service crossed the Berlin Wall with classified documents and a list of Communist spies. A wave of arrests followed. Later that day in Rolla, Missouri, a strange event occurred—an event that would long be puzzled over...

Monday, January 29, 1979:

Early that morning Werner Deich got rid of a satchel in a UMR dumpster.

Dr. Ingrid Deich was teaching a 1:30 sociology class when a man came to the classroom. Dr. Deich left the room and spoke with the man outside for about five minutes. The man never entered the classroom. Dr. Deich finished teaching her 1:30 class, taught a 2:30 class, then reported to Dr. Erwin Epstein—chairman of sociology at the time—that she was ill and was going home for the day. That was the last time that Dr. Ingrid Deich was seen.

A missing person's report was filed on Dr. Deich with the Rolla Police Department. The Deiches' house was searched and the police discovered a fully stocked refrigerator and no evidence of anything missing except Dr. Deich's car. There was no evidence of foul play.

A while later, Dr. Epstein received a telegram from Dr. Deich from Mexico City. The telegram read:

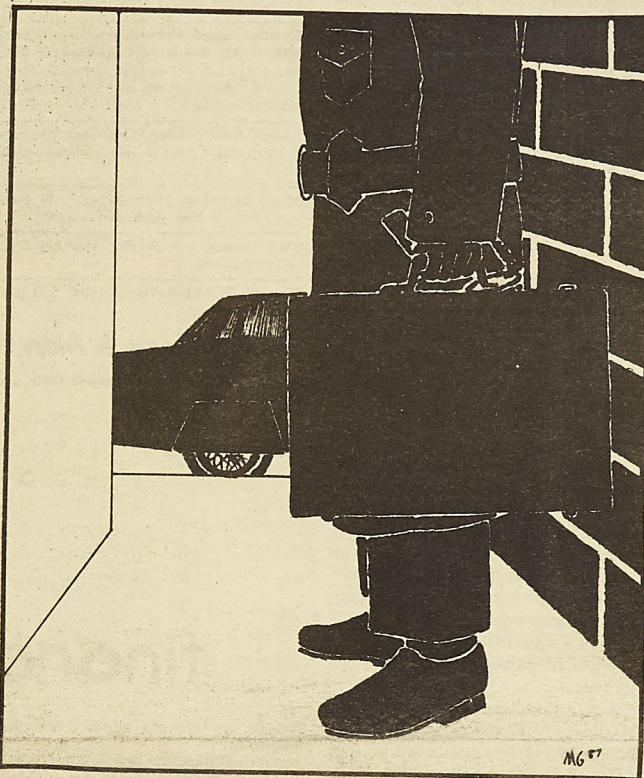

"Very sorry for disappearance stop had to choose between work and marriage stop followed Werner to his New York (work) place in Mexico City stop formal letter resignation will follow stop Ingrid Deich."

And in March 1979, Dr. Epstein received Dr. Deich's letter of resignation, void of return address and with a smudged postmark.

Dr. Deich, at this time, also sent a letter to a UMC graduate student, John Cross. She asked him to pack the Deiches' belongings and pay some of their bills. Cross figured that Dr. Deich had suddenly decided to be with her husband after suffering through some earlier separations while one or the other went back to Germany from time to time.

Who were the Deiches? How did they get here?

Ingrid Deich received her Bachelor's and MS degrees at the Universities of Dusseldorf and Berlin, respectively. It was at Berlin that Ingrid met and married Werner Deich, who was studying history. Werner Deich came to Columbia, Missouri to teach history at UMC, where Ingrid got her PhD in

sociology. When Werner became unemployed, the Deiches moved to Rolla, where Ingrid taught sociology at UMR. This was in 1976. The Deiches had been permanent residents since 1972.

While Ingrid was doing graduate work at Berlin, she spent six months in West Germany with a cover letter. The letter allowed her to have access to valuable West German intelligence information, which was in her field of emphasis—industrial policy. While in the United States, the National Science Foundation was fixing up a contract for Ingrid that would allow her to continue studies in industrial policy.

Six years later, in 1983, Ingrid Deich was spotted in East Germany at a conference on "Sociology and Peace" that was organized by the government. At that time she was a Professor of Sociology at Karl Marx University in Leipzig.

In a later telephone interview with Dr. Deich, she said, "There are certain edges and corners in people's lives which are not always straight." And when asked if she was a spy, Dr. Deich laughed. However, the FBI believed differently. They believed that both Ingrid and Werner, Deich were lower level spies.

GM donates research money

Source: News and Publications

General Motors Corporation has presented the University of Missouri-Rolla with a \$70,000 gift to assist UMR's Eminent Program in Intelligent Industrial Systems. The gift is the first of five such annual contributions.

The Eminent Program in Intelligent Industrial systems, which places UMR among the top colleges and universities in the nation in the field of industrial automation, is interdisciplinary, offering a solid undergraduate

academic program, an active graduate and research program in industrial automation, and consulting and co-operation with industry.

The program brings together the faculty and staff resources of the Institute of Artificial Intelligence and the Institute for Flexible Manufacturing and Industrial Automation, and uses UMR's sophisticated computer-aided design, manufacturing, industrial processing and intelligent computing equipment.

GM representative Richard Bachelor presents a check to a grateful Chancellor Jischke.

Placement office alternative offered

By Randy Richardson
Staff Writer

There is now an alternative to the UMR placement office in the Buehler Building. The alternative is Advance Professional Placement, located on Old St. James Road just right of the Pepsi distributor. This placement agency handles 1500 executive agencies nationwide and places only professionals. Their emphasis is with medium and small sized companies. There is no charge for UMR students who use this service. simply take your

resume to them and sign a statement that the information is true. It takes about five minutes.

APP can place people in exclusive regions such as the St. Louis or Kansas City areas, or they can search a wider region such as the Midwest. Their system is completely computer based.

APP is discreet about the disclosure of personal information. They send only a person's qualifications to a

possible employer. Names are not given until the prospective employer wants an interview.

A seminar will be sponsored by APP featuring David Shaw, who will discuss resume construction and interview techniques. The seminar will be Saturday, December 5 at 10 am in the Missouri Room. Cost will be \$20, but there is a money-back guarantee if students are not satisfied with the results.

School's top ten go-getters listed in Who's Who

Source: News and Publications

Ten students from the University of Missouri-Rolla will be listed in the 1988 edition of "Who's Who Among Students in American Universities and Colleges."

Students were selected by a campus nominating committee and editors of the annual directory on the basis of academic achievement, service to the community, leadership in extracurricular activities and potential.

The students listed were chosen from among students representing more than 1,400 institutions of higher learning in all 50 states, the District of Columbia and several foreign countries. The directory has been published since 1934.

UMR students listed this year are:

MISSOURI

Ballwin: Mary Ellen Marshall, daughter of Ralph and Mary Marshall, 101 Sheffield Court, a senior in civil engineering. She has held the offices of president and recording secretary

of Zeta Tau Alpha sorority and recording secretary of the UMR student chapter of the American Society of Civil Engineers. Her memberships also include the Associated Students of the University of Missouri, Intercollegiate Knights service organization, the Association of General Contractors, the Institute of Transportation Engineers, and the Golden Hearts of Sigma Phi Epsilon. She also is a member of UMR's women's varsity softball team and was chosen as an Interfraternity Council Greek Goddess. She is the recipient of a St. Louis City Panhellenic Scholarship. She also was chosen 1987 Homecoming Queen second runner-up.

Bois D'Arc: Rodney N. Joel, son of Neal and Marjorie Joel, Route 1, a senior in civil engineering. He has held the offices of president of the Interfraternity Council, president, vice president and secretary of Acacia fraternity, and secretary of the Greek

Council. His memberships also include the UMR student chapter of the American Society of Civil Engineers. His activities and honors include Interfraternity Council Greek God, listed in Outstanding College Students of America, elected to "Business Tomorrow XIII," Big Brother/Big Sister program, Mason, UMR Auxiliary Services Board of Directors, and University Housing Advisory Board.

Concordia: Gary Meyer, son of Larry Meyer, 901 Magdalena Street, and Donna Meyers, 704 South Street, Wellington, a junior in aerospace engineering. He has held the offices of president of the Rock Climbing Club, treasurer and vice president of Phi Eta Sigma freshman honor society, treasurer, first vice president and historian of Alpha Phi Omega service organization, and assistant treasurer and scholarship chairman of Beta

calendar of events

Wednesday

The Red Cross Bloodmobile will be at Centennial Hall from 10 a.m. to 4 p.m. Please help to ensure an adequate blood supply.

