Faculty honored

News Services
SOURCE

Rolla, MO. — The University of Missouri - Rolla Parents' Association recently honored 16 UMR faculty members for their service as advisors to UMR freshmen.

The advisers were honored at a banquet held Friday, Sept. 25, at UMR. Those honored were:

— Thomas B. Baird, associate professor of computer science.

— David J. Barr, professor of geological and petroleum engineering.

— Thomas E. Bryson, lecturer of basic engineering.

— Douglas Carroll, assistant professor of basic engineering.

— Archie W. Culp Jr., professor of basic engineering and mechanical engineering.

— D. Ronald Fannin, chairman of basic engineering, director of freshman engineering and professor of electrical engineering.

— Nord L. Gale, chairman and professor of life sciences.

— Charles J. Hass, professor of mining.

— Leon M. Hall, professor of math and statistics.

— James Highfill, lecturer of engineering management.

— Edward E. Homsey, associate professor of basic engineering and engineering mechanics.

— Ronald A. Kohser, professor of metallurgical engineering and assistant dean of the School of Mines and Metallurgy.

— Terry F. Lehnhoff, professor of mechanical and aerospace engineering.

— Kenneth B. Oster, assistant professor of basic engineering and engineering and engineering mechanics.

— Juana Sanchez, assistant professor of economics.

— Daniel R. White, associate professor of basic engineering.

State Rep. speaks on behalf of Carnahan

Roger Amman
Staff Writer

Missouri State Rep. Chris Kelly has been travelling all across Missouri speaking to universities and colleges, on behalf of Lt. Gov. Mel Carnahan. He gave a speech at Rolla this past Tuesday. Kelly spoke in favor of Mel Carnahan's plan for higher education in Missouri.

Kelly, who currently serves as Chairman of the House Budget Committee, said last Tuesday, "The current administration in Jefferson City doesn't understand how important a strong system of higher education is to the economic future of this state. Mel Carnahan will provide the leadership needed to strengthen Missouri's colleges and universities."

Kelly noted that Carnahan has proposed several important initiatives for Missouri's colleges and universities. The first initiative is to develop a comprehensive long-range planning process for the state's higher education institutions. The second initiative is to create a Missouri Research Alliance to coordinate and seek greater funding for research with important commercial applications. The final initiative is to establish a new Universal College Revolving Loan Fund to make education loans available to Missouri families regardless of income.

Under Carnahan's loan plan, students can participate in a carefully designed program of community service in lieu of repaying the interest of their loan. This plan is very similar to Democratic Presidential candidate Bill Clinton's plan for higher education.

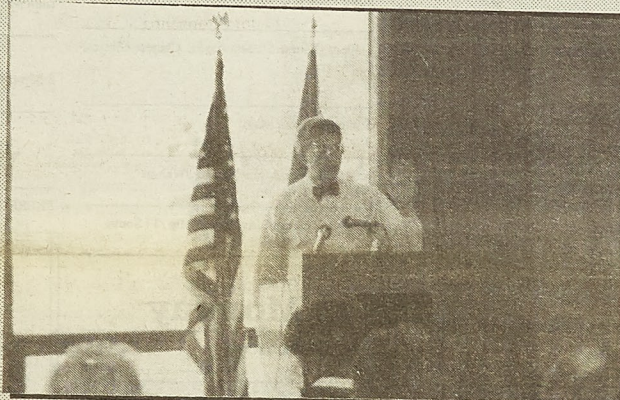

Carnahan has also proposed other

initiatives to upgrade vocational and technical education and enhance the importance of community colleges. Carnahan is in favor of Rolla's program with University of Missouri-St. Louis. He believes the program will start to boost once the state starts generating more funds.

"Mel Carnahan has been particularly concerned that access to higher education has been restricted rather than expanded over the last ten years," said Kelly. "Mel's plan to create a new revolving loan fund to make education loans available regardless of family income will help knock down the financial barriers to college for Missouri families."

Kelly said that Carnahan "has demonstrated an outstanding commitment to improving education at all levels."

"If Carnahan is elected, we'll finally have the pro-education governor we need. A strong system of education will greatly improve Missouri's economic prospects and it's ability to create jobs. Mel Carnahan will make education a top priority."

Jason Hanson

Missouri State Representative, Chris Kelly speaks at the University of Mo.- Rolla on behalf of Lt. Gov. Mel Carnahan.

UMR students unite to design formula car

Roger Amman
Staff Writer

The Formula Car Team of UMR is currently designing and constructing this year's car for their upcoming races this spring. The team has been competing for more than ten years; however, the first few years they raced baja cars. The group, which is comprised of UMR students, designs, fabricates, and races one or two cars a year. More than 72 colleges and universities participate in an annual race at the end of May. Through extensive, hard work each year, the Formula Car Team of UMR is able to compete with some of the top schools around the country.

Before actually constructing the car, the team must raise enough money to complete the project. In

addition, the team must have a design of the entire car. On the average, it costs about \$20,000 to completely build and race a formula car. We aren't talkin' about a go-kart here! Most of the funds for building the car came from corporate contacts and local sponsors. In past years, corporate fundings have come from Ford Motor Company, General Motors, and Motorola. The team also has a "phone-a-thon" each year to raise money. After enough money is raised, the team then begins to design the car. Computers play a major role in the designing process, the team uses both software and CAD to layout their plans for construction.

The actual construction of the car involves four major processes which are putting together the suspension, fabricating and welding the frame together, mounting the engine and its related parts, and troubleshooting

any problems with the completed car. The team fabricates almost all of the parts of the car, with the exception of the engine. The engine is from a Kawasaki Ninja motorcycle. It is 600 cubic centimeters, which is close to the limit of 610 cc. Once completed, the car weighs less than 450 pounds and is capable of accelerating to over 110 miles per hour. Last year's car had a fuel injection system and turbochargers, which was designed by the team's electrical engineer.

The Formula Car Team is a member of the Sports Car Club of America (SCCA). Each year, the team takes their completed car on several trial runs and to several area races before they go to the national competition at the end of May.

In past years, the national competition of over 72 colleges and universities has taken place at automobile corporate headquarters. Last year

UMR's two cars took 12th and 14th place at Ford Motor Headquarters in Dearborn, Michigan. The team has placed higher in the overall competition than MIT in past years. The overall competition is based on the following: presentation, cost analysis, design, dynamics, hundred yard acceleration, how many gravitational g's the car produces, and a fourteen mile endurance race. UMR's team allows 5 or 6 drivers out of the twenty members involved in the competition. Chrysler will be hosting the competition this year at their headquarters near the end of May.

The Formula Car Team is always looking for new members. This year many of the team's current members will be graduating. It does not matter what you are majoring in to

UMR Homecoming Court

News Services SOURCE

Rolla, MO. — **Lisa Molner**, a University of Missouri - Rolla student in electrical engineering from **Kirkwood, MO.**, has been chosen UMR's 1992 Homecoming Queen.

Member's of the queen's court are: first runner-up, **Lisa Willhaus**, a senior in chemical engineering from **Kansas City, MO.**; second runner-up, **Suzanne Reeves**, a senior in mechanical engineering from **St. Louis**; and third runner-up, **Lisa Stiles**, a junior in nuclear engineering from **St. Charles, MO.**

The queen and members of her court were chosen from among 28 candidates after interviews and a campuswide election. The winners were announced Saturday, Oct. 10, during halftime ceremonies of the homecoming football game between the Miners and Missouri Southern State College.

Molner was nominated by Zeta Tau Alpha (ZTA). She is president of ZTA and is a part of the UMR Student Ambassador Program. She has held offices in Panhellenic Council, plays on the women's varsity soccer team, and is active in Down To Earth and Lambda Sigma Pi.

Willhaus was nominated by Pi Kappa Alpha. As a member of Chi Omega, she has held the offices of president and secretary. She is active in a number of campus organizations, including Blue Key, Tau Beta Pi, Omega Chi Epsilon, Intercollegiate Knights, varsity track, M-Club and Phi Eta Sigma. She is a member of the UMR student chapter of the American Institute of Chemical Engineers.

Reeves was nominated by Chi Omega. She is a member of Chi Omega and is actively involved in several campus organizations including Phi Eta Sigma, Pi Tau Sigma, Blue Key, Tau Beta Sigma, UMR Marching Band and UMR Symphonic Band, the UMR Intramural program and Alpha Phi Omega. She has been a member of the Thomas Jefferson Hall Association and is active in the UMR student chapter of the American Society of Mechanical Engineers.

Stiles was nominated by Tau Kappa Epsilon. She is a member of Zeta Tau Alpha and is active in Toastmasters, Phi Eta Sigma and Tau Beta Pi. She is a member of the UMR student chapter of the American Nuclear Society.

Jewelers of America, through Kent Jewelry of Rolla, provided the tiaras for the queen and her runners-up.

Cyclist treks from California

Kevin Biggers Photo Editor

Today when I was on my way to the Missouri Miner office to fulfill my office hours, a strange thing happened to me. As I was walking up to Norwood hall, a transient looking fellow stepped out of the shadows with his bicycle. He was with one of my photographers and was introduced to me as Daniel Festen, from Tierrasanta, California.

Festen stood there outside Norwood Hall with his low-cut tattered black leather shoes, no socks, his baggy olive green pants rolled up to the knees, a purple hip pack stuffed full, a yellow jacket with a reflective vest, a camouflaged bandanna rolled up around his neck, he looked like he hadn't shaved in about a week and a half, these goofy red horned rimmed glasses on his sun-parched face, and a brand new bright blue baseball cap on his head. We talked for a while outside Norwood Hall as he told me his story.

Festen is a X-country bicyclist. He has been on the road since six days after Labor Day. That's six weeks and a day the day I met him. He left Mojave, California, on his ten year old, American made, Schwinn fifteen speed mountain bike, his Winabago as he calls it, on his way to meet some friends and associates in Chicago, Illinois. Festen tries to average 80 miles

a day, but that has been getting shorter and shorter and he now shoots for about 50 miles a day. He spent last night in Doolittle, "a town properly named," next to Pat's Phillips 66.

