Forgotten MSM-UMR Halloween traditions revisited

Miner Archives
SOURCE

Ed. Note: This story was compiled from various sources, including the Miner archives. We would like to thank former staff writer Kola Agagu, as well as the Rolla Daily News and University Police, who helped Agagu on an earlier story that was used in the compilation of this piece.

Once upon a time, the University of Missouri-Rolla was the Missouri School of Mines. Those were the days when we were the "vandalistic Miners," especially on Halloween. Rolla townsfolks remember the way things used to be around Halloween season in UMR—not always with fondness.

One annual Halloween prank was the ritualistic burning of an outhouse in front of the Dean's Mansion (in the days before Rolla had a Chancellor). Another was the ever-popular soaping of windows; automobile and building alike. Of course, these were not the only pranks.

Many years ago, the University had a spring wagon used for hauling students to and from the Missouri School of Mines. It was a reasonably heavy wagon—much heavier than a typical farm wagon. On Halloween night, Rolla students removed the wagon from the garage where it was stored, disassembled it, and hoisted it to the top of Norwood Hall, where it was reassembled. It took University crews some time to decide on the best method of removing the wagon.

Another Halloween, students setup

tombstones all over the campus—real stones from an Edgar Springs cemetery. The students hauled the stones in pickup trucks and jeeps and timed the movements of the night watchmen so that they could place the stones campus without being caught. Afterwards, the University had to find which cemetery the stones had been borrowed from before they could be removed.

As stated before, a long standing tradition was for students to gather outhouses from the countryside. These were then burned on the lawn of what is now the Chancellor's Mansion. After honoring this tradition for several years, it got to a point where outhouses were almost impossible to find. The November 1 issue of the Rolla Daily News lamented this. "A group of 100 MSM Miners gave lusty cheer as one of the town's few remaining two-holers went up in flame and smoke Halloween night," they wrote. "The Miner moved the Chick Sale bungalow—one of the fast disappearing luxury models—to the corner of 11th and State streets in front of Dean Wilson's home and set it afire."

After the local supply of outhouses ran dry, students decided to build their own. The construction "contract" was rotated among the different organizations from year to year. It was customary for the Dean to come out and give a speech to the students at outhouse burning rituals.

Nobody is certain if one notable prank was accomplished during Halloween or St. Pat's, but it did happen with remarkable engineering ingenuity and precision. It occurred about the time that the building immediately south of the

Uptown theatre was being built. The evening started out innocently enough, with several UMR students enjoying a 7:00 show. The Rolla police passed the corner of 11th and Pine streets as the show was letting out, but didn't notice anything unusual. When they drove by again, twenty minutes later, they found a concrete wall across Pine Street.

During this twenty minute interval, the students leaving the movie had constructed the eight foot wall from sidewalk to sidewalk. It was almost perfectly straight and perfectly plumb. The wall had almost uniform spaces between the blocks, just large enough for a thumb to clear as the blocks were stacked. When the contractors came across the wall the next morning, they said they wished they could hire the students responsible.

A similar prank occurred one winter when students built a snow wall from Mechanical Engineering to Parker Hall. Physical Facilities attempted to knock the wall down, but found it unusually sturdy. The students had reinforced the wall with wires and reinforcing rods, which in turn had frozen solid.

Modern day Miners have been a little less ambitious, with no notable pranks taking place in recent memory. This is in large part due to changes in society's attitude toward these activities. While in the past these were dismissed as fun and games, they are now looked on more seriously. Even the mildest prank, soaping windows, is considered defacing private property, and anyone caught doing so is open to arrest. Another contributing factor is the much larger Rolla police force.

This burning outhouse, a victim of this year's Halloween celebrations, hearkens back to older and less civilized Rolla traditions

Hancock, Moody participate in local forum over Amendment 7

Miner Archives
SOURCE

U.S. Rep. Mel Hancock, the sponsor of Amendment 7, and Jim Moody,

the former state budget director, will discuss the proposed amendment at a Student Council sponsored public forum Wednesday, Nov. 2, at the University of Missouri-Rolla. The forum begins at 7 p.m. in Leach Theatre of Castleman Hall. This forum will be open to the public on a first come, first

serve basis, with about 650 available seats. Doors will open at 6:30.

Mel Hancock sponsored the original Hancock amendment in 1980 when he was a Missouri senator. He is currently representing a southwest Missouri district in Congress. Jim Moody authored one of the major re-

ports to analyze Amendment 7's potential impact on Missouri's economy. Both speakers will be allowed to make twenty minute opening remarks, followed by questions from the audience. The forum will be moderated by Tom Colvin of KTTR.

The forum will be the best oppor-

tunity for Missouri voters to hear both sides of the Amendment 7 debate. The proceedings will be broadcast live by KTTR, KUMR and student radio station KMNR. For more information, contact Student Council President Andrew Sears at (314) 341-4280.

What's Up at UMR

INTERVIEW EVALUATIONS:

If you have had more than three on-campus interviews, be sure to check at the Career Opportunities Center for your evaluations by recruiters. Many students have picked theirs up and have found them very helpful in pointing out both strong and weak areas in their interview skills.

This is a new service for students and recruiters that was started this fall in keeping with the university-wide emphasis on the application of constructive evaluation (TQM or Total Quality Management). Recruiters have the opportunity to evaluate students and students have the opportunity to evaluate the recruiters. Both then receive the evaluations for their own improvement.

GREAT NEW BOOKS TO HELP YOUR JOB SEARCH:

Check out the following great new publications at the Career Resource Library in the Career Opportunities Center. Read them at the COC or take them overnight after 4:15 pm if they can be returned by 8 am the next morning. The COC will feature a new reference at its registration desk -- be sure to look it over ---- it just may

help!

Environment Career Directory: a one-stop guide for a career in preserving the environment; from typical career paths to directories of hundreds of companies and organizations with jobs and internships.

Peterson's Job Opps '95 The Environment: background and information on over 1500 high growth and emerging companies and agencies involved in bioremediation, manufacturing and consulting. Includes contacts and 95 environmental outlook.

Every Women's Essential Job Hunting & Resume Book: winning job search strategies; includes 85 resume samples, interviewing advice and lists hottest careers for women today.

America's Fastest Growing Employers - 2nd edition: key facts about the most rapidly growing companies in the U.S. today; 275 firms included, from high-tech, entrepreneurial start-ups to Fortune 500 giants.

Directory of International Internships: comprehensive guide to internships around the world sponsored by educational institutions, government agencies and private organizations.

1994-95 The Almanac of American Employers: a complete reference to America's 500 largest and most successful firms with over 2500 employees. Includes growth plans and corporate culture.

American Directory of Job and Labor Market Information: easy-to-read directory of federal, state, and city government employment resources nationwide.

Missouri Miner

The **Missouri Miner** is the official publication of the students of the University of Missouri-Rolla. It is distributed each Wednesday afternoon at Rolla, Missouri and features activities of the students of UMR.

All articles, features, photographs, and illustrations published are the property of the **Missouri Miner** and may not be reproduced or published without written permission.

The **Missouri Miner** encourages comments from its readers, and will attempt to print all responsible letters and editorial material received. All submissions must have a name, student ID number, and phone number for verification. Names will be withheld upon request.

Submissions for publication must be in our drop box (first floor of the Norwood Hall, Room 103) by 3:30 p.m. on the Thursday before publication. Submissions, not including personals, will be accepted through E-mail (Internet) at MINER@UMR.EDU. The **Missouri Miner** reserves the right to edit all submissions for style, grammar, punctuation, spelling, length, and matters of good taste.

The **Missouri Miner** is operated by the students of UMR and the opinions expressed in it do not necessarily reflect those of the university, faculty, or student body.

Our new staff for the 1994-1995 year:

Editor-in-Chief Christopher Goo (364-8247)

Managing Editor Jeff Lacavich (341-8436)

Asst. Managing Editor Linda Starbuck

Business Manager Jason Boles (364-8968)

Advertising Director Billy Mittenzwey (364-7970)

Asst. Ads Directors Josh Beudel

..... Jodie Courtin

Circulation Jeff Paskiewicz (341-8141)

News Editor Andrew Dooley (364-1433)

Asst. News Editor Paul Otto (368-4506)

Features Editor Jody Luksich (364-7586)

Asst. Features Editor Laurie Wilman (364-3574)

Sports Editor Brian Fortelka (364-3723)

Understand My Dream

Son of a gun, I had the same dream the other night as some mythical letter writer. My raggedy Revolution War soldier said to me, "I am Joe Reid, your ancestor, who fought in the revolution. I am buried in the cemetery in New Fane, Vermont. When I tried to vote after the war was over, I was denied because I did not own property. My wife couldn't vote because she was a woman. My neighbor who had served in the Continental Army and owned property could not vote because he had a black skin.

My children became sick with tuberculosis, diphtheria, small pox, and polio and some died. Expenditures of tax money by the U.S. Government helped eliminate these scourges so that your children shall have no fear for these diseases.

Until the U.S. Congress acted, several of the states had laws establishing certain religious denominations and fining people for not attending. I refused to attend the established church and I was fined for every Sunday I did not attend. This is not what Ann Hutchenson, the Quakeress hanged on the Boston Common for her religious beliefs died for nor why Roger Williams fled to live with Indians in Rhode Island nor why the Jews fled persecution in Brazil to build their synagogue in Providence.

The chimera complains about having to buy permits to travel. They are normally called airline tickets. He must want a free ride. He is a real Anarchist; he does not want to pay taxes although taxes are the price of civilization. He must not be a student at UMR. If he was a UMR student, with this philosophy, he would insist on paying the full cost of his education, 4 times the current tuition.

This physiological wonder wants to put our money system under the control of South Africa and Russia by reverting to the gold standard. These two countries are the main producers of gold. They would end up owning our industry and business.

Remember what Thomas Reid said, "Some men like to stand erect, while others who are rich and highly placed like to crawl." Do not be cowardly dog! Don't be a gutless wonder! You stood up to oppression before I did! Remember John Hancock! Sign your name so boldly that all people can read it!"

H.P. Leighly, Jr.
Professor

Don't Knock Athletes

As a former varsity athlete, I believe I can see both sides to the issue of athletes receiving special treatment. As such, I feel obligated to respond to the opinion published in the October 25 issue of the Miner. The opinion was clearly against athletes receiving any special treatment and there are key elements of that opinion with which I agree. I, and every coach, will agree that school is the priority of every athlete here. That is the mission of Division II athletics. As for grading penalization, I have never heard of a person being penalized for being an athlete. Furthermore, I have heard of few problems re-scheduling tests or being excused from class for competition. I suspect that very few varsity athletes could disagree with these statements. I also suspect that the original writer who brought forth these accusations did not present us with a full and accurate story.