Thursday

Intercollegiate Knights will meet tonight at 6:30 in the Ozark Room.

IFC Sing & Dance: late Night with the IFC Sing and Dance, 7 p.m. at the Armory.

Phi Eta Sigma meeting 6 p.m., H-SS G-5. Plaque signing party, 7:30. Beta Sigma Psi activities and alumni welcome.

Physics Seminar "The Use of High energy Accelerators to Study Atomic Collision Processes," John A. Tanis, Western Michigan Univ., 4 p.m., Physics 104. Free.

Southwinds will meet Thursday, Nov. 19, at 3 p.m. in H-SS 105. Anyone interested in writing, photography, or magazine publication may attend.

UMR Film Series, "Playtime," 7:30 p.m., Miles Auditorium, ME 104. Admission by season ticket or \$3 at the door.

Friday

Engineering Mechanics Seminar, "Analysis of Thick Composite laminates," Dr. Ajit Roy, Univ. of Dayton Research Inst., 3:45 p.m., EM 202. Free.

StuCo Equipment Fund: ATTENTION any organization eligible for Student Council appropriations: In order to request funds from the Equipment Fund, your proposals are due in the Student Council office by noon on November 20, 1987. We will have a preliminary review of the requests on Nov. 23 at a time and location to be announced. The Student Council will vote on the Equipment Fund at the Dec. 1 meeting.

GDI's Annual Turkey Wake is at KC Hall. If you're not involved in the Greek Sing, come have a good time. It's from 8 to 11 p.m. Live music by Obeid Khan and "Boots."

Saturday

Men's Basketball, Alumni Game, 7:30 p.m., Multi-Purpose Bldg., Free.

Women's Basketball, Avila, 5:30 p.m. Admission charged.

UMR Swimming Miner Classic, 7 p.m., Multi-Purpose Bldg. Free.

Sunday

UMR Jazz Band Concert, 2:30 p.m., Cedar Street Center. Free.

Monday

Chemistry Seminar, Ronald E. Olson, UMR, 4:30 p.m., G-3 Schrenk Hall. Free.

Christian Campus Fellowship meeting 7-8 p.m., Mark Twain Room, Univ. Center-East. Elections for officers will be held. Come join us for Christian fellowship. For more information call 364-9841 or 3567.

KMNR Artist Feature Steve Winwood (from traffic to today), 6-9 p.m. Give it a listen—you'll love it!

Men's Basketball, Harris-Stowe, 7:30 p.m., Multi-Purpose Bldg. Admission charged.

SWE Meeting, 5:45. Speaker: Monterey Coal. Officer elections.

Women's Basketball, Harris-Stowe, 5:30 p.m. Admission charged.

Next Thursday & Friday

UMR Offices Closed for Holiday, Thurs. and Fri., Nov. 26-27.

Today

National Science Foundation Awards: NSF announces the second annual competition for its Engineering Creativity Awards. To apply you must be an engineering senior and you will be asked to display a creative idea. The Foundation points out that creativity and high GPA are not necessarily the same thing. Those who receive the award will be paid \$20,000 a year for three years to go to graduate school. The awards are portable and can be taken up at any U.S. school of engineering. Detailed information on how to apply is being sent to the undergraduate engineering student council on campus as well as the Dean's Office and the offices of the chairmen of departments. This is a program to get seniors to go on to graduate school so that they can become the innovative and creative engineers of the future. The program is not open to anyone who has ever been to graduate school. To apply you must either be a U.S. citizen or a resident alien of the U.S. on the closing date which is Feb. 1, 1988. If you have any problem in getting information on the program, you can call the NSF in Washington, 202-357-5102.

Southwinds is now accepting submissions for the 1988 issue. If you write poetry or prose, or have photos or artwork you'd like to submit, simply drop them off at the English Department office on the second floor of the Humanities Bldg. Any submissions are greatly appreciated.

Tau Beta Pi Sophomore Engineering Scholarship: Tau Beta Pi will be extending the deadline until Nov. 23. Those interested must have 30-45 credit hours, a GPA of 3.5 or better, be of sophomore status, and be enrolled in an engineering program. Five scholarships of \$250 will be awarded. Pick up applications in the Financial Aid Office.

Judiciary to be discussed

By Cordell Smith
Staff Writer

At its upcoming meeting on Thursday, November 19, the UMR College Republican club will feature a program for judicial restraint. The meeting, which will be held in room 321 of the Chemical Engineering building, will begin at 7:30.

The main event will be a thirty-minute videotape, "Judges Bird, Grodin and Reynoso: Court of Injustice?" The tape was produced last year during the electoral campaign in California to unseat California Supreme Court judge Rose Bird.

"Judge Bird provides an excellent example of judicial activism—that is, the effort by the populace while over-

riding the legislative and executive branches," CR chairman Tim Scott commented, "As a result, this tape really is timely, especially as the future direction of the federal Supreme Court is being debated. Certainly everyone who signed our club petition in support of Robert Bork should see this film."

Robert Bork was President Reagan's nominee to fill the existing vacancy on the Supreme Court until he was defeated by the Senate. "Judge Bork advocated judicial restraint but was defeated because an insufficient number of people understood the need for restraint. Thus, this tape provides important facts," Scott stated.

financial aid

National Association of Women in Construction Scholarship. Eligibility: 1) Applicants must be a first, second or third year student in a course of study leading to a degree in construction, construction management, architecture, civil, mechanical, structural or electrical engineering. 2) Applicant must also desire a career in one of the above. 3) Student must be enrolled full-time; part-time students are

not eligible. To apply: 1) Complete a four-page application (available in the Student Financial Aid Office). 2) Have the evaluation form completed by your academic advisor (available in the Student Financial Aid Office). 3) Submit an official transcript of college grades. Application deadline: Postmarked no later than January 1, 1988.

Finals Schedule Announced

FALL 1987

The final examination period will begin Monday, December 14, 1987, at 7:30 a.m., and end at 5:30 p.m., Saturday, December 19, 1987. Common finals are scheduled for those courses listed in Section II below. Room assignments for common finals will be announced by the instructors.

The courses not covered in Sections I, II, and III are to be arranged by the instructor in cooperation with the students in that course.

I. Evening Course Finals are scheduled for the evening session during final week.

II. Common Finals include ALL SECTIONS.

According to the Manual of Information all requests to change the final schedule because of conflicts or having three or more examinations scheduled on one day "are to be made in the Registrar's Office at least one week before the beginning of the final examination week" (Friday, December 4).

Women at Work-Final lecture held

By Marcia Waggoner
Staff Writer

Suzanna Maupin Long, University of Missouri-St. Louis, will speak on "Black women's Clubs in St. Louis, 1930-1945" at noon in the Missouri Room, University Center-East, at the University of Missouri-Rolla.

The lecture, which is part of the Women-At-Work series, is the final program of the series for 1987. The public is invited to attend.

The series examines issues that are of contemporary interest due to the changing status and roles of men and women in our society.

comments

Excuse me, my name is 74473

By Jim Harter
Editor-in-Chief

Whatya know it was Friday morning and only one obstacle left to face before the glorious weekend. An afternoon test awaited just hours away. Studying late the night before, the eyes began to feel heavy reviewing test material in the library. I was tired yet psyched to get the test over, anticipating the weekend. I approached the information desk in the library. I asked to see a file on reserve, hoping to check some homework answers pertaining to the material on the upcoming test. Lilly the Librarian with a stone face responded methodically: "I need your I.D. card before I am able to show you any of the files on reserve."

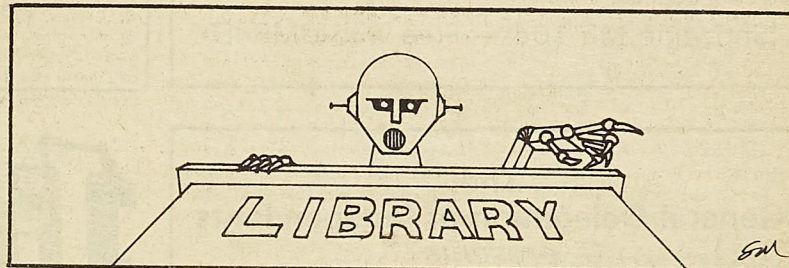

Realizing I didn't have that particular piece of plastic, I implored graciously just to check one answer at the desk, involving only a few of her precious seconds. Yet Lulu, I mean Lilly, the Librarian snapped back indomitably. I began to wonder if this was the same lady who in the **Wizard of Oz** was in charge of all those flying monkeys.

