Blood Bank gets a shot in the arm

Douglas Sobery
News Editor

In the wake of the disaster in Oklahoma, students turned out in record numbers last Wednesday and Thursday to offer the precious gift of life to the American Red Cross. Sponsored by Student Council, the blood drive collected nearly 300 units of

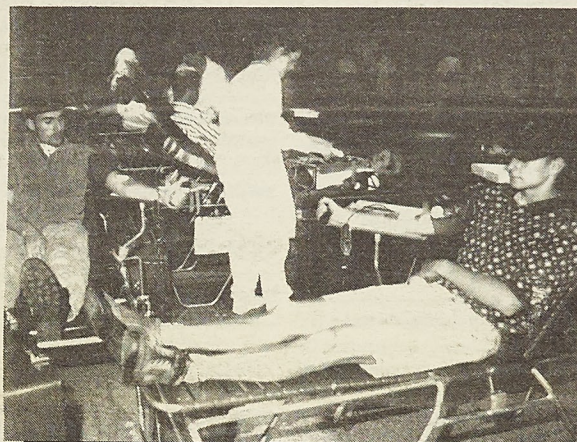

blood over the two day period, the highest total on record for a Student Council blood drive.

Turnout at this month's drive grew steadily over the two day period and by late Thursday afternoon so many people had donated blood that the Red Cross ran out of blood bags. Since workers were unable to locate more bags locally, the drive ended thirty minutes early and some donors were turned away.

One of the reasons for the record turnout is the recent disaster in Okla-

homa City. "I heard several people say they heard on the news that blood donations were needed," said Tom O'Neil, head of the Student Council Community Relations Committee. "Although our drives don't usually supply that area," he continued, "different blood regions work together in crises to meet the demand."

All those involved with the drive felt it was a complete success, but O'Neil hopes the next one, scheduled for September 5, 6, and 7, will be even bigger.

Students donated blood in record numbers last week to donate blood to the American Red Cross.

Scholarship created for future teachers

News Services
Source

The University of Missouri-Rolla College of Arts and Sciences recently established a new scholarship program for students interested in becoming teachers.

The Dr. Stephen A. Douglass Teacher Education Scholarship was established to commemorate Douglass, UMR's education director and an adjunct professor emeritus of education.

Douglass, who has been with UMR for more than 28 years, was instrumental in developing a cooperative teacher education program between UMR and the University of Missouri-Columbia. He has directed that program for more than 20 years.

Students who have completed 75 hours of college credit with at least eight hours of education

courses are eligible for the scholarship. The students also must have a grade-point average of 3.0 or above and a minimum ACT score of 22. They also must have attended Missouri public schools continuously from kindergarten through high school graduation.

Douglass has been teaching at UMR for more than 28 years. He earned his bachelor's and master's degrees in education and his education doctorate from the University of Missouri-Columbia.

Prior to joining UMR, he taught in the West Plains, Mo., public schools for 17 years and was director of the South Central Vocational-Technical School in West Plains.

To apply for the scholarship, contact UMR's student financial aid office, Room G-1 Parker Hall, or call the financial aid office at (314) 341-4282.

To donate to the scholarship fund, contact Laura Powell at 211 Castleman Hall at UMR or by calling (314) 341-6090.

UM-Rolla picks on competition in national mining contest

News Services
Source

For the second straight year, University of Missouri-Rolla students have taken top honors in a national

old-fashioned mining competition.

The UMR women's mining team and one of two UMR men's mining teams won first place in the 17th Annual Intercollegiate Mining Competition held April 13-15 at the UMR Experimental Mine south of Rolla. The other UMR men's team won fourth place in the competition.

The competition gives modern-

day mining engineering students a chance to try their hands at old-fashioned mining techniques, such as panning for gold, steel-driving, "jackleg" drilling through rock, and building and tearing down railroad tracks. The five- and six-person teams are judged based on speed, a

Bomb blast rocks Oklahoma City

Mike Madden
Staff Writer

Every year terrorists bomb strategic areas such as New York City, Tokyo, and London. For the most part, the rural midwestern U.S.A. is exempt from the destruction often poured out on metropo-

lises around the world. But this was not true on the serene, calm morning of Wednesday, April 19, 1995.

As government officials reported for work and parents left their children in the hands of day care officials in Oklahoma City, they had no idea that this normal, mundane morning would soon turn apocalyptic and tragic. At approximately 9:04, a van loaded with 1,000 to 1,200 pounds of ammonium nitrate and fuel exploded in front of

the nine story Alfred P. Murrah Federal Building that houses several government agencies and a federally sponsored children's day care center. The enormous blast dug a crater 8 feet deep and thirty feet wide where the van once stood. Within seconds of detonation, the explosion defaced the entire north side of the building: as the bottom floors were removed, the rest of the

Financial Aid

ROLLA AREA (PHELPS COUNTY) NAACP OFFERS FOUR \$600 "YES I CAN" GRANT AWARDS FOR THE 1995-96 ACADEMIC YEAR

ELIGIBILITY REQUIREMENTS

- *African-American
- *Demonstrated financial need
- *U.S. Citizen
- *Admitted to, or attending UMR during the period of the grant
- *Current UMR students who have a 2.0 semester and cumulative GPA and in good standing

*Member of the Rolla Area (Phelps County) NAACP Branch, if currently attending UMR.

*High school students admitted to UMR for Fall semester are eligible to apply.

Applications available in the Student Financial Aid Office, G-1 Parker Hall.

Application deadline is: May 1, 1995.

THE MID-WEST CONCRETE INDUSTRY BOARD, INC

The MCIB Educational Fund was established to provide financial aid to college engineering students pursuing a Bachelor of Science or higher degree that includes concrete and concrete design courses as an integral part of their degree program.

REQUIREMENTS:

- * Applicants permanent residence as indicated on college records or the high school or record must be with the states of Kansas or Missouri and either (a) within a 150-mile radius from a point on the Kansas/Missouri state line at highway I-35; or (b) within a 25 mile radius of the main U.S. Post Office at the mailing address of a current MCIB member.
- * Applicant must be pursuing a Bachelor of Science or higher degree that includes concrete and concrete design courses as an integral part of their degree program at an accredited college or university.
- * Applicant must be enrolled in or have completed concrete or concrete design courses.
- * Applicant must not be a son, daughter, grandson, granddaughter, niece, or nephew of an Advisory Committee member.
- * Part-time student applicants will be limited to junior class status or above. The scholarship award to part-time students will be commensurate with the cost.
- * (a) A statement of appraisal of the applicant in terms of potential for growth, character, leadership capacity, and career interest from three evaluators is required; at least one should be from a faculty member. The statements of appraisal must be returned directly to MCIN by each evaluator. Recommendations sent to MCIB by the applicant will not be accepted.

Applications available in the Student Financial Aid Office, G-1 Parker Hall. Application deadline: April 30, 1995.

THE JOHN GYLES EDUCATION FUND

The John Gyles Education Fund is again this year offering financial assistance to students in both Canada and the United States. Canadian or American citizenship is a requirement. Awards are available for all areas of post-secondary study. A minimum GPA of 2.7 is required. Criteria other than strictly academic and financial need are considered in the selection process. Selected students will receive up to \$2,500.00. Deadlines for 1995 are April 15th, June 15th, and November 30th. Applicants must be mailed by these dates.

Students may receive an application by sending their requests along with a self-addressed, stamped (US 32 cents) No. 10 envelope to: The John Gyles Education Fund, Attention: R. James Cougle, Administrator, P. O. Box 4808, 712 Riverside Drive, Fredericton, New Brunswick, Canada E3B 5G4

WILLIAM M REISS FOUNDATION SCHOLARSHIP FUND

Scholarship recipients are limited to graduates of publicly supported high schools located within the city limits of Belleville, Illinois. Students working toward a degree in medicine, but not nursing, are excluded. Post baccalaureate students will not be considered.

The selection committee consists of two officers of

Boatmen's Trust Company of Illinois, and an Administrator of Belleville Area College. Selection is made primarily upon academic promise and financial need. Since the scholarship is based on merit and financial need, an official needs analysis (FAFSA) document is required for determination of financial need. The amount of the award is fixed by the committee and may be sufficient to include any or all of tuition, room, and board.

Awards will normally be made on a one-year basis. All relevant materials must be submitted by May 1, 1995. Recipients will be announced as soon as possible after June 30, 1995.

Applications available in the Student Financial Aid Office, G-1 Parker Hall, Rolla, MO 65401.

1995-96 ORVILLE REDENBACKER'S SECOND START SCHOLARSHIP PROGRAM

This program is designed to assist the growing number of adults who are returning to college or beginning for the first time.

ELIGIBILITY CRITERIA:

- * must be age 30 or older
- * enrolled or planning to enroll in a degree program at an accredited college or university
- * pursuing part-time or full-time studies on an undergraduate or graduate level

Applications available in the Student Financial

Aid Office, G-1 Parker Hall

Application Deadline: Application must be postmarked by May 2, 1995.