However, I feel that the writer loses his or her focus and begins to personally attack the athletes. It is easy to say "let's check the facts" and present misleading information when the 95% of the students are not athletes and thus do not know the whole situation. Many of our teams do not have great records, but the fact is that our athletes represent UMR in one of the hardest Division II regions in the nation and do so with a major handicap: we are a technical school. There are very few non-engineers among varsity athletes. The coaches do not recruit a diverse group of individuals. They want, and get, smart, talented, and technically oriented individuals, not Biff Jockstrap.

UMR does not offer a future as a professional athlete, it offers a future in science and engineering. Consequently, our athletes carry a higher GPA than the general student body. Regardless of their major, how may Division I athletes can say the same? Not many.

Perhaps the most disgrunting of all is the lumping of athletics as just another extracurricular activity. It is an insult to the athletes to think that way. There is a major difference between a varsity sport, a club sport, or an extracurricular activity. Water Polo is a perfect example. It is a club sport, not varsity, and it is basically dead at UMR. I haven't heard of an organized practice or tournament in a very long time. Furthermore, I have always heard the members complain that nobody would show up to practice! The state of the Water Polo club illustrates the difference between a varsity sport, a club sport, and extracurricular activity.

That difference is called commitment. Sure, the writer states that he or she has "activities," more than one we are led to believe. Yippee. So do I. How may entail swimming 10,000 yards a day for up to six months? That's what the swimmers do. How many entail running upwards of eighty miles per week, in August? That's what the runners do. And how many entail hours upon hours of drills under the not sun and in the freezing rain? That's what the football players do. Does the writer's "activities" push him or her to the edge? Do they bruise, break and

tear the flesh? In other words, does it take a piece of him to do what he does? And that's just during the season, because it doesn't stop. Division II athletics have advanced to the point that these athletes must continue to train heavily during the off-season just to maintain a competitive level. These athletes have invested an enormous amount of their life just getting to here and they continue to do so. So when you say varsity athletics are just another activity, I say you insult them. You denigrate everything they have done.

And perhaps that is what really irritates me about the writer. There are those few who questions the worth of what our athletes do. They ask, "who care?" I wonder, do they embrace mediocrity? Athletics are not just about chasing a ball, it's really a celebration of life, of purpose. We should celebrate our athlete's achievements. These athletes have set before them a greater good and made a commitment to attaining it. If we look they will show us what commitment means. They will show us the drama of life. They will show that people will stumble, but also that we can pick ourselves up again. They will show us what dignity is. Why does the writer not acknowledge that?

Finally, I will not argue the budget information provided. I'm not qualified to do so, but I suspect our anonymous author isn't either. Somehow I don't think I used \$2200 in goggles during my swimming career!

Michael Holm

More than athletes

At the risk of starting a paper war that will annoy students who read the Miner, I would like to address the letter in last week's issue regarding athletes. It is obvious that the anonymous author of this fabrication had little clue as to what they were writing about. First, rather than digging into the statistical archives, why not look at current UMR teams. We are much better than indicated. Second, the figures referred to as "money allocated to varsity athletes," are misrepresented. This is the amount of money given to the athletic department as a whole. It is used to fund both varsity athletics and the intramural program which hundreds of students are involved in. Finally, it is obvious that the author has no idea what it takes to compete in athletic events at any level, much less at the collegiate level. Put on a pair of spikes sometime, play a sport, then we can talk.

Rather than waste any more time referring to last week's letter, I would like to instead touch on the big picture. As students at UMR, we are all aware of the demands placed on each day. Tests, lab writeups, extensive homework assignments...we all face it. As athletes, however, we spend two or three hours every day in the gym or on the practice field, striving to improve, striving to represent this university to our full capacity. It is only then that we are able to tackle our course work. Don't get me wrong, however, we are not complaining. We chose this uni-

versity for its excellent academic programs in addition to the athletic programs it provides. Our athletic scholarships and facilities are often less than what is provided at other universities. Academics played a large part in drawing us here. If you look at the statistics, we are not a bunch of dumb jocks just trying to get by. We are student athletes who strive to succeed in both the classroom and on the playing field.

Our ability to succeed, however, has been hampered by two obstacles. First is the issue of priority registration. In the past at UMR, and at nearly all other colleges in the country, athletes are allowed to receive priority registration. This simply means that varsity athletes are allowed to register for courses before they become full. Varsity athletes are not so numerous that our registering first will have that great an impact on registration overall. It will, however, have a tremendous impact on UMR athletics. It's hard enough to structure a class schedule which will not conflict with our athletic endeavors, but when we are locked out of classes because they are full, this makes our task nearly impossible.

The second issue is in regard to the common testing procedure. As a student, I understand the benefit of testing outside the class period. As an athlete, however, I find it hard to justify missing a practice or competition for some-

See Athletes page 19

Blind Followers to Split Republicans

The one thing that holds Republicans together is the Republican ideal--limited government. It is loyalty to this ideal which has caused the Republican Party to remain strong and loyal for so many years. Now that loyalty is threatened--not because people no longer believe in that ideal, but because some Republicans such as Congressman Hancock are trying to say that no government is the same thing as limited government. This is what has split the Republican party.

Hancock has proposed Amendment 7, commonly called Hancock II, as a standard tax cut amendment which gives the people more power--sounds like standard Republican philosophy. The Springfield News Leader surveyed all the Republican candidates running for office in Missouri this election and found that more Republican candidates were against Amendment 7 than for it, and the largest majority was undecided. Republican Senator Danforth was so opposed to Amendment 7 that he became co-chair of the committee to defeat the amendment. Even John Ashcroft, has refused to take a stand on this issue. If Amendment 7 is standard Republican philosophy, then why are the majority of Republican leaders against it?

The answer is that they realize that Amendment 7 is not a measure for limited government--it is an attempt to have no government. It is an attempt to have the people vote on everything and has the potential to cut over half the state budget. If this were done, we would have no need for a government because people would vote on everything. The legislature would have so little discretionary money that it would no longer have any control of the state budget. It would have the power to make laws, but not the money to enforce them. Government would not be gone entirely, it would just be powerless.

AIM HIGH

IF THE HIGH COSTS OF COLLEGE HAVE GOT YOU DOWN, AIM HIGH WITH AIR FORCE ROTC.

College costs have never been known to go down.

But efforts to pay for your education can get a big boost with Air Force ROTC. In fact, you may be eligible to compete for a full scholarship that will pay full college tuition, textbooks, fees and \$100 each academic month.

That's just one of the benefits available to those who Aim High. You'll also combine the lessons of leadership with your college degree to begin an outstanding career.

From the day you join the Air Force, the advantages continue to multiply. Upon graduation, you'll wear the gold bars of an Air Force officer – and you'll discover the prestige and respect given to *proven* leaders. And the kind of opportunities available to no other graduate will be open to you.

It's your future, your scholarship, your decision. Choose Air Force ROTC today.

The Life and Times... *Goblins, Inc.*

Author's note: In opinion, Halloween is a week-long event, so it's okay that the actual day is past, right? Good.

BOO!! Did that scare anyone? Didn't think so. Well, maybe this will:

'Twas the night before Spook's Day and all through the school
All the witches and goblins weren't acting quite cool.
They sat and they wiggled while their teachers droned on
About Thermo and Physics and those ionic bonds.
They crossed campus like zombies, the pale, living dead,
But their only true focus was the night that's ahead.
For All Hallow's Eve was their kind of night.
With the tricking and treating and spooking and fright.
They'd climb every porch step, they'd ring every bell.
They'd yell "Trick-or-Treat," and a joke they would tell.
They'd gather their candy, the Snickers, the Mars,
The Skittles, the taffy, the mini-Hershey bars.
But after all that came the real, true fun.

When all witches and goblins would gather as one.
They would meet at the Puck, all holding their tummies
From eating too much, (but hey! it was yummy!)
And just as the last spook sat down in his place
And the full moon would rise and shine down its bright face,
And just as the clouds would gather and form,
And lightning would play 'bout the top of the dorm,
And the bonfire was lit for the 'mal-lows to roast,
Then would appear the Great Rolla Ghost.
He would rise up above the fire and flames.
He would float right along, o'er sires and dames.
And after a moment of silence had passed,
Then would he speak of the future he cast:
"My little ones gathered on All Hallow's Eve:
Listen up well, then; hear and believe.
For this is your future I hold here in my hands."
And with that, he unfurled a scheduling plan.
"If you can't meet requirements by this certain date,

Your grade point will plummet, graduation will wait.
You've prereqs and intros, some not in your major,
To complete before too long: more sooner than later.
See, Tommy here needs to complete his first Phys.
And Calc is still waiting for poor little Liz.
Bob need to pass Thermo --an ominous chore,
As it seems he's already tried three times before.
And Mary must know the shear modulus of steel,
and Jim must learn heat treats, like process anneal.
And Brian needs Chem 1, and 2, 3, and 4.
While Steven, a Chem E., needs all those and more.
See, my dear children, what lies here ahead:
Homework and finals, and the nights of the dead?"
And a shudder ran quickly through the whole gathered crowd,
For the fright in his message rang clear and rang loud.
And as the Great Rolla Ghost, in his St. Pat's bright green,
Floated away, he then whispered,
"Have a swell Halloween."

SUBConscious

Coming Friday November 4 to the UMR Multi-Purpose Bldg., Restless Heart, one of the biggest country acts around today!!!! They are four time Grammy nominees and 1990 Country Music Vocal Group of the Year. Tickets on sale now at the ticket window outside the bookstore. Student tickets are only \$5 (with student ID) and public tickets are \$10. Get your tickets soon!!

The SUB movie this weekend is

Tombstone, one of the year's hottest movies, starring Kurt Russell, Val Kilmer. Tombstone will be shown Friday and Saturday at 7pm and 9pm.

Later this month, SUB is bringing Virtual Reality! It will be here November 15, 11am-4pm, in UCE. Don't miss your free chance to experience the world of virtual reality with the most technologically advanced equipment available.

Students' Concerns Should Be Addressed to the Office of Student Affairs

As busy as life is at UMR, you may not always have the time to pay attention to the world around you. During freshmen and transfer orientation, freshmen engineering and other places, you are told about the variety of services, programs, and offices on campus. However, students usually do not use this information unless they need it. Unfortunately, when you do have a problem or concern, you do not remember to whom to talk get it resolved.

The Office of Student Affairs could be the answer. As student advocates, our office deals with student issues and

concerns and helps resolve student problems. We cannot help solve these problems, though, unless we know what they are. That is where you come in. If you have a concern or issue about something happening on campus, contact the Office of Student Affairs, 106 Norwood Hall, 341-4292, staff@umr.edu. Although all problems or concerns may not be under our control to resolve, we will steer you to the appropriate campus departments or individuals to answer your questions. Come find us when you have a question or concern.