When asked why he's doing it, Festen replied with a smile on his face, "to keep him on the streets." The real reason he is doing it that his dad died in January and he has a hard time dealing with the loss, he figures by making his tires turn a couple of million times, by the time he gets to Chicago, maybe his head would be right.

When asked how he like riding through Missouri, Festen replied, "I find the hills in Missouri a bitch. I'd much rather have a two mile long

mountain rather than nature's cruel parody of a roller coaster."

Some of the hardships that Festen has encountered was he had 19th, 20th, and 21st flats in Groom, Texas. Oklahoma must have left a good impression on him because he said when he was there he was a X-country and western bicyclist. The worst injury that Festen has sustained on his trip has been, "when I banged my head on a toilet paper dispenser in a Stuckey's in New Mexico."

Festen would like to thank the wonderful people in the great state of Missouri for their kindness. A personal note to Dan Festen, good luck on your trip and God's speed.

Kevin Biggers

X-country cyclist, Daniel Festen, is biking from California to Chicago to meet friends. He has been traveling for six weeks.

I.M.P.A.C.T. week activities

News Services SOURCE

Rolla, MO. — The University of Missouri - Rolla is observing IMPACT Week '92 from Sunday, Oct. 18, through Saturday, Oct. 24, to promote National Collegiate Alcohol Awareness Week.

IMPACT stands for Intelligent Miners Promoting Alcohol Concern Together.

"The primary goal of IMPACT Week is to work toward reducing alcohol use education, promoting low-risk decision-making and healthy lifestyles, and to increase awareness of alcohol abuse prevention and intervention services available on campus and in the community," says Dr. Camille Consolvo, coordinator of student development at UMR. She is working with a student committee to coordinate this year's IMPACT Week activities.

UMR's events actually begin before the national alcohol awareness week, with students giving red ribbons to supporters of healthy lifestyles beginning at the UMR homecoming game Oct. 10.

Other activities include:

— **Monday, October 12,** through **Thursday Oct. 15,** UMR

TECHS, a group of student peer educators, will discuss low-risk alcohol use with UMR freshman engineering classes. TECHS stands for Teaching, Encouraging, Caring and Helping Students.

— **Monday, Oct. 19,** UMR TECHS and Intercollegiate Knights sponsor a barbecue from 11:30 a.m. to 1 p.m. at the Hockey Puck on campus. At the same time is "The Tree of Life," sponsored by the UMR Student Council.

— **Tuesday, Oct. 20,** the Interfraternity Council and the St. Pat's Celebration Committee will serve "mocktails" at 7:30 p.m. in the University Center-East Cafeteria, followed by Student Union Board Comedy Night with comedian Bill Leff at 3 p.m.

— **Thursday, Oct. 22,** from 11:00 a.m. to 12:45 p.m., University Police and the Rolla Police Department will conduct an "under the influence" obstacle course at the Hockey Puck on campus.

— **Saturday, Oct. 24,** UMR's Army ROTC detachment sponsors a 5-kilometer "Run for your Life" from Ber Juan Park in Rolla. Registration is from 8 to 8:45 a.m. The race begins at 9 a.m.

For more information about IMPACT Week, contact Consolvo at (314)341-4292.

Car

be a member. The team is comprised of electrical, mechanical, aerospace and even chemical engineers.

Usually, the team works on the car on Friday nights, Saturdays,

and over Spring Break. Member's don't have to pay any fees. If you would like to become involved with the team, feel free to contact the group leader, Kyle Tucker at 341-2371. You

can also stop by the mechanical engineering lab next Friday night or Saturday. One of the team's members would be glad to show you around.

Award Nominations being accepted

The Lippin Group SOURCE

Los Angeles, - The Gleitsman Foundation, a Los Angeles-based non-profit organization which encourages positive forms of social activism, has expanded its awards program with the establishment of The Michael Schwerner Activist Award, an annual honor created specifically to recognize college students nationwide who are proving themselves to be outstanding catalysts of social change in their schools and communities. The announcement of the award was made today by Alan Gleitsman, founder of the Gleitsman Foundation.

In addition to The Michael Schwerner Activist Award, The Gleitsman Foundation also presents the biennial Gleitsman Award For People Who Make A Difference, which hon-

ors social activists working within the United States; and the recently announced Sakharov Award, to be presented every other year (commencing in 1993) to exceptional social crusaders outside of the country.

The Michael Schwerner Activist Award is dedicated to the memory of Cornell University graduate Michael Schwerner, a distinguished civil rights activist who was kidnapped and murdered in Mississippi in 1964 (along with co-workers James Chaney and Andrew Goodman). The award will be presented every spring to five young men or women currently enrolled in a college or university in America who have changed some form of social injustice, promoted positive solutions for change and inspired others to realize that they too can make a difference. Award honorees will each receive a \$1,000 prize.

Nominations for potential Michael Schwerner Activist Award honorees may be submitted by a nominee's fellow students, as well as by campus faculty, staff members, alumni and others. Nomination forms, which must be returned no later than January 31, 1993, may be obtained by writing to The Gleitsman Foundation, 6100 Wilshire Boulevard, Suite 400, Los Angeles, California, 90048-5111. Nominators are free to nominate one or more possible honorees.

Commenting on the award, Gleitsman said, "People often have important solutions to critical needs, but feel they are not powerful enough to confront the system. By recognizing students who have successfully effected change, I hope that others will realize their own potential and will initiate positive actions on behalf of causes important to them. The result will be a better world for us all."

THE FAR SIDE

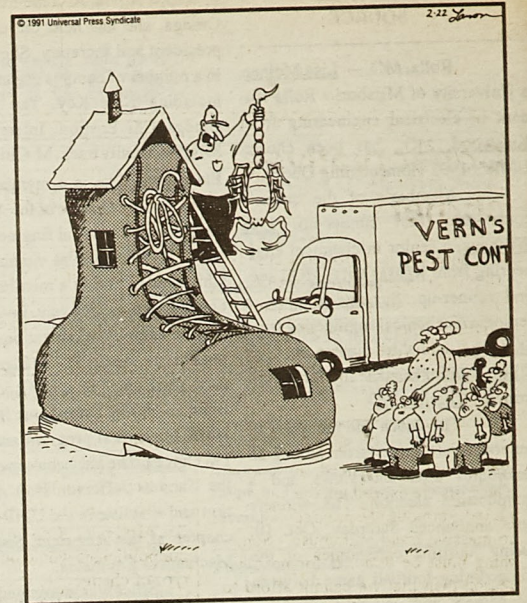

By GARY LARSON

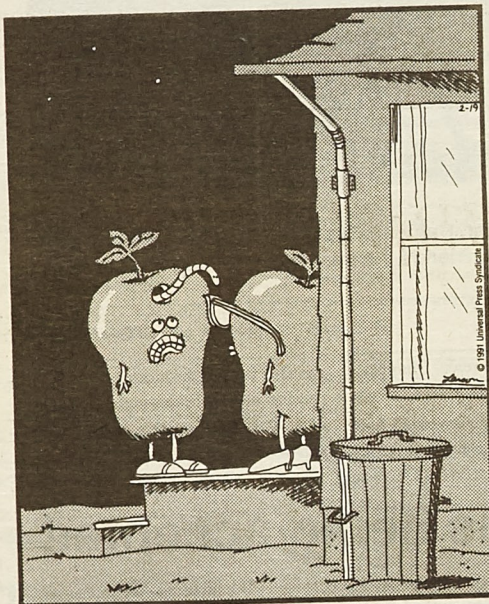

The crew of the Starship Enterprise encounters the floating head of Zsa Zsa Gabor.

As Thak worked frantically to start a fire, a Cro-Magnon man, walking erect, approached the table and simply gave Theena a light.

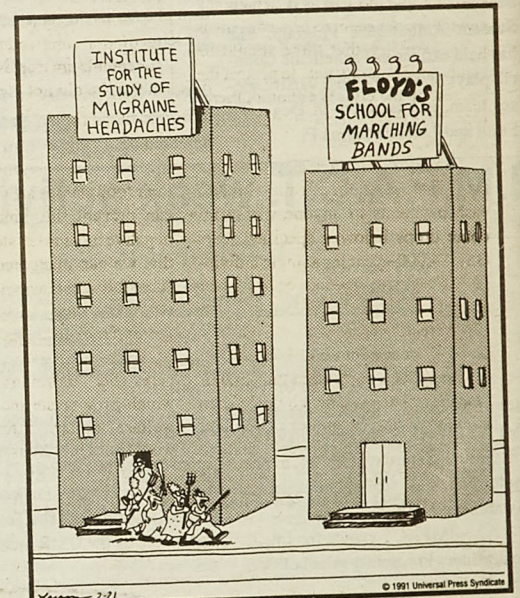

"OK, ma'am — it's dead. In the future, however, it's always a good idea to check your shoe each time you and the kids return home."

Andy looked up in horror. Right in front of Sally, a worm was emerging from his forehead — and he felt himself turning even redder.

Comments

Conservatives corner

Conservatives are often accused of offering criticisms but no solutions. Like most stereotypes about Conservatives this one is untrue, and to prove it I propose to offer solutions to a few of the problems facing our nation today.

Few people, even among Liberals, will deny that our Federal welfare/entitlement system needs reforming. The costs are exorbitant, the bureaucracies enormous, the programs subject to massive fraud and abuse. Something must be done, if for no other reason than that we cannot afford to continue spending 57% of our budget on these programs.

As a Conservative I would favor the total elimination of welfare. However, we do live in a democracy and there does seem to be a consensus in this country that there should be some sort of "safety net" to protect the poorest of society. We should, therefore, try to make this safety net as cost-efficient as possible.

The solution is a negative income tax. Instead the IRS simply makes cash payments to anyone whose income drops below a specified level (say, \$4,000 a year for a single individual). Of course, it would be necessary to keep the cut-off point fairly low, to avoid creating an incentive for staying on the government dole.