AMERICAN SOCIETY OF PROFESSIONAL ESTIMATORS OF ST. LOUIS #19

REQUIREMENTS:

- * Two scholarships in the amount of \$250.00 each shall be awarded by ASPE
- * Applicants shall be a student enrolled in a Full Time capacity in a junior college or university
- * The applicant must be pursuing courses of study leading to a degree in some phase of construction, i.e., architecture, engineering, general contracting, construction management, or a construction-related program.
- * Applicants shall furnish with their scholarship application:
 1. College transcript
 2. SAT, ACT score or other pertinent scores
 3. Letters of recommendation
 4. Copies of college entrance letters
 5. History of: Employment, High school clubs, Community Activities, Athletics, Other

APPLICATIONS AVAILABLE IN THE STUDENT FINANCIAL AID OFFICE, G-1 PARKER HALL

APPLICATION DEADLINE MUST BE RECEIVED BY ASPE NO LATER THAN APRIL 30, 1995.

Missouri Miner

The Missouri Miner is the official publication of the students of the University of Missouri-Rolla. It is distributed each Wednesday afternoon at Rolla, Missouri and features activities of the students of UMR.

All articles, features, photographs, and illustrations published are the property of the Missouri Miner and may not be reproduced or published without written permission.

The Missouri Miner encourages comments from its readers, and will attempt to print all responsible letters and editorial material received. All submissions must have a name, student ID number, and phone number for verification. Names will be withheld upon request.

Submissions for publication must be in our drop box (first floor of the Norwood Hall, Room 103) by 9:30 p.m. on the Thursday before publication. Submissions, not including personals, will be accepted through E-mail (Internet) at MINER@UMR.EDU. The Missouri Miner reserves the right to edit all submissions for style, grammar, punctuation, spelling, length, and matters of good taste.

The Missouri Miner is operated by the students of UMR and the opinions expressed in it do not necessarily reflect those of the university, faculty, or student body.

Committee on Campus Environment gets to work

Lambda Sigma Pi would like to congratulate its new pledges

Jessica Adams
Tara Algreen
Diana Alt
Jen Campbell
Carrie Eyerluss
Bridget Hammond
Jessica Sanson
Anika Stuckenschneider
Skye Studebaker
Amie Woods
Mozow Yusof

Our goal as the Committee on Campus Environment is to not only get the wheels turning for effective change, but to actually have created change to make this place better than whence we came. The entire campus community must make a conscious effort on a daily basis to conceptualize and invent ways to effect change immediately.

Through four sub-committees formed within the committee, we want you to know what the Committee on Campus Environment has done this semester alone toward positive change: (A) The Survey Team sub-committee is going to expand the committee's climate assessment and general understanding of the UMR environment via a new survey of the UMR student/staff/faculty population next semester. All comments pertaining to the survey should be sent to Dr. Connie Meinholdt, Psychology Department.

(B) The Strategic Action Plan sub-committee offered eight suggestions for approval in the Strategic Action Plan for 1995-96. The suggestions were: (1) To specify who the under-represented are and a number to be hired for each category for every year, instead of giving percentages based

over a stretch of years. For 1995-96 hire: 3 Black faculty/staff, 3 Hispanic faculty/staff, 2 Native American faculty/staff, 5 women in engineering/science; (2) To develop an undergraduate international student scholarship program based on merit; (3) Hire an individual each semester to teach prevention and self-defense classes for a week; (4) If there are any incidents on campus, make it a policy to notify the campus community; (5) Build a diversity monument in the middle of campus representing our initiative, commitment, and goals toward diversity for the next century; to surround this monument with the full flag of every nationality represented on this campus with the capability of adding more if need be; (6) Have every freshman receive three hours of intercultural communication training within the Freshman Engineering Program; every new hire (staff, faculty, administrator) receive three hours of training, as well; (7) Institute by policy that every staff, faculty, and administrator must receive ICDP training every 3/5 years to remain full-time; and (8) Supervisors to receive more training on Affirmative Action rules and regulations.

(C) The Campus Investigators Team sub-committee was created to

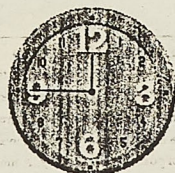

get direct feedback from campus concerning environment issues. The sub-committee consists of Lelia Flagg, Amanda McBane, Jeff Erker, and Tanveer Syed. Let them know what you think!

(D) The Travel Team sub-committee has been created to travel to other campuses to see how campus environment is dealt with positively in other places.

Along with all of this activity by the committee, we are also sending many of our members to diversity conferences/seminars across the country this summer and next year in order to bring back positive experiences to be implemented. We, as a committee, plan on being here for a long time. So, what this committee is asking from all of you is: to tell us what your fears are and what your dreams are, so we can identify, investigate, and change this environment for the better. In a day and age where people only remember tremendous events that have a positive or negative impact, we must be willing and able to create opportunities for positive impact. Send any concerns or comments to 312 Library.

by Herman Smith III (J.R.)
Chair of Committee on
Campus Environment

Job Openings

Time Is

Running Out

Position: World Wide Web Hit Squad

Job description: Computing Services is forming a "World Wide Web Hit Squad." Squad members will work on a team to respond to Web related requests from departments across campus. The departments will relay to the WWW team what they need in a web page, whether it be a generic form implementation, a home page, or amending to an existing html form.

Minimum Qualifications: Sophomore level or above, in good academic standing, have a Saucer or Rocket account, a home page, and a working knowledge of html.

Desired Background: Familiarity with programming html, client tools, perl, and/or C; multimedia layout and design training experience; software engineering and or project management skills; and interpersonal communication skills.

Position: Networking Assistants

Job description: Computer Services is currently hiring a small number of students to assist with networking projects in the residence halls. These students will help install Ethernet cards, make network registrations, install network software, and assist with problems.

Minimum Qualifications: Sophomore level or above, in good academic standing and have networking experience.

Desired Background: Familiarity with networking personal computers, including Ethernet cards, drivers, and PC software applications. Willing to work with students and a variety of personal computers.

Two or three positions will be made available in the Fall of 1995. Summer employment is also possible.

Submit application and resume to Computing Services, Room 114, UMR.

Application Deadline: May 1, 1995

Sports

Records Fall As Track Team Prevails

UMR Track
News Source

The Miner and Lady Miner track teams competed twice last week with good results at Lincoln University and Southern Illinois University at Edwardsville. The men's team posted a pair of winning performances at Lincoln, while the women's mile relay team set a new school record at SIU-Edwardsville.

At Lincoln, the winning efforts were turned in by Brian Gorman (Crystal Lake, Ill.) in the javelin with a mark of 154-5 and Mike Knowski (Omaha, Neb.) in the high jump at 6-6 3/4. Ben Fish (Oskaloosa, Iowa) turned in a second-place effort in the 400-meter intermediate hurdles with a time of

57.94 seconds, while Gorman added a third in the hammer throw with a mark of 143-6.

Peter Bachle (Rockport, Mo.) had a fourth in the high jump at 6-0 3/4 and a fifth in the triple jump at 41-4 1/2, while Brian Collingham (Tarkio, Mo.) came in fifth in the 5,000-meters with a time of 16:50.2.

On the women's side, three Lady Miners posted third place finishes: Kim Finke (Montgomery City, Mo.) in the high jump at 5-1; Tracy Jones (Rolla, Mo.) in the 400-meters at 59.6 seconds and Brandy Miller (Clarinda, Iowa) in the 400-meter hurdles at 1:16.65.

Two days later at SIU-Edwardsville, the women's 4 x 400-meter relay team of Polly Robinson (Freeburg, Ill.), Amy Barnes (Chatham, Ill.), Denise DeGeare (DeSoto, Mo.) and Jones finished fifth

in the event, but its time of 4:13.45 was three seconds better than the previous school record. The women's 4 x 1600-meter relay team recorded a second place finish while the distance medley team came in third. Maja Lundeen (Apple Valley, Minn.) was the top finisher among the individuals with a fourth-place effort in the javelin.

The Miners' distance medley team recorded a third-place finish, as did Ben Mulvaney (Jackson, Tenn.) in the 10,000-meters with a time of 34:09.84 and Gorman in the hammer with a mark of 144-8. UMR's 4 x 1600-meter relay team came in fourth place, while the 4 x 400 team posted a sixth-place performance.

UMR will compete in its final pre-conference meet Saturday at the Arkansas/Tyson Invitational in Fayetteville, Ark. The MIAA Championships open April 27 in Joplin, Mo.

Miner Netters Ace Opposition

The UMR tennis team has won four of its last five matches to move back over the .500 mark on the season at 6-5. The Miners have two matches remaining before opening the conference tournament April 27 in St. Joseph, Mo., and want to lock up its second straight winning season before that date.

UMR beat Webster on Monday and will be at Missouri-St. Louis Wednesday before concluding the regular season Sunday at Drury.

The Miners opened the week by defeating Central Methodist 7-0. Methi Bengisu (Istanbul, Turkey), Chris Brannon (Kennett, Mo.), Matt Hamlin (Billings, Mont.), Well Zung (Rolla, Mo.), Steve Kadyk (Shawnee, Kan.) and Pradeep Wilfred (St. Louis, Mo.). UMR also swept its three doubles matches.

Thursday, the Miners won two of the three doubles matches and needed only a split of the singles matches to win the meet at Northeast Missouri State, but Bengisu sprained an ankle during the first set of his match. He won the opening set, but lost the second in a tiebreaker and the third. Zung and Kadyk did win in singles play.