The Miner Review

UMR Students To Present Play

Lu Ann Hampton Laverty Oberlander is the title of this semester's student play, but you don't have to worry about pronouncing the title in order to see it, everyone is invited to come watch (I've been calling it LAHLO since brevity is the soul of wit!). The play is scheduled to open in UMR's Leach Theater on November 10th and play through November 12th.

A Texas Trilogy by Preston Jones, LAHLO consists of three plays about the citizens of a small dead West Texas town somewhere between Abilene and San Angelo. LAHLO is a poignant, revealing and frequently humorous play which portrays the touching and telling trials and tribulations of a girl stagnated in Bradleyville, Texas.

What makes this play so interesting is the fact that it is not a conflict driven play. It instead, focuses on the characters and lets us see how they develop as the story is told.

In Act I, it is the spring of 1953 when we are first introduced to Lu Ann Hampton. Here she appears as a 17 year old high school cheerleader who dreams of escaping to far away places, but instead settles for marriage to a friend of her brothers.

Ten years later, we find Lu Ann divorced and working as a beautician in order to support her young daughter. In this act Lu Ann meets and marries Corky Oberlander only to lose him to a... (You'll have to see the play to find out what happens here!)

In the final act, it is 1973 and Lu Ann is still in Bradleyville with her teenaged daughter, her alcoholic brother, and her disabled mother.

In a moving scene, Lu Ann is visited by her high school sweetheart who has become a successful preacher, and as they review the past, it becomes eloquently clear that Lu Ann's life has come around full circle. Her hopes and dreams have been sacrificed to the realities of everyday life with only her resolute spirit to sustain her.

LAHLO is directed by John Woodfin. John has taught and directed theater since graduating from the University of Missouri in Columbia in 1972. Upon completing his M.A. in theater from Southwest Missouri State University, John came to Rolla to teach speech and theater at Rolla High School. After twenty years in the high school classroom, he has joined the Performing Arts faculty at UMR full-

John Woodfin is Directing

time. John has also directed plays for the Ozarks Actor's Theater, Beacon Hill Theater at College of the Ozarks and enjoys directing the mystery plays to benefit the Rolla Public Library. John Woodfin also enjoys serving on the board of directors for "Arts Rolla", and Prevention Consultants of Missouri.

HAPPY

HALLOWEEN

Here is the cast list:

Lu Ann Hampton - Nancy Sparlin
Claudine Hampton - Amy Voss
Skip Hampton - Jonathan Oliver
Dale Laverty - Kevin Solofra
Corky Oberlander - Shawn Maloney
Billy Bob Wortman - Mark Watson

UMR opinions on campus

When asked what type of entertainment they would like to see come to Rolla these students responded:

Ellen Huggett
Freshman
"Good music, not Restless Heart."

Leslie Monplaisir
Grad. Student
"More rock groups."

David Caraballo
Freshman
"Better advertising of things that come along."

Rich Wasleski
Freshman
"Alternative bands."

Bahai Perspective... *Evolution of the Spirit*

Bahai Source

One of the goals of the Bahai College Club is to familiarize the student body with the basic principles of the Bahai Faith. In our continuing effort toward that end we offer another quote from *Paris Talks*, by Abdu'l-Baha.

This text was written in the early nineteen hundreds but remains pertinent to the issues we deal with today.

EVOLUTION OF THE SPIRIT

"Absolute repose does not exist in nature. All things either make progress or lose ground. Everything moves forward or backward, nothing is without motion. From his birth a man progresses physically until he reaches maturity, then having arrived at the prime of his life, he begins to decline, the strength and powers of his body decrease, and he gradually arrives at the hour of his death. Likewise a plant progresses from the seed to maturity, then its life begins to lessen until it fades and dies. A bird soars to a certain height and having reached the highest possible point in its flight, begins its descent to earth.

Thus it is evident that movement is essential to all existence. All material things progress to a certain point, then begin to decline. This is the law which governs the whole physical creation.

Now let us consider the soul. We have seen that movement is essential to existence; nothing that has life is without motion. All creation, whether of the mineral, vegetable or animal kingdom, is compelled to obey the law of motion; it must either ascend or descend. But with the human soul there is no decline. Its only movement is toward perfection; growth and progress alone constitute the motion of the soul.

Divine perfection is infinite, therefore the progress of the soul is also infinite. From the very birth of a human being the soul progresses, the intellect grows and knowledge increases. When the body dies the soul lives on. All the differing degrees of created physical beings are limited, but the soul is limitless!

In all religions the belief exists that the soul survives the death of the body. Intercessions are sent up for their progress and for the forgiveness of their sins. If the soul perished with the body, all this would have no meaning. Further, if it were not possible for the soul to advance toward perfection after it had been released from the body, of what avail are all these loving prayers of devotion?

The very fact that our spiritual instinct, surely never given in vain, prompts us to pray for the welfare of those, our loved ones, who have passed out of the material world: does it not bear witness to the continuance of their existence?

In the world of spirit there is no retrogression. The world of mortality is a world of contradictions, of opposites; motion being compulsory everything must either go forward or retreat. In the realm of spirit, there is no retreat possible, all movement is bound to be towards a perfect state. 'Progress' is the expression of spirit in the world of matter. The intelligence of man, his reasoning powers, his knowledge, his scientific achievements, all these being manifestations of the spirit, partake of the inevitable law of spiritual progress and are, therefore, of necessity immortal.

My hope for you is that you will progress in the world of spirit, as well as in the world of matter; that your intelligence will develop, your knowledge will augment, and your understanding be widened.

You must press forward, never standing still; avoid stagnation, the first step to a backward movement, to decay.

The whole physical creation is perishable. These material bodies are composed of atoms; when these atoms begin to separate decomposition sets in, then comes what we call death. This composition of atoms, which constitutes the body or mortal element of any created being, is temporary. When the power of attraction, which holds these atoms together, is withdrawn, the body, as such, ceases to exist.

With the soul it is different. The soul is not a combination of elements,

it is not composed of many atoms, it is on one indivisible substance and therefore eternal. It is entirely out of the order of the physical creation; it is immortal!

Scientific philosophy has demonstrated that a simple element ('simple' meaning 'not composed') is indestructible, eternal. The soul not being a composition of elements, is, in character, as a simple element, and therefore cannot cease to exist.

The soul, being of that one indivisible substance, can suffer neither disintegration nor destruction, therefore there is no reason for its coming to an end. All things living show signs of their existence, and it follows that these signs could not of themselves exist if that which they express or to which they testify had no being. A thing which does not exist, can, of course, give no sign of its existence. The manifold signs of the existence of the spirit are forever before us.

The traces of the Spirit of Jesus Christ, the influence of His Divine Teaching, is present with us today, and is everlasting.

A nonexistent thing, it is agreed, cannot be seen by signs. In order to write a man must exist - one who does not exist cannot write. Writing is, in itself a sign of the writer's soul and intelligence. The Sacred Writings (with ever the same Teaching) prove the continuity of the spirit.

Consider the aim of creation: is it possible that all is created to evolve

and develop through countless ages with this small goal in view - a few years of a man's life on earth? Is it not unthinkable that this should be the final aim of existence?

The mineral evolves until it is absorbed in the life of the plant, the plant progresses until it finally loses its life in that of the animal, the animal, in its turn, forming part of the food of man, is absorbed into human life.

Thus man is shown to be the sum of all creation, the superior of all created beings, the goal to which countless ages of existence have progressed.

At the best, man spends four-score years and ten in this world - a short time indeed!

Does man cease to exist when he leaves the body? If his life comes to an end, then all the previous evolution is useless, all has been for nothing! Can one imagine that creation has no greater aim than this?

The soul is eternal, immortal. Materialists say: 'Where is the soul? What is it? We cannot see it, neither can we touch it.'

This is how we must answer them: However much the mineral may progress, it cannot comprehend the vegetable world. Now the lack of comprehension does not prove the non-existence of the plant!

To however great a degree the plant may have evolved, it is unable to understand the animal world; this igno-

Miners Lack Speed In Loss to Mo. Western - Move to .500

Brian Fortelka
Sports Editor

The University of Missouri-Rolla football team entered last weekend in sole possession of third place in the MIAA. The Miners traveled to St. Joseph, MO, to take on Missouri Western. The game was a hard-hitting, teeth-grinding, slugfest between two solid teams. The Miners were perhaps a step behind the speed-oriented Griffon attack. A fourth quarter outburst gave Western a 30-10 victory, and left the Miners with a .500 mark at 4-4-1 overall.

The Missouri Western Griffons broke the scoring drought first with a 32 yard field goal in the 1st quarter. On their next possession, the Griffons mounted up and journeyed 49 yards on 11 plays capped off with a 3 yard touchdown run. The extra point was good, and Western led 10-0.

The second quarter awoke the Miner offense from their zombie-like daze. The Miner O took over on their own 20 yard-line, quarterback Jason Politte hooked up with David Wells on

a 33 yard reception and Chris Williams on a 25 yard strike. Politte then called his own number, and scored on a 9 yard bootleg around the left side. Brandon Risner added the extra point, and the Miners trailed 10-7.

Both teams came up short on any scoring drives in the remainder of the first half and the score remained 10-7 at halftime.

On the Miners initial possession of the second half, kickoff returner David Wells gave the Miners a boost with a 50 yard return. The Miners took over at the Missouri Western 49 yard-line. The Miners drove down to the Griffon 2 yard line but were unable to capitalize, and settled for a 19 yard field goal by Brandon Risner. The kick tied the score at 10 a piece.

From that point on, the Miners went to sleep. Missouri Western took full control of the contest with a 20 point fourth quarter. Three rushing touchdowns were all the punch the Griffons needed to dispose of our Miners.

With the loss, the Miners move to the .500 mark. A 4-4-1 overall mark, and a 3-3-1 confer-

Ryan Shawso

The Miners leading tackler #34 Brian Gilmore and #7 D-Man Darin Nix set their sights in on the opposition. The Miners look to get back on the winning track when Missouri Southern invades Jackling Field this Saturday. Kickoff is set for 1:30pm.

ence record put the Miners in the middle of the pack in the MIAA.

Statistically speaking, the Miners rushed for 74 yards on 32 carries. Jason Wagoner led the Miners with 23 yards on 7 attempts. Jason Politte connected on 16

passes on 36 attempts with a total of 174 yards. Politte accounted for 3 interceptions on the day.

Defensively, the Miners gave up some serious yardage. The Griffons ate up 319 yards on the ground and 145

yards through the air. A total of 464 total offensive yards hurt the Miner defensive ranking. Courtney Porter recorded a sack, Brian Gilmore had an interception, and D-Man Darin Nix led in tackles with 10.