Some may object that this kind of cash-payment system would lead to abuse (blowing the money on alcohol, for example). The answer is that we have this abuse now. Go down to the average bar on the first of the month

Someone believes Mr. Hobart has a few flaws in his corner

Mr. Hobart's comments have, so far this semester, remained largely unmolested. I thought that perhaps it was time for somebody to point out some rather serious flaws in his last 2 columns.

Mr. Hobart's column, concerning voter registration, obviously mimics the conservative-elitist point of view. Mr. Hobart sees no problem with letting important decisions be made largely by the well-informed.

The first problem I have with this: Perhaps people are uninformed because they are not registered. This rather than the thought that they are uninformed because they do not care. I am an optimist. I believe that if these people who currently are not registered (for whatever reason) would become registered, they would make more of an effort to become "well informed."

The second problem I have is this: The majority of non-registered voters are poor people, uneducated people and young people. Is our country better served if these people do not have a voice in government? No! If new voter registration laws made it easier for more people to register, perhaps more people from these groups would register and vote. Would this not mean their interests would be better protected or are we to assume that the politicians in office (both Democrats and Republicans), whose careers can not be altered by these people who are not registered, are concerned with these people's problems? No! These are the same politicians that have helped increase the gap between the rich and the poor to a disastrous level. These are the rich politicians who can not conceive what it is like to wonder "Can I pay a doctor bill?" or "Can I afford tuition?". Perhaps if these poor, uneducated, young people would have an influence upon politicians, our politicians would once again learn how to make policies for ALL THE PEOPLE. It seems worthwhile to implement laws which would help bring about this type of change.

My last problem with Mr. Hobart Views, concerning voter registration, is this: With views like these, it seems Mr. Hobart does not believe in "Popular Sovereignty." Simply argued, I DO! This is the best of all arguments for the passage of laws which make it easier to register to vote.

Next, in Mr. Hobart's recent column, he wants the reader to believe that, unlike liberals, conservatives do not wish to make laws dealing with moral issues. To quote: "The reason we (conservatives) criticize things such as Ice-T's music or Hugh Hefner's magazine is not because we want government action against them, it is because they are wrong." and "If a liberal thinks something is wrong, he tries to outlaw it."

Is that to say Mr. Hobart does NOT believe that we should have legislation restricting the freedom of choice for pregnant women. Does Mr. Hobart NOT support restrictions on freedom of speech (such as record labeling, restrictions on the publication and selling of pornography for and to adults, and the like). If the above statements are true, Mr. Hobart and I are in agreement and he has separated himself from my image of a "conservative". If he does not adhere to the above statements, he did not "tell it like it is".

and you'll see welfare families drinking away the money they got by selling their food stamps at 50% off. Nothing can prevent this kind of fraud. A negative income tax stops the pretence that we can make people behave responsibly and leaves all choices to the recipients; they can spend the money wisely or foolishly as they wish.

Even better, the negative tax eliminates the enormous bureaucracies which now waste the bulk of every welfare dollar. Admittedly, this would put a few thousand pencil-pushers and social workers out of work — but what's wrong with that? Let them

earn an honest living for a change.

Best of all is the huge reduction in Federal spending which would result from a negative income tax. With a system like this we could double the defense budget and expand the space program and we would still have a budget surplus — without having to give up the "safety net" for the poor. How's that for a solution?

Next week: reforming Social Security. (Those seeking more information on the negative income tax should read Milton Friedman's Free to Choose.)

By Rob Hobart

Congrats !!!!

ASUM surpassed
their goal and registered 1023
people to vote.

No excuses now, so
vote.

ASUB

To whom this may concern,

I'm a psychotherapist in private practice. I've been living in Australia for two years and I am back in the area. Although I work with sexual abuse survivors, depression, co-dependency etc. a main area of experience is in eating disorders. Because statistics of bulimia/anorexia are so high for college women I thought at some point an article on such might be in order. As some therapists are not experienced and even refer eating disorder clients there is confusion as to even where to turn for help. The purpose of the article could be to acknowledge that the problem also exist in our community and inform that help is available that is confidential. I know it is needed.

If you are interested let me know. Thank you for your time.

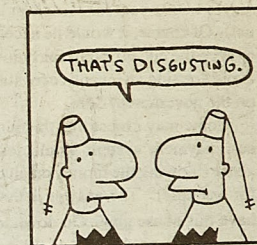

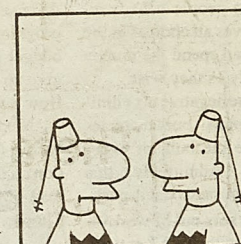

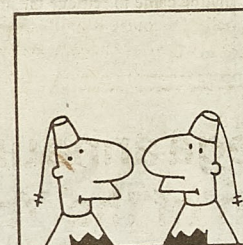

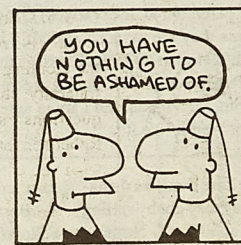

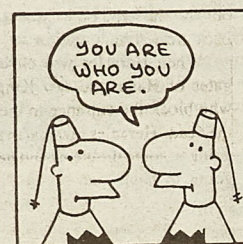

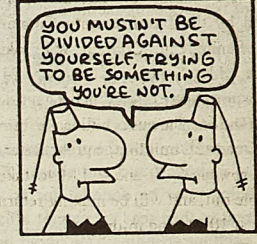

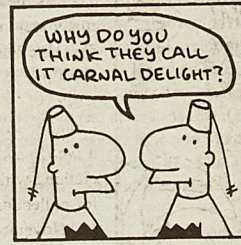

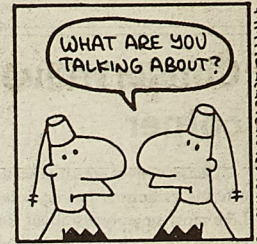

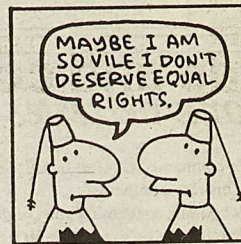

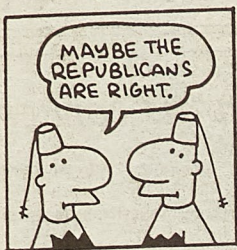

Sincerely,

Gretchen Brown

IFC SOURCE

The annual fall hayride sponsored by the Interfraternity Council and Panhellenic Council will take place this Saturday, October 24. Transportation to and from the hayride is provided. The buses will leave from the Quad, EE building, and the fraternity row at 6, 7, and 8 PM to take people out, and will be making return runs at 10, 11, and midnight.

Tickets are on sale now through either your IFC or Panhellenic representative, or through the Greek Life office located on the second floor of the University Center West. Tickets include a souvenir cup and admission to the hayride, which will feature a live band. If there are any questions, please call Gerhardt Rodenberger at 364-6916.

IFC SOURCE

As the cold weather approaches, many local families will be forced to face the elements with inadequate clothing. In an attempt to reduce their hardship, the UMR Interfraternity Council will be sponsoring a coat drive. In addition to coats, any and all clothing will be accepted. The weeks for collection will be October 26-30 and November 2-6.

After collection, the clothing will be turned over to L.O.V.E. (Local Organization for Various Emergencies). IFC reps will collect the clothing at fraternities, and non-fraternity students, or anyone with questions should contact Steve Robertson at 364-6752. Please do what you can to help those who need this assistance.

This week in Greek

Mark Crawford Staff Writer

This week we will travel with an ancient greek hero to the gates of hell. No... not to Rolla, but to the underworld with our hero Heracles.

In Greek Mythology Heracles is a mortal, but not just any mortal, he takes on impossible tasks. He does everything from holding up the world to fighting ugly, stank, and horrible giants. On this particular journey we join our hero as he battles the sinister powers of the underworld, to bring out of Hades Cerberus, the watchdog of Hell. This monster has three dog heads with gaping jaws always slobbering venom, his body ended in a dragon's tail and the hairs on his heads and his back are writhing snakes.

When Heracles was close to the gates of Hades, he saw King Pluto, who block the entrance to the city of the dead. Heracles saw that there were going to some problems and he wasn't going to have that, so he shot King Pluto with his bow and arrow. King Pluto now realized, with an arrow sticking out of his shoulder, that Heracles was no joke. Heracles told him that he came to retrieve the hound of hell. Of course King Pluto said yes, but he gave a condition on this agree-

ment in order to save face, he must master the dog without using any of his weapons.

Heracles agreed and went after the hound. He found the hateful dog crouched down at the mouth of the Acheron. The bark from the hound was louder than thunder multiplied a hundredfold. He clamped the dog heads between his legs, twined his arms around the necks, and did not loosen his hold (Heracles was a little stronger than the average man to do this) though the creature's tail-in-itself a dragon-lashed out at him and bit him in the flank (loin) with its teeth (ouch!!!). Heracles was really angry now and he held fast and choked the monster's throats until he had gained the upper hand. He then lifted up the dog and took him to the upper world, his task completed.

Greek sponsored coming adverts and announcements

Kappa Delta - October 23 Kappa Delta will celebrate their founder's day and will have a table at SWE's high school day. October 24 they will have a sisterhood retreat.

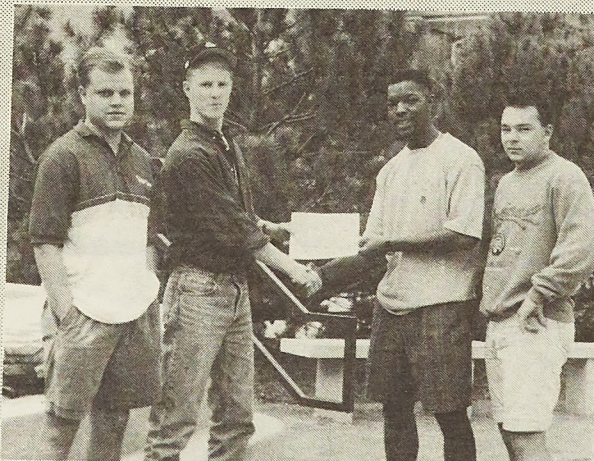

Alpha Kappa Alpha - Is sponsoring a fun and healthy aerobic session every Wed. in TJ Hall room G-3. Everyone is welcomed to come join in on the fun.