Over the weekend, the Miners recorded an easy 7-0 win over Kentucky Wesleyan and followed that with a 5-4 win over a good Brescia College team. Brannon, Hamlin, Kadyk and John Hesemann (Florissant, Mo./Hazelwood Central) won in singles play as did the doubles team of Hamlin and Zung.

Doubles partners Bengisu and Kadyk won their match and also won in singles to highlight UMR's 6-2 win over Webster Monday.

outstanding player at this level," said head coach Dale Martin. "He has age, experience and strength, three things I felt this team needed in our recruiting efforts. Terry shoots the ball extremely well and has the ability to get open shots.

"He has proven to be a scorer at every level he has played at," Martin added. "He will be a fine representative for the university on and off the court."

Smith, who plans to major in psychology at UMR, averaged 14 points, three rebounds and two assists per game during the 1990-91 season at Glendale. He was an outstanding shooter during that season, making 55 percent of his field goal attempts, including 46.1 percent from three-point range, and 75.3 percent of his free throw tries.

The Miners signed Cam Lindsey, a 6-1, 190-pound all-state guard from Paola, Kan., High School, during the early signing period in November.

UMR was 10-16 overall, 2-14 in the Mid-America Intercollegiate Athletics Association during the 1994-95 season.

University of Missouri-Rolla men's basketball coach Dale Martin has announced the signing of Terry Smith, a guard from Iowa Western Community college in Council Bluffs, Iowa, to a national letter of intent for the 1995-96 season.

Smith, a 1991 graduate of Glendale High School in Springfield, Mo., is the second player to sign with the Miners for next season. He is a 6-foot-2, 190-pound player who averaged 17 points, 5.5 rebounds, 4.5 assists and three steals a game in 1993-94 for Iowa Western, where he was a first-team all conference selection. He did not play during the 1994-95 campaign and will have two years of eligibility remaining at UMR.

Smith also made 50 percent of his field goal attempts, including 40 percent from three-point range, and 82 percent of his free throw attempts.

"I think Terry is going to be an

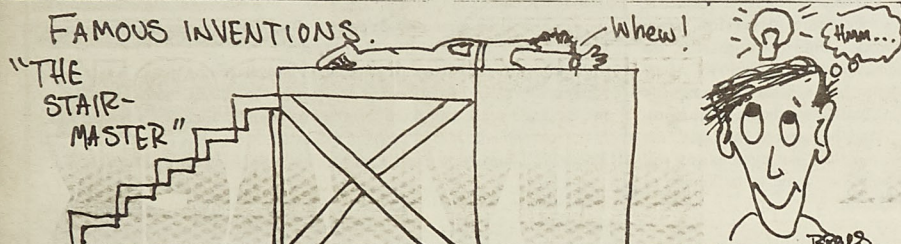

M-Club Athletic Banquet

The University of Missouri-Rolla M-Club, a service organization of student-athletes from the campus, will host its annual awards banquet on Sunday, May 7. The banquet will start at 5 p.m. in Centennial Hall of University Center-East on the UMR campus.

Tickets for the banquet are \$8 for adults and \$5 for students, and are available now by calling M-Club president Ed Midden at 341-9719 or at the UMR athletic office at 341-4175. Tickets will also be available at the door on May 7.

The banquet will highlight the 1994-95 athletic season at UMR, including the introduction of the most valuable players of the 14 athletic teams. There will also be several special awards given out that evening, including one for the M-Club's "Athlete of the Year."

The scheduled guest speaker for the banquet will be Dr. Kim Colter, ChemE '73, a former Miner football standout who won Academic All-America honors in 1972. He is currently a physician in Washington, Mo.

Lady Miner Softball Looks to Close Out Season On High Note

Lady Miner Softball
News Source

After a busy spring break week, where it got to play 13 games, the UMR softball team played only two last week. But those two games came out on the positive side as UMR swept a doubleheader from Missouri Baptist by scores of 9-1 and 7-0.

The schedule will pick up again this week, with UMR scheduled to host St. Louis University Tuesday and Columbia College Thursday (both doubleheaders start at 3 p.m.) prior to an important weekend of play in Shawnee, Kan.

UMR currently stands in fifth place in the Mid-America Intercollegiate Athletics Association South Division standings, one game behind Southwest Baptist, and needs to finish among the top four teams to make the conference tournament. The Lady Miners will play their final six league games this weekend against teams from the MIAA North Division.

On Friday, the Lady Miners will face Northwest Missouri State, Northeast Missouri State and Emporia State, then the following day will take on Central Missouri State, Washburn and Missouri Western. All six games will take place at the Johnson County Girls Athletic Association complex in Shawnee.

Ryan Shawgo

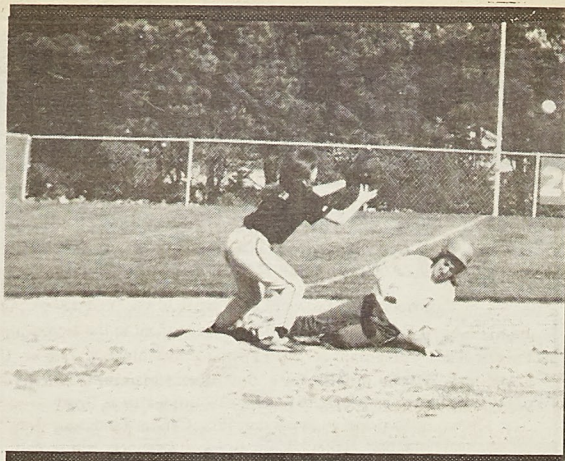

The Lady Miner third baseman Amy Buttmer puts on the tag during softball action last week. The Lady Miners look to close out the season this Wednesday at home against McKendree. The twin-bill starts at 3:00pm weather permitting.

In Thursday's wins over Missouri Baptist, the Lady Miners jumped out to a 6-lead in the first inning and won the game in the sixth inning due to the eight-run rule. Melanie Rohrer (Boulder, Colo.) had two hits, two stolen bases and three runs batted in for UMR, while Becca Alt (St. Louis, Mo./Parkway West) added a pair of hits in the 11-hit attack. Erin Collins (Schuyler, Neb.) went the distance for the win and recorded four strikeouts.

The second game win saw sophomore pitcher Melissa Rohrer (Boulder,

Colo.) throw a three-hit shutout and get good offensive support. Three Lady Miners -- first baseman Teri Marvich (Belleville, Ill.), left fielder Kristan King (Overland Park, Kan.) and third baseman Amy Buttmer (O'Fallon, Ill.) -- each had two hits. Both of Marvich's hits were run-scoring doubles.

King leads the Lady Miners in hitting with a .356 average and has already set a school record for runs batted in for a season with 33. Marvich is batting .345 while Melanie Rohrer checks in at .336.

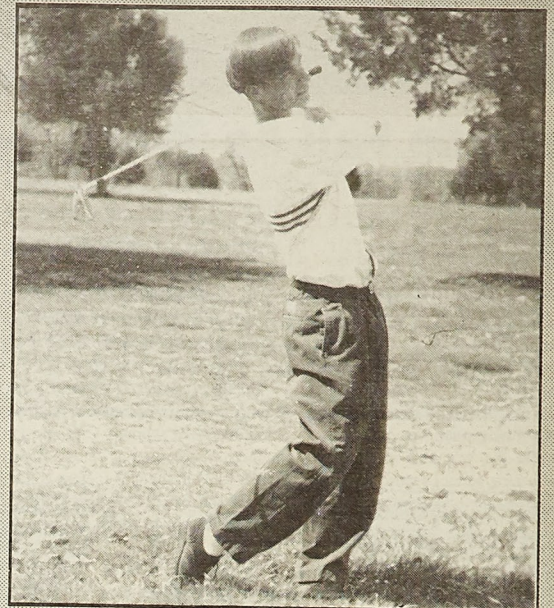

Ryan Shawgo

The Lady Miner Softball team had high expectations this season but swung and missed out on MIAA post-season play. The Miners will try and end the season on a positive note as they play their last home games of 1995 today at 3:00 against McKendree College.

M-Club Athlete of the Week

This week's M-Club athlete of the week is Nathan Wade. He is the left-fielder for the Miner baseball team. Nathan is a junior majoring in Chemistry from Springfield, Illinois. In the Pittsburg State University game, Nathan had four doubles to boost his batting average to .359. Congratulations Nathan, and good luck to the Miner baseball team with the rest of their season.

Miner Golfers Continue to Hack

Casey Briscoe

The UMR golf season will come to a conclusion in the next week, as the Miners host the UMR Best Ball Tournament Friday and Saturday at Oak Meadow country Club and then head off to the MIAA Championships at the Tan-Tar-A course in Osage Beach, Mo.

UMR will be joined by defending champion Lincoln and Missouri-St. Louis in the 27th annual Best Ball event.

Last week, the Miners finished in 15th place among the 18 teams at the Missouri Western Invitational in St. Joseph, Mo. UMR shot a 676 over the two days and got its best score from Brian Panka (Lead, S.D.), who had a 159 in the tournament. Troy Pinkerton (Sikeston, Mo.) came in with a 164, Bill Kuess (St. James, Mo.) checked in with a 174 and Matt Henry (Topeka, Kan.) with a 179.

Northeast Missouri State won the meet, but Central Missouri State remained in first place in the conference standings through the final regular season meet. UMR is 10th in the standings heading into next week's MIAA Championships.