The Miners take on Missouri Southern State College at Jackling Field this Saturday. Kickoff is set for 1:30pm. Come out and support the Miners at their last home game of the season.

The senior members of the team have guaranteed victory over the Lions. It should be an entertaining affair.

Here are the current MIAA standings

NE Mo.	7-0-0
Pitt State	7-0-0
Mo. West.	4-3-0
Cent. Mo.	4-3-0
Mo. South.	4-3-0
MINERS	3-3-1
Emporia St.	3-4-0
SW Bap.	1-5-1
Washburn	1-6-0
NW Mo.	0-7-0

MIAA Game of the Week: Northeast Missouri State at Pittsburg State. This game is for all the marbles in the conference. Both teams look to advance to the Division II playoffs. Pitt State should win.

NFL Roundup - Week #9, Buffalo Scalps Chiefs, San Diego, Dallas Remain AFC, NFC Best

Bryan Schneller
Asst. Sports Editor

Hello once again and welcome to your weekly NFL roundup section of the Miner. Week #9 in the National Football League was one of the best this year with many close games and near upsets. Let's look back at this Sunday's results.

AFC East - The big game in the East was supposed to be the rematch between the Miami Dolphins (6-2) and the New England Patriots (3-5). Instead, it was the most disappointing! The rematch was a far cry from the exhilarating game Miami won 39-35 in week #1. The first '94 meeting produced 74 points and 997 total yards of offense, compared to this contest which produced 26 points and only 524 total yards of offense. Miami which won by the score of 23-3 and retained first place in the East, was led by the running of Bernie Parmalee and his 123 yards rushing and Keith Byars who had eight catches for 77 yards including 2 touchdowns. Miami quarterback Dan Marino threw for 198 yards moving within 150 yards from second place on the all-time list. New England quarterback Drew Bledsoe had several streaks snapped on Sunday. His streak of 12 games with at least one TD pass ended and for the first time this season,

he completed fewer than 20 passes.

AFC Central - In the central there were no interdivisional games. The important games involved division leading Cleveland and second-place Pittsburgh. Cleveland traveled to Mile High Stadium to face Denver. The Browns (6-2) arrived with one of the NFL's elite record, but Sunday, the Broncos (3-5) dumped the AFC Central leaders 26-14. Most of the damage was done by the Denver offense which rolled up 457 total yards. Bronco quarterback John Elway was 30-41 passing for 349 yards and two touchdowns. Coming into this game, the Browns were ranked number one in the AFC in fewest yards allowed. John Elway extended his record as a starter against Cleveland to 10-2. On the bright side for the Browns, Matt Stover, Cleveland's kicker, was 2-2 in field goals giving him the highest percentage in Browns history (65-87). In Arizona, the Pittsburgh Steelers (5-3) could have taken advantage of the Cleveland loss and move into a tie for the lead but the Cardinals (3-5) denied that with a 20-17 overtime victory. This might have been the worst coached game ever. Pittsburgh called to ill-advised timeouts in crucial situations late in the fourth quarter and had to kick a field goal on third down two move the game to OT. Dumb play calling also led to the Steelers doom. In OT, Pittsburgh's Charles Johnson fumbled the opening kickoff. Arizona recovered the ball at the Steeler 35 yard

line which ultimately set up the game winning field goal by Greg Davis.

AFC West - In San Diego, the Chargers (7-1) remained the team with the best record in the NFL with a 35-15 thrashing of the Seattle Seahawks (3-5). The Chargers proved their worth after losing quarterback Stan Humphries with a dislocated left elbow early in the second half. The victory gave the Chargers a two game lead on Kansas City. The stars of this game all belong to San Diego. Natrone means rushed for 104 yards giving him four consecutive 100-yd games. Backup quarterback, Gale Gilbert, filled the void left by Humphries with a 125 yard passing performance and two touchdown tosses while placekicker John Carney kicked two field goals giving him 18 in a row and 22 out of 23 on the season. In Buffalo, the Bills (5-3) demolished the Kansas City Chiefs (5-3) by the score of 44-10. Joe Montana was hurried and harassed all day being sacked three times and throwing an interception. The Chiefs were penalized 10 times for 75 yards, including coach Marty Schottenheimer's 15-yard unsportsmanlike penalty. The Bill's backs, Kenneth Davis and Thurman Thomas, rushed for 83 and 77 yards respectively while Buffalo quarterback Jim Kelly threw 4 touchdown passes. Wide receiver Andre Reed had five catches for 106 yards and two TD's.

NFC East - The Dallas Cowboys (7-1), the best team in pro football,

recorded a 23-20 victory against Cincinnati (0-8), the NFL's worst team, but not without a surprising scare by an unknown third-string Bengal quarterback. The winless Bengals led the two-time defending Super Bowl champion Dallas Cowboys 14-0 in the second quarter on two bombs from third-string quarterback Jeff Blake to rookie wide receiver Darnay Scott. Blake completed 14 of 32 passes for 247 yards and two touchdowns. Dallas wasn't phased buy the surprising Bengal start and steadily pulled to a victory. Emmitt Smith rushed for 92 yards and Alvin Harper and Michael Irvin combined for 197 yards receiving. The Cincinnati special teams, which have given up four TDs this season, gave up two long kickoff returns Sunday--37 yards and 55 yards by Kevin Williams. In Washington, the Redskins (2-7) provided a scare for the Philadelphia Eagles (6-2). The Eagles won 31-29 to stay within a game of first place Dallas in the East. This game was decided in the final seconds by a 30-yard field goal by Eddie Murray with :19 seconds remaining.

NFC Central - In Tampa Bay, the Viking defense made big plays, as usual, to rout the sinking Buccaneers (2-6) by the score of 36-13. Minnesota cornerback Anthony Parker started the rout by intercepting Craig Erickson and running 41 yards for a touchdown. His third touchdown in three weeks, two on interceptions and one on a fumble return, helped the Vikings (6-

2) stay atop the Central. The Vikes' Terry Allen carried 17 times for 113 yards, including a 37-yard TD that gave them a 17-0 lead early in the second quarter. Fuad Reveiz also added five field goals. The Buccaneers have lost 5 of the last 6 and three in a row.

NFC West - This was the Bye week for the West. No results.

Week #9 Top Performances

Rushing
Barry Sanders (146 yds, 26 carries)
Rodney Hampton (138 yds, 30 carr, TD)
Harvey Williams (128 yds, 29 carr, TD)
Bernie Parmalee (123 yds, 25 carries)
Terry Allen (113 yds, 17 carries, TD)
Passing
John Elway (349 yds, 30-41, 2 TDs)
Troy Aikman (272 yds, 20-33, 2 TDs)
Jeff Blake (247 yds, 14-32, 2 TDs)
B.J. Tolliver (226 yds, 19-43, TD)
Mark Rypien (210 yds, 17-30, TD)
Receptions
Herman Moore (9 catches, 106 yd, 2TD)
Rob Moore (9 catches, 99 yds, TD)
Shannon Sharpe (9 catches, 85 yds)
Keith Byars (8 catches, 77 yds, 2TDs)
Eric Metcalf (8 catches, 62 yds)
Glyn Milburn (8 catches, 76 yds, TD)
Leroy Thompson (8 catches, 45 yds)
Receiving Yards
Darnay Scott (155 yds, 4 catches, 2TDs)
Alvin Harper (125 yds, 6 catches, TD)
Herman Moore (106 yd, 9 catches, 2TD)
Andre Reed (105 yds, 5 catches, 2TDs)
Rob Moore (99 yds, 9 catches, TD)

Colorado No Match For Nebraska..I Called It!

Chris Reiter

Sports Staff Writer

Ahhh! It's time to sit back and watch Nebraska go undefeated straight into the Orange Bowl. Why can we (Nebraska fans) sit back and enjoy? Because the Cornhuskers walked all over the Colorado Buffalos. In fact, they stampeped over the Buffalos.

For those who don't read my article each week, I'll catch you up-to-date. Tommie Frazier, Nebraska's quarterback and Heisman hopeful, is out for the season and nobody thought they would be contenders for a Big Eight Championship without him. I did! Also, Colorado's "lucky" wins over Michigan and Texas are the only reasons why the Buffalos are ranked in the Nation's Top Ten.

Now back to the present. Nebraska's defense blew away the Colorado offense, allowing them just 89 total yards in the first half. The Cornhuskers led 17-0 at the half. Brook Berringer, Frazier's replacement, performed as though he was in the hunt for a Heisman. Berringer threw for 142 yards, rushed for 19 yards, and threw one touchdown pass. In the battle of runningbacks,

Colorado's Rashaam Salaam outrushed Nebraska's Lawrence Phillips 134 yards to 86 yards, but that wasn't enough. Nebraska wins the Big Eight Championship with a 24-7 victory over Colorado.

Other pronounced Conference Championships include Penn State and Florida State. Penn State took their AP #1 ranking (my No. 2) and shoved it straight up the Ohio State Buckeye's. Kerry Collins, Penn State's quarterback, remained the Nation's top-rated passer as he passed for 265 yards and two touchdowns. The Nittany Lions handed the Buckeyes their worst defeat in 48 years, 63-14. I guess you could say they were as embarrassed as Husman was on Sunday Morning after his drunken stupor at Greek Sing. *Chancellor Park will see you in his office ASAP.

Florida State put Duke in their place on Saturday as well. The Blue Devils were undefeated at 7-0 going into Tallahassee, but Burt Reynolds was on Florida State's sidelines. Burt might be bankrupt, but being an FSU alumni still has its perks. The Seminoles racked up 620 yards of total offense against Duke, in which case, the Blue Devils didn't even cross the 50-yard line until the third quarter. Duke really was suppose to be a challenge for Florida State. Oh well, another year another bowl game for FSU coach Bobby Bowden. Sorry though, no national title giveaways this year.

As far as other conference matchups went, the Oregon Ducks upset Arizona by the score of 10-9 as the Ducks beat their second straight nationally ranked opponents in as many weeks. Texas Tech, an outside shot for the Cottonbowl, beat Texas 33-9. The Red Raiders recorded their most lopsided victory over the Long Horns since the series began in 1928.

Lastly, my article wouldn't be complete without mentioning Michigan's 31-19 loss to Wisconsin and Notre Dame's 58-21 stomping of the midshipman from the Naval Academy. The Irish travel south to play Florida State November fifth.