I was like in dire need to see that file. I imagined Lilly the Librarian making her kids present their social security cards before sitting down for dinner. My eyes were bloodshot from lack of sleep. I was dressed like a typical college student — maybe a little unshaven because of the little sleep, but Lilly the Librarian assumed that I was Johnnie Joe the On-Reserve Thief. Apparently, Lilly the Librarian had never been in need of a file on reserve. Not much action was happening at the information desk, but apparently, the need of a student was not on her mind.

Even with only two hours of sleep, I guess I managed to wake up on the wrong side of the bed. I pay my tuition, study hard (sometimes), and believe in democracy, but Lilly the Librarian, playing commandant, refused a brief peek while in the presence of her eagle vision. I couldn't believe it! So I tracked down a professor for his school I.D.

After running around campus wasting valuable time, not to mention trying to study for the upcoming test, I returned to the library. I presented the I.D. in return for the file on reserve.

Boy, was that a nightmare! What if Lilly the Librarian happened to be a nurse at the infirmary? God help the student with a broken leg who has left his school I.D. at home. Maybe Lilly the Librarian had a bad day, but such a simple request to glance at the file while in her presence was not asking for much. After spending lots of time and effort in preparing for a test, the last thing I or any student needed to face was a cold Lilly the Librarian.

I got it though! What if all the students tattooed their student I.D. to their foreheads? Now that would be a cost-cutter. There would be no need ever to make new ones and Lilly the Librarian would be a happy camper. Then Lilly the Librarian could treat every student like a number, and we could all just be a statistic.

It was an infuriating experience to encounter before taking a test. I thought Lilly the Librarian was to help students who wanted to further increase and broaden their knowledge. I suppose I was wrong — the grim reaper does exist at UMR! I think Lilly the Librarian should stick to shelving books, that is if the library is to be of any use for the student.

letter to the editor

Dear Editor,

Now that I have time to catch my breath between tests, there are some things that have flitted through my mind between semaphores and homomorphisms on which I now have time to comment.

Like hazing and the St. Pat's Board. Now, unless something has changed in recent years, St. Pat's honorary knights are chosen by the organization that they represent. Becoming or

remaining a knight is not dependent on taking a dip in Alice. Obviously, hazing would not affect the knighting ceremony. But, try looking a little deeper. The Board is steeped in initiation rites, especially those involving the mass consumption of alcohol. The hazing laws could mean a change to those rites, but probably won't, as the members of the Board seem to enjoy them.

See Board, page 8

Homecoming coordinator named Miner of Month

By Jon P. Kadane
Staff Writer

The members of the Blue Key National Honor Fraternity wish to congratulate Jim Trautman for being selected as Blue Key Miner of the Month for October 1987. Jim was nominated by the Student Union Board for his efforts as chairman of the 1987 Homecoming Committee.

Early last semester, Jim accepted the challenge to chair the 1987 Homecoming Committee after the success of Homecoming 1986. He began the formation of the steering and planning process in March of 1987, and he spent the entire summer of 1987 at UMR working on the planning of Homecoming 1987. He developed and motivated a diversified steering committee which represented a broad base of campus organizations, and this led to the accomplishment of the second successful year of Homecoming, thereby establishing the firm foundation for the tradition of future Homecomings. Homecoming 1987 fostered better relations between faculty, students, and alumni, and will in the long run improve alumni support for the University of Missouri-Rolla.

Also considered for the honor of Blue Key Miner of the Month for October 1987 were Kelley Sheehan, nominated by Kappa Delta; Lori Goucher, nominated by Zeta Tau Alpha; Joe Kloeppel, nominated by Pi Kappa Alpha; and Marla Jungling, nominated by Angel Flight. Again, congratulations to Jim Trautman!!!

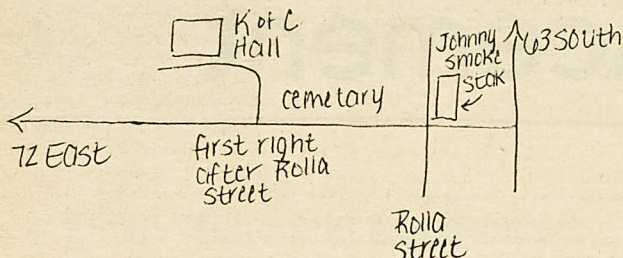

Just a reminder that Miner of the Month applications for November are due by December 1. Applications are available at the Candy Counter and at the Student Activities Office, and completed forms should be returned to the Candy Counter in the University Center-East.

GREAT AMERICAN SMOKEOUT

TAKE A BREATH

Join the Great American Smokeout on Thursday, November 19. Millions of smokers across the country will take a break and try not to smoke for 24 hours. How about you? Or, if you don't smoke, adopt a smoker for the day and promise to help that friend get through the day without a cigarette!

85-7MM-Rev. 4/87-No. 5680-LE

A FEW QUIT TIPS

Hide all ashtrays, matches, etc.
Lay in a supply of sugarless gum, carrot sticks, etc.

Drink lots of liquids, but pass up coffee & alcohol.

Tell everyone you're quitting for the day.

When the urge to smoke hits, take a deep breath, hold it for 10 seconds, & release it slowly.

Exercise to relieve the tension.

Try the "buddy system," and ask a friend to quit too.

features

Thanksgiving Vacation seems just a test away

By Bob Hansen
Staff Writer

Slumped over a mound of texts, coffee cups and candy wrappers scattered throughout the room, the true engineer lies peacefully in a state of unconscious bliss.

"Mark...Mark...Wake up, Mark."

"Huh, what...the square root of E=mc² at 1300 when the sheer stresses reach their max..."

"Mark! Wake up! You're dreaming."

"Oh, Hi JoAnn. What are you doing here?"

"Don't you remember? I'm giving you a lift home for Thanksgiving. Now hurry up. Let's go."

Mark had forgotten there were no classes for the rest of the week. Almost instinctively he had stayed up all night studying for an exam that wasn't scheduled for another two weeks. And now Thanksgiving break had begun. All Mark could ask was, "Why?"

"Why must I be interrupted from my life's work for some silly holiday commemorating one lousy meal between a bunch of heretical pilgrims and heathen savages?" Mark has long considered Thanksgiving one of his least favorite holidays.

Once on the road, JoAnn began chatting away about all the intoxicatingly wonderful aromas that anxiously awaited her at home. The smell of the turkey in the oven, the mouth watering pumpkin pie cooling on the counter...she could almost eat the steering wheel if she would stop talking for even a few moments.

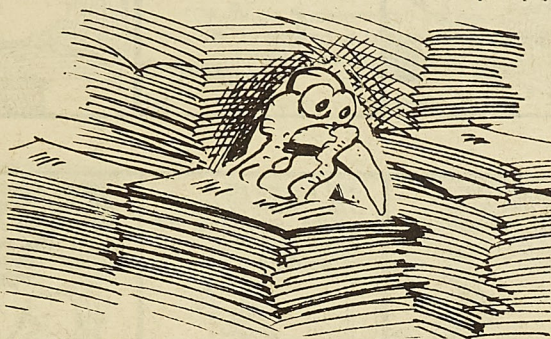

On the other hand, Mark's mind drifted through similar thoughts, but from a moderately different viewpoint...the composition of the butter atomizes with the juices of the turkey filling the air with molecular substances that only the human nose can recognize and detect. How many moles of these molecular gasses are necessary before the olfactory system registers them and how many more before the system can identify them?

After what seemed like endless hours (45 minutes) JoAnn had arrived at Mark's home and was hastening him all the more to "Get out! I'm running late as it is! And don't forget, I'll be back at 2 o'clock sharp to get you on

Sunday, and be ready! And, oh yeah, have a happy Thanksgiving..."

Slowly Mark walked to the door, pausing before entering. It was almost as if he were preparing himself mentally for war. Beyond this very door lay horrors not even Steven Spielberg could imagine, worse than any nightmare, more brutal than the torture rack, more painful than bamboo shoots under his cuticle. Yes, beyond this door lay the infamous family gathering.

Mark was shaken from his trance when Aunt Trudy appeared at the door and announced his arrival to the rest of the tribe. "Oh look everyone, Mark is here. He finally tore himself

away from his books and he's just in time for dinner."