Weekend Endures 24 Hours of "Quad-ball"

Carl James
Staff Writer

Residents of the Quadrangle are no strangers to volleyball. Every warm, sunny day (and even a few cold, rainy days) you will always find a good (well, at least interesting) game of volleyball being played. The Third Annual 24-hour Volleyball Marathon was held

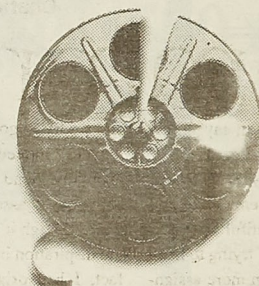

this past weekend at the Quadrangle volleyball court. The event served as a fund raiser for the Red Cross through a donation competition, T-shirt sales, and concessions. Play began at 5:00 PM Friday with House 2 facing a strange group from McAnerney known as "The Squirrels." Teams from the Quad and TJ competed every half hour. Even the late evening rain couldn't totally put a damper on things. Once the rain stopped and the wet sand was attended to, play continued on. The early morn-

ing saw competitions between different Residence Hall officer teams as well as Residential Life staff members. The endless volleyball seemed to be a welcome diversion from classwork. Until the rain came, the Quad was bustling with activity. Many residents had a blast bumping and spiking into the wee hours of the morning. And be assured, not rain, not snow, not sleet, not even exams will stop what has come to be known as "Quad-ball."

The Life and Times... Seriously

Sadly, I think I might need this disclaimer today: The views offered here are not necessarily the views of the Missouri Miner staff, its advisor, or anyone else affiliated with the University proper.

All right, kids, I hate to say it, but I'm not going to crack silly jokes today. I am not going to gripe about classes or stress or lab write-ups. I am not going to discuss the evils of eating the ears off of chocolate rabbits before you eat the rest of them. So, faithful readers, if you need some lightness in your life this week, I suggest you read someone else's column just this once, because I have deeper subjects in which to delve, namely, ethics.

American Heritage Dictionary defines "ethics" as "a system of moral principles or values." How we live. What we believe in. Who we are inside and the way that our minds and hearts work. Basically, the rulings of one's conscience. Those of us engineering majors -- as I'm sure is true for all the others as well -- are reminded constantly about ethics. We are entering a field where these principles may be very difficult to keep sometimes, and the pressure may be quite great to do things which go against our moral beliefs. I per-

sonally dread the day when I will be called upon to make that decision between right and oh-well-it's-just-a-little-wrong-and-no-one-will-ever-know-if-we-don't-tell-them-that-we're-charging-them-triple-the-cost-for-this-design-even-though-we're-using-imported-labor-and-shoddy-parts, for example. But a decision will have to be made, and only one who is very strong ethically will be able to choose the proper path to follow and be able to stick with it, no matter the consequences. I pray that with my upbringing and my faith I will be able to be one of those strong ones.

The troubling part is this: more and more these days, ethics are falling by the wayside. No one cares about them. Just as you weren't cool if you didn't smoke 10 years ago, so now today is this unhealthy epidemic of people being pressured into believing -- or at least, accepting -- that which will hurt others, just so that they themselves are accepted. It is a sad and deeply disturbing trend, yet it seems that the population is being swept by it and no one really cares.

Now, I suppose I shouldn't say no one. It just feels like it sometimes. And I am quite certain that a lot of folks out there care and are alarmed by what can be seen on television, the

news, the streets, and other men's hearts today. But it's rare indeed for someone to speak out against it, to raise that one quivering voice and say, "Hey. That's not right, and I will sit here and explain to you why it is not right if you'll give me the chance and open up your mind a little to what I am saying. You've had your turn to speak, and you used it to relate a destructive view. Let's see if I can try to undo your wrong."

Last week, a mere nine hours after the terrible bombing of the Oklahoma City federal building, a mere nine hours after hundreds of people were killed or injured, a mere nine hours after the entire world was destroyed for the surviving family, friends, and relatives of those innocent victims, a mere nine hours after the peace of the United States as a whole was wrenched away and replaced by a gripping fear, I actually had the horror of listening to someone say (paraphrasing the quote slightly), "You won't be able to find one person who would say that this bombing was not ethically acceptable after what the government did to the Branch Davidians in Waco two years ago." Now, whether or

see Life, page 18

Charles Janson

Hmmmmmmmm...

Greetings and salutations, my fellow sufferers!

How's life treatin' ya???? I hope you are finding it extremely easy to study with all this beautiful weather!

Well, I am tired - of trying to hang on, tired of getting even more assignments, tired of always having the end just out of sight and never getting any closer. But I am not going to grace you with yet another article on why I hate school or how much stuff I've got to do - hopefully you're all in the same boat as I am and our pain is mutual.

Instead, today, we're going to talk about one of my best friends in the whole world (now, before you move on to another article, just please give me a few more lines), a friend that has stood with me through thick and thin, a friend that picks me up when I'm down, a friend that others said I would grow tired of, a friend that pulls me through the late-night stretches, and most of all he's a friend that doesn't ask a lot, but gives all he's got (that was kind of poetic). We're never really far apart,

and we try to go everywhere together.

Yes, indeed, folks, I'm talking about my friend, Mr. Coffee (his name is in no way associated with the brand name, though it's rumored that he was the inspiration behind the product). In fact, I had originally thought about writing, "Ode to Coffee" (you know, something that goes like, "O little cup/so brown and hot/ give me what I need/ before I snap..."), but I'm not really much of a poet, and it would take up too much valuable newspaper space. So, I thought I'd take just a moment to honor my friend, Mr. Coffee.

It's kind of like Janis Joplin's *Bobby McGee*, but different. Actually, it's quite a bit different, and I don't have a problem. Sure, the very first thing I do in the morning is make a nice big pot of that lovely go-go juice, but it's the only thing that I've found to cure my morning headache. Sure, I could do all kinds of neat stuff like get my fairy tale 8 hours of sleep, take my vitamins, and eat right, but why do all that when I've got my good friend to

pull me through? But the good news is that come the end of this semester, like so many others, I will kick the coffee habit - until it all starts over again...

SO, on with the story...

It appears that my ploy to get everyone to be like me is slowly working. Evidence: people (2) are commenting on my article (their comments range from, "You jump around too much" to "Well, if I had the time, I'd show you what a real article looks like," to "Why do you need to get out (of lab) early, it's not like you have to meet your sources or make a deadline; all you do is make stuff up." - thanks to Ann and Bill for their help). Sure, they know me, but if you interacted with me on a near daily basis, I'm sure that you too would have some wonderful constructive criticisms. Anyway, the point is, I'm slowly (but surely) reaching my goal of having everyone come to me for guidance and wisdom.

see Hmmm, page 18

SUBCONSCIOUS

This week is the last week of the SUB April Fools Comedy Series. This week's comedian is **Randy Levin**. He will be in UCE-Cafe on Wednesday, April 26 at 8pm. Randy is one of the most established and sought-after comedians on the college circuit. He is also a regular performer at some of the top comedy clubs in the country, such as the Improv and Dangerfield's.

The SUB movie this weekend is *Blown Away*, starring Jeff Bridges and Tommy Lee Jones, which will be shown at 7pm and 9pm respectively on Friday and Saturday night in ME 104.

1995 Homecoming: There will be a T-shirt design contest with cash prizes awarded to the first, second and third place designs. The 1995 Homecoming theme is "Dazed and Confused for 125 years," and the design must incorporate the theme. Also, the shirt must say "MSM-UMR Homecoming 1995," and beer and illegal substances cannot be present. Cash prizes will be given: 1st place-\$30, 2nd place-\$20, 3rd place-\$10. Turn in designs to the SUB office (218 UCW)

by 4:30 on Wednesday, April 26, or bring them to the Homecoming meeting that night at 7pm in G-5 H-SS. Also, remember to turn in your Homecoming Queen nominations with the \$10 entry fee to the SUB office by Tuesday, May 2. Keep reading SUBconscious for more Homecoming reminders.

SUB's annual **OAR Day** is May 3. Come out and see all the cool outdoor equipment that faculty, students and staff can rent. It will be on display from 10:00 am - 1:00 pm at the puck. There will also be a free BBQ for all who stop by. A caricaturist will be roaming about during the BBQ as well. Also, if you want to find out more about SUB in general or how to join, there will be an information table with free prizes!!

Mark Pittman, a hypnotist, will be here May 3, at 8pm in Centennial Hall. Hypnosis is simply one of the funniest and most fascinating shows you'll ever see!! Mark is a certified Hypnotherapist with many hours of experience with clients. Don't miss him!!

KA's Easter Egg Hunt Is Big Success

On your mark, get set... Children wait anxiously to search for eggs while a KA member explains the rules.

Saturday, April 15, at 1:00 in the afternoon, an Easter egg hunt was held in the back of the Kappa Alpha house on Fraternity Row for thirty children from L.O.V.E. (Local Organization for Various Emergencies) and the Calvary Assembly of God congregation. Both groups were led by Pastor Kemp from the Calvary Assembly of God. After the hunt was over, everybody headed out front where several games for the children were planned. Everyone had a great time and some of the KA's even joined in the fun. The crowd then headed inside for lunch with hearty appetites from all the activity and sugar. The

Order was fortunate enough to have a majority of the candy donated by a member of a local sorority, Kappa Delta's Angie Gamble. Food was generously donated by Hardee's, McDonald's, Burger King, and Highland Dairy. Lunch being devoured, most of the kids ran outside again to play with the fraternity men in a spontaneous session of roughhousing. The afternoon proved to be a fun-filled event for everyone involved and is just one of the ways that Kappa Alpha, as a member of the Greek system at UMR, extends its hand to the Rolla community.