Theta Tau Omega announces Pizza night and Freshmen of the Year

Christopher Goo Features Editor

Theta Tau Omega has announced the winner of its annual Theta Tau Freshmen of the Year scholarship. His name is Andre Taylor from the quadrangle. Andre received a check of \$200 from Theta Tau. Congratulations!

To round out the semester, Theta Tau will be sponsoring our bi-yearly Pizza Night. Any organizations interested should contact Joe Hornburg at 341-5277 for further information. Try to get a hold of him by October 19th. What is Pizza Night you ask? Well, basically you order a pizza through Theta Tau for either the week of Oct 26th- 30th or Nov 2nd-Nov 6th. The pizza costs about \$8 per pie with about 3 to 4 dollars of the original cost going to charity. The pizza will be provided by Imo's pizza, St. Louis' #1 rated pizza. So get hungry and pig out for a good cause.

Kevin Biggare

Andre Taylor receiving check from Theta Tau Omega for freshman of the year

St. Pats committee looking for a few good men

Kory Bakken Staff Writer

The St. Pat's Committee will be holding an Open Forum on Wednesday, October 28th at 7 p.m. in the Missouri Room, of UCE. The discussion will be primarily centered around new membership for this upcoming semester. If you are thinking about joining the St. Pat's Committee, then show up and find out what is currently going on with the St. Pat's Celebration preparations. Additionally, if your organization desires to elect a new member, but the decision has not yet been made, send a representative to obtain the information you may later

need. There will be members of the Committee to field any questions you may have, or help you with any questions or problems you may have about our organization. We hope to see you there!

Also coming up next Wednesday is the DEADLINE FOR ST. PAT'S FLOAT ENTRIES. This is a correction from last week's issue where I stated that the Christmas float entries are due. They will be due on the 28th at 6 p.m. at AEPI.

NOTE: The first twelve entries will receive \$500 to put toward their floats. Be there on time.

GREEN 'EM ALL!!!

Only 142 Daze till the Best Ever 1993!

SUB: Results are in

SUB SOURCE

The World Bird Sanctuary (formerly the Raptor Rehabilitation and Propagation Project) is a non-profit organization that is attempting to save many species of wild birds. They focus mainly on raptors, or birds of prey. Raptors are a class of birds that have strong talons for catching food. Some of the more common raptors include hawks, owls, falcons, eagles, and even vultures and condors. One of the World Bird Sanctuary's projects that you may have heard about is the release of peregrine falcons in Downtown St. Louis. This project started a few years ago and if you watch the skies in St. Louis carefully you may spot one of these magnificent birds. The peregrine falcon's main diet is other birds, so it is a great aid in controlling the pigeon population.

For those of you from Kansas City, you may have seen the World Bird Sanctuary's Traveling Talons Show at the Renaissance Festival. This show features many of these beautiful birds on display and in flight. **The Traveling Talons show will be on campus on Tuesday Oct. 27 at 12:30 on the puck, sponsored by the SUB.**

Many people think that it is a crime to keep this birds in captivity. But most of the birds that are kept at the World Bird Sanctuary are injured

birds that have been rescued. Many of the birds then become incapable of returning to the wild after becoming accustom to humans. These birds are therefore kept and used for education, and are used in breeding programs to help re-populate their endangered species.

If you miss the Traveling Talons show on campus, or if you want to learn more about the World Bird Sanctuary, they are having an open house on Sat. and Sun. Oct. 31 and Nov. 1 at Tyson Research Facility starting at 11:00. Tyson Research Facility is located on highway 44 at the Beaumont Antire Exit in St. Louis County.

What is going on this week?

This weekend at 7 & 9 P.M. in ME104 - CAPE FEAR.

Exhilarating, suspenseful & funny - don't miss Robert DeNiro, Jessica Lange & Nick Nolte in this remake.

Next Tuesday, October 27 at 12:30 at the Puck - THE TRAVELING TALONS. The Traveling Talons is an educational presentation from the World Bird Sanctuary, near St. Louis. A talon is a bird of prey - owls, vultures, hawks, falcons, & eagles all fall into this category. The World Bird Sanctuary will be bringing about seven or eight birds of prey to the Puck for their presentation. They will in-

roduce you to the birds and some of the birds will be allowed to fly. It's an informative and FUN spectacle you don't want to miss this experience. Brought to you by the Fine Arts Committee.

October 28, Wednesday from 12:30 to 5:00 at the Puck - is the time to get into the Halloween Spirit - no pun intended. The Special Events Committee will be sponsoring a Pumpkin Decorating Contest. SUB will provide the pumpkins, you provide the tools & the imagination. You could win great **CASH PRIZES!** 1st Place - \$ 50, 2nd Place - \$ 25, and 3rd Place - \$ 10. Pumpkins will be available on a first come first service basis. Remember Wed., Oct. 28 @ The Puck! **OCTOBER 31 - HAPPY HALLOWEEN!!!**

Are you a golfer or would you just like to play one for Halloween. The SUB Leisure & Recreation Committee is sponsoring a Golf Scramble at the UMR Golf Course on Saturday, Oct 31. For more information or to register call the SUB Office @ 341-4220.

Don't forget everyone is always welcome at SUB committee meetings: 10/21 Tech. Services 6:30 pm SUB office.

Fraternities and engines; there is a correlation; I think!

Cujo
Staff Writer

When we were first discussing ideas for this paper, I thought that I could write an informative history of fraternities. When we discussed the process writings in Point of Departure I started to think about a paper on building an engine. Since Phil liked my analogy of the engine in comparison with the fraternity, I have decided to follow that vein. All dates and such are from The White Diamond, my fraternity's new educational manual.

In 1750, a group of students from William & Mary College formed the "Flat Hat Club" at the Raleigh Tavern in Williamsburg, Virginia. Thomas Jefferson was refuted to be a founder of this group. Twenty-six years later, in the Apollo room of the same tavern, Phi Beta Kappa was formed. In 1780 and 1871, chapters were added at Yale, Harvard, Dartmouth, and Union. In 1817 they were forced to reveal their secrets and become an honorary scholastic fraternity. From 1825, fraternities were founded all over the East. The "Flat Hat Club", and Phi Beta Kappa were steam engines, these new fraternities

represent the beginnings of combustion engines.

There are now roughly sixty national men's fraternities and thirty-one women's fraternities/sororities. The women's fraternities/sororities were started in the early eighteen-fifties. All of this organizations are based on Greek ideals, and therefore have Greek names. Phi Beta Kappa means, "Philosophy, the Guide of Life". That was one of the secrets that they were forced to tell because of the disapproval of their faculty. Other than becoming a member of a fraternity, the only way to know the ritual is to go to the Library of Congress where all rituals are shelved. I don't know if just anybody is allowed to see them, but I do know from personal experience that the secrets are passed by word of mouth, and are not written anywhere.

When I say that all of these organizations are passed on Greek ideals I mean that each has taken their own philosophy from Greek history. Admittedly there is much overlap, but most are unique. Scholarship is an obvious one. As is Brotherhood/Sisterhood. Fraternity and Brotherhood/Sisterhood mean the same thing, and, if you look them up, they refer to each

other. This fraternity is the metal of the engine, composited with secrets and tradition to make it stronger and more heat resistant. Each member is a piston, the more members, the stronger the engine. The crankshaft is the fraternity, a word I am using as a neuter term for Brotherhood/Sisterhood. The crankshaft receives the power from the members as well as directing their motions. The crankshaft is connected by a chain to the camshaft, which directs the valves. The intake valve controls the amount of information each member receives, and the exhaust valve allows the tensions of college life to be vented.

I don't know where it started, but a disease entered this garden of education and fraternity--hazing. There are many definitions of hazing, but mine is the best and simplest I've ever heard. Anything which you are forcing someone to do, but are not willing to do yourself, is hazing. The biggest excuse is: "well we had to do it, it's only fair, and it will make them better brothers." This is bull! Some of their "better brothers" are dead because they were forced in to the trunk of a car, usually blindfolded, and forced to drink a large quantity of alcohol before they were released. Real brotherly.

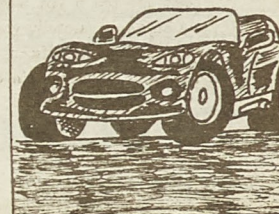

The worst I've ever put my younger brothers through is a poorly planned initiation (people didn't know their lines). Line-ups are still common on this campus. I can look at my "fraternity" neighbors and watch them line up their pledges for drinking, reciting, exercises, or whatever other brutality they can think up. This is the mentality which has blown headers right off the engines, and thrown lifters down through the oil pan.

Insurance companies will not cover fraternities. A few years ago, the Chief Executive of my fraternity started F.I.P.G., a Fraternity Insurance Purchasing Group. About fifty national fraternities got together and created an insurance company and issued a rigorous set of rules concerning parties and overall activities. Problems have elevated so much that its existence is threatened. What once was a honored institution is now viewed as a danger.