Aunt Trudy was a bit of a crazy old bat...lovable enough but could she ever put some compressive and sheer stresses on a cheek...PAIN!

Uncle Elmo quickly came to his rescue reminding Aunt Trudy that "He isn't a kid anymore, he's a man. Do you know how much you're embarrassing him?" Thank heavens for Uncle Elmo.

Once past the first line, Mark found his father waiting with his 500 psi handshake that has always been his trademark. "Welcome home, son. Glad you could make it back for the holiday," Mark's father, Frank, was a truly unique individual in that he owned one of the few remaining farms that wasn't co-owned by the bank. Mark had tremendous respect for his father and all of his horse sense that had taken him so far. If only Mark could put it all into an equation...

"Mark! Mark! You're home!" As with most mothers, Emma had an uncanny habit of restating even the most intuitively obvious facts. Mark didn't really mind. After 22 years he

had almost grown used to it. "I fixed your favorite...oyster and corn casserole." Mark's mother also had a special knack for always knowing which of his favorite dishes to fix when he came home for any occasion.

Just as Mark thought he had everything under control, in came Marvin, Mark's youngest brother. Of course, he wasn't alone. He had brought along the family dog, Hobo who was so excited to see Mark that he promptly used

each rib of the poor sucker who had just been creamed in the middle of the field? Even more interesting are the aerodynamic qualities of that little piece of over-inflated leather they call a football. What effect would it have if the football were made of polystyrene aluminum with a 45 pt grain

for gripping and filled with 212 psi of helium? Mark often got over-involved in the technical aspects of the sport himself.

"Vittles are on the table, come and get 'em!" As anyone who has ever attended a family gathering knows, this means that everyone should form an orderly queue for processing by the table seating controller. The job of the controller is one of great responsibility for any number of mid-dining room collisions may occur if even one wrong signal is given.

And if that isn't bad enough, there is the tremendous confusion involved in the processing of each of the heavily laden bowls and blast furnace-hot casserole dishes so that each and every member at the table becomes sufficiently stuffed.

"Now let's see, the stomach holds approximately 1 pint or 383 ml in a perfectly stress free environment. However, on Thanksgiving, the stomach can hold..." By now it should be clearly evident that Mark has been at Rolla entirely too long.

Dinner conversation goes about as would be expected when at least one member of the family is in college. "So, how are your classes going? Are you getting good grades this semester? How's your social life? Now tell us again, when will you graduate, and what will your degree be in, and..." Most know the rest of the line of questioning.

Just as the pie arrives and Mark is calculating the mass of each piece and the circumference of the pie tin, he begins to hear voices in the distance...

"Mark! Mark! Get up! You've got class in five minutes." Suddenly Mark was shocked into the reality of what had happened. It is the week BEFORE Thanksgiving break and he really does have a test...in five minutes. One reassuring thought prevails even in this moment of complete and total PANIC...at least it's just a test.

GDI offers party weekend

Submitted by GDI

It's back! Independents' Weekend, that is. At a recent GDI Board of Governor's meeting, it was decided that the time has come for the revival of a long tradition at UMR. The last Independents' Weekend was in 1983, and GDI feels the need to remind the students of UMR that there is an alternative to the Greek system.

Tentative plans are being made for April 20th thru 24th. We would like to start off the fun with a bowling bash Wednesday night. On Thursday, there will be a Belly-up with the Independents. Friday will bring a tea, Independent Queen coronation, and a

party. On Saturday, we would like to have Independent Games at Lion's Club Park, with such things as frisbee golf, an obstacle course and a softball tournament. Saturday night there will be a dance, and on Sunday we would like to have a B-B-Q at Lion's Club for those who helped bring this together.

In keeping with the tradition, we would like to have t-shirts printed up and available for those participating in the weekend.

If your organization is interested in being a participant, please contact Liz Huggins at 364-8996 or Sandy Magerkurth at 364-4764. We would like to know as soon as possible, so we can start making firm plans.

KMNR snaps on Sundays

Submitted by KMNR

Hello and welcome to another Fabulous, Frivolous, Furiously Fun-Filled edition of the Groundwaves from KMNR 89.7 FM. This one hopes to tell you what's happening on Sundays.

At midnight the doom crying host of "Asylum from the Real" brings you obscure meaningful music with an occasional touch of angst. Then at 3 a.m. (still Saturday night for most of you), "Is Anybody Out There" brings to you the best of the past, 60's and 70's rock to keep the body moving in the wee hours of the morning.

To wake those church-going folk, we have the esteemed Dr. Lou. (But doctor of what, we don't know.) Dr. Lou's show, "Yog-Sothot, Dragon & Co.", will shake you up and lay you flat again. From the obscure to the out of control, the madhouse rebels from 6 a.m. to 9 a.m.

From nine til noon, KMNR presents the "Big Band/Reggae/Alumni

Show" during which anything can happen. Next it's the "Folk/Bluegrass" show.

Chris Icade leads a tag-tag fleet "Off to Nowhere" with various themes and no sense of direction. Follow him from 3 p.m. to 6 p.m. To lead you into Monday, first the cool sounds of jazz permeate the airwaves from 6 p.m. to 9 p.m. Then the blues roll through your speakers and fill your body with rhythm from 9 p.m. right up to Monday.

Don't forget that the KMNR roadshow is available free for all-campus parties. The roadshow plays your favorite DANCE tunes at your request. Call 341-4272 for more information.

Really fun craziness shall emanate from your friends at KMNR. So, keep in tune, keep in touch and always remember: no matter where you go...there you are!

Snapman
P.S. Wubba, Wubba, Wubba!

SUB schedules entertaining activities

Submitted by SUB

Finals week is only how long away ???? You've gotta be kidding me; it was over a month or so away not long ago!! Well as we all know, finals week gives us a lot to do as well as a lot of stress due to too much studying. That is the reason your Student Union Board likes to schedule some fun-type

activities toward the end of the semester, to help you relax and enable you to give your mind a break from your worries and frustrations for a little while. Some of the activities we have planned only last for an hour or so and really do not take a lot out of your study or work time. The benefits of taking a one hour break are tremendous to a person under a lot of stress (just ask any psychologist) or you may just take my word for it. The UMR Student Union Board exists for basically one reason, and that is to

provide entertainment that is beneficial to the student body.

The following is a basic itinerary for the rest of the fall '87 semester. On Nov. 23rd, at 8 pm the annual SUB talent show will be held in Centennial Hall. For participants this is a chance to win up to \$200.00 in cash, and for spectators it will prove to be a lot of fun. Remember, if you have an act be sure and sign up by Friday of this week in the SUB office. The 19th of this month the Second City Touring Company will be appearing at the Cedar Street Center at 8 pm. This should be a really funny show, back by popular demand! This weekend's movie will be Ferris Buellers Day Off showing at 6 and 9:30 pm Friday night

and 6 pm Saturday night. The Mid-night movie series presents a Doug and Bob Mackenzie Classic: "Strange Brew". Showtimes will be at 11 pm, both Friday and Saturday nights. Both

movies will be shown in ME 104. On December first, Hypnotist Jim Wand will be appearing live at Centennial

Hall at 8 pm. On December 5th Comedian Rich Hall of Saturday Nite Live fame will be appearing live and in concert in the Miner rec. Building (right across from the Multi-Purpose Building) at 8 pm. There will be admission charged to attend this concert. All proceeds are going to the LOVE organization, which feeds the homeless and elderly. Admission will be 1 or more cans of food or one dollar. This is going to be a great show, and it is benefiting a great cause.

All of us on the Student Union Board want you to enjoy and relax as many SU sponsored activities as you can. Be sure and read next week's article, which will include a sneak preview of what is going to happen here next year.

Lifesaving Drug manipulates God's plan

By William McCrary
Staff Writer

Scene: A discussion between Dr. Ayyigari, a geneticist and biochemistry researcher, and Dr. Williams, a philosopher at a local university, on the topic of genetic research.

"Dr. Ayyigari, perhaps you would be so kind as to start this discussion by telling me just what it is that you are currently working on."

"I can best summarize my group's research by saying that we are trying to induce a bacteria to produce the human hormone insulin."

"Just how do you propose to do such a manipulation on a function so innate to an organism's metabolism?"