Diversions

JAFO

Summertime Blues

Well, for this week I really had to scramble for a topic. It has been a surprisingly busy week for me, and as a result of the demands, my higher brain functions have shut down. But just because I know that someone out there reads this (I actually met one), I have dove deep into my book of "Random Neural Firings" and pulled out this topic: What I will do this summer?

Great topic, eh? I'll refrain from making any comments about how this sounds like a grade-school essay and get right to the point. This summer I have no clue as to what I will do.

Now, I know what you all are thinking. "But JAFO, you never have a clue!" and, yes, that seems to be true a lot of the time. But this time, it is pretty close to reality. Sure, I'll do the typical college-puke thing and go steal a summer job from a bunch of high school kids. That's a given. But other than that, the ol' Magic 8 Ball is blank.

I have decided, however, that this summer I will have fun. My job will

be fun; that is number one. I will not work at the DQ, I will not sell fast food. I will not go back to Little Caesars, for working there is not a pleaser. I will not deal with customers full of spite, for they are not right.

Now that I have established my ideals in the preceding poetic passage (I'm rhyming because I want all of my articles to be performed on stage in a Broadway musical entitled "Lost in the Mailbox"), with those standards set down, I can now find a job. I've actually already started looking. I already have gotten one offer for when I get back.

But I know what you are saying. What else is gonna happen this summer? Well, by following the idea of having fun, I think I will go and see as many concerts as I can. Now that I live in a place where concerts actually take place (Atlanta) there are many performers who I actually stand a chance of seeing. Let's see... Who would I go see... Right off the bat I would say Juliana Hatfield, Jimmy Buffett, White Zombie, Magnapop, Belly. Hmmm. Those are the only groups I

could come up with off the top of my head.

I also think I will go back to my stomping ground, Northern Virginia. I haven't seen a lot of my friends in a long time and it would be great to go back and shoot the breeze for a few days. The only problem with that is I will A) have to get it past my parents (they would probably rather I not drive 800 miles alone) and B) keep my sister from bugging me to take her with me.

But most of those goals are still many weeks (if not months) away. In the meantime, I have one important short term plan: SLEEP! I never seem to get enough while I'm at school, so I'm going to crash when I get back. Just thinking about it is making me sleepy.....

By the way, no one entered the "JAFO Jolly Rancher Extravaganza." I got so depressed over this typical display of Generation X slacker that I ate the Jolly Rancher myself. So hahahahaha! No one can have it now!

United Ministries

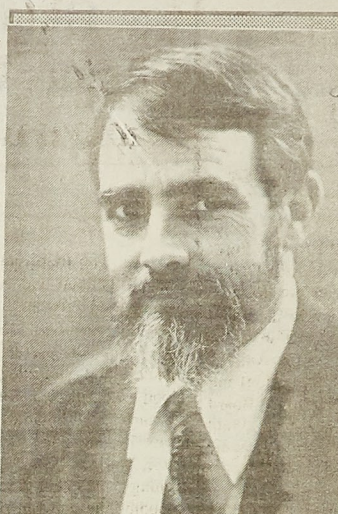

"Last Lecture" to be Held

United Ministries in Higher Education at the Wesley Foundation will again sponsor the "Last Lecture," which will be given by Dr. Oliver K. Manuel, Chair of the Chemistry Department and Professor of Chemistry at UMR. His lecture, titled "Science, Self and Others," will be presented at 6:00 p.m. on April 26.

Wesley Foundation is located at 403 W. 8th Street. Campus and community are invited to attend the lecture.

after which refreshments will be served.

Dr. Manuel has a Ph.D. Degree in Nuclear Chemistry from the University of Arkansas. He was a Postdoctoral Fellow in the Physics Department at UC-Berkeley before joining the UMR Chemistry Department in 1964. Dr. Manuel received special recognition as a principal in-

Dr. Oliver K. Manuel will give this year's "last lecture."

investigator in NASA's lunar program, a Fullbright Award for Advanced Research Abroad, and an Outstanding Research Award from UMR's Alumni Association.

The "Last Lecture" series happens each semester when UMR faculty are invited to speak as if it were the last lecture

of their life. If that were the case, what would they like to say? What issues

and concerns do they consider of paramount importance?

United Ministries in Higher Education at the Wesley Foundation is supported by the Christian Church (Disciples of Christ), the Presbyterian Church USA, and the United Methodist Church. The campus ministry serves students of all denominations. For more information, call 364-1061.

The Unbelievably Radically Awesome Miner Music Review - and stuff

daryl andershock

on my own

Hey all! It seems to have been some time since I've sweated over the keyboard to get a story in the Miner. I've been kinda' real busy lately, but I did manage to scrounge up two terrific writers - Jeff Daniels and John Borgmeyer. I hope you have all been enjoying their stuff; I know I have. I might not be here next semester, so these guys are gonna' carry you through 'till I get back. I'm gonna' try that co-op thing.

If any of you are interested in writing for the music section, drop me an e-mail message at "shock@umr.edu".

I didn't have enough time to review this cd by TRUCK STOP LOVE, How I Spent My Summer Vacation, but from what little I have

heard, they are pretty cool. I know they just played at the Earth Day concert (20 or so bands and TSL played 3rd from last...) sponsored by Channel Z in Springfield, MO, and are scheduled to play in St. Louis at the Other World on May 27. Look for a review in next week's paper. Check 'em out if you get the chance.

About our rating scheme. We use two categories: sound quality, and performance, and a scale of 1 to 10 - ten being the highest. Bon appetit!

Clint Black
One Emotion
RCA Records

Sound Quality 6
Performance 5

Truck Stop Love (l. to r.: Rich, Brad, Eric, Matt)

I thought I would add a little more diversity to the Miner Music Reviews and talk about a country cd this week. Clint Black, one of the most

successful male country musicians, seemed like a logical choice. With the increased popularity of country music, there has been a huge influx of new artists with a similar sound making it hard to distinguish one from another. Clint, on the other hand, has a style and voice that is unmistakable.

I have liked his last three previous releases and had great expectations for this one, One Emotion. I was, however, very disappointed. The cd sounds like someone handed him

some music and told him to play it. Even though he helped write every single song, it is as if his heart is not in it. The cd lacks the energy and "emotion" that fill Clint's

previous albums. With most of the ten songs under three minutes, I get the feeling this is a cd quickly thrown together to keep some record company executive happy.

I'll try to finish up on something good, though. There was one song I did like a lot, and it isn't that crappy over-played "Wherever You Go" song. The last song on the cd, "You Made Me Feel," is a jazzier country song that Clint brings off well. However, this isn't enough to carry the cd. I might be a little too hard on him because of his previous work, but if you were already a millionaire, I would see no need put out poor quality music just to make a buck. If you are a big Clint Black fan you might want to skip this one.

-J.Daniels

Student Council

Task Force Appointed to Review Student Fees

The Student Fee Task Force is appointed by the UM-System President about a year before each new five year plan is passed by the Board of Curators. The main function of this Task Force is to investigate various student fees (most notably tuition) and make a recommendation to the Board of Curators about what tuition should be and how much it should change for each year of the five year plan.

Many things go into consideration, such as affordability to students, how much the state is funding, and how best to achieve the mission the institution. In the past, tuition generally went up at the Higher Education Price Index (HEPI), the rate of inflation for higher education. The last task force, for several reasons, decided that it wanted to take University of Missouri from a low cost to a moderate cost school, in order to educate more effectively.

This year, the Task Force was appointed by the University of Missouri system president, George Russell. It is being chaired by Chancellor Charles Kiesler of the University of Missouri-Columbia. It is comprised of undergraduate, graduate, and professional students from the various campuses. Also represented are various staff, faculty and alumni. One representative is Jinny Ryle, a staff member at UMR, who was appointed from Rolla.

Also, representing the students at UMR is Diana Alt, who is a member of the UMR Student Council. "I think that it is very important for all the campuses to be represented fairly," said Diana. "It is an important issue to students at Rolla. With 80% of the campus paying [an engineering fee], it is crucial to have an undergraduate representative on the task force."

If you have any questions, comments or suggestions, call 341-4280, email StuCo (stuco@umr.edu) or Diana Alt (diana@umr.edu) with them.

UMR Students Pull Through for Oklahoma City Disaster Victims by Donating Record Amounts of Blood

The fourth and final UMR Student Council and American Red Cross Blood Drive of this school year was a huge success! During the two day drive, 320 people attempted to donate blood, and 298 good units of blood were collected. The turnout was so much greater than expected that at about 5:15pm on the second day of the drive, workers were forced to begin turning people away as the Bloodmobile had run out of bags in which to collect the donated blood. Our most sincere and heartfelt thanks go out to all the UMR students, faculty, staff and members of the Rolla Community who donated blood or helped work at the blood drive.