This water in our gas called hazing can only be remedied by reviewing and purifying the gas which is pumped into our new member's minds. We need to use a higher octane fuel with detergent, to clean out the impurities and give the fraternity better gas mileage. The new fraternity will have dual

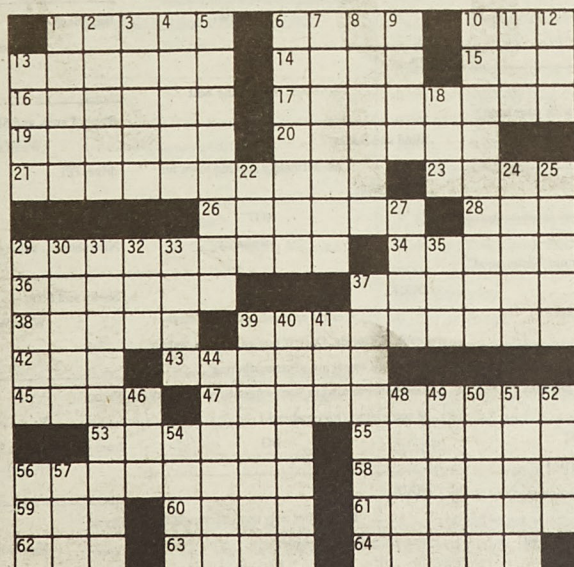

overhead cams to better control what we teach the new members, and to control the older members vent their feelings. There is fuel injection so that the sparks of excitement and enthusiasm will fire with exactness. The engine must transfer plenty of power through the transmission and drive train into the car which is the chapter at a specific university. Each fraternities national is like a car company which puts out several models, but within all of them is the basic fraternity engine.

Miss ya'll ... Where are you all the
time? Where are you living? You're not here...
You're not there ... And what's your new phone
number anyway??? are you trying to get rid of
me? 'Cause I can take a hint ...
Love Deb

Lab Partner of the Year,
Do you have your Goggles? Why
the hell do you park all the way in BF1?
The Ditz

Deena,
I'll never get out of the shower w/
out a full robe on again!!
Dot-to-dot

Ed, John S., and Kenny,
I'm the luckiest Big Sis around!!
You guys are WAY COOL!!
Love
YBS

P.S... Yuke is your Big Brother now ...
Bum, money, food, girls (like he'd have any
anyway) whatever off of him ... he needs to
learn family responsibility!!

Mindy,
It's a good thing we're roommates
because I don't think any other two people
could stand our bitching.
Chrissy

Allen,
P.S. says you are in trouble!
Giggles

Rebecca,
Terrific job with Soccer Smash!
You and Kappa Delta are great!
Love in AOT
Giggles

Thanks to everyone who participated in Soccer
Smash!
KD

Stephanie,
If you keep wearing your hair like
that to the library, you'll never find a guy to
mash on.
Endust

Laura D.
You're a great "big" little sis!
AOT
Chrissy

Rebecca,
Is that what you're wearing?
AOT
Chrissy

My petting zoo is now missing 2 members!
J.M.

Ben at Sig Chi,
I want to meet you sometime so I
can see if what you wrote on your derby is true
The KA who stole
your derby

Kelly, Kelly, Kelly, Kelly,
Your the best lil sis. Sorry I had to
mess with your mind for a whole week, but hey
- what are big sisters for?
Goofy

Da boyz next door,
Puh-hanna-ruh!
Your next door neighbors

Derek and Scott,
You guys are the greatest. Thanks
for everything

Don B -
How many majors does one person
need? Don't you ever want to graduate?
your lunch buddy

I play foo-bah on the foo-bah field with a foo-
bah

Amy,
Bamn the Dad Luck! Guys are
scum (except Tom of course). The Zetas Love
you Always
ZLAM
Deb

Chrissy,
I'm so excited about having you as
my big sis. You're the best.
Love,
YLS

Chalk Buddies are the coolest!!!

Stephanie,
You did a great job on 20th.
Love and friends forever,
Laura

Giggles,
How are Mona Lisa and sex on the
beach?
Stephanie

C.M.C.
A 29%? I think NOT!!
T.C.Q.

50 things to combat boredom

Rich Dahm
Features Writer

1. Doodle with magic markers on your skin.
2. Go into the cupboards and mix a little bit of every food item into a bowl. Taste.
3. Sit upside-down on the couch with your head on the floor. Imagine a upside-down world.
4. Break all your crayons in half.
5. Fool a younger sibling into thinking the family is moving away.
6. Put a sleeping-bag upside-down over your head. Have a friend do the same. Run full-force at each other and attempt to knock yourselves down.
7. Make loud animal noises.
8. Plug up the sink and fill it with water. Test all items in the bathroom for bouyancy.
9. Cross-dress.
10. Bounce up and down on your parents' bed.
11. Draw pictures of monsters with lots of blood and dismembered bodies.
12. Blow up a balloon, then let go of it. Watch it sail around the room.
13. Pretend your whole house is made of candy and run around biting everything.
14. Fill the toilet with an overabundance of bathroom tissue. Flush.

15. Stretch your Slinky until it won't spring back.
16. Ask mom for a bowl of ice cream. Stir it up until it's soupy. Dump it down the sink.
17. Draw moustaches and blacken teeth on faces in magazines.
18. Throw your siblings' toys down the stairs.
19. Try a doggie biscuit.
20. Sneak into your parents' room. Rummage through their closets and drawers to find secret treasures.
21. Belch.
22. Adjust the control knobs on the TV.
23. Burn ants on the sidewalk with a magnifying glass.
24. Empty a can of shaving cream into the tub.
25. Get in the family car with a friend and pretend to go for a ride.
26. Pull off a scab.
27. Take the labels off all the canned goods in your cupboards and roll the cans on the floor.
28. Build a fort out of furniture in the basement. Defend it from your parents with a whiffle-ball bat.
29. Play some 33 rpm records at 45 rpm.
30. Jump off the garage.
31. Set small controlled fires in the basement.
32. Ring a neighbor's doorbell and run away.
33. Walk around the house backwards.
34. Pull the heads off all your dolls.

- Put the wrong heads on the wrong bodies.
35. Turn on all the lights and electrical appliances in the house.
36. Blow bubbles with your own saliva.
37. Disassemble a pen.
38. Repeat everything somebody says until you get sluggish.
39. Suck your thumb.
40. Chew a piece of gum. Take it out of your mouth. Stretch it, smooch it, roll it into a ball, and stick it to the underside of a furniture.
41. Pour Elmer's glue on your hand. Wait for it to dry, then peel off the dried glue as if it were your skin.
42. Make prank phone calls to people with funny names in the phone book. (Sample call: "Is this Mr. Hamburger? It is? Then you should go back to McDonalds.")
43. Start a rubberband fight.
44. Delete some files from Mom or Dad's home computer.
45. Go through family photo albums and cut up some photos to make your own composite pictures.
46. Blow air into a plastic bag. Sneak up behind a unsuspecting victim and pop the bag.
47. See how many crackers you can jam into your mouth.
48. Spin around in circles until you can no longer stand up. Lie flat on the floor and feel the room spin.
49. Look up dirty words in the dictionary.
50. Go through trash bins.

Liberal Lavatory

James Barnes
Staff Writer

This is the first installment of the Liberal Lavatory. In this election year a lot of people are uncertain what their political preferences are. The choices are not clear, and the candidates are idiots. George Bush is an old rich fart who is running a campaign based on the thesis that we the voters can not trust his opponent. Bill Clinton is running a campaign based on the three words, *America Needs Change*. Ross Perot is taking a stand behind being an outsider, and wanting to take back America (this is semi-reminiscent of the Jerry Brown premise). Clinton's idea sounds good, but then you watch him talk like a baby into the camera during the first debate. So what are we to make of all this? The voter turn out will probably be the highest in years, yet all the candidates are lame.

We will start with the vice-presidential debate. What was it, some freshmen high school students fighting about who sat in who's seat? While the VP stooges argued their masters' plans for America, Perot's man stood awed by his own presence in the making of history. While Quayle was saying you can't trust Clinton, Gore was talking about change for America. I think the new

slogan for the Democrats should be: "It's time to change America's underwear, Clinton/Gore 92."

At the first presidential debate—which I was suppose to attend with the Young Republicans, but got drunk instead at a really good GDI party—Clinton looked like a really well rehearsed "proper" idiot, always talking into the camera like a little kid. Bush was quick to defend his "experience" and go over his time allotment, all the while pushing the idea that the American people can not trust Bill Clinton. Perot was just hanging out over on the left, but unlike the other candidates, he had some really good ideas about the way this country should be governed. But hey, who can really afford this crazy gas tax, and if he gets elected, how is he going to move things through congress with no specific party behind him?

So what are we left with? Three bad choices, I guess we are going to have to just watch and see what happens.

ATTENTION: For the protestant, baptist, and pentecostal Jesus-crispies, and the catholic mary-crispy; I think that since this is a scientific university, we should open up an objective, as well a scientific, inquiry into the feasibility and the tangible aspects of religion—stay tuned.

See what one vote can do

In 1645, ONE VOTE gave Oliver Cromwell control of England.

In 1649, ONE VOTE tipped the balance scale, Charles I of England was executed.

In 1776, with ONE VOTE English was chosen over German as the official language of the United States.

In 1839, ONE VOTE elected Marcus Morton governor of Massachusetts.

In 1845, ONE VOTE brought Texas into the Union.

In 1868, ONE VOTE saved President Andrew Johnson from impeachment.

In 1876, ONE VOTE gave Rutherford B. Hayes the presidency over Samuel Tilden.

In 1923, ONE VOTE gave Adolf Hitler leadership of the Nazi Party.

In 1948, ONE VOTE elected Lyndon B. Johnson to the U.S. Senate from Texas by less than a vote per precinct.

In 1960, ONE VOTE change in each precinct in Illinois would have defeated John F. Kennedy.

In 1982, less than ONE VOTE per precinct re-elected James R. Thompson governor of Illinois.

Something new

Dennis J. Downey
Staff Writer

Here's an idea that I'm going to throw out at you. Let's form an organization on campus who's soul function is to philosophize. It won't have a president, treasurer, secretary, or social chairman. It will have no membership fees and the only membership requirement would be that you must be a free-thinking individual who will readily accept new ideas. Perhaps disorganization would better describe what we are about to form here.

W. B. Yeats once said, "I am still of the opinion that only two topics can be of the least interest to a serious and studious mood—sex and the dead." This would be a perfect name for the disorganization: "Sex and Death," or better yet the "Sex and Death Junta." Junta coming from greek or latin or something like that which means "secret society." Well it won't actually be a "secret society" but the name sounds really cool anyway.