Reiter's Top Twenty

1. Nebraska (9-0)
2. Penn State (7-0)
3. Auburn (8-0)
4. Florida (5-1)
5. Alabama (8-0)
6. Miami (6-1)
7. Florida State (6-1)
8. Texas A&M (7-0-1)
9. Utah (8-0)
10. Colorado (7-1)
11. Syracuse (6-1)
12. Washington (6-2)
13. Colorado State (7-1)
14. Virginia (6-2)
15. Arizona (6-2)
16. Kansas State (5-2)
17. Virginia Tech (7-2)
18. North Carolina (6-2)
19. Brigham Young (7-2)
20. Oregon (6-2)

NFL Challenge Week #8

Bryan Schneller

Asst. Sports Editor

This is the Week #8 of the NFL Challenge taking place at the Miner involving some of the sports staff writers.

To refresh the readers or for those of you who don't know what it is, here is how it's played.

There are four players. Each week, before the next week's games are played, the four players make their picks on three games. The three games chosen are categorized into the "Lock of the Week", the "Upset of the Week", and the "Close Call". The "Close Call" is the game in which the spread is the lowest. No Monday Night games shall be chosen, with the exception of Week #8. This is because this article has to be written by Monday afternoon at 3:00. If the pick is correct than that player gets a win (W) and vice-versa. A running record is kept and a point total is calculated. The point breakdown is 2 points for a win, 1 point for a tie, and no points for a loss. The highest point total at the end of the semester wins. First place, second place, and third place shall proceed to eat and drink for

free at one of the fine restaurants in Rolla.

At the half way point, the Hus has a three point lead over Mr. G., while Fort and Hemp fight for the basement. Now I shall give you the results of Week #8 and the picks for Week #9.

NFL Challenge Week #8

Swimming Team Strokes Washington U.

UMR Swimming

News Source

The Miner swimming team made it two wins in a row on Saturday, dispatching Washington University 134-95 at the UMR Pool. The Miners will attempt to continue their early success in the first of two trips to Washington University this season, taking part in the Washington University Relays on Saturday.

UMR was dominant in a meet in which it gave up points due to the lack of a diver. Despite

that, UMR swimmers won seven individual events and the 400-yard medley relay to win the meet handily.

Leading the way for the Miners were two national competitors from last season, Bill Unizicker (Decatur, IL) and Dikan Rendic (Split, Croatia). Unizicker won three events, taking the

1000-freestyle in 10:55.69, the 200-butterfly in 1:59.64 and the 500-freestyle in 5:05.06. Rendic was part of the winning relay team and also took firsts in the 50-freestyle in 22.33 and 100-free in 48.90.

UMR also got victories from Tyler Christensen (Rolla, Mo.) in the 200-

breast-stroke in a time on 2:18.56, and Wade Haggstrom (Zionsville, Ind.) in the 200-individual medley in 2:04.91. Brad Cozad (Bartlesville, Okla.) had a second in the 200-freestyle and was part of two second-place relay teams.

Justin Ferguson

UMR Swimmers enjoyed early season success last Saturday with a victory over Washington University at the UMR Pool.

Booster Club Banquet

The University of Missouri-Rolla Booster Club will host its annual Tip-Off Basketball Banquet Monday, Nov. 14, at Oak Meadow Country Club.

The banquet, held in honor of UMR's men's and women's basketball teams, begins with a reception at 5:30 p.m. Dinner is at 6:30 p.m., followed by the introduction of the 1994-95 Miners and Lady Miners.

Tickets are \$10 and must be purchased in advance from the UMR athletic department, (314) 341-4175; Booster Club president Dave Dearth, director of computing services at UMR, (314) 341-4841; or any member of the UMR Booster Club board of directors.

Attention Graduate Students

The Council of Graduate Students is an officially recognized organization which provides a means of communication between graduate students and the UMR administration, and coordinates activities for graduate students. CGS meetings are held monthly on the first Monday of each month. All graduate students are members of CGS.

The following topics will be addressed at the next meeting:

- The Presentation Graphic Center will be available for use within the next month. The equipment that will be available includes computers (IBM and Mac) with presentation software, slide-maker, and scanner.

- The possible effects of The Hancock Amendment on graduate student appointments, stipends and tuition will also be discussed.

The next meeting will be held on Monday, November 7 in Computer Science 216 at 5:30 pm. All interested graduate students are encouraged to attend.

"Darn these cutbacks!"

Your Real Horoscope

by Ruby Wyner-lo
A.A.B.P.-certified Astrologer

Scorpio: (Oct. 24–Nov. 21) You dream of a gold medal in the slaloms at the Olympics, until your thumbs are cut off by a razor sharp hat.

Sagittarius: (Nov. 22–Dec. 21) If you really want to put Jimmy "Superfly" Snuka out of commission, you'll have to perform a flying leap from the turnbuckle.

Capricorn: (Dec. 22–Jan. 19) You'll be crushed when you realize the love poems from your partner are actually the lyrics to the theme from "Growing Pains."

Aquarius: (Jan. 20–Feb. 18) As an Aquarius, you're always trying to impress. But smugly calling table salt "sodium chloride" only makes you look like a jerk.

Pisces: (Feb. 19–Mar. 20) Orion's starry belt says financial success is in your future, but his sassy Coco Chanel handbag says that circus trash will mock your tattered garments as you leave the soup kitchen.

Aries: (Mar. 21–Apr. 19) Getting a cereal flake shaped like the twelfth district is a sign from the stars to run for alderman.

Taurus: (Apr. 20–May 20) New laws force you to change the name of your little league team from "The Fighting Cherokee Braves" to "The Pink Chiffon Mama's Boys."

Gemini: (May 21–June 21) Romance is in the air for Geminis. Consult the peculiar and fasci-

nating mating habits of the great crested grebe before disrobing.

Cancer: (June 22–July 22) Deft conversational employment of the word "akimbo" nets you quality veal at bargain-basement prices.

Leo: (July 23–Aug. 22) A particularly flavorful cigarette distracts your attention just long enough for a thief to steal your shoes and replace them with cheap wooden ones.

Virgo: (Aug. 23–Sept. 22) Your only weapon in the war against racism is being double-jointed.

Libra: (Sept. 23–Oct. 23) A Libby's fruit cocktail commercial causes your estranged children to reach out to you. Respond only in CB Trucker lingo.

"Y'know, there must be a better way to move this stuff."

THE FAR SIDE

By GARY LARSON

"Well, Mr. President, let's see ... carry the one, take away three, carry the two ... that would be forescore and seven years ago."

To win the tribe's respect, Jed first had to defeat their best thumb-wrestler.

"I can't believe it! ... One lousy little bee gets inside and you just freak out."

"What? No tartar sauce? You'd forget your own head if it wasn't bolted on!"

Text of Amendment 7

Text of the Initiative Petition

BE IT RESOLVED by the People of the State of Missouri that the Constitution of the State of Missouri be amended as follows: Article X, Sections 16 through 19 and 21 through 24 are repealed and in place thereof the following is enacted:

Section 16. Taxes and state spending to be limited - state to support certain local activities - emergency spending and bond payments to be authorized. The provisions of Sections 16 through 25 of this Article are intended to reserve to the citizens of the State of Missouri the authority to vote on the establishment, imposition, increase or expansion of any tax, license or fee and shall be liberally construed in favor of this purpose. Any exceptions shall be strictly construed and must be supported by express provisions of sections 16 through 25 of this Article. Property taxes and other local taxes, licenses or fees shall not be established or increased without direct voter approval. State taxes, licenses, or fees shall not be increased above the limitation specified in section 18(a) without amending this constitution. State taxes, licenses or fees shall not be increased above the limitation in section 18(e) without voter approval prior to implementation. The state is prohibited from requiring any new or expanded activities by counties and other political subdivisions without full state financing, or from shifting the tax burden to counties and other political subdivisions. Provisions for emergency conditions and referenda are established and the repayment of voter approved bonded indebtedness is guaranteed. Implementation of this section is specified in sections 17 through 25, inclusive, of this Article.

Section 17. Definitions. As used in sections 16 through 25 of Article X: (1) "Total State Revenues" includes all general and special revenues, licenses and fees excluding federal funds, as defined in the budget message of the governor for fiscal year 1980 - 1981 and excluding any opening balance or unspent revenue from past fiscal years. Total State Revenues shall exclude the amount of any credits based on actual tax liabilities or the imputed tax components of rental payments, but shall include the amount of any credits not related to actual tax liabilities. (2) "Personal Income of Missouri" is the total income received by or on behalf of residents of the State of Missouri from all sources, as defined and officially reported by the United States Department of Commerce or its successor agency (3) "General Price Index" means the Consumer Price Index for All Urban Consumers for the United States, or its successor publications, as defined and officially reported by the United States Department of Labor, or its successor agency. (4) "Tax", "License", "Fee" and "Increase" shall be given their plain meaning for purposes of sections 16 through 25 of this Article and their meaning shall be broadly construed such that any revenue measure (whether a new tax, license or fee or an increase or broadening of any existing tax, license or fee) shall be subject to the limitations of sections 16 through 25 of this Article. "Tax, license or fee" includes, but is not limited to, User Fees (as defined herein), special assessments, charges, levies, contributions or exactions no matter how denominated monetary penalties imposed by a court for the commission of a felony or misdemeanor shall not be considered a "tax", "license" or "fee". (5) "User Fees" shall mean those charges or fees for goods or services provided by a county or other political subdivision or for the rental of property owned by a county or other political subdivision which are- (i) established by a county or other political subdivision governed by elected officials; and, (ii) charged for those goods and services or rental of public property that are optional, not mandatory, and that the individual person, firm or corporation specifically chooses to purchase or rent in each individual transaction. "User Fees" shall not include a mandatory assessment imposed upon a class of persons. (6) "Broaden" when used in connection with any tax, license or fee shall mean an affirmative act by the state, a county or other political subdivision which causes any property, activity or income, not previously subject to such tax, license or fee to be subject to such tax, license or fee.