With the success of this drive, the donations total during this school year comes to over 925 units of blood. The second day of the drive was particularly busy as many of our donors were responding to the bombing disaster in Oklahoma City. Ok, they helped meet the requests for extra blood donations from hospitals caring for the victims. Although Oklahoma City is not part of the Greater Ozarks Blood Region, in the case of such a disaster neighboring

blood regions are generally asked for assistance in meeting the high demand for blood. Blood reserves are almost never sufficient to meet anything beyond everyday needs. The need for blood will thus be high for the next several weeks, and if you missed this drive, and have an opportunity to attend another drive in the near future, your donation will be especially appreciated.

The blood drive was successful due in part to the donations of Pizza from Dominoes, and Pizza Inn, coupons from McDonald's and Pizza Hut, soda from Hebbeler Bottling, and last but not least cookies and hot dogs from Marriot food service. In addition, we appreciate the time contribution of volunteer workers from Alpha Phi Omega, Intercollegiate Knights, Gamma Alpha Delta, Kappa Sigma, The St. Pat's Committee (sorry we missed you last time), and UMR Student Council. Thanks to you all, and...Get READY!! The first drive of next year is September 5, 6, and 7, 1995, and rumor has it Greek Week Points will be given for participation!

Once again, thanks to all who helped make this a huge success!

New Bulletin Boards Coming to Campus

In order to provide a central location on campus for the posting of campus activities as opposed to the random selection of department bulletin boards or posting in residence halls, Student Council approved a request for funding to place two bulletin boards on the two main strips of the campus. Dr. Ogrosky has agreed to fund half (\$2475.00) of such a project, while Student Council is responsible for the other half. The Student Council budget is quite tight, and presently there is a large amount of excess funds in the Capital Fund that have not been designated for any use. Therefore, in order to better serve the students, Student Council voted to appropriate the necessary funds from Capital Fund to be used for the construction of the bulletin boards. After discussing the issue with Marvin Patton, Interim Vice-Chancellor of Physical Facilities, a design, materials, and two locations were decided upon.

The bulletin boards will be double-sided, free-standing, enclosed bulletin boards. The dimensions will

be 3 feet by 4 feet and will be raised 40 inches off of the ground. The frame is a custom-made aluminum design that will resist weathering and deterioration. There was concern about that strong gusts of wind or other types of inclement weather might make a mess due to the amount of paper that would be placed on such bulletin boards. In order to remedy this, the boards will be covered with two glass doors on hinges that will be easily opened, because there will not be locks on them. However, students still are required to have everything approved for posting.

The two bulletin boards will be placed at the center of each main area of campus to ensure that as many students as possible have daily access to them. One of the bulletin boards is going to be placed directly between Parker Hall and the M.E. building. The second bulletin board is going to be placed on the north side of the Engineering Management building between Management and H/SS.

Intercultural Relations Dinner

The Intercultural Relations Committee (IR) of Student Council is sponsoring a Intercultural Relations Dinner. We would like to invite all UMR Intercultural Groups to attend and participate in the celebrations that is being planned. This event was taken on so that the different organizations with which the committee works could have some interaction with each other.

We are asking that each group bring a food dish from their native land so that the those in attendance can experience the taste of different cultures on campus. The dish should be large enough to allow for all who are in attendance to get a taste. The dinner will be in the UCE Cafeteria at 6:00 pm, Thursday, April 27th. We are expecting about 40

people to be in attendance. If you're interested, we ask that you please submit a copy of the organization's constitution and a copy of all the events the organization participated in throughout the 1994-1995 school year. These items will be used to award the Intercultural groups for the past year.

Please contact, Joseph Kweh, at the Student Council Office (202 UCW) or call him at (314) 341-8731 by this Friday, April 21st, 1995. IR needs to know if your organization will be participating in the event and what type of dish that will be prepared and brought. This will be a very good experience for everyone and IR strongly urges each organization to attend and participate.

TEACHER EVALUATIONS ARE NOW AVAILABLE IN THE LIBRARY AND STUCO OFFICE

The results from the Teacher Evaluations are now available in the Library and in the Student Council office. This is not a complete group of all evaluations of the teaching staff, rather only those teachers that chose to release their results for this purpose. Each summary report consists of the teacher's name, the course name and number, the total number of students enrolled in the course, and the total number of students responding to the questions on the survey.

Each teacher is evaluated by taking an average of all sections in that course, all instructors, total curriculum, their department, and all teaching staff of UMR. If you would like to see the survey, stop by the library or the StuCo office and take a look at how students rated your professor. If you have any questions, call 341-4280, visit the StuCo office (202 UC-West) or e-mail stuco@umr.edu.

Photo Of The Week

Justin Ferguson

"I wanna' volleyball all night, and party every day!" was the tune you were likely to hear if you happened to be strolling through the Quad anytime from 5:00 pm Friday night to the same time Saturday. The annual RHA 24-hour volleyball marathon was held this weekend, and while the weather didn't exactly cooperate, there were still plenty of players ready to go out and have some fun in the mud for a good cause.

Surprise your folks.

When you stay awake in class, you tend to learn more. (Unless you have an uncanny talent of learning through osmosis.) So don't let fatigue get in the way of your A, Revive with Vivarin®. One tablet has the same amount of caffeine as about two cups of coffee.

And it's just as safe. Hey, anything is possible, if you're up for it.

Revive with Vivarin®

Lost books found in the bookstore Mining

from page 1

Forrester Wilson
Staff Writer

Since March 17, 1994, the lost-and-found office of the UMR Police Department has sent 11 books to Barnes and Noble Bookstore, where they were put on the shelves and sold.

The lost-and-found office had sent the books to the bookstore under the assumption that the profit from the books' sale were going to a scholarship. But no such Scholarship exists.

The sale of these books for the profit of the bookstore is against campus policy, according to the University of Missouri Business Manual which sets the guidelines the campus must follow.

The U.M. Business Manual states that the "proceeds from the sale of unclaimed property must be used by the University or designated organization for some worthy cause or purpose associated with the aims and endeavors of the University as approved by

the Chancellor." A spokesperson in the office of UMR Chancellor John T. Parks said that he has no policy yet concerning the proceeds from the sale of lost and found books. These books, in order to be sold, must have first gone through the Campus Purchasing Department, according to the U.M. Business Manual, which states "unless specifically addressed and provided for elsewhere in this manual, items for resale must be acquired through the respective Campus Purchasing Department."

When asked about the books, bookstore manager Leland Crisco said, "Since I started working at the bookstore I have seen maybe six books". He said he has been a manager since 1988. When asked later why he had only seen six books when in the last year there had been 11 books sent to him, Crisco said it didn't rank highly in his mind and that most the books were out of date editions and were "probably sold for eighty cents on a junk book table".

However, at least two of the books are currently being used in classes and are being sold by the bookstore. Other books included a

novel by J.R.R. Tolkien and Roget's Thesaurus. Later, Crisco said he had found 4 of the 11 books in storage and that he had been "ill advised to sell them."

A spokesperson in the lost and found department, upon finding out that books sent to the bookstore and sold with the proceeds going to Barnes and Noble, said the books will be sent to the Campus Purchasing Department from now on.

The Vice Chancellor for Student Affairs, Wendell Ogrosky who oversees the Bookstore, said the bookstore will send any lost books they receive to the Campus Purchasing Department or that he would be willing to give those books to the Student Council for use as they see fit. He said he did not want to profit from the "misfortune of others."

Andrew Sears, president of the Student Council, said the Student Council would "give the books to Alpha Phi Omega for its book sale." Alpha Phi Omega donates the profits from its book sale to a charity which hasn't been picked yet.

The manager of the bookstore said he would "return books of equal or greater value of those sent to him."

Blast

from page 1

floors collapsed upon them.

At the scene of the detonation, carnage was widespread. Emergency workers rushed bloody, ravaged bodies to medical facilities while firefighters tried desperately to search the wreckage for people who still might be clinging to life. According to officials, the rubble trapped many people in the building, but the initial blast killed many more. Presently the death toll is in the mid eighties, but firefighters and rescue workers expect the count to rise even higher as they carefully sift through the distraught skeleton of steel and concrete. An Oklahoma County sheriff's deputy summed it up when he said, "It's just horrible, like nothing you could ever imagine."

Just as quickly as the bomb

ravaged the area, reactions from around the world poured in. President Clinton vowed "the strongest response" to the attack. He also said the killers would be "treated like killers" with justice that is "swift, certain, and severe." Attorney General Janet Reno agreed with President Clinton and promised the American people that she would push for the death penalty against the perpetrators. Also, leaders from around the world expressed their sympathy and condemned the bombing as a useless, unfruitful loss of lives.

Shortly after President Clinton's message, a massive world-wide manhunt began for the terrorists responsible for the bombing. From the beginning, there were many leads coming in from all parts of the

country. As of Sunday morning, officials detained three suspects for questioning.

Last month a bombing in a calm, unstrategic area would have been imperceivable and unpredictable. Terrorism only effected people in certain areas, not random locations. But since the bombing, many have asked if a similar situation could occur in their area. Local residents have asked, "Could this happen in Rolla?" Before the Oklahoma bombing, Americans were numb to and apathetic toward terrorism, but since this unfortunate disaster, terrorism and its grief moved much closer to home. If terrorists could infiltrate and destroy a federal building in Oklahoma City, Oklahoma, it could happen anywhere.

text•book (tekst-buuk) n. a book
of information for use in studying
a subject.

612

“If I don’t grasp the lecture material completely,
re-reading the textbook helps me tremendously.”