Right now you might be saying this is all well and good but what's the point of this organization, disorganization, or whatever you're going to call it? The S.D.H. (see it even has a

cool acronym) shall provide a structure in which to discuss and think about absolutely anything that needs to be discussed or thought about. Things like sex, death, religion, politics (sorry about the profanity), science and art are perfect examples. So you should find some quite place that you can sit down and think about something that's always bothered you. It doesn't have to be some earth-shattering idea. Ask questions like: what is the point of having a "b" in dumb if you're not going to use it? and is there an intelligent answer or even an answer that makes sense to the question "What's up?" Ask yourself the more important questions like: how can I prevent the spread of AIDS? and am I prejudiced and why or why not? After you have thought about questions like these, go out and discuss them with your friends. Then go and write down all of in you're S.D.J. notebook. Our ultimate goal will to conquer the world with free thought.

With utmost sincerity,

Dennis J. Downey

P.S. What is the pompitous of love, anyway?

Brain Tease

There are 28 teams in the National Football League. All except one are listed below. See if you can decipher the names of the teams and discover which one is missing:

Activity Fee

**SAFB
SOURCE**

The Student Activity Fee (SAF) board decides how to allocate Student Activity Fee money. During the spring semester the SAF board sends out a survey to one thousand randomly selected students. This survey is to find out the student's opinion on what needs to be done to make UMR a better place. For example, last year one of the issues dealt with on the survey was the availability of student voter registration on campus.

In the fall, members of the SAF Board meet with agents of the organizations SAF funds. This meeting is to prepare a budget. The SAF board then money should be distributed. These recommendations are sent out to all students. The SAF board's goal is once again to get input on how their money is to be spent. The recommendations are then presented to the student council. Once the SAF board's recommendations are approved by STUCO and Chancellor Park, the board of Curators must approve them. Most often the Chancellor or the board of Curators will disagree with an aspect of the SAF boards recommendations and the SAF board will submit additional proposals until all parties can agree.

This semester's members and the organizations they work with are as follows: Mark Junkins (chairman) - Athletics / Capital Fund, Sarah A. Blunt - Cheerleaders / Equipment Fund, Shawn Craig - University Center/SUB, Ronald Platz - KMNR/Golf Course, Mike McClellan - ASUM / Non-Varsity Sports, Ronald Covington - STUCO, Rollamo, James Swinfor - St. Pat's Committee / Missouri Miner, (Associate Members) - James Ward, Laura Vrable, Brian Klein, and Tim Steadham.

Any suggestions for the SAF board should be returned in at the STUCO office. We welcome any input that will help us realize our primary goal, to spend YOUR money wisely.

Come speak your opinion on Nov. 3rd open forum.

KUMR exceeds goal for their Autumn tune up

**KUMR
SOURCE**

More than 20% over its goal ... public radio KUMR not only reached its \$16,000 AUTUMN TUNE-UP investment drive goal; it exceeded it by \$3,794! Listeners and members of the station responded from all over South Central Missouri in another success story for the small NPR affiliate station. "The AUTUMN TUNE-UP was essential for us to meet several pressing equipment needs at the station; our members and listeners HAD to be there for us," commented Station General Manager Janet Turkovic.

"Imagine how thrilled we were to see this kind of support pouring in from all over the area!"

The Investment Drive lasted 3 days and 5 hours. Targeted in the drive was the station's need for a new STL transmitter, a need that the station's licensee, the University of Missouri-Rolla, was finding difficult to fill. Once again, KUMR turned to its listeners in an unusual bid for them to become partners in keeping the station alive. As a result of mail-ins and on-air pledges, 85 listeners became new members, bringing the total to over 400 new member families since the beginning of the year.

As a part of the AUTUMN TUNE-UP, UMR Chancellor, Dr. John Park, appeared as a guest host on ALLEGRO, talking about the value of the station to the University and the key role KUMR plays in the educational and cultural life of the surrounding communities. A dozen guest hosts and over 30 phone volunteers assisted in the station's activities. Twelve challenge grants were issued over the air from the following area individuals and businesses: Dr. Hugh Bartlett; Boatmen's Bank; Conservative Financial Services; Dietzmann and Bushie, Attorneys at Law; Eyberg Construction; Friends of the Blue Heron Rookery Cafe; Rolla Women's Clinic; Dr.

Thomas Van Doren; and three anonymous individuals. Challenge grants were a significant factor in the success of the AUTUMN TUNE-UP.

The continuing achievements of KUMR in the face of possible extinction are not only a testimony to the staff's tenacity; they are a clear indication of the commitment area listeners have to the future of public radio service in South Central Missouri.

For more information regarding KUMR programming or membership, call (314)341-4386 or 1-800-388-KUMR.

Football Miners fall to ESU Hornets

Chris Merris
Asst. Sports Editor

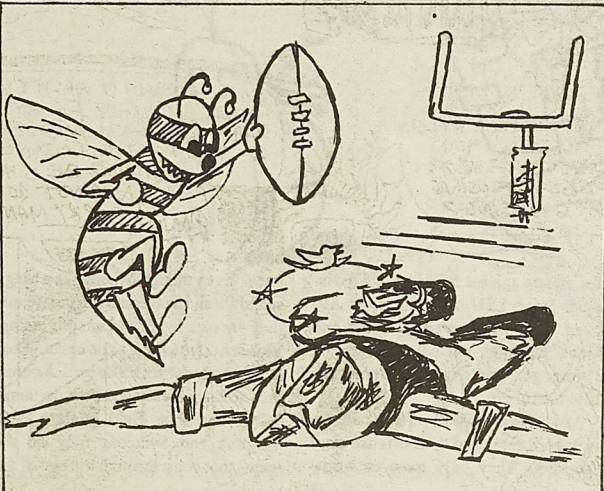

The Miners ventured to Emporia Kansas this past weekend to battle the 16th ranked Hornets in a MIAA conference game. The Miners entered with a 5 game losing streak and it would only get worse.

The game opened up with UMR kicking off. The defense held tough forring ESU to punt. On the Miners first possession they also punted. Each team repeated their first possossion and then ESU received the punt and went 10 yards to the UMR 47 yard-line. The Hornets drove down the field with help from a roughing the kicker senalty to score on a 7 yard touch down by Quincy Tillmon. The first quarter ended with ESU up 7-0.

The Miners started the second quarter on defense and held the Hornets on a 4th an 4 from the 6 yard line to get the ball back. The Miners then went on an impressive 93 yard drive capped off by Chris Alversons 12 yard touch down reception from redshirt freshman Quarter back Joe Knapp.

The Miners failed to tie when Listerud's kick missed. On the kickoff the Hornets got the ball on the 37 yard line. Then they drove 63 yards for a

touchdown to Anthony Cowin with 7 seconds left in the half. The half ended 21-6.

touchdown for Quincy Tillmon when he recovered his own fumble in the end zone. ESU went up 14-6. Late in the half Joe Knapp threw an interception

The second half was the most part all Emporia State since the Miners couldn't convert on 3 interceptions one by Jarrett Dace and 2 by Matt

Henry. The third quarter remained scoreless. The fourth quarter featured two Empria State touchdowns one by Shane Meyer and a 26 yard pass and another by Mike Smith on an 82 yard run with 46 seconds left to play. The final score was 35-6 in favor of the bad guys.

One thing that unfolded was the emergences of Joe Knapp who started his first game and completed 13 of 32 for 237 yard, one TD and one INT. Craig Sorrensen had 4 catches for 91 yards and Steve Howard had 3 catches for 90 yards. These great performances were overshadowed by Emporia's Quincy Tillmon who rushed for 92 yards.

The Miners have 4 games left in the 1992 season. Up next against the Washburn Ichabods. The Ichabods up set CMSU 13-10 this past weekend. This weekend is Hall of Fame day at UMR. One of the many that will be Honored is Joel Loveridge who founded M-Club. The Ichabads should be a good game for the Miner to get on track with as the 4 have only the one win over CMSU.

UMR	0	6	0	0-0
ESU	7	14	0	14-35

ESU - Tillmon 7 run (kick good)

UMR - Alverson 12 pass from Knapp (kick failed)

ESU - Tillmon 2 fumble recovery (kick good)

ESU - Cowin 7 pass from West (kick good)

ESU - Meyer 26 pass from West (kick good)

ESU - Smith 82 run (kick good)

The world's greatest winter sport is in season

Bob
Staff Writer

With the weather growing cold and the days getting shorter, people aren't participating in outdoor sports as much as they did when the weather was warmer. Unless you're a big fan of ice-fishing or curling you've decided to take the winter off and bear the cold temperatures by relaxing in your warm, toasty livingroom. For the real sports fan who's not just satisfied with being indoors, they have to be doing something, have I got the sport for you. Rotting is the most popular in the winter on cold, cloudy days.

Rotting, the sport of the future, is a simple game that everyone can play. All you need is a remote control and enough refreshments (beer) to keep you alive for several hours or a couple days, whatever your preference. Rotting is the special art of sitting and watching TV for hours on end. There are only a few rules to this sport. 1. you are only allowed to watch sports, that's what makes it a sport. 2. Do not watch commercials. Every time a commercial comes on you must flip through the channels to find another sporting event until the one you were watching comes on. 3. You can only get up to use the bathroom. Recliner optional.

Not everyone is cut-out to be a world-class rotter. It takes a special

kind of person. Obviously you have to like sports. If you don't like sports then don't try rotting be any means. Some disastrous results may occur. Another suggestion, don't disturb anyone who is rotting. Rotters are very sensitive people who love their sports. Don't get them angry. You won't like them if they are angry. I must warn young kids to not try rotting at home without their parents supervision. It takes a professional and I wouldn't want to be responsible for any young kids getting hurt.

For the amateur rotter or for someone just starting to rott I must point out some of the best rotting times through out the year. Any weekend in the fall is fair game. You have college football on Saturday and Pro football on Sunday. The ambitious rotter could conceivably sit down on a saturday morning and not get up until late Sunday afternoon. Now that's a rotter's dream. Another prime rotting time is during March Madness in college basketball. The beauty of this time of year is there is games on during the weeknights as well as on the weekend. A good rotter could catch about 11 or 12 games in a week and stay in their chair from Friday night until Sunday evening. For the rotter who only has a few hours, because he has to do something stupid like go to work or something, he could watch any baseball game because they last about three hours.