Section 18. Limitation on taxes which may be imposed by general assembly - exclusions - refund of excess revenue - adjustments authorized. (a) There is hereby established a limit on the total amount of taxes, licenses and fees which may be established or imposed by the general assembly in any fiscal year Effective the first full fiscal year after adoption of this Amendment and for each fiscal year thereafter, the general assembly shall not establish or impose a tax, license or fee of any kind which, together with all Total State Revenue and all other revenue (including but not limited to revenue generated by any voter approved state-wide law and any revenue generated by a tax, license or fee levied by the state on any private or quasi-public entity), exceeds the revenue limit established in this sub-section. This revenue limit shall be calculated for each fiscal year and shall be equal to the product of the ratio of Total State Revenue in fiscal year 1980 - 1981 divided by the Personal Income of Missouri in calendar year 1979 multiplied by the Personal Income of Missouri for the calendar year most recently completed or for the average of the three most recently completed calendar years, whichever is greater. The revenue limit established in this sub-section 18(a) shall not be exceeded nor revenue subject to this limit excluded from this limit (other than as provided in section 19 of this Article) without amending this constitution. (b) For any fiscal year in the event that the revenue limit established in sub-section (a) of this section is exceeded by one percent or more, the excess revenues shall be refunded pro rata based on the liability reported on the Missouri state income tax (or its successor tax or taxes) annual returns filed following the close of such fiscal year. If the excess is less than one percent, this excess shall be transferred to the general revenue fund. In the event this refund provision is held invalid by any court in a final determination, as an alternate remedy, in the first fiscal year after such excess occurs the Director of Revenue shall reduce state sales tax in an amount equal to the amount of the excess revenues. (c) The revenue limitation established in sub-section (a) of this section shall not apply to ad valorem property taxes imposed or pledged for the payment of principal and interest on bonds, approved by the voters and authorized under the provisions of this constitution. (d) If, as a consequence of constitutional amendment, responsibility for funding a program or programs is transferred from one level of government to another the state revenue and spending limits shall be adjusted to accommodate such change, provided that the total revenue authorized for collection by both state and local governments does not exceed that amount which would have been authorized without such change. (e) In addition to the revenue and spending limits in this Article, the general assembly shall not enact any tax, license or fee that exceeds the limit established by this sub-section (e) without first obtaining voter approval of such tax, license or fee. There is hereby established a limit on the total amount of revenue generated in any fiscal year by new, increased or broadened taxes, licenses or fees which may be established or imposed by the general assembly. Effective the first full fiscal year after adoption of this amendment and for every fiscal year thereafter, the general assembly shall not establish or impose any new, increased or broadened tax, license or fee if the revenue generated by the new, increased or broadened tax, license or fee (in the fiscal year such revenue is generated), together with all other revenue generated by all other new, increased or broadened taxes, licenses or fees, (in the same fiscal year such revenue is generated), exceeds the revenue limit established in this sub-section. This revenue limit shall be calculated for each fiscal year and shall be equal to twenty hundredths of one percent (0.20%) of Total State Revenue during the previous fiscal year. Any tax, license or fee that generates revenue in excess of this limit shall have voter approval prior to implementation. Revenue generated by all such taxes, licenses and fees shall be included in and subject to the revenue limit of sub-section (a) of this section (f). Any new, increased or broadened local tax, license or fee shall have state-wide voter approval if imposed on a state-wide basis and shall have local voter approval if approved or authorized on a local option.

Section 19. Limits may be exceeded, when, how. (a) The state tax, license and fee limitations of section 18 of this Article may be exceeded only if all of the following conditions are met. (1) The governor requests the general assembly to declare an emergency, (2) the request is specific as to the nature of the emergency, the dollar amount of the emergency, and the method by which the emergency will be funded, and (3) the general assembly thereafter declares an emergency in accordance with the specifics of the governor's request by a two-thirds recorded vote of the members elected to and serving in each house. The emergency must be declared in accordance with this section prior to incurring any of the expenses which constitute the emergency request. The revenue limit may be exceeded only during the fiscal year for which the emergency is declared. In no event shall any part of the amount representing a refund under section 18 be the subject of an emergency request. The new or increased tax, license or fee shall only be collected in the fiscal year in which the emergency is declared. (b) The revenue limit of section 18(a) may be exceeded during the first full fiscal year in which a voter approved referendum is effective, provided that the amount by which the revenue limit may be exceeded shall be no greater than the amount of any net increase in state revenue generated by such referendum; and provided that the state revenue limit shall not be exceeded in any subsequent fiscal year as a consequence of such referendum.

Section 21. State support to local government not to be reduced, additional activities and services not to be imposed without full state funding. (a) The state is hereby prohibited from reducing the state financed proportion of the costs of any existing activity or service required of counties and other political subdivisions. A new activity or service or an increase in the level of any activity or service beyond that required by existing law shall not be required by the general assembly or any state agency of counties or other political subdivisions, unless a state appropriation is made and disbursed to pay the county or other political subdivision for any increased costs. "Activity or Service" as used herein includes, but is not limited to, any appropriation of funds by a county or political subdivision which is necessitated by compliance with any statute or regulation adopted by the General Assembly or a state agency. (b) The state shall not mandate that a political subdivision impose or increase any tax, license or fee as a requirement for such political subdivision maintaining its corporate status or existing level of state funding, nor shall any law condition increased apportionments of state aid upon the rate of any tax.

Section 22. Political subdivisions to receive voter approval for increases in taxes and fees - rollbacks may be required - limitation not applicable to certain taxes for bonds. (a) Counties and other political subdivisions are hereby prohibited from establishing, increasing, or levying any tax, license or fee above the current levy or charge, including any current levy that has been reduced pursuant to section 10(c) of this Article, without the approval of the required majority of the qualified voters of the county or other political subdivision voting thereon. If the definition of the base of any existing tax, license or fee, is broadened, the maximum authorized current levy of taxation on the new base in each county or other political subdivision shall be reduced to yield the same estimated gross revenue as on the prior base. If the assessed valuation of property as finally equalized, excluding the value of new construction and improvements, increases by a larger percentage than the increase in the General Price Index from the previous year, the maximum authorized current levy applied thereto in each county or other political subdivision shall be reduced to yield the same gross revenue from existing property, adjusted for changes in the General Price Index, as could have been collected at time existing authorized levy on the prior assessed value. Any rate reduced under this section shall be rounded to the nearest 1/100th of a cent per hundred dollars of assessed valuation. During a year of state-wide reassessment, any tax which is approved by the required majority of qualified voters prior to the mailing of assessment notices shall be subject to the rate reduction required by this sub-section in the first year of its implementation. Any tax, license or fee reduced under this section shall not thereafter be increased unless such increase is approved by the required majority of the voters. (b) The limitations of this section shall not apply to taxes pledged or imposed for the payment of principal and interest on bonds or other evidence of indebtedness or for the payment of assessments on contract obligations in anticipation of which bonds are issued which were lawfully authorized prior to the effective date of this section. (c) Notwithstanding the limitation in section 22(a), the local governing body of any county or other political subdivision may establish and adjust User Fees within the governing body's discretion. This section 22(c) shall apply only to User Fees and not to any other tax, license or fee. (d) The provisions of sections 16 through 25 of this Article shall not limit the authority of a local governing body to set taxes, licenses or fees to meet the requirements of revenue bonds when such bonds have been issued according to law and such obligation entered into prior to the effective date of this Amendment. Taxes, licenses or fees to support revenue bonds lawfully issued prior to the adoption of this provision may continue to be established, increased, or decreased according to the law under which such bonds were issued. Taxes, licenses or fees to support revenue bonds issued after adoption of this provision may be established or increased only with the approval of a majority of the qualified voters of the county or other political subdivision voting thereon, unless the revenue bond issue is approved by such a majority and the ballot proposal submitting the revenue bond measure explicitly states that approval of the measure will authorize the county or other political subdivision to establish or increase taxes, licenses or fees from time to time throughout the lifetime of the improvement or its extensions or replacements, to the extent that the governing body of the county or other political subdivision may determine to be needed to provide sufficient funds to finance operations, maintenance and replacement of the improvement and debt service.

Section 23. Taxpayers may bring actions for interpretations and enforcement of limitations. Notwithstanding other provisions of this constitution or other law, any taxpayer of the state, county or other political subdivision shall have standing to bring suit in a circuit court of proper venue to enforce the provisions of sections 16 through 25, inclusive, of this Article and, if the suit is sustained, shall receive from the applicable unit of government his costs, including reasonable attorneys' fees incurred in maintaining such suit. Injunctive relief, including temporary and preliminary relief, shall be available to enjoin the collection of any tax, license or fee that violates or will violate the provisions of sections 16 through 25 of this Article. Funds collected by a county or other political subdivision while the litigation is pending, allegedly in violation of the provisions of section 22 of this Article, shall be held in escrow pending a final determination of any such litigation. Any funds collected in violation of section 22 of this article will be refunded.

Section 24. Voter approval requirements not exclusive - self-enforceability. (a) The provisions for voter approval contained in sections 16 through 25, of this Article do not abrogate and are in addition to other provisions of the constitution requiring voter approval to incur bonded indebtedness and to authorize certain taxes. (b) The provisions contained in sections 16 through 25, of this Article are self-enforcing; provided, however, that the general assembly may enact laws implementing such provisions which are not inconsistent with the purposes of said sections. (c) Any ballot proposal submitting for voter approval any measure that may directly or indirectly result in any new, increased, or broadened tax, license or fee, including any bond issue, shall clearly and explicitly state that approval of the measure may increase taxes, licenses, or fees.

Section 25. Interpretation and Severability. (a) In the event of a conflict or inconsistency between the provisions of sections 16 through 25, of this article and any other provisions of this constitution, then the provisions of sections 16 through 25, shall control. (b) In the event that any provision within sections 16 through 25 of this article are held by a court in a final determination to be invalid, then the remainder of the provisions within these sections shall remain in effect. Notice: You are advised that the proposed constitutional amendment changes, repeals or specifically modifies by implication or may be construed to change, repeal, or modify by implication, in addition to the provisions of the constitution which are specifically repealed (Article X, 16 through 19 and 21 through 24), the following provisions of the Constitution of Missouri: Art. II, Sec. 1; Art. III, Sec. 3; Art. III, Sec. 7; Art. III, Sec. 37(d); Art. III, Sec. 37(e); Art. III, Sec. 38(b); Art. III, Sec. 39(b); Art. III, Sec. 39(c); Art. III, Sec. 46; Art. III, Sec. 46(a); Art. III, Sec. 47; Art. III, Sec. 48; Art. III, Sec. 51; Art. IV, Sec. 15; Art. IV, Sec. 22; Art. IV, Sec. 23; Art. IV, Sec. 24; Art. IV, Sec. 27; Art. IV, Sec. 28; Art. IV, Sec. 30; Art. IV, Sec. 43; Art. IV, Sec. 47(a); Art. IV, Sec. 47(c); Art. V, Sec. 3; Art. VI, Sec. 11; Art. VI, Sec. 12; Art. VI, Sec. 18(c); Art. VI, Sec. 18(d); Art. VI, Sec. 19; Art. VI, Sec. 25; Art. VI, Sec. 26(f); Art. IX, Sec. 1; Art. IX, Sec. 2; Art. X, Sec. 1; Art. X, Sec. 3; Art. X, Sec. 4(a); Art. X, Sec. 4(d); Art. X, Sec. 10(a); Art. X, Sec. 10(b); Art. X, Sec. 10(c); Art. X, Sec. 11(a); Art. X, Sec. 11(b); Art. X, Sec. 11(c); Art. X, Sec. 11(d); Art. X, Sec. 11(e); Art. X, Sec. 11(f); Art. X, Sec. 12(a); Art. X, Sec. 12(b).