"The concept is quite simple actually. The location on the human DNA strand which codes for the production of insulin has been known for years. My research group has located the gene on a bacterium DNA strand which is responsible for the production of a molecule which is nearly identical to insulin. Our research has shown that the bacteria contain or can produce all of the molecules necessary for insulin production. By switching the codes on the DNA strand we can give the bacteria the

ability to produce insulin. The rest is simple. After we are through the bacteria multiplies as normal. The insulin produced is then isolated from the bacteria and given to diabetic patients who need it. A happy ending for all."

"So you're saying that these people owe you quite a lot? Do you feel

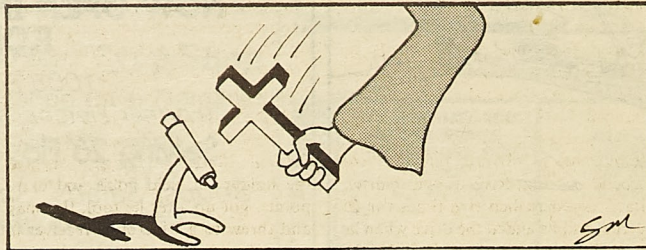

imposed by people who haven't got enough foresight to see the benefits of this work."

"You seem quite pleased with your accomplishment, Dr. Ayyigari."

"I am and you should be also."

"Just why is that?"

"Because my group has managed to save thousands of people from a certain death."

superior to other people, Dr. Ayyigari?"

"No. What I am saying is that we've achieved a major medical breakthrough and there will be a lot of people whose lives are saved because of it."

"Don't you feel like you are overstepping moral boundaries by manipulating the structure of an organism?"

"No. I feel like the only boundaries that I am overstepping are those

"You have no regrets about changing the purpose of an organism to suit your own needs?"

"No. Do you?"

"Yes, I do. It bothers me quite a lot that men are manipulating the structures of living organisms. You are essentially playing God. You are creating and destroying life. I cannot accept that."

"Dr. Williams, let's get a few things

straight right now. Number one, I am not creating life or changing it to suit my own needs. You state that you feel it is morally wrong to do such a thing. Which is more important to you, the life of a bacteria or that of a human? Is it morally wrong to let a human life die when you know how to save it?"

"It is when you have to destroy another life."

"You would sooner prevent the manufacture of a life-saving drug than change a bacteria's structure? Let me ask you a question. Do you have your home sprayed for bugs?"

"Yes, I do. Every spring when they come out in force."

"Have you ever thought that you were killing? Is it somehow different, Dr. Williams?"

"Yes, it is...besides what has this got to do with anything?"

"It has got everything to do with this. We are not even killing. You do more damage, to more organisms, by spraying your house than I'll ever do."

"It just doesn't seem right. God didn't intend for men to change the organisms that are around him. It isn't part of the divine plan."

"God's divine plan! If your God was as perfect as you and others like to

think, he wouldn't make these people suffer like that. Do you think that those people deserve to die?"

"I don't know. At least I do not try to take matters into my own hands. You..."

"That's right. You don't take anything into your own hands. You would sooner sit back and criticize another's efforts instead of making an effort to help yourself. Do you honestly think that a newborn baby with a disease deserves to die?"

"No. I think you are being unfair."

"No. I am being quite reasonable. You state how morally wrong it is to destroy a life. Just what do you think you are doing when you deny me the right to produce a medicine necessary to save a life? You are killing that person! You are standing between the patient and his right to live. You asked me earlier if I felt as though I am superior to other people. I said no, but I guess I actually do feel superior to some people...those people who have no greater purpose in their lives than to prevent progress which could save lives. When I die, at least I will be able to say that because of my work, a life was extended or maybe even saved. What will you be able to say?"

Board to battle IFC again

By Chris Layton
Staff Writer

The St. Pat's Board would like to thank everyone who turned in a float entry yesterday. In case you haven't heard, the theme for the St. Pat's '88 Parade is "Great Inventions." With this theme we think it allows your organization to use your own imagination to help make this parade the best ever.

As the 3rd round of tests come to an end this week, and the Thanksgiving vacation is right around the corner, we ask you to stop by the hockey puck to do some easy Christmas shopping. Just last week you can

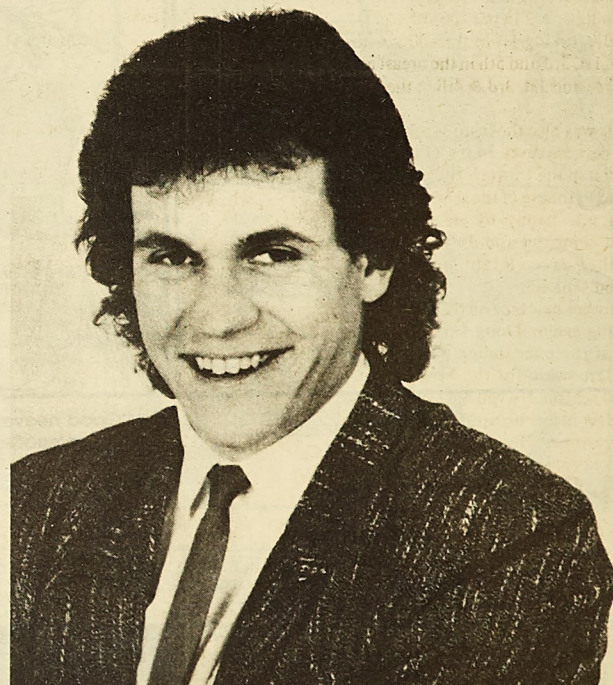

pick up this leather strapped hat. What a bargain! Stop by soon because as Christmas approaches supplies are limited.

In two weeks the mighty Blarney Bunch will join together once again to battle the IFC in a game of soccer. The battle will begin at 3:00 pm sharp on Friday Dec. 4 at the fraternity for fields. We invite everyone out to watch an enjoyable game and soak up some of your favorite beverages to start off a fired-up Christmas party weekend.

We would also like to wish everyone an enjoyable Thanksgiving vacation and don't eat too much!

120 Daze

Greeks to sing and Dance

Joe Marlotti will host IFC's annual Greek Sing.

By Alex Scott
Staff Writer

On November 20th the IFC will hold its last major event of the semester. The all Greek Sing and Dance, this year's theme is "Late Night with the IFC." The Sing will start at 7:00 pm with the dance immediately following. This year's theme has been drawn away from Christmas in order to broaden the range of acts.

Another added feature is the M.C. This year the M.C. will be Joe Marlotti from the Funny Bone. America's Campus Comedy Network. Joe is a self-admitted class clown who graduated from Mizzou in 1984. He got his start at the St. Louis Funny Bone during an open-mike night. This fall Joe is scheduled to appear on Star Search and has already appeared on Showtime and an M.C. His humor touches on subjects that college

students can relate with: school, music, T.V., etc. He is also an accomplished guitarist. Between his humor and musical talent, Joe should make a most enjoyable M.C.

The dance also promises to be a most enjoyable event. This year the band will be Corporate Humor. They are a St. Louis based band with a growing mid-west following. Their music spans the sixties classics to current hits. They also have an equally diverse selection of originals. One Corporate Humor original has been released by the London based Unicorn Records.

The IFC would like to invite everyone to attend "Late Night with the IFC," November 20th at 7:00 pm, at the Armory. This year's Sing and Dance promises to be an event not to miss. Therefore, be there!

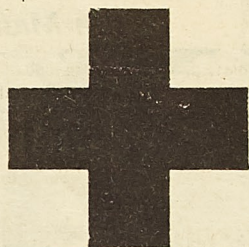

Stuco to sponsor Red Cross Blood Drive

By Kevin Gibson

Student council is sponsoring its second American Red Cross Blood Drive this semester on November 18th from 10 am to 4 pm. In the past 7 years, UMR's participation in these blood drives have topped others within the Springfield district. We are asking for your continuous support to uphold this tradition and honor.

As in the past, KMNR's Road Show will provide music for your listening pleasure. Also, for the first time, Domino's Pizza will offer coupons for

their delicious pizza. And, of course, there will be plenty of free cookies and beverages provided for all those who participate.

Furthermore there will be a traveling trophy and a gift certificate from End of the Rainbow worth \$150 awarded to any of the Greek organizations with the best participating percentage in the two blood drives held this semester. Sigma Nu captured the trophy and gift certificate last semester and will be strong competition this semester.

Please save an hour of your time to donate a pint of blood which may someday save someone's life. Thank you for your time and support.

Board from page 3

The real questions, at least in my mind, are: Why does the St. Pat's Board need and get \$55 per student from our activity fees? Do green sales, the hundred dollar club, etc., provide enough funds? Why did this article, which was basically the printing of the hazing law, get top billing when articles about the student play "Don't Drink the Water" and the Veteran's day service were lost to the back pages of the paper?