If rotting sounds like the sport for you and you want to get more information about it. St. Louis Cardinals pitcher Bob McClune wrote a whole

book about it. I don't claim to know everything about this sport, I'm just an amateur myself, I suggest you get this book to get the whole story. Good luck

in your rotting endeavors, and remember don't over do it, you're got to be out of shape for this sport.

Just another day at the office

The Lady Miners in action last Wednesday. The Lady Miners and men's soccer team both furthered their good seasons last week by beating ranked opponents. Updates on the men's and women's soccer teams, as well as the cross country squad, on page 17.

Squiggy says 'Welcome back, Fightin' Irish'

**Squiggy
Staff Writer**

The past two weeks have been very exciting in the world of college football. So many established teams fell in surprising upsets. Now the new edition of Squiggy's top ten:

#10: Syracuse - This team is on the rebound after a tough loss to Ohio State. They came back by winning a big game over West Virginia who was previously unbeaten. With their speed and the Carrier Dome look for the Orangemen to continually improve.

#9: Nebraska - With a lone loss to Washington and a two back tandem of Derek Brown and Calvin Jones they look to return to the Orange Bowl after Colorado tied Oklahoma 24-24 and only beat Missouri 6-0. If they can come up with a creative pass offense to compliment the run this team may rebound as a title contender.

#8: Notre Dame - It was only a matter of time before the Irish returned to the top of the heap. With Stanford losing to Arizona and Penn State losing to Boston College the idle week will help gear up the high power offense that had

52 points and 400 plus yards rushing against Pittsburgh. With BYU next and Boston College and Penn State not far off look for Lou Holtz to turn it into high gear.

#7: Georgia - Forget Marshall Faulk the top running back in the college ranks is Garrison Hearst. With Florida and Georgia Tech left as their

quarter to upend Shawn Jones and Georgia Tech. Good thing that Charlie Ward can turn it on and off when he needs to. He has all the tools to become the next Randall Unningham.

#5: Alabama - I'm not sold on their offense, but if it is good enough they could upend Miami's title hopes in a bowl game. They have very meaning-

about Texas and they could remain unbeaten and untested. Since Stanford, the Aggies have beaten Mizzou, Texas Tech, LSU, Rice, Tulsa, and Baylor who are all having losing seasons.

#3: Miami - Why do the Hurricanes play TCU? Whoknows, but why are they in the weak Big East confer-

Hurricane unmolested. They will lose, I promise.

#2: Washington: Like Miami this is a team that is very shaky. Only Nebraska has posed any threat besides USC. With games against Stanford, and Arizona they will lose or tie and blow the chance to repeat. Why will they lose because Arizona is a prime team overlooked by big teams and Bill Walsh will breathe fire reminiscent to the coaching gem at Notre Dame. Stanford is for real and the Huskies are not.

#1: Michigan - Why No. 1? Because as Goon would put Tyrone Wheatley is a stud and who can deny a name like Freshman Sensation Mercury Hayes. These two have come on strong along with Grbac, Alexander, and Powers to lead a balanced offense. This team may have tied ND, but that was at southbend and Grbac threw the game away with an ill advised pass to blow the game. Since then Michigan has won by an average score of 35-8. They don't let teams even come close, they just blow'em away. If the Huskies make the Rose Bowl unscathed watch the Wolverines eat'em for dinner.

only opponents look for the Bulldogs to bowl their way to the SEC title game versus Alabama. With Hearst over 1000 yards already he may be NFL Bound so it is now or never for Sophomore Eric Zeier and Georgia.

#6: Florida State - still recovering from their stunning loss versus Miami the Seminoles had to erupt in the 4th

ful games against Mississippi, Mississippi State, LSU, and arch rival Auburn. Any of these teams could end Gene Stallings perfect season. If Palmer gets hurt or pulled 'Bama will lose to Auburn.

#4: Texas A & M - Their defense is unbelievable and their offense is on the rise. They only have to worry

ence. Even though Miami has a tough schedule and has remained undefeated they are lack luster and unconvincing. This is a team asking to be upset. They handed games to FSU, and Arizona only to have these teams out do themselves and miss field goals. West Virginia and Syracuse may be the teams that coast through the eye of the

Shawn & John: the controversy is over, or is it

**A. T. Goon
Promoter**

The campus was abuzz all day Friday in anticipation of the great contest that was to happen that evening. And believe me, come 4:00 the Gale Bullman multi useless building was full of hungry fans hoping to catch a mere glimpse of these two great athletes. Yes, it was the day that Shawn and John, two men whom the media has enlarged to legendary proportions, were to meet and decide who in fact was the world's greatest athlete.

At exactly 4:00, the match was underway. John hit the first bucket of what would prove to be a long, defense oriented contest.

"I knew that my natural touch would be enough offensively, so I didn't even practice any offense, I just concentrated on my D." John would say after his impressive game on the other side of the ball. Shawn, usually an unstoppable inside force, just could not push the feisty little Herrmann around as he is accustomed to doing.

John, however had some offensive problems of his own. He learned quickly that Shawn is much quicker than he looks. He just couldn't shake the man as Shawn's defensive stats would attest. Shawn finished the game with 17 blocked shots, 12 of which were the get-that-s_t-out-of-my-yard-rejection type. I think it is safe to say that big Shawn dominated the game in the paint, as was expected, but one play, that occurred with the score 21-14 in John's favor, would typify

this game. This one play would tell the story of the entire game. John pumped from about 35-feet and Shawn bit on it. John, seeing the opening, darted past the leaping Shawn and headed hard for the basket. Shawn

a rejection of gargantuan proportions. But, without blinking, John was off in chase of the ball. He retrieved it just outside the three point line and quickly proceeded to bury a trey. The mighty Shawn shook his head in disbelief of

In post-game interviews, Shawn expressed his frustration with the officiating.

"I couldn't get a shot off. My arms are gonna be red for the next month. They sent him to the line four times, but they wouldn't call anything against him."

When confronted with this later, senior referee Jeff Lacavich responded, "Hey, wuddn't me, baby!"

John could not be reached for comment following the game. Sources say he headed straight for Disneyland.

Extra: In a late breaking story, It has been revealed that prior to this game, doctors had advised Shawn not to play. It seems sometime in March of this year, Shawn contracted the AIDS virus. None of his pets have it so it isn't really known where Shawn got it. If you have any information as to where Shawn could have contracted this disease, please send it to:

**Barcerolla disease research

concerning Shawn Craig

Your identity will be kept anonymous. So please, Shawn may tell you he doesn't want you to tell anyone these stories, but he needs you to. It's for his own good, so all you people out there who know intimate stories about Shawn Craig, please send them in. We can't find a cure if we can't find a source.

WAY TO GO, POCKET!

quickly recovered and it wasn't long before Shawn was right behind him again. As John went to lay up, and possibly perform a 360-degree triple pump slam, Shawn reached out with a big paw and swatted the ball back out,

the speed of this man they call John. All in all, the game was decided by the three point basket. John hit four to Shawn's one, and when the dust had cleared and it was all over, the scoreboard read John 31, Shawn 19.

Intramurals

**Jim Beard
Corresponding Secretary**

With the 1992-93 intramural season underway, Pi Kappa Alpha has jumped out to an early lead, followed closely by Phi Kappa Theta, Sigma Phi Epsilon, and Sigma Nu. With soccer and volleyball ready to get underway things are just going to get closer.

At the last intramural managers meeting, athlete and team of the week were elected. Congratulations to Sigma Nu's "King Jeremy the wicked" White. Jeremy set a personal best with 355 yards passing and four touchdowns in a heart-wrenching loss to Lambda Chi Alpha. Jeremy helped his Heisman chances in what could have been his swan song from college football. He has not decided if he will enter the draft as of yet, and he's not talking. It remains to be seen if the evil green will claim yet another victim.

This week's team of the week went to Omega Psi Phi football. This expansion powerhouse rolled to the division II championship in their first year of intramural competition, leaving smoke and carnage in their path as they went. Is this a dynasty in progress? Maybe. I guess we'll find out next year.

Soccer and X-country: good seasons go on

Soccer teams continue good seasons by upsetting highly regarded opponents. Cross country has strong showing.

UMR Athletics SOURCE

MEN'S SOCCER: The University of Missouri-Rolla men's soccer team will attempt to start a winning streak now that it will be at home for a while. The team opened a five-game home stand this week.

The Miners, who lost the only game they played last week, took a 3-5 record into a Monday night game with Columbia College. UMR will face Lindenwood Coolege on Wednesday before its weekend tournament, where the Miners play Lewis University on Friday and the University of Denver on Sunday.

The home stand will end with a game against Southwest Missouri State on Oct. 21.

Lindenwood scored an early-season victory over the University of Missouri-St. Louis, the team that beat the Miners last week by the score of 4-1. Sean Bulla (Arlington/Lamar) scored the lone UMR goal in the contest. UMR also picked up a forfeit win over St. Joseph's (Ind.) for a game that was scheduled on Saturday.

UMR will play Lewis in the second game on Friday, following a game between Northeast Missouri State and Denver, coached by former St. Louis Steamers' coach Dave Clements. The Miners and Denver will square off on Sunday following the Northeast-Lewis game at noon.

Jim Chapman (St. Louis/Hazelwood East) remains the Miners' lead-

ing scorer with seven points on two goals and three assists. Scott Harrison (Granite City, Ill.) leads the Miners in goals with three.

WOMEN'S SOCCER: Homecoming weekend, usually a festive weekend at a university, was anything

UMR will attempt to get back on the winning track on Wednesday when the Lady Miners play host to William Woods College at the UMR Soccer Complex. It will be the final home game for UMR, and the last game for ten days as the Lady Miners will be

Lady Miner games have ended in shutouts, with UMR winning two of them.