“I feel I have done everything I can to be a successful
student by using the suggested books and going to class.”

Students at Kansas State University

“I don’t see how a student can take full
advantage of a course without a required text.”

“A well written textbook can make the
difference in your grade.”

“Textbooks allow me to develop a library
for future reference.”

“Textbooks outline the theoretical framework
necessary for understanding of the subject.”

*Students at San Diego
State University*

“Textbooks are a good study guide
anytime of the day.”

“Serves as a reinforcer for
professor’s lecture and sometimes
provides a differing viewpoint.”

“You can keep the textbook for
future, handy and easy reference;
often, future courses build off past
courses and it is invaluable to have
the past text as a reference and a
refresher.”

*Students at University of
Missouri-Columbia*

“The textbook is well-worth it
for reinforcing class material
and in some cases you can dig
deeper than the course
requirements if interested.”

*Student at Rowan College
of New Jersey*

“It serves as a reference to enhance lectures.”

“It would be impossible for me to complete
assignments without a textbook. It would also be
extremely difficult and/or rude to keep borrowing
one from a classmate.”

Students at Sierra College

**Help your students invest in their future.
Encourage them to read the book.**

A REVISIONIST CHALLENGE TO THE U.S. HOLOCAUST MEMORIAL MUSEUM

By Bradley R. Smith

This ad does not claim "the Holocaust never happened." Those who say it does want to muddy the issue. This is what the ad does claim: The U.S. Holocaust Memorial Museum displays no convincing proof whatever of homicidal gassing chambers, and no proof that even one individual was "gassed" in a German program of "genocide."

The question, then, is not, "Did the Holocaust happen?" The question is: If there were no gas chambers, *what was the Holocaust?*

This Museum promotes the charge that the Germans murdered the Jews of Europe in homicidal gassing chambers. It therefore has a *moral obligation* to demonstrate that the charge is true. Those who contend it is more important to be sensitive than truthful about whether or not the gas chambers existed debate America's old civil virtues of free inquiry and open debate, and they betray the ideal of the university itself. For the benefit of whom?

What are the facts?

The Museum's "proof" for a gas chamber at Birkenau is a plastic model imagined by a Polish artist. A plastic copy of a metal door is displayed as "proof" of a homicidal gas chamber at Maidanek. And, incredibly, the Museum has simply dropped the Auschwitz gas chamber, the basement room visited yearly by hundreds of thousands of tourists in Poland.

There is no mention of the alleged gas chambers at Buchenwald or even at Dachau, where after World War II American G.I.s and German civilians were assured that more than 200,000 victims were "gassed and burned."

The notion that eyewitness testimony, given under highly politicized and emotional circumstances, is *prima facie* true, was refuted by the Israeli Supreme Court when it acquitted John Demjanjuk of being "Ivan the Terrible." The Israeli Court found that eyewitnesses who testified that Demjanjuk operated "gas chambers" could not be believed!

Deborah Lipstadt argues in her much-praised *Denying the Holocaust*, that revisionists ("deniers") should not be debated because there *can not* be another side to the gas chamber story. This is where revisionism displays its strength. Revisionist theory, resting only on facts, can be disproved. Exterminationist theory, having fallen into the hands of cultists, must be "believed."

I'm not in disagreement with Ms. Lipstadt and her *clique* on the gas chamber controversy because they may be Zionists or Jews. That's disingenuous. I'm in disagree-

ment with her over the fact that she argues against "light of day," our understanding that in a free society *all* ideas are best illuminated in the light shed by open debate.

The Museum is so confident no one will challenge its gas-chamber gimcrackery that it even claims to have found a new "death camp" gas chamber. Proof? The uncorroborated fantasies of one man pandering to the victims of Holocaust-survivor-syndrome. The Museum's historian doesn't even know *where the place was!* It "may have been" near Giessen. "May have been?" That's the best historical writing \$200 million can buy?

When I challenge such gas-chamber vapors I understand I'm going to be slandered as an antisemite by true believers representing the Holocaust Lobby. These quasi-religious Holocaust zealots claim that because of the purity of their own feelings about the Jewish experience during World War Two, mine must be soiled when I express doubt in what they preach as "truth."

Yet not even Winston Churchill in his six-volume history of World War Two, or Dwight D. Eisenhower in his memoirs, made reference to homicidal gassing chambers. How do the Holocaust Lobby and its Museum explain that?

Intellectuals who do not believe that intellectual freedom is worth the while on this historical issue, should ask themselves why they believe it's worth the while on *any* historical issue. Then they should explain their answer to the rest of us.

The Operation and Technique of the Museum

The Museum's exhibit technique is a mixture of sinister suggestion and dishonest omission. Example: the first display confronting visitors beginning the Museum tour is a wall-sized photograph of American soldiers looking at corpses smoldering on a pyre. The context in which you see the photo suggests that the dead pictured in it are murdered Jews.

Were the prisoners killed or did they die of typhus or some other disease during the last terrible weeks of the war? Autopsies made by Allied medical personnel found inmates died of disease. Not one was found to have been "gassed." All such relevant information is omitted from this exhibit. We don't even know that the dead pictured in the photograph are Jews!

Unable to judge the significance of the photograph, and not wanting to believe the Museum would mislead you, you are moved to accept the false and manipulative suggestion that it somehow represents the "genocide" of the European Jews.

Call the Museum! Find Out For Yourself!

I'm willing to be convinced I'm wrong about the gas chambers. Authentic physical remains or wartime-generated documents would do the trick. I say the Museum displays neither. CALL THE MUSEUM! FIND OUT FOR YOURSELF! The telephone number is (202) 488 0400. Ask which (specific) Museum exhibits display proof gas chambers really existed. Have this (or any) newspaper publish the result. Then we'll all see what's what.

Special pleaders imply that to investigate the gas chamber stories in the light of day will be harmful to Jews. I challenge this bigoted insinuation! Free inquiry will *benefit* Jews—for exactly the reasons it benefits us all. In any case, why should it not?

COMMITTEE FOR OPEN DEBATE ON THE HOLOCAUST (CODOH) is not a membership organization and is not affiliated with any political group or organization. Our goal is to promote free inquiry and open debate, without which intellectual freedom can not exist. To those who ask, "Why challenge the Holocaust Museum?" we reply—*Why not challenge the Holocaust Museum?*

We are the only ones pointing out the falsehoods and misrepresentations surrounding the Museum and the lack of integrity of those who represent it. Every intellectual who visits the Museum, and particularly historians, should point out these facts to you—yet none dare. Only CODOH! Only CODOH dares to challenge the taboo against challenging the Museum!

Help us monitor this growing national controversy. Clip the stories run in your campus and off-campus newspaper and send them to us. Include the name of the paper and the date the story ran. In return, we'll update you on the continuing controversy. Address information to:

CODOH: PO Box 3267 Visalia CA 93278 Tel/Fax: (209) 733 2653

Rob Breznsy

REAL ASTROLOGY FOR AN UNREAL WORLD

ARIES (MAR.21-APR. 19): This week it would be a bad idea to patronize shopping malls built on top of old Native American burial grounds. And it would be a good idea to wear a T-shirt that reads "I'M NOT A SLAVE OF MY BUYOLOGICAL URGES!" What? Huh? What the hell am I talking about?

Well, big spender, the fact is that you have a date with a new financial destiny, and I'd like to make sure that all your money karma is squeaky clean for the occasion. So be a saint in all matters related to buying and selling. Pay off debts. Don't purchase items whose manufacture required the torture of little animals. Contribute to charities. And don't you dare try to get somethin' for nuthin'.

TAURUS (APR. 20-MAY 20): I believe the history books of the future will give contradictory accounts of your recent exploits. Some will maintain that you were in exile in hell. Others will say you were on a heavenly vacation. My own personal view is that you somehow managed to visit heaven and hell simultaneously. All the grief and joy were crushed together; all the splendor and rot. In fact, because of your experiences, I now believe more than ever that heaven and hell are actually located in the same place, or at least that there's a huge zone where they overlap.

Given how strong this experience has made you, it shouldn't take you

more than a few days to recuperate. Then it'll be time to take inventory of how completely you've changed.

GEMINI (MAY 21-JUNE 20): THE ORACLE: You are crossing the great water in a dream boat with a small leak. You may be able to reach the other side before going under, but then again you may not.

THE ANALYSIS: Even if you did manage to stay afloat the whole way, the unpredictability of the hassle would crank your anxiety up to toxic levels.

THE RECOMMENDATION: Row back to where you started and repair the leak.

CANCER (JUNE 21-JULY 22): If you ever find yourself in the position of selling your life story to the highest bidder, it might be because of adventures that ignite this week.

The fun begins if and when you decide you can't tolerate your trademark pain any longer. This upends the cosmic scales, ripping a hole in the fabric of the space-time continuum and possibly attracting the attention of a reporter from *People* magazine. Soon you'll have made visual contact with a previously invisible force that's been tickling your destiny without your knowledge for a long time.

LEO (JULY 23-AUG. 22): The past few weeks have brought odd victories. You've outgrown mysteries that had frustrated you for eons. You've received rewards that you no longer care

about as much as you once did. And you've finally lost interest in hide-and-seek games that you'd been half-addicted to long after they'd lost their power to educate you.

As wistful and curious as these revelations have been, they'll seem like prologue to what comes next. Get ready to solve problems you didn't even know you had.