While I'm thinking of it, three cheers to the Army and Air Force ROTC for remembering the veterans. Unfortunately I was unable to attend the Veteran's Day service as I was in class. I hope it went well.

Debra Budd

Bobby Craig tops charts

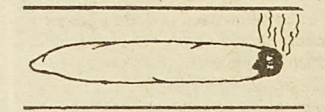

Source: Palladium Records and Cassettes

Going where others have feared to tread, many college radio stations have been adding Bobby Craig's comedy single "Have You Got Any Pot, Nancy Reagan?" The single is from Bobby's new Fill 'Er Up LP just released by Palladium Records in Laguna Beach, California. In addition, Swedish National radio added the record "the first day it arrived," according to Kalle Oldby, program director.

Satons addin the record last week included.

KRRC FM (Reed college),
WSRU FM (Sloppy Rock U.)

WCCR FM (Purdue)
WSUC FM (SUNY Cortland)
KSUR FM (Iowa state)
WBRU FM (Brown University)
WUOG FM (U. Georgia)
WUMA FM (U. Massachusetts)

Many students and adult listeners feel the country rock record is welcome comic relief in the face of Nancy Reagan's "Just Say No" media blitz, where even paying moviegoers now have to sit through the First Lady and her familiar message.

sports

UMR Wins Football Finale, Finishes 5-5

By Mark Buckner
Staff Writer

After trailing 10-7 at halftime to Southwest Baptist, the UMR Football Team poured it on in the second half against the Bearcats and won in impressive fashion. The Miners scored two touchdowns in both the third and fourth quarters. To make matters worse for the Bearcats, they failed to score any points in the second half as the Miners won the game 35-10.

Ty Dinsdale was the Miners' starting

quarterback in last Saturday's game. Out of six pass attempts, he completed just one, but that one completed pass Dinsdale had was a big one. It was a 33-yard touchdown pass from Dinsdale to wide receiver Greg Suellentrop. That gave UMR a 7-0 lead in the first quarter.

The Bearcats came back in the second quarter, while the Miners were shut out, and led 10-7 at the half. But Southwest Baptist, in need of a victory to have a good chance at a playoff berth in the NAIA Division II, couldn't stop the UMR offense in the

second half.

The third quarter turned out to be the Mark Paris Show as he was the main contributing player for the Miners' two third quarter TDs. Paris rushed five times for 25 yards on UMR's first possession of the period. The drive was capped off when quarterback Dave Andrzejewski, playing in his last game in a Miner uniform, scored on a 14-yard run. On the second scoring drive of the quarter, Paris again rushed five times for 25 yards, and he ended the drive when he scored on a one-yard run. Paris led the

Miner team with 89 yards rushing on 22 carries. After three quarters, the Miners had a 21-10 lead.

In the fourth quarter, the Miners had a fourth down and long yardage situation from the Bearcats' 20 yard line. UMR brought its kicking unit on the field to attempt a field goal. But the field goal wasn't attempted as the Miners pulled off a surprise against the Bearcats. Andrzejewski, who serves as the holder for field goals and extra points, got up after he took the snap and threw to a wide-open receiver in the end zone for a 20-yard TD pass.

Suellentrop was the wide-open receiver who caught the pass. It was his second TD reception of the game.

The Miners' final touchdown came late in the game when Andrzejewski completed his second scoring pass on a 13-yard TD catch by running back Jack Armstrong. The Miners had 190 yards rushing.

This was the last game of the 1987 season for the Miners. The win enabled the Miners to finish at .500 with a 5-5 record. Not a bad record considering all of their injuries and that it was basically a young team.

Swimmers wash out UMSL, squeeze past Washington U.

By Scott Clark
Staff Writer

The Miner swimmers traveled to St. Louis on Saturday the 7th to compete against the UMSL Rivermen. Even with the Rivermen's pool being in poor condition, the Miners came out on top with a 109-83 victory.

The Miners had the most problems with the Rivermen's sprinters, with them placing 1, 2, & 3 in the 50 free, 1, 2, 4 in the 100 free, 1st in the 200 free and 1 & 3 in the 400 free relay. But this didn't hurt the Miners at all because they were strong in the stroke category sweeping 1, 2, 3 in the 200 IM and the 200 BK, taking 1st in the 400 medley relay, 1st, 3rd and 5th in the breast and 500 free and 1st, 3rd & 4th in the 1000 free.

This was also the team's first time to see the new diver Mark Guvernator take 1st in the 1 meter. With no divers at the beginning of the school year, the team was happy to see that Mark could come out and do well and that another diver might be ready by second semester.

Another new face on the team is graduating senior Doug Imrie. Doug is one of the outstanding polo players, and last swam for the Miners in the '84-85 season. He will only swim in the first few meets because of graduation in December. He is a lot of help since

Steve Goodell, the team's distance and 200 flyer, is still not at 100% after a shoulder injury. With all the injuries springing up, the Miners did well and are looking forward to a good season.

Results of the meet were:

- 400 Medley Relay**
(1) Cruse, Martin, Sandvoss, Lundeen
1000 Free
(1) Goodell (3) Imrie (4) Phillips
200 Free
(2) Cruse (3) Lundeen (4) Bilyeu
50 Free
(4) Koelling (5) Cordier (6) Clark
200 Individual Medley
(1) Streb (2) Sandvoss (3) Martin
1 Meter Diving
(1) Guvernator
200 Fly
(1) Sandvoss (4) Imrie (6) Taylor
100 Free
(3) Lundeen (5) Cordier (6) Koelling
200 Back
(1) Cruse (2) Streb (3) Wagner

500 Free

- (1) Goodell (3) Bilyeu (5) Phillips

200 Breast

- (1) Streb (3) Martin (5) Clark

400 Free Relay

- (2) Cordier, Wagner, Koelling, Bilyeu
(4) Imrie, Phillips, Taylor, Clark

Thursday, Nov. 12, the Miners made their last road trip of the semester to Washington University. The meet was a fast paced fight for every point with the Miners coming out on top 108 to 107.

The Miners saw yet another injured swimmer compete. Sophomore Bob Phillips was plagued with a shoulder injury. Bob swims the 500 and 1000 free and the 400 free relay. This has been a bad year for the UMR distance men, but a recovery by second semester is possible. Neither Phillips nor Goodell can sit out to recuperate because of a lack of members to round out the team. Even with injury, Goodell placed second in both the 500 and

100 free and Phillips placed sixth in both events also. This was out of an eight man field. They were both members of the fourth place 400 free relay.

Without the presence of a diver, the Miners would have lost the meet. At the beginning of the season the Miners didn't have a diver, but Freshman Mark Guvernator showed up to round out the team. Mark placed second on both the one and three meter boards to score much-needed points to enable a Miner victory. Thanks Mark!

The Miners' next meet is this weekend, Nov. 20 and 21, starting Friday at 7 p.m. and on Saturday at 10 a.m. The Miners would like to have some fans to come cheer them to a victory.

The results of the Wash U meet are:

- 400 Medley Relay**
(1) Cruse, Martin, Sandvoss, Lundeen
1000 Free
(2) Goodell (3) Imrie (6) Phillips

200 Free

- (1) Lundeen (2) Bilyeu (4) Cruse

50 Free

- (2) Martin (4) Cordier (5) Koelling
(6) Clark

200 Individual Medley

- (1) Streb (2) Sandvoss (5) Wagner
(8) Taylor

1 Meter Diving

- (2) Guvernator

200 Fly

- (1) Lundeen (4) Koelling (5) Clark

100 Free

- (2) Lundeen (4) Koelling (5) Clark

500 Back

- (1) Cruse (3) Wagner (5) Cordier

500 Free

- (2) Goodell (3) Bilyeu (6) Phillips

3 Meter Diving

- (2) Guvernator

200 Breast

- (1) Streb (3) Bilyeu (6) Taylor

400 Free Relay

- (2) Cordier, Wagner, Koelling, Martin
(4) Clark, Imrie, Phillips, Goodell

Lady Miners recognized as threat in MIAA

By Tracy Boland
Asst. Sports Editor

Basketball season is upon us again. Maybe last week's men's b-ball preview tipped you off. Or perhaps you've been wandering around downtown lately and have seen the schedule posters on display in some of the local businesses. Let me refresh your memory: the men's poster features their schedule, the smiling countenances of Coaches Martin and Stringfellow, and a fizzing cup of Pepsi, while the women's sports their respective schedule and a photo of Miner player 21 outleaping three opponents to take a shot.