One of those two was a 4-0 win over Westminster on Tuesday, as freshmen forward Crissy Isreal (Dallas, Texas) scored three goals for

out of 13 teams while Lady Miner junior Becky Wilson finished with a personal best time in the Miner Invitational over the weekend.

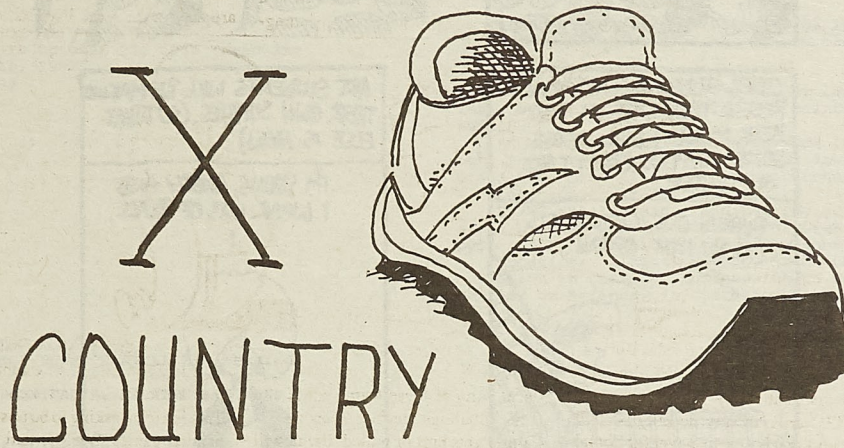

Bob Etien (Fort Wayne, Ind.) was the top Miner runner, as he finished in 31st place in the 8,000-meter race with a time of 26:43. Kerry Kimmel (Knob Noster) was 37th in 27:01, while Dirk Frisbee (Rolla) was 48th in 27:41. Justin Ticken (Kearney), who had a time of 28:25, and James Stanfield (Belle), with a mark of 28:28, rounded out the Miners' top five in the race.

The University of Missouri-Columbia, led by Sean Birren's second-place time of 25:03, won the race by four points over Northeast Missouri State. The Bulldogs had meet winner Rob Jensen, who finished with a time of 24:41.

In the women's race, the University of Missouri-Columbia and Pittsburg State's Christie Allen were runaway winners. The Tigers finished 25 points ahead of Pittsburg State for the team title, but Allen took individual honors in the 5,000-meter race in a time of 17:30, 32 seconds ahead of Harding's Shawn Queen.

Wilson finished in 19th place in the fast-paced with a personal-best time of 19:01. Carla Wiebe (Rolla) finished second among the UMR runners with a time of 21:30.

Both teams will be idle this week, as they prepare for the Mid-America Intercollegiate Athletics Association Championships on Oct. 24 at Pittsburg State.

but that for the UMR women's soccer team as it lost two games by a combined score of 10-0. The Lady Miners lost to St. Joseph's (Ind.) 4-0 on Saturday, then dropped a 6-0 decision to Northeast Missouri State the following day.

idle until an Oct. 24 game at Southern Indiana.

The weekend losses extended a shutout streak against the Lady Miners to three games, as they lost at the University of Missouri-St. Louis 2-0 last Wednesday. In fact, the last six

UMR. It was the first three-goal performance by a UMR player since 1988 and gave Isreal a team-high five goals on the season. Isreal also has two assists this year.

CROSS COUNTRY: The Miner cross country team took eighth place

APPLICATIONS FOR NOMINATIONS FOR TRUMAN SCHOLARSHIPS BEING ACCEPTED

Applications for nominations for Harry S. Truman Scholarships are currently being accepted by Dr. Donald B. Oster, University of Missouri-Rolla associate professor of history.

To be eligible for possible nomination, students must be full-time juniors, in the upper fourth of their class, of U.S. citizenship or U.S. nationals, and pursuing a degree and career in public service. Applications must be submitted to Oster by Oct. 30, 1992.

Students awarded scholarships will receive up to \$3,000 for their senior year of undergraduate education and as much as \$27,000 for graduate studies.

For further information contact Oster at Room 124 Humanities-Social Sciences Building on the UMR campus or at 341-4817.

Engineering Scholarship Offered

Jefferson City, Mo.(October 8,1992) — The Consulting Engineers Council of Missouri (CECMo) is currently accepting applications for its annual scholarship. CECMo will be offering one \$1,200 cash scholarship. To be eligible, candidates must be U.S. citizens, pursuing a Bachelors Degree at an ABET-accredited college of engineering in Missouri and entering their junior, senior or fifth year in the fall of 1993.

The winner will be selected by panel of distinguished judges based on superior scholastic efforts, civil responsibility, community and college-level achievements, previous work experience, recommendations and writing ability.

"With this scholarship, we often introduce students to the benefits of joining the consulting engineering profession, including creativity and entrepreneurship," said Bruce Wylie, CECMo Executive Director.

CECMo, headquartered in Jefferson City, Missouri, is a state association of almost 100 consulting engineering firms employing over 4,600 and annually designing some \$20 billion in constructed public work and private industry projects. The Council's member representatives are the top management and key principals of Missouri's leading consulting engineering firms.

Financial Aid

The AESF is offering separate scholarships for university or college undergraduates and graduates.

An undergraduate student may apply for any academic year when he or she will be of at least junior standing in a chemistry, chemical engineering, environmental engineering, metallurgy or materials science program where the focus of the curriculum is in surface science subjects.

A graduate student may be eligible for an AESF scholarship award if he or she has completed an accredited undergraduate program in chemistry, chemical engineering, environmental engineering, metallurgy or materials science and is enrolled in a graduate program leading to a master's or Ph. D. degree. Award selections will be based on, but not limited to: career interest in surface finishing technologies, scholarships, achievement, motivation and potential.

Awards are not necessarily based on financial need. Applications must be postmarked by April 15, 1993 in order to be considered for the 1993-94

TYLENOL will award ten \$10,000 scholarships and five hundred \$1,000 scholarships to help educate tomorrow's leader today. To be eligible, students must have been accepted to or will be enrolled at an accredited two or four-year college, university, or vocational school for Fall 1993. Each scholarship will be awarded to a student based on leadership demonstrated in academics, school activities, and/or community activities. Scholarship applications must be postmarked no later than November 15, 1992. For an application form, please contact: TYLENOL Brand Scholarship, Citizen's Scholarship Foundation of America, Inc., 1505 Riverview Rd., P.O. Box 297, St. Peter, MN 56082.

American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc. (ASHRAE) Offers Grant-In-Aid Programs

ASHRAE offers two grant-in-aid programs; one for graduate students and one for students in their final two undergraduate years. ASHRAE will award approximately 12 grants in each category this year.

Noday

Preregistration for the 1993 Winter Semester will be Oct. 26 through Oct. 30. students should obtain their preregistration materials and schedule of classes from the Registrar's office starting Oct. 22th. Detailed information regarding preregistration will be found in the front section of the Winter Schedule of Classes.

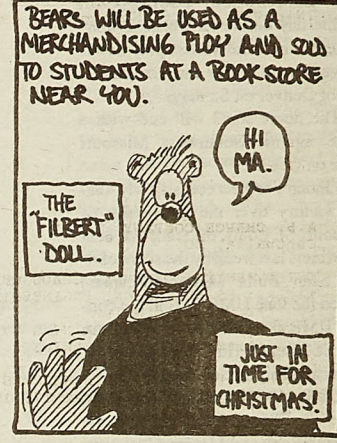

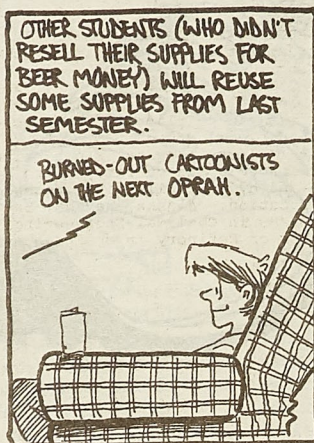

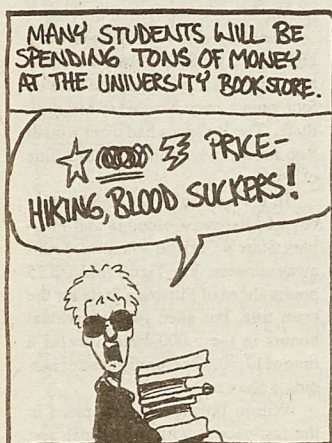

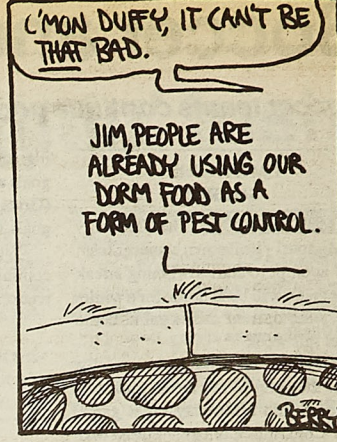

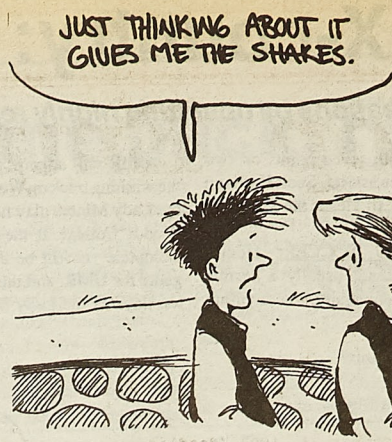

Students receiving Masters' and Bachelors' degrees may purchase their caps and gowns at the UMR Bookstore anytime starting December 9th from 8:30 to 4:00. Masters' and Bachelors' attire do not need to be ordered in advance.

Cap and gown orders for faculty, staff, and PHD students will have a deadline of November 4th and may pick up orders starting December 9th.

We can not guarantee any delivery of cap and

gown orders placed after November 4th. Late fees will be charged after this date.

The UMR Bookstore will be open on Saturday,