Mr. Dave Dealy
VP of Operations for the Santa Fe Railway Co.

will be speaking on the topic of

"PUTTING QUALITY ON THE FAST TRACK"

Mr. Dealy has worked in the transportation industry all his life. He has been with the ATSF Railway Co. for two years, since leaving his previous position as VP-Operations for Union Pacific Railroad. He will be discussing the role of quality in American industry and how to make it both workable and profitable.

The Santa Fe is the 7th largest class-one railway. Its operations center is based in Schaumburg, IL, and contains one of the only two central dispatching centers in the world.

Lady Miners End Season Strong

Angela Passainse
Staff Writer

The UMR Lady Miners Soccer Teams ended their successful season this past Saturday with another win. Their final record is 12-6-2 tying the most wins set back in 1985. This past week the team carried a record of 1-1-1.

On Wednesday the Lady Miners traveled to St. Louis to battle Washington University. A tie was drawn because the team did not play to their ability. The Lady Miners had the opportunity to move ahead but missed their chances. Defensively, Zac Thompson, Cathy Vomberg, Stephanie Ingalls, Carrie Eyerkuess, and Rachel Lewis kept Washington University scoreless.

The following day the Lady Miners faced top ranked Lewis University. Despite the change in line-up the team could not hold off the attack of Lewis. At halftime UMR was down by one goal and was scoreless. In the second half, Lewis dominated offensively

defeating UMR by the score of 2-0.

On Saturday the Lady Miners smacked William Woods with a 3-1 win. The team played excellent increasing the total goals scored for the season to 68 and tying their win record

crossed the ball in front of the mouth of the goal and Natalie Sanders put it away for the second goal of the game. With approximately seven minutes left in the game Chrissie Eckhoff chipped the ball over the defensive line to

Amber Fischer. Amber used her dribbling expertise and scored the final goal of the game. Kate Masterman had an outstanding offensive performance. Natalie Sanders, Chrissie Eckhoff, and Amber Fischer also worked offensively to relieve pressure from the defense. The entire defensive line played excellent. This includes: Rachel Lewis with her great saves, Kelly Rau with her defensive aggression, Stephanie Ingalls and Zac Thompson with their excellent ball control, and Tammi Bowman after a severe injury.

Congratulations to the 1994 Lady Miner Soccer Team. The team is young and UMR can expect good things to develop in the years to come. Coach Swanbeck was pleasantly happy with the outcome of the season. The Lady Miners appreciate all the fan support this year and hope to see everyone again next year.

Ryan Shawso

The Lady Miners closed out the 1994 campaign in fine fashion. Lady Miner Chrissie Eckhoff looks to pass during a game earlier this season.

if 12. Midway in the first half Natalie Sanders put the ball over the hands of the goalie after the pass by Kate Masterman. At halftime UMR was in the lead by a lone goal. In the second half, William Woods rallied tying up the score. However, within the next 10 minutes Kate Masterman

Tens of thousands of people will need blood during the holidays.

Still wondering what to give?

Student Professional Awareness Conference To Be Held

The University of Missouri-Rolla IEEE (Institute of Electrical and Electronics Engineers) student branch will be hosting an S-PAC on the UMR campus on November 11. An S-PAC is a non-technical conference with topics that explore professional development. The conference is not just for electrical engineers and is open to the entire campus. In fact, the conference is a multi-campus event with participants from UMC and Washington University.

Experienced, practicing engineers who are familiar with engineers' professional concerns will present issues concerning most technical students. The first speaker, Dr. Aaron Collins, Atlanta, GA, will discuss "Profes-

sional Development Through Advanced Degrees." Dr. Collins will present the pros and cons of whether or not to pursue an advanced degree. The question of continuing school immediately after graduation or after gaining some work experience will be considered. Next, Michael Andrews, Scottsdale, AZ, will discuss a topic on the minds of many seniors, "Job Search Skills." Finally, Lorry Bannes, St. Louis, MO, will talk about a timely issue, "Engineering Ethics." Find out how ethics factor into the day-to-day activities of an engineer.

Students will also have the opportunity to ask the speakers questions. There will be a break between the second and third speakers with refreshments. An optional dinner will follow the conference. Speaking at the dinner will be Dr. E. Keith Stanek, EE Department Chair, the topic will be, "Maintaining Technical and Profes-

sional Awareness as a Practicing Engineer."

The conference has been planned entirely by students, for students. To register for the conference and/or the dinner send your name, phone number and \$3 (conference), \$6.50 (dinner) to IEEE/S-PAC, EE Building, via campus mail. For more information contact Liana Land at 341-6534 or e-mail lianal@umr.edu.

When/Where?

Friday November 11, 1994

Centennial Hall, University Center-East

Conference: 2:00p.m. to approximately 5:15

Dinner (optional): 5:30p.m. to 7:00p.m.

Bahai

rance is no proof that the animal does not exist!

The animal, be he never so highly developed, cannot imagine the intelligence of man, neither can he realize the nature of his soul. But, again, this does not prove that man is without intellect, or without soul. It only demonstrates this, that one form of existence is incapable of comprehending a form superior to itself.

This flower may be conscious of such a being as man, but the fact of its ignorance does not prevent the existence of humanity.

In the same way, if the materialists do not believe in the existence of the soul, their unbelief does not prove that there is no such real, as the world of spirit. The very existence of man's intelligence proves his immortality; moreover, darkness proves the presence of light, for without light there would be no shadow. Poverty proves the existence of riches, for without riches, how could we measure poverty? Ignorance proves that knowledge exists, for without knowledge how could there be ignorance?

Therefore the idea of mortality presupposes the existence of immortality for if there were no Life Eternal there would be no way of measuring the life of this world!

If the spirit were not immortal, how could the Manifestations of God en-

dure such terrible trials?

Why did Christ suffer the fearful death on the cross? Why did Muhammad bear persecutions?

Why did the Bab make the supreme sacrifice and why did Baha'u'llah pass the years of his life in prison?

Why should all this suffering have been, if not to prove the everlasting life of the spirit?

Christ suffered, He accepted all His trials because of the immortality of His spirit. If a man reflects he will understand the spiritual significance of the law of progress; how all moves from the inferior to the superior degree.

It is only a man without intelligence who, after considering these things, can imagine that the great scheme of creation should suddenly cease to progress, that evolution should come to such an inadequate end!

Materialists who reason in this way, and contend that we are unable to see the world of the spirit, or to perceive the blessings of God, are surly like the animals who have no understanding; having eyes they see not, ears they have but do not hear. And this lack of sight and hearing is a proof of nothing but their own inferiority; of whom we read in the Qur'an, "They are men who are blind and deaf to the Spirit". They do not use that great gift of God, the power of understanding, by which they might see with the eyes of the

spirit, hear with spiritual ears and also comprehend with a Divinely enlightened heart.

The inability of the materialistic mind to grasp the idea of the Life Eternal is no proof of the nonexistence of that life.

The comprehension of that other life depends on our spiritual birth!

My prayer for you is that your spiritual faculties and aspirations may daily increase, and that you will never allow the material senses to veil from your eyes the glories of the Heavenly Illumination."

The UMR Bahai College Club welcomes all inquiries, please direct your communications to **Kang Le 341-1571, Maureen Sidio-Hall 364-6131, or Bill or Lynn Whities 364-2740**, drop a note to the Bahai College Club, University Center West, via campus mail or attend one of the following Bahai Club functions: Regular Sunday classes for children and adults 10:30 AM, University Center West RM 2-1 (the Walnut Room). Personals

Cathy,
I forgive your artistic ability. You are awesome.
Thanks!

Lico,
ybs

Marites,
It's official! You are the best!
Lico,
Daisie

Erin,
Got any more paper?

Happiness is an unexpected smile that you've come to enjoy.

Jeph,
Great times....given any thought to being a DJ?
Oh, wait you have! Um...I have an idea...Let's play ultimate!

#10...When is #11 planned? I enjoy them at 2 a.m., too!

Hey Erin. What do you mean that you're too busy?

Jennifer,
Can I get some sunshine in Wal-Mart at 1:30 in the morning? We already go the modern. Keep smiling too!

Christy H.,
Is he babbling again?

Milk...it does a body good...especially on 1N!

STEVE GORK,
Happy 21st birthday!
Love,
Stephanie

Marion,
Want some candy little girl?
the same a*hole that
visits at 4:30 a.m.

Laura G.,
Hey you are a great little sis!
Lico,
ybs

Mandy,
Feeling lonely?
dawg

BB,
A moment of silence for the general.

Famhand,
Make sure you bring some stew with you!
dawg

Jody,
A personal that was on voice mail.
B

Eggo,
Wasn't swinging birches Tuesday morning fun?

Hey Becky,
Would you kick him out of your--house?

Dear Roomie,
I kill you. I kill you bad. I kill you two--no, I kill you three times.
AOT,
Grammar Girl

Chi Omega football is awesome!

Craig & Steve,
Thanks for putting up with all of us during our season. You guys are great!! Thanks again!!!!
Lico,
the football players

Karlryn,
You are the greatest. Thanks for making me smile.
Love,
Kasie

Leia,
You are the sweetest cutest most fun, big sis ever! I love you!
Kasie

WAHOO KAY-DEE!!!!

Shaw,
Got some MD 20/20 waiting for you! NOT.

VH,
Had any good dreams/phone conversations at 1:30 a.m.?
The a*hole on the phone

Widget,
Gee, if only I had the opportunity to answer that for you...

Chi-O Football Team,
Thanks for the great season. Good luck next year.
Coach

Jen & Deanna,
Sack-o-rama in the backfield. Defense running wild. GREAT JOB!!
Coach

Team Chi-O,
The TALL grass looks DRY.
Coach

The green is here!

Looking for the opportunity to become a professional in a demanding profession? If so, the Industrial Hygiene Graduate Fellowship Program is for you.

Sponsored by the U.S. Department of Energy (DOE), Office of Health, Industrial Hygiene Programs Division, the fellowship program is accepting applications for the academic year beginning September 1995. The deadline for applications is Jan. 31, 1995.

The need to ensure healthful conditions in the workplace for employees has created an unprecedented demand for industrial hygienists who anticipate, recognize, evaluate, and control those environmental factors or stressors arising in or from the workplace that may cause sickness, impaired health, significant discomfort, or inefficiency among workers.

The primary goal of the fellowship program is to increase the number of industrial hygienists at the master's degree level to help ensure healthful working conditions for employees of DOE laboratories and facilities throughout the United States. Other program goals include increasing the visibility of industrial hygiene as a career option, strengthening the industrial hygiene profession, and strengthening ties between DOE and the academic community.

Administered by the Oak Ridge Institute for Science and Education (ORISE), appointments in the Industrial Hygiene Graduate Fellowship Program are for 24 months. Fellows are required, however, to submit a renewal application at the end of the first 12 months. The program pays an annual stipend of \$15,600 in 12 monthly payments of \$1,300, an academic allowance of \$1,500 annually, and full tuition and fees.