VIRGO (AUG. 23-SEPT. 22): You need a new bedroom name, my little love pirate, but I'm not sure I should be the one to give it to you. Maybe you could ask that bushy-tailed creature with the crooked smile to lay a fresh hot moniker on you.

If for some reason there is no such creature available to you now (though that wouldn't make sense astrologically), I'm providing the following list of generic pet names for you to choose from: Slippery Monkey...Hot Sauce...Fire-Licker...Lap-Diver...Fizzy Nectar...Lust-Rustler...Sweaty Sweetie...Rowdy Gusto...Silky Banger...Mango Sucker...

LIBRA (SEPT. 23-OCT. 22): Turns out it wasn't an apple that got Adam and Eve kicked out of Eden. Many biblical scholars now believe it was a fig, or possibly an orange. I bring this up because your own personal myth of exile is coming up for review. Ready or not, it's time to question the ancient story you've always told yourself about how your paradise got lost. Clues you

uncover this week should prove to you that everything you thought you knew about your origins is at least half-wrong.

SCORPIO (OCT. 23-NOV. 21): It doesn't matter if you've said a million Hail Marys, or made a pilgrimage to the Wailing Wall in Jerusalem, or done all Twelve Steps five times over. You will simply not be excused from the history that's repeated and repeated and repeated itself-until you forgive yourself...totally...forever...amen.

Neither does it make a bit of difference if you've finally paid your debt to society or paid your dues to those who've made it possible for you to have gotten as far as you have--unless you've reimbursed *yourself* for all the grief you've caused yourself.

SAGITTARIUS (NOV. 22-DEC. 21): A recent study provided stark evidence that making love may have dramatic benefits for your physical health. During orgasm, the average person experiences a 20 percent rise in immunosystem cell count. Keep this in mind as you edge into the Sagittarian sniffing season. In addition to getting more than enough sleep and good food and vitamin C, include regular erotic workouts in your regimen of preventive medicine.

CAPRICORN (DEC. 22-JAN. 19): Just in time for your upcoming burst of riotous growth, here's a useful reminder from my favorite Capricorn revolutionary, Martin Luther King Jr.

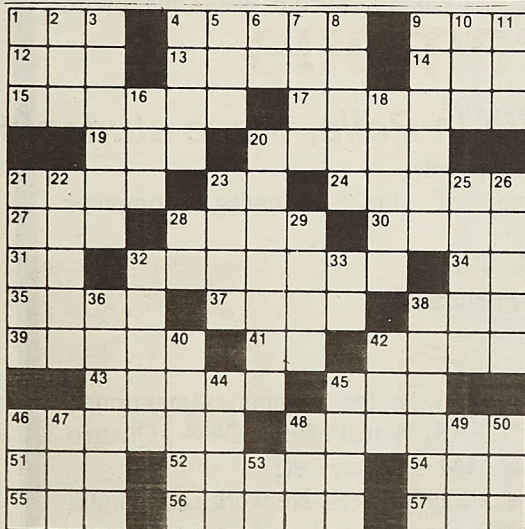

"The soft-minded person always fears change. For him, the greatest pain is the pain of a new idea." I trust that in the next few weeks you'll expunge any temptation to be soft-minded--or to be unduly influenced by mush-brained persons. The ironic corollary to King's formulation is that the changes will be painful only if you fear them.

AQUARIUS (JAN. 20-FEB. 18): You could fly to Florence, Italy and purchase an antique piece of handcrafted furniture for your living room. Or you could send away to that weird store in Sparta, Wisconsin and buy an eight-foot-tall fiberglass statue of a Johnnie Walker bottle for your bedroom. You could hang all the pictures on the walls upside-down and use a felt-tip to write your dreams on the refrigerator. Or you could construct a secret altar in the attic and utter prayers to Baubo, goddess of belly laughs. I don't care what you do, as long as you shake and bake your household out of its ruts and trances. Rev up some domestic bliss--or else prepare yourself for a wave of domestic ignorance.

PISCES (FEB. 19-MAR. 20): Your Red Phase lasted from around February 22 till March 15. Your Brown Period stretched from the last week of March until a few days ago. The color therapist on our staff believes it's now time for you to launch your Yellow Era.

Hmmm

from page 7

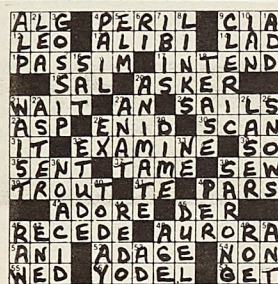

In anticipation of the "Awakening," I've gone out and bought myself some flowing robes and a pretty awesome sound system so that all may hear the virtues of Floyd. And, on the advice of another soon-to-be-follower, I've polished up my combat boots ('cause they go so well with flowing robes). I've even contemplated shaving my head, but I'm going to wait until I get a few more followers for that as I'm not quite sure how my significant other would take to a head shaven purveyor of wisdom and guidance...

I've yet to find someone to take me up on my offer of last week. You know, the one where you blow off the rest of your semester, and then I write a story detailing your exploits. Why has no one contacted me? Are you all *chicken*? Surely there must be someone out there willing to take a \$2,000 gamble with his/her grades. If there is anyone out there, just let me know, but it better be soon, as time is running out.

Well, I think that's about it for this week. Kinda' short, I know, but I'm out of things to make up...

She says that painting your room a rich lemon hue would boost your IQ and spark your communication skills—which is exactly what my astrological diagnosis recommends. You might also consider buying a canary shirt, or snacking voraciously on bananas, or

closing your eyes and visualizing giant sunflowers. Other timely benefits from this yellow deluge: more emotional balance, a healthier respect for yellow flashing lights, and a heightened intuitive sense of where to look for yellow's close cousin, gold.

Congratulations to the New 1995-1996 Missouri Miner Staff!

Life

from page 7

not the government was wrong in the Waco tragedy is not the subject at hand. What is the point is that this person actually sat there and told a group of five or six of us that it was *all right* to have murdered those sixty-five (the death toll will probably have risen by press time, so excuse the lack of currency) workers, including at least seventeen children, *children* for Heaven's sake, in the old system of an "eye for an eye" (although, frankly, I don't see what those kids in the day care had to do with Waco to be punished as it were for the crime). Correct me if I'm wrong, but I think that teaching was modified quite a bit to "turn the other cheek" about two thousand years ago by someone who we recently celebrated on Easter. I am not saying that it is always --or, truthfully, ever-- easy to do this, to go on and not seek out revenge onto those who have hurt

us, but that does *not* make the revenge "right" or "acceptable." All it does is spread the lie that acts like that, acts without the use of the conscience, without the use of ethics or morals or principles or whatever you want to call it, is how the world is run today. To an extent, some amoral people are running the world. But how on earth are we ever going to change that, how are we to ever get back our morals if we just accept these heinous views and don't try to stop them from spreading? People complain about how society is collapsing into chaos, with sex, drugs, guns, violence, and disease blazing like wildfire everywhere one turns. Well, if we let this amorality continue as it has in recent years, nothing is ever going to get better. Lives are going to continue to be lost, children are going to still be the largest class of victims, and we are going to become the stuff

that science fiction producers have reveled in for years: the dark, godless society of dirt and scum that lives only by the "kill or be killed" illogic.

Well, kids, I'm just not quite ready for that yet, and I know that the vast majority of you out there is not ready for it either. I call upon you today to speak out when you hear these atrocities being spoken. Be the one that raises the voice of ethics and conscience. It will not be easy. It will be scary. And at that moment, those around you may not have the kindest of words pointed in your direction. But I guarantee that at least one person who witnesses your action will remember it, and that one will then have the courage and confidence to raise his own voice the next time. If evil can spread like an epidemic, then so can good. It just needs a little encouragement now and then.

HelpDesk Position Open

Computing Services is taking applications for the general campus HelpDesk located in the M/CS 104/108 CLCs and for the ME 119/121 CLCs. These positions are for the Fall 1995 Semester. The helpdesk answers questions about the computer systems and the software on them, works on special projects, helps at short courses and with tours, and maintains the CLC's. The salary is \$4.73/hour with a maximum of 16 hours per week.

The requirements for the position are:

- An ability to work well with people.
- Experience using **some** of the following computer hardware/software:
 - H-P workstations/Unix machines
 - IBM PC/clones
 - Apple Macintosh
 - Any of the software installed on the computers mentioned above such as FORTRAN, SAS, WordPerfect, C++, Quattro Pro, Mathematica, CAD/CAM software, etc.
 - Electronic Mail, FTP, Telnet, and Novell Network commands.
 - World Wide Web and/or Gopher
 - Campus Dial-up Facility
 - Any of the following operating systems: Unix, DOS, System 7.

If you are interested, please pick up an application from our office, M/CS 114, fill it out, and return it by 4:30pm on Monday, May 1st. Contact Ms. Chris Townsend at townsend@umr.edu for more information.

Summer Employment

RIGHT NOW FROM APPLE CAMPUS DIRECT.

Being a student is hard. So we've made buying a Macintosh® easy. So easy, in fact, that the prices on Macintosh personal computers are now even lower than their already low student prices.

Unfortunately, they won't stay this low forever. So you need to forget about how hard your life is for a minute and start thinking about how easy it will be with a Macintosh. The computer that gives you the power any student can use. The power to be your best. Apple