Ah, yes, player 21, better known as Tanya "Tank" Hough: three-year letter winner, MIAA 1st Team Selection for 1986-87, double-digit scorer and rebounder, Miner Athlete of the Week numerous times last season, and all-around nice person. It's too darn bad she'll be spending this season on the sideline.

What? Say it ain't so? Believe me, I'd dearly love to, but the ironic fact is that Miss Hough, around whom much of the pre-season publicity is centered, is scheduled for knee surgery in mid-December and has been red-shirted in the hopes that she'll be back in form for next year. It is difficult to overstate her absence.

However, before you Miner fans write off the '87-88 season as a loss, let me inform you that there are plenty of reasons to expect an exciting year right now. Let me introduce them to you:

Head Coach Mary Ortelee had a banner year in '86-87. She was named

MIAA Coach of the Year for leading the ladies to a 19-8 season, quite a turn-around from their previous record of 6-19. Last year was also the first time the Miners saw post-season play in the MIAA tournament.

Asst. Coach Julie LaVec joins UMR in a dual-identity: in addition to her basketball duties, LaVec has also been made coach of the softball team. The big question here is how many b-ball players will she be able to snag to play for her other sport?

Senior Liz Haning is returning for her fourth year in a basketball uniform. As one of two upperclassmen, Liz is going to be partly responsible for acclimating the six new recruits.

Junior Mary "Pud" Pudowski is an undeniable leader of the Miners. She and Liz do the majority of talking out on the court, inciting the rest of the team to a stronger defense and more aggressive offense.

Sophomore Jennifer Cordes works defense and offense equally well. With Hough out of the game, much of the burden of the inside game will fall to Cordes' shoulders, and her aggressive nature should assure her a number of defensive player of the game nods.

Sophomore Stephanie Zink is going to be taking up some of Tank's slack in the middle. Although Coach Ortelee doesn't think there can be a replacement for three years of MIAA experience, she does think Zink will help balance Hough's absence.

Sophomore Colette Neal will also be seeing a lot of middle action. Both Neal and Zink played summer basket-

ball, and Ortelee cites this for their improved inside strength.

Sophomore recruit Nikki Westmoreland is a 5'3" juco transfer. She's damned quick, and Ortelee expects to make good use of her in the fast break situation. She also should credit a number of steals.

Sophomore Mickey "Bird" Grimpso is also a juco transfer who won't be eligible to play until after the end of the winter semester. (That's not as bad as it sounds, though, because the Miners don't face any MIAA opponents until 1988.) Her nickname is justified; Coach Ortelee didn't forget women's

basketball is instituting the 3-point shot this year, even if you did.

Freshman Cynthia "C" Farrington is expected to help fill the shoes of Lady Miner all-time high-scorer Susan Mullins, who ran out of eligibility last year. Practice has shown her to be good off the boards, and Ortelee has credited Farrington with "a great court awareness."

Freshman Jan Grotenhuis is a 5'9" point guard whom Coach Ortelee likens to former player Dianna Pasley in terms of floor leadership. She is also

Intramural X-Country Results in Teams gear up for Soccer Playoffs

By Greg Budd
Staff Writer

As we head into the final week of the soccer season, the race for that championship trophy is close, as usual. Pi Kappa Alpha led the way during the regular season as they boasted the only undefeated record in the league. Kappa Sigma and TJ-North also fielded strong teams, each having only one loss. With the playoffs already underway, this week promises to be full of thrills and action down at the intramural soccer fields.

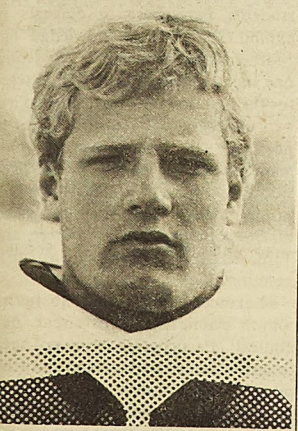

This is also the final week of the regular season for volleyball, with the playoffs starting the Monday after Thanksgiving break. The race for

playoff spots has been very intense so far this season as several of the teams in the league are having exceptionally good seasons.

Results of the cross country meet are in and the winner was Gary Gibbs. Dave Fitzgibbons and Tim Giddens finished second and third, respectively. The overall team winner was Air Force ROTC, with Tech Engine Club and Pi Kappa Alpha rounding out the top three.

Congratulations to Eric Smarko of Tau Kappa Epsilon for being named intramural athlete-of-the-week and Pi Kappa Alpha volleyball for being team-of-the-week.

M-Club Athlete of the week

Submitted by M-Club

The M-Club Athlete of the week for November 1-7 is John Hentges. In the Miners loss to Southeast Missouri State, John had another outstanding game, leading the defense with 15 tackles. John's performance also earned him MIAA defensive player of the week for the second time this season. Congratulations, John, on another great game.

AMERICAN CANCER SOCIETY

Who's Who

Sigma Psi fraternity. His memberships include Blue Key National Honor Fraternity, the UMR student chapter of the American Institute of Aeronautics and Astronautics, and Toastmasters. His activities and honors also include Honors Program Mentor and the Campus Coalition for Legislative Action.

Rolla: Kim E. Thein, son of Raymond and Donna Riggs, 1315 Eastwood Drive, a senior in mathematics and psychology. He has held the offices of treasurer of Phi Eta Sigma freshman honor society, and deputy commander, comptroller, and pledge trainer of Arnold Air Society. His memberships include the National Society of Pershing Rifles, Phi Kappa Phi honor society, and Kappa Mu Epsilon mathematics honor society. His activities and honors include varsity wrestling, ROTC air force commander, a Mathematical Competition in Modeling Meritorious Award, a General Motors Mathematics Scholarship, an Air Force Scholarship, a National Sojourners Award, a UMR Curators Award, and an American Legion Scholastic Excellence Award.

St. Louis: Earl A. Wiggley, son of Rita L. Wiggley, 1721 South 18th Street, a senior in electrical engineering. He has held the offices of president of the Association of Black Students, and vice president of the National Society of Black Engineers. His memberships include Thomas Jefferson Hall Association, and the UMR student chapter of the Institute of Electrical and Electronic Engineers. His activities and honors include Minority Engineering Program Counselor, Minority Engineering Program Scholarship, Cooperative Education Program, Westlake Foundation Scholarship, Chancellor's Leaders Committee, Student Council Student Curator Search Committee, and Intramurals.

Springfield: John D. Skiffington, son of Edward and Charlotte Skiffington, 2746 South Luster, a senior in chemical engineering. He has held the offices of president and vice president of UMR's student chapter of the American Institute of Chemical Engineers. His memberships include Alpha Phi Omega service organization, Missouri Miner, Sigma Chi fraternity, Tau Beta Pi honor society, and Omega Chi Epsilon chemical engineering honor society. His activities and honors include Phillips Petroleum Scholarship, Outstanding Young Man

of America, SWMSU Freshman Board, of Regents Scholarship, Judy Fleebe Memorial Scholarship, and Intramurals.

Independence: Linda L. Desilet, daughter of Larry and Suzan Desilet, 816 Wigwam Trail, a senior in aerospace engineering. She has held the offices of vice president and social chairman of Kappa Delta sorority, secretary of Sigma Gamma Tau aeronautics honor society, project officer of Arnold Air Society, and secretary of the Order of the Sun of Phi Kappa Theta Little Sisters. She is a member of Kappa Mu Epsilon mathematics honor society. She also is a distinguished military student; and

Douglas R. Eden, son of Renald and Deva Eden, Route 2, a senior in petroleum engineering. He has held the offices of president of the UMR student chapter of the Society of Petroleum Engineers, secretary of Sigma Gamma Epsilon earth sciences honor society, vice president of Pi Epsilon Tau petroleum honor society, and president and secretary of Liahona House. His memberships include M-Club, Varsity Wrestling Squad, Blue Key National Honor Fraternity, Raiders, Chess Club, and Rugby Club. His activities and honors also include Missouri Miner sportswriter, M-Club Athlete of the Week, and Student Union Board Chess Champion.