Participation in a three-month practicum, a practical, hands-on work experience, at a DOE-designated

facility is required. Transportation expenses to and from the practicum site are reimbursed and a dislocation allowance of \$400 per month is paid.

The program is open to U.S. citizens who hold the baccalaureate degree and who have not completed more than one academic year of graduate studies by the effective date of the fellowship appointment.

For application materials or additional information on policies, procedures, and guidelines under which the program operates, please contact: Mary Kinney, Industrial Hygiene Graduate Fellowship Program, Science/Engineering Education Division, Oak Ridge Institute for Science and Education, 120 Badger Avenue, P.O. Box 117, Oak Ridge, Tenn., 37831-0117; telephone: (615) 576-9655.

The Oak Ridge Institute for Science and Education (ORISE) was established by the U.S. Department of Energy to undertake national and international programs in science and engineering education, training and management systems, energy and environment systems, and medical sciences. ORISE and its programs are operated by Oak Ridge Associated Universities (ORAU) through a management and operating contract with the U.S. Department of Energy. Established in 1946, ORAU is a multiuniversity consortium.

The Missouri Beta (UME) Chapter of the Tau Beta Pi Association, a national engineering honor society is currently accepting applications for its spring scholarships. These scholarships are awarded to students who have demonstrated outstanding potential during their freshman year in the field of engineering. Applicants should be currently enrolled at UMR, be a full-time undergraduate engineering student (including Engineering Management and Engineering Mechanics), have completed between 30 and 59 credit hours, and have a minimum 3.5 cumulative GPA. Forms are available at the Financial Aid Office. The deadline to return the forms is Tuesday, November 22, 1994.

THE AIR FORCE IS STILL HIRING and has 2 and 3 year scholarships available through the Air Force Reserve Officer Training Corps (AFROTC) for qualified college students in selected engineering, science, and nontechnical majors. Scholarships cover most tuition and laboratory, textbook, and incidental fees plus a \$100 monthly allowance. If you are a freshman, sophomore, or junior and are interested in scholarship opportunities, please contact AFROTC in Harris Hall, room 206 or call 341-6541.

Meramec Area Legal Aid Corporation (Legal Aid) will begin serving clients in a new area of the law. Legal Aid will provide an attorney free of charge to eligible clients for simple estate planning. Clients can

now receive help with planning for the future.

Services to be provided include simple wills, powers of attorney, beneficiary deeds and documents known as "Living Wills". Legal Aid serves clients in a 12-county area of South Central Missouri. Persons who are requesting legal assistance in the area of simple estate planning or other areas may call 341-3655 or 1-800-999-0249 to apply for free legal services.

Students considering the continuation of their educational careers should look to the U.S. Department of Energy (DOE) for a helpful hand. Tens of thousands of dollars are available for students interested in pursuing master's or doctoral degrees in such areas as nuclear engineering fusion energy, applied health physics, radioactive waste management, and industrial hygiene.

Graduate fellowship programs sponsored by DOE and administered by the Oak Ridge Institute for Science and Education provide full payment of tuition and fees, monthly stipends, and the opportunity to gain practical experience at DOE laboratory. Awards vary depending on the specific program and the degree being pursued.

All programs require the submission of a fellowship application and completion of the Graduate Record Examination (GRE). Students must have received their undergraduate degrees in a science or engineering discipline by August 1995.

Selection is based on academic performance, recommendations, and a statement of career goals by the applicant.

Fellowship applications are being taken through Jan. 31, 1995, and awards will be announced in April 1995. For applications or additional information, contact Sandra Johnson or Marcia DeMarcus, ORISE Fellowship Programs, Oak Ridge Institute for Science and Education, Science/Engineering Education Division, P.O. Box 117, Oak Ridge, Tenn., 37831-0117, or call 1-800-569-7749. FAX-on-demand can be utilized by simply dialing (615) 483-7652 from any touch-tone phone. A recording will guide you through the call and will ask you to input your fax number. A copy of the specific program description/application form or program flier you requested will automatically be faxed to you.

The Oak Ridge Institute for Science and Education (ORISE) was established by the U.S. Department of Energy to undertake national and international programs in science and engineering education, training and management systems, energy and environment systems, and medical sciences. ORISE and its programs are operated by Oak Ridge Associated Universities (ORAU) through a management and operating contract with the U.S. Department of Energy. Estab-

lished in 1946, ORAU is a consortium of 82 colleges and universities.

ANNUAL COMPETITION FOR FULLBRIGHT GRANTS OPENS

The United States Information Agency (USIA), the J. William Fulbright Foreign Scholarship Board (BFS) and the Institute of International Education (IIE) announce the May 1, 1994 official opening of the 1995-96 competition for Fulbright Grants for graduate study or research abroad in academic fields and for professional training in the creative and performing arts.

The purpose of these grants is to increase mutual understanding between the people of the United States and other countries. They are funded under the Mutual Educational and Cultural Exchange Act of 1961 through an annual appropriation made by Congress to USIA. Participating governments and host institutions in many countries also contribute. The BFS, composed of 12 educational and public leaders appointed by the President of the United States, establishes criteria for the selection of candidates and has the final authority for the awarding of grants.

For all grants, applicants must be U.S. citizens and hold a bachelor's degree or its equivalent by the beginning date of the grant. Creative and performing artists are not required to have a bachelor's degree, but they must have four years of relevant training or study. Candidates in medicine must have an M.D. or equivalent at the time of application.

All applicants are required to have sufficient proficiency in the language of the host country to carry out their proposed study or research.

Fulbright Full grants provide round trip international travel, maintenance for the tenure of the grant, a research allowance, and tuition waivers if applicable. Fulbright Travel Grants provide round trip travel to the country where the student will pursue study or research and are intended to supplement maintenance awards from other sources that do not provide funds for travel.

All grants include basic health and accident insurance.

Complete program and application information is contained in the brochure, "Fulbright and other grant's for graduate study or research abroad, 1995-96." Students currently enrolled in a college or university should contact their on-campus Fulbright Program Advisor for brochures, application forms, and further information.

RURAL MISSOURI, INC.

If you have been employed as a farmworker in the past two years, you may be eligible to receive free tuition assistance for your education.

If you have worked as a farm, orchard, greenhouse or poultry/egg production employee, you may qualify. To obtain details and the field representative closest to

you call 1-800-234-4972.

The University of Missouri-Rolla chapter of Phi Kappa Phi National Honor Society invites outstanding UMR seniors to apply for fellowships worth up to \$7000 for first year graduate or professional study.

Phi Kappa Phi will award 50 fellowships nationwide and 30 additional honorable mention awards of \$1000. The awards will be based on scholastic achievement, standardized test scores, honors and enrichment programs, campus and community leadership activities, study and career goals, and faculty evaluations.

Graduating UMR seniors with superior academic and leadership records should contact Phi Kappa Phi representative Jerry Bayless at Room 101 Engineering Research Laboratory, 341-4151, for additional information and for application forms. The deadline to submit applications is Feb. 1.

Phi Kappa Phi, founded in 1897, has more than 250 chapters at universities and colleges throughout the nation. It is the only major national scholastic honor society that recognizes academic excellence in all disciplines.

MSPE ST. LOUIS CHAPTER AUXILIARY SCHOLARSHIP

The Missouri Society of Professional Engineers, St. Louis Chapter Auxiliary, is pleased to announce that they will once again be awarding six (6) \$1500.00 scholarships to aspiring engineering students for the 1995-96 school year.

REQUIREMENTS

- Be a junior or senior engineering student in the 1996-97 Fall semester attending a Missouri Engineering College or University.
- Have good scholastic achievement
- Reside (both student & parents) in the Metropolitan St. Louis area in include the counties of St. Louis, Jefferson, Franklin, St. Charles, Lincoln, and Warren.
- Have a financial need.
- Be a citizen (a green card will not qualify).

FORMER RECIPIENTS ARE ALSO WELCOME TO APPLY AGAIN.

Applicant must attach copy of their transcript of grades and credits.

AND PERSONAL RECOMMENDATION BY THE DEAN, FACULTY MEMBER OR A COUNSELOR FROM THE SCHOOL OF ENGINEERING BY IN-CLUDED.

Applications available in the Student Financial Aid Office, G-1 Parker Hall.

DEADLINE RETURN TO MSPE BY DECEMBER 3, 1994.

thing which could just as easily be later
in they day. What we suggest is a win-
dow of time in the afternoon, which is
reserved solely for extra-curricular ac-
tivities. This can include athletic prac-
tices, organizational meetings, etc.
This will provide the balance we are all
looking for, the ability to succeed in
both athletics and academics.

Finally, we realize that a large num-
ber of students at UMR support our
programs. For that we thank you. For
those students who doubt the benefit of
athletics, consider the following. Ev-
ery time a UMR team competes, our
university receives publicity in major
newspapers, on the radio and on televi-
sion. Just looking at this year's sched-

ules, UMR teams will compete in Mis-
souri, Kansas, Illinois, Indiana, Michi-
gan, Arizona, Kentucky, Florida, and
Mississippi, just to name a few states.
It is this publicity and name recogni-
tion that draws many students to Rolla.
It seems that supporting athletics is a
small price to pay when compared to
the end result.

Although I have only been able to
touch on a few key topics, I hope that
students will have more of a feel for
what we, as student athletes are all
about. I also hope that you will support
us both in regard to the mentioned
issues and on the playing field.

Kristan King, Team Captain
UMR Softball

If so many Republicans
are against Amendment 7,
then who is for it? The an-
swer is Libertarians. Amend-
ment 7 falls right in line with
the Libertarian belief that
there should be no govern-
ment. When Jim Moody, a
former state budget director
under Governor Ashcroft,
published the Moody Report
stating the economic impact
of Amendment 7, who did
Hancock turn to for support?
It was not the Republicans. It
was a Libertarian think tank

called the Cato Group.

This group published the
Cato Report to counter the
Moody Report. This Cato
Group is also well known for
its advocacy in favor of the
legalization of drugs. Does
this sound like standard Re-
publican philosophy? Since
when do Republicans turn to
groups like this for support?

Don't be deceived. Lim-
ited government is the banner
of the Republican Party, but
no government is the banner
of the Libertarian Party. This

is why so many Republicans
have refused to support
Amendment 7--it is not a Re-
publican amendment but a
Libertarian movement. The
fact that so many Republi-
cans are against Amendment
7 is not a sign of disloyalty to
the party, but a sign of loyalty
to the Republican belief.
Those who believe in the Re-
publican ideology should
think carefully before voting
for a Libertarian measure like
Amendment 7.