Kansas City: Joann K. Girard, daughter of A. J. and Rosemary Girard, 712 Denver, a senior in electrical engineering. She has held the offices of house manager of Chi Omega sorority, and treasurer of Intercultural Club. She is a member of Intercollegiate Knights service organization, the UMR student chapter of the Institute of Electrical and Electronic Engineers, the Society of Women Engineers, and the Student Union Board. She also is the recipient of a Curators Scholarship.

Kirkwood: Michael J. Gross, son of Frank and Norma Gross, 1111 Craig Drive, a senior in metallurgical engineering. He has held the offices of treasurer of Phi Kappa Theta fraternity, and president of the St. Pat's Board. He also is a member of Theta Tau Omega honor society, the Missouri Miner, Kappa Mu Epsilon mathematics honor society, Tau Beta Pi honor society, Blue Key National Honor Fraternity, and the UMR student chapter of the Society of Metallurgical Engineers.

Meeting held on UM budget requests

Source: News and Publications

A public discussion on the development of the University of Missouri's legislative request for the 1988-89 fiscal year will be held from noon-1 p.m. Tuesday, Nov. 24, in the Mark Twain Room, University Center-East, at the University of Missouri-Rolla.

UM President C. Peter Magrath; UMR Chancellor Martin C. Jischke; Jay Barton, UM vice president for academic affairs; James McGill, UM

vice president for administrative affairs; and chancellors from the other UM campuses will be among those present.

UMR faculty, staff, students, and the public are invited to attend.

The meeting is one of four scheduled on each of the UM campuses. In addition to Rolla, other campuses are located in Columbia, Kansas City, and St. Louis.

Jischke named Army's Civilian Aide

Source: News and Publications

University of Missouri-Rolla Chancellor Martin C. Jischke has been named Civilian Aide to the Secretary of the Army for Missouri (East).

According to U.S. Secretary of the Army John O. Marsh, Jr., the appointment is an honorary one. "Civilian Aides across the country tell the Army story, relate Army policies which may affect their areas, and generate continuing public support for the Army's mission," he said.

Jischke expressed pleasure upon notification of the appointment, and said, "I view this appointment as both an honor and a wonderful opportunity to serve our country and the United States Army."

A nationally recognized professional engineer and engineering educator, Jischke has been chancellor of UMR since April 28, 1986.

He is also a member of the American Society for Engineering Education, the National and Missouri Societies of Professional Engineers and the American Institute of Aeronautics and Astronautics.

He is a reviewer for nine national engineering journals and the author of co-author of 30 refereed research articles. Jischke is also the author or co-author of 22 technical engineering reports.

He has received research grants from NASA, the National severe storms Laboratory, National Institutes of health, U.S. Air Force, National Science Foundation and Nuclear Regulatory Commission.

He received his bachelor's degree with honors in physics from the Illinois Institute of Technology in 1963 and earned master's and doctoral degrees in aeronautics and astronautics at the Massachusetts Institute of Technology in 1964 and 1968, respectively.

Students needed for Math contest

By James Reed
Staff Writer

Universities across the nation are trying to build and maintain a reputation as having some of the brightest students; ours is no exception. To help their schools in this regard students participate in contests to exhibit their skill and knowledge. The Mathematical Contest in Modeling, one such contest which UMR entered for the first time last year, showed our two undergraduate student teams to perform well above average. One team, consisting of Pat Bain, Sean Foote, and Kim Thein, received meritorious honors. The other, consisting of Doug Bullock, David Porter, and Tim Reddy received honorable mention.

There were 156 student teams which participated in the 4 day contest. Participants received their question on Friday morning and were given until Monday to have their answers in the mail. Teams worked on the problem at their own schools and had access to computers and libraries. The only restriction was that no one could help them.

UMR will be entering the next competition in Feb. 1988 and positions are open on two teams. The teams are open to all majors and need diversity to increase the ability of the team. Anyone interested should contact Dr. Hall in the math department before the end of the semester.

an excellent shooter who will help to open the outside game to the Miners.

Freshman Jenny "Brute" Schnur is, as her name implies, a physical player who follows Hough and Cordes in her playing style. Like Cordes, she will be expected to keep the inside game a viable option for UMR, and she has the personality to emulate Haning and Pudlowski as a vocal leader.

Freshman Casey "Bull" Angstrom is, at 6'3", probably the most visibly impressive player the team has to offer. Rumor has it that Coach Ortelie tried to persuade her to try a mohawk haircut in the hopes of scaring the hell out of the opposition. With or without the mohawk, Angstrom will be trying to give the Miners some real power off the boards as well as inside strength for the quick two.

So what does the loss of a league-, not to mention team-, leader like Tank mean to the Miners? According to Ortelie, it's a definite disappointment, but the team is not going to struggle without her. Coach is confident that a change in strategy, from the inside game to one more outside-oriented, will keep UMR in contention for the fourth-place finish which has been predicted for them by the league.

Players with the outside shot, especially the 3-point shot, like Grimpio, Farrington, Grotenhuis, Haning and Cordes, will probably be seeing most of the action shotwise, leaving the occasional under-the-basket play to Zink, Neal, or Angstrom.

The Miners have also been concentrating on defensive maneuvers in order to prevent penetration by the opposition. The team is still weak playing the rebounds, and Ortelie wants to keep the competition as far away from the paint as possible.

Now for some cheerleading. During the '86-87 season, this university posted the highest average basketball attendance for a Division II team, and ranked 19th in game attendance for

schools in the nation, a tradition we should strive to uphold. The Lady Miners are a class act which deserves to be treated as more than a pre-game show for the men's game. The team opens the season this Saturday at 5:30 p.m., at home in the Multi-Purpose Building. UMR will be facing Avila College, a team that last year finished 20-7, and this year promises to be a challenge. Admission is FREE with a student I.D.

Women's Basketball Schedule

Lady Miners,
Good luck this season. Get psyched!

A loyal Chi-O Fan

P.S. Should we bring the horn????

Elspeth,
Where & when is our first road trip?? (Does
the drawer go with us??)

I love you!

YR

Rolla Women,
If you ever get bored here in Rolla because of
the guys taking off, take a trip to Springfield and
take some attitude lessons. It's worth the 2 hour
drive to meet some friendly girls.

Tired of Your Attitude

Damage Inc.,
You are all a bunch of worthless scum! You
have degenerate thoughts and put worthless
comments in the paper each week. Go back to
Jr. High and play with the 7th Grade devil
worshippers. Get off campus.

Everyone

K.P.,
Don't let the little things get you down. I'm
always there for you to talk to.

A Friend

Jill,
Goldfish don't fly. Try keeping them in the
bowl. They might live longer.

K

Schonda,
Thanks for finally getting my calendar back to
me while I am still young.

Shep

Chris,
Thanks for the great time at the dances
Saturday. It was F.U.N.

Love,

Julie

P.S. I want a poster of you in that wetsuit!

Mom,
Incest is the best. I'll put you to the test.

Kid

Julie,
If you pull one out. I'll slap your face!

Shep

IFC
Kiss-kiss!!

Panhellenic

Kathy,
I love you! You're a great KD!

Love in AOT,

YBS

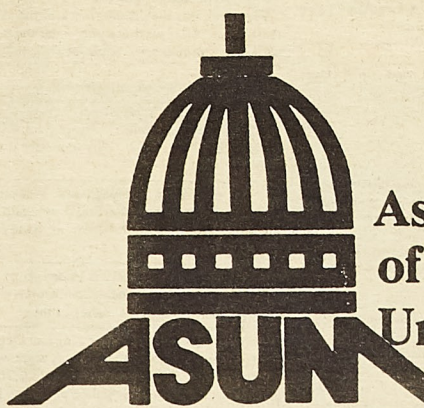

To the Wednesday Night Crew,
This week was the opening week of the WNC
taxi service. After we drink you under the table,
we'll help you find your house. Right, Andy??
That Sports Guy

P.S. Hi, Mark. See ya in December.

To Whom It May Concern,
GDI has been working to change their image
for the past few years. Why not give us a
chance??Do you remember Independents' Weekend?
Well, if not, how about starting it up again? If
interested, call Liz at 364-8996 or Sandy at
364-4764.GDI's Annual Turkey Wake is Friday, Nov. 20,
at KC Hall. Live music and refreshments will be
provided. Come out for a night of fun!If you're not going to the Greek Sing and Dance,
and you want something to do Friday night, why
not check out GDI's Turkey Wake at KC Hall.
Obeid Khan and his gang will be providing live
entertainment, and refreshments will be avail-
able.Hey GDI!
Get psyched for the Turkey Wake!To everyone:
