Millennium Arch sculpture commissioned at UMR

by Angela Keune
Assistant News Editor

Commissioning for a new sculpture on the University of Missouri - Rolla took place on Thursday, October 22 outside Castleman Hall, where the sculpture will be placed. Edwina Sandys, sculptress, will be sculpting a "Millennium Arch," which will be 15 feet tall and will represent relationships between art and science, UMR and the community, and the new millennium.

The "Millennium Arch" will be 15 feet tall and made of two upright stones jointed across the top by a lintel. It will consist of two figures cut into the stone, one man and one woman, which will be placed out to the side of the arch. The capstone of the arch will hang six inches over the vertical legs, which will actually fit into slots into the bottom of the capstone to make the structure more stable.

Sandys will be working closely with Dr. David Summers, Curators' Professor of mining engineering at UMR, who is an expert in waterjet technology.

"It seems like a good match," Sandys said, "Dr. Summers and his research team can solve scientific problems and I can make something beautiful, and together we can have something more than either of us has envisaged. I'm looking forward to working with Dr. Summers and other members of the faculty as well as students."

Missouri granite will be used for the sculpture. Sandys and Summers went to the Missouri Red Quarry in Graniteville to pick out the stone

before the commissioning. The block of stone that will be used has not been cut yet but will be removed all in one piece so that the color of the rock will be uniform throughout the sculpture.

Summers and his research team are working to develop the best way

Artist Edwina Sandys will be sculpting the Millennium Arch.

Office of Publications

to cut the stone. They will be cutting through 30 inches of stone and have to figure out the best way to successfully cut all the way through the stone without having jagged edges toward the back.

Castleman Hall was chosen as the location because, "The site is ideal because it is a natural bridge between the community and the University. It is also the site of the university's art center, which is a fitting location for the sculpture," said Sandys.

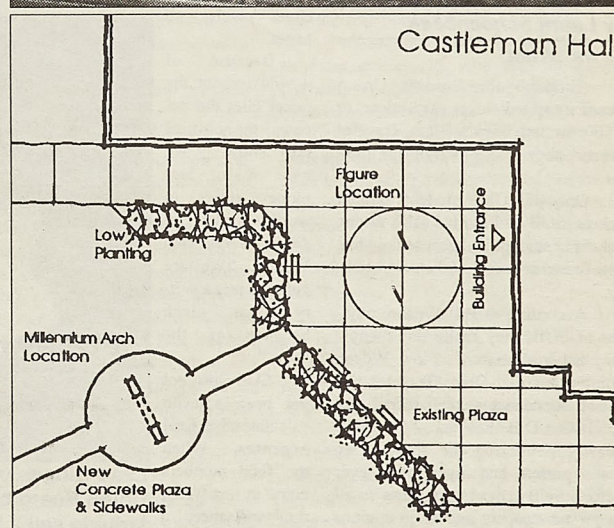

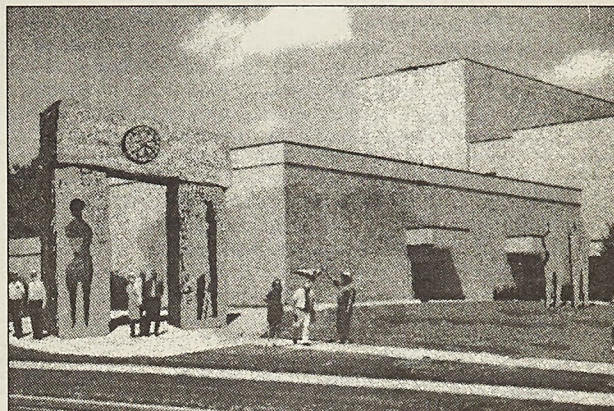

Scott T. Porter, a UMR graduate, is providing funding for the project, which will be dedicated to his late parents and wife. Porter and Sandys met at the 50th anniversary of Winston Churchill's famous "Iron Curtain" speech. At this time Sandys noticed a photo of the original speech that was taken by Porter. They have remained friends since that first meeting.

Another of Sandys' projects is a "Millennium Circle," which is similar to a small Stonehenge with women's figures cut into it. When Porter saw the model of this project, he told Sandys about UMR's Stonehenge replica and the waterjet technology used to create it. He then suggested that she use the waterjets to create a sculpture for UMR. "Little did I realize in May—when I told Edwina about UMR's waterjet capabilities—that we would be standing here today to announce the commissioning of a sculpture on the campus," Porter said.

Sandys has created two other sculptures in Missouri. "Breakthrough," which is made out of sections of the Berlin wall, is placed at Westminster College in Fulton, Missouri, and "The Branches of Promise," made out of glass placed in St. Louis.

A weekly updated website at <http://www.umn.edu/~mile-j> is posted on the web for anyone who wants to be updated on the project.

There are job opportunities with the project posted for students interested in many areas of study including mining, electrical and mechanical engineering.

UMR webpage vandalized by unknown person

by Keith Missey
News Editor

The University of Missouri - Rolla chapter of the National Society of Black Engineers (NSBE) received a serious blow when its webpage was vandalized with racial slurs and profanity.

Courtney McCoy, president of NSBE, said, "An unknown person going by the name of Shawn London or Ron Delmond is trying to ruin the NSBE chapter reputation. The person took our website, copied it to a free webpage server from GeoCities.com and posted all kinds of racial slurs, profanity and stupidity."

According to McCoy, the person sent e-mail regarding the vandalized webpage to the NSBE Region Five

Executive Board, the UMR Chapter Executive Board, the Dean of the School of Engineering, several prominent professors at UMR and some UMR students unrelated to NSBE.

McCoy stated, "He's sending messages to people that you need to have internal access to get their e-mail addresses. I cannot trace him because he's using various free HotMail and MailExcite e-mail accounts. If he keeps this up, maybe I can get a trace on him. I have the webmaster at GeoCities keeping tabs on this individual and removing all sites that this person creates as soon as he posts them to the web."

The individual has created several sites with racial slurs and profanity and sent e-mail to people giving them the location to these web pages, but

the authorities at GeoCities take down all of the websites. "He's basically wasting his time re-creating these 'hate' sites," McCoy commented.

The University Police have assigned an officer to investigate the incident, and Student Affairs and Computing Services are also involved. It was at first suspected that the offending individuals were from the University of Missouri - Columbia, but no charges have been made.

McCoy declared, "If nothing is found out by the school, I plan on turning this over to the FCC and the FBI. They can find out where the message originated because I have the original message with the IP addresses and server names...they could find out what school or home the message was sent from."

Chemistry magic show next weekend

♦ The University of Missouri - Rolla is celebrating National Chemistry Week with a "Magic Show."

A number of "amazing" chemistry experiments will be conducted on Saturday, November 7, starting at 3 p.m. The show will take place in the Monsanto Lecture Hall in Schrenk Hall. There will also be hands-on chemistry booths from 1 to 3 p.m. in University Center East.

The event is sponsored by the W.T. Schrenk Chemical Society and the South Central Missouri American Chemical Society Local Section.

Project Halloween will help area kids

♦ The UMR Panhellenic Council

in conjunction with the Rolla Police Department is organizing a second annual neighborhood watch on Halloween night. Members of fraternities, sororities and residential life will be patrolling the neighborhoods during Trick-or-Treating hours keeping an eye out for suspicious activity or children who need help.

Starting at 5:30 p.m. on Halloween night, these college students will be giving assistance to children who might be lost, in trouble, or who need police assistance.

If there are any questions, contact Jill Schoenecker, UMR Panhellenic Greek Service Chair, at 364-0631.

Auction next Saturday at McNutt

♦ There will be an APG/C.L. Dake Geological Society Mineral Auction Saturday, November 7, at

In A Nutshell

Campus, National and International news briefs

UMR's McNutt Hall.

Registration begins at 9:00 p.m. in room 265. A children's auction will begin at 12:00 p.m. in room 204, and the auction begins at 1:00 p.m. in room 204.

For more information call 341-4616.

Preregistration materials available

♦ Beginning last Thursday, UMR students may pick up their preregistration material in the Registrar's Office or access the schedule of classes and appointment times by using STAR, available on the Registrar's Office Home Page <http://www.umn.edu/~reg>

www). Advisor week started this week and continues to Friday.

After obtaining the term password from the advisors, register using STAR or the telephone system (341-6000). Appointment times begin Monday, November 2. Preregistration ends November 19. Add/Drop continues through January 7.

Midterm grade reports are now available using STAR or by going to the Registrar's Office Home Page (<http://www.umn.edu/~reg>) or by dialing the Telephone System at 341-6000. Beginning this semester paper copies of the midterm grades will not be preprinted. Go to the Registrar's Office, 103 Parker Hall, to order a copy.

Visitors night at observatory

♦ The UMR physics department

is sponsoring a visitors night beginning at 7 p.m. Friday, October 30, at the UMR Observatory.

Weather permitting, visitors may view the Moon, Jupiter and Saturn through the observatory's 16-inch telescope, said Dr. John L. Schmitt, UMR associate professor of physics.

The event is free and open to the public. The observatory is adjacent to UMR's Stonehenge replica on Highway 63 North, north of V.H. McNutt Hall and west of St. Patrick's Lane.

Information compiled from various sources

Blues Traveler doesn't bring expected audience

by Laura Schoenbeck
News Writer

Although the Student Union Board expected ticket sales close to 2,500 for last week's Blues Traveler concert, they sold a total of 791 tickets.

Only 483 UMR students bought tickets. SUB had limited sales to one ticket per student ID because they had anticipated selling 1,500 student tickets.

According to Bill Wilson, advisor of SUB, they really don't know why ticket sales were so low. Wilson pointed out that Blues Traveler had strong attendance at their recent tour for H.O.R.D.E. Festival. Also, SUB heavily publicized the show using more posters and flyers than ever before. SUB sent press releases to all major newspapers and radio stations in the state, and the concert was advertised on both the UMR and

Blues Traveler web pages.

Because of the low turnout, the ticket sales did not cover the cost of the show. "We have a lot less money today to work with than we did last week," said Wilson. "We are going to feel a pretty tight pinch because of the show."

SUB has not yet been able to calculate the final expenses. When the final numbers come in this week, they will meet to reevaluate and plan for the rest of the

Lead singer of Blues Traveler, John Popper. Student Union Board counted on Popper's and his band's popularity to sell 2,500 tickets. Only 791 tickets were sold.

photo by Ryan Shawgo

year. "We are going to see how we can most effectively use the money that is still there," said Wilson.

SUB will continue to put on the film series next semester, though they probably won't have any blockbusters on the play list. They will also provide the April Fools Comedy Series again but will not have five comedians like last year.

With regards to a St. Pat's show, we'll make every effort we can to procure a percentage-based show," said Wilson.

On Thursday, Oct. 15, SUB sent an

e-mail to students to remind them that the discounted student price of \$12.00 only applied to tickets sold in advance. Also, the letter informed students that if they didn't buy tickets, SUB would have limited funds to provide quality activities for the rest of the year.

"We wanted to say to the students, 'We've behaved responsibly. We've let you know the consequences of this action and how you can have a positive impact,'" Wilson said. "If we didn't do that, we know we would have heard cries of 'If you had told us, we would have come.' We just wanted the students to realize that every action has a reaction."

Students had varied reactions to the e-mail. Senior David Cowan thought that the e-mail sounded threatening. "It just made things worse. Any time someone threatens

Opinions

Something rotten in Congress?

Opinion

LA Times/Washington Post

Not the least remarkable thing about the \$520-billion spending bill passed by the House Tuesday and the Senate Wednesday was how many members of Congress rose to denounce it after its enactment. The 4,000-page omnibus package includes funding for 10 Cabinet departments, which should have been provided weeks ago, along with such other overdue measures as \$18 billion to replenish the International Monetary Fund's reserves. But it is also loaded with uncounted last-minute additions, including incumbent-benefiting pork-barrel goodies and special interest tax breaks.

Sen. John Ashcroft, R-Mo., condemned the bill as reflecting the budget process at its worst. "It reeks," was his summing up. Sen. Tom Harkin, D-Iowa, complained that "no one knows what's in this stupid thing." Sen. Robert C. Byrd, D-W.Va., himself a champion provider of pork, saw the bill as a "monstrosity." Thus was the people's work done, in secret deal-making by congressional leaders and the White House and in votes cast in ignorance by weary legislators eager to get out of town.

In the end, the \$70-billion budget surplus that President Clinton promised would remain inviolate was violated, as more than

\$21 billion was snatched away to fund so-called emergency needs, thus getting around the spending limits of the balanced budget agreement.

With temporary authority to keep the government running about to expire, the whole bill was put before the two chambers as a no-amendments-allowed, take-it-or-leave-it measure. Much in the bill had never been considered by committees. Much remains a mystery to those who voted for it and to the president, who signed it into law Wednesday. There must be a better way to do things.

And of course there is. It requires that lawmakers meet their constitutional responsibility to guide government spending by passing money bills in a timely manner, instead of holding them hostage to narrow ideological demands. To do that will take a level of cooperation and civility between the parties and between Congress and the White House that lately has all but disappeared.

Richard A. Gephardt, D-Mo., the House Democratic leader, described the departing Congress as the worst in history. It's not, but it is a Congress in which intemperance, rancor and partisan hobby-horse riding made conciliation difficult and statesmanship all but impossible. Americans deserve better than this from their elected leaders.

A pastime past its prime

by Jonathan Yardley

LA Times/Washington Post

The only thing stranger than the meanderings of popular fancy and media hype is their utter unpredictability. The waves of fad and fashion rise and fall not according to the pull of the moon but to forces far beyond anyone's ken. In the immortal words of Thomas "Fats" Waller: "One never knows, do one?"

Which is by way of remarking that there could scarcely be anything stranger or less predictable than the blip of popularity currently being enjoyed by major-league baseball, a pastime given up for dead only a few days ago — or so at least it seems — but now Flavor of the Month. Four years after committing what looked for all the world like hara-kiri, thanks to a strike in which both labor and management revealed themselves as utter louts, baseball has done a complete about-face.

Thus, in the summer only recently past, the poets of the press box rhapsodized ad nauseam about baseball's Second Coming. Sports Illustrated, which usually devotes most of its energies to fawning over the semi-literate heroes of intercollegiate football, did double back-flips while fawning over the semi-literate heroes of big-league baseball.

Newspaper columnists piled metaphor atop simile in desperate attempts to achieve rhetorical heights appropriate to the New Day. Elderly pundits gathered before television cameras and crooned the game's praises. Even The New York Times Magazine, that avatar of establishmentarian chic, devoted much of last week's issue to the triumph of what it called "Bizball."

Not to be contrarian or anything like that, but: Does anybody out there really care, or is this just another instance of the media listening to themselves instead of to vox pop? Has baseball really come back, elbowing aside football and basketball, those "hot" sports of the post-Vietnam era, or is it just surfing the small, evanescent wave of 1998's home-run derby? Even if it really has come back, has selling out been the price of doing so?

You can tell from the way the questions are phrased, obviously, what yours truly fancies the answers to be. If the summer of 1998 was for (alleged) millions of Americans one in which the National Pastime was rediscovered and celebrated, for me it was one in which this semi-lapsed baseball fan turned wholly and terminally apostate. This leads, equally obviously, to the temptation to leap from the particular to the universal: to assume that since I am sick of baseball — or, more specifically, of what baseball has done to itself — so, too, is everyone else.

The temptation will be resisted. If others find joys in baseball that I no longer do, if the game revives and prospers, more power to all.

Just please don't ask me to march in the parade. For half a century I loved baseball and wrote often about it: too often and too ardently. Probably it is mere coincidence that my disenchantment with the game occurs at the same moment as the game's rejuvenation, but there you have it. While everyone else is saying hello, I'm here to say goodbye.

There are any number of reasons, most of which have been mentioned in this space in recent years: the slow pace at which games are now played; the willful inconsistency and arrogance of the umpires; a sense that, being a short year away from a rather great age, it is time to put aside childish things. But what pains me most is that baseball is no longer something unique, particular, distinct. Maybe, as its apologists like to say, it hasn't really changed on the field, but it's changed everywhere else, and I cannot abide what it has turned into.

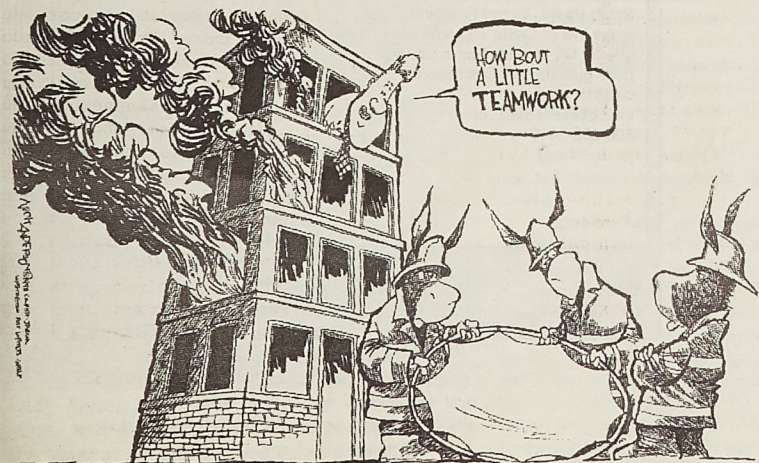

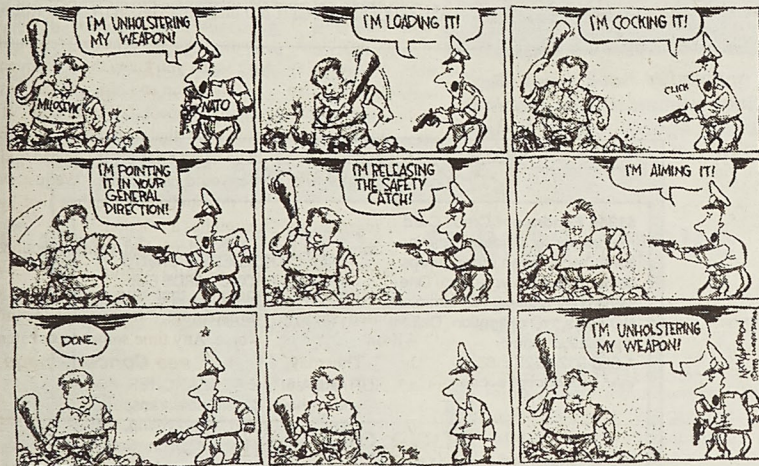

Like everything in American mass culture, baseball is not a game but a show. Now as in my youth there are men who play it with grace and skill, yet the figures they cut on the field have become incidental, if not downright irrelevant, to the entertainment that is now the game's real and sole purpose.

Probably it had to be that way. In an entertainment culture, he who fails to amuse is doomed. Baseball was just about dead when it discovered that if it put on enough of a show off the field, no one would care about the boring, leisurely, old-fashioned game on the field. Baltimore's Camden Yards established the theme of retro nostalgia, proved that it could be a cash machine, and set the pattern for everyone else: Baseball went Disney, rolling in fake quaint, souvenirs by the ton and background music by John Denver.

Like all else in late-20th-century American pop culture, baseball opted for the ersatz over the actual. When Mark McGwire broke Roger Maris' record with his 62nd home run, what mattered was not the homer itself but the show that had been carefully set up to celebrate and profit from it. It wasn't a baseball game but a media event, a photo op, a chance to get 30 seconds on the evening shows and to record tape clips for future Major League Baseball TV commercials.

Fine. Help yourself. Different strokes for different folks. Long may baseball wave. But last Wednesday night, when entirely by accident I turned on the TV set just as the Yankees were icing yet another World Championship, what I thought was: Sayonara. No, baseball will not miss me at all, but neither will I miss baseball. At all.

Miner Team Feature:

Miner soccer team wins with commitment and comradery

by David Wekesa
Staff Writer

If you don't already know, you do now. The University of Missouri-Rolla men's soccer team are the MIAA conference soccer champions. But who makes up the soccer team and what makes them tick?

The UMR men's soccer team is composed of Jeff Houghland, Todd Wilfling, John Almeida, Greg Schulte, Aaron Ogorzalek, Brain Koscielski, John McQueary, Hass Jassim, Nathan Wojtkiewicz, Ashley DuPree, Greg Maslin, Scott Vogelsang, Michael Salcedo, Joe Young, Alan McMahon, Conor Magee, Jarred Rhea, Chris Leonard, Eric McGregor, B.J. Stuhlsatz, Jon Baker, Ben Cunningham, Matt Long, Joel Warneke, Head Coach Dawson Driscoll and Assistant Coach Faithi Finaish.

The season's statistics are impressive. In brief, Nathan Wojtkiewicz is the top scorer with 6 goals, followed by B.J. Stuhlsatz with 5 goals. Brain Koscielski has 3 goals, Matt Long and Hass Jassim have 2 goals apiece. Micheal Salcedo, Greg Maslin, Scott Vogelsang, Joe Young and John McQueary have a goal each. After this past weekend's action the team is 12-2.

Now we know who is who in the UMR men's soccer team. But what makes them tick?

When asked to describe his

team and teammates, Nathan Wojtkiewicz, the top scorer, who incidentally was the top scorer during his senior year in high school, says that the team always does what it takes to win, within the limits of the rules of the game, of course.

He adds that the team is confident and very determined. Their determination is evident from the number they have had to come from behind and win the game.

Wojtkiewicz summed the team's style of play with, "we play hard, we hit hard."

Wojtkiewicz says there is good chemistry between all of the members of the team, but adds that its much easier when you are winning.

He points out team cohesiveness and outstanding support for each other during games as important contributing factors to the win-

ning ways of this year's squad.

Freshman Hass Jassim echoes his teammates words by saying that although the team is young, it's maturing at a very fast rate, which he says in turn helps the team on the field.

But what about the Coach, you may ask. Todd Wilfling, who is one of the teams' two outstanding goalkeepers, says that the coach gives the players a lot of freedom on the field.

Both Wojtkiewicz and Wilfling agreed that the coaches approach to the games allowed them to play better. Overall, the team seems to like his style.

So who is this Coach who style seems to be making a positive difference to the team?

His name is Dawson Driscoll. This is his first year as coach at UMR. Driscoll is anything but inexperienced, however. Driscoll has

teamwork prevalent in the team.

Driscoll said that his style includes putting together components of hard work, effort and fun, both off the field and on. He allows self-expression and freedom when it comes to tactics during the game. Nevertheless, he demands 100% effort from the team and that each player gives their maximum potential.

When asked about the future, Coach Driscoll says it's bright as the Miners hope to add new talent to their already impressive squad.

In a nutshell the Miner soccer team seems to be one big happy family working hard to get somewhere and are having a ball doing it.

The UMR men's soccer team has a chance at making to regionals and perhaps even nationals. If they play as hard and as well as they have through the season and recently, they will probably have no trouble making it.

An upcoming game against Rockhurst College may be the determining factor in this year's Miner playoff hopes. One thing is for sure, you will be hearing a lot about this team in the future.

And thus ends our peek into what makes the UMR men's soccer team tick through the eyes of some of its members. To all the members of the team... keep doing what you are doing. It's all good.

Sophomore Scott Vogelsang (12) heads the ball away from a defender as a teammate looks on in the Miners recent game against William Woods. The Miners are currently 12-2 and are fighting for a spot in the upcoming regional tournament.

photo by Ryan Shawgo

Cross country teams have mixed results at conference

by Erin Gifford
Staff Writer

The University of Missouri-Rolla cross-country teams competed for the top conference spot Saturday, Oct. 24, at the Mid-America Intercollegiate Athletics Association Championships. Pittsburg State hosted the event at Four Oaks Grove golf course, with eight teams participating in the men's division and nine teams competing in the women's division.

Central Missouri State took first place overall in the men's division and Missouri Southern topped out the competition for the women's race.

The Miner men ran an eight kilometer race and placed sixth out of the eight teams present.

"We raced hard, but we really didn't raise up to our potential," Josh Anyan said. "Hagen worked really hard, but I don't think everyone else worked as hard as they could have."

Senior Matt Hagen placed seventh in the race and first for the Miners, coming in with a time of 26:05. His top ten finish gave him all-conference honors. Next for the Miners was senior Josh Sales who completed the course in 22nd place and a time of 26:41.

Freshman Josh Anyan ran the race in 27:08 and finished in 29th place. The next three Miners finished very close to one another. Freshman Kevin McGuire placed 43rd and finished in a time of 27:49, followed by junior John Sanders with a time of 27:58 and 47th place. Freshman runner Paul Whetstone placed 48th in the race and completed the course in 28 minutes flat. Senior Dan Saylor finished up for the Miners in 57th place with a time of 28:55.

"We were prepared for the competition," Anyan said. "We've been practicing hard all season for meets like these, but we just weren't mentally prepared."

UMR cross-country coach Sarah Preston seemed very pleased with the men's performance.

"We did a lot of things we were hoping for," Preston said. "Hagen made all-conference and had a good solid performance. A lot of the men stepped up, like Josh Sales and Josh Anyan each ran a really good race. We also beat Missouri Southern, which was one of our goals."

The UMR women ran a five kilometer race and placed seventh out of the nine teams present, though two of the schools didn't bring full teams. Preston was disappointed with the Lady Miners showing at the race, but is looking forward to the regional

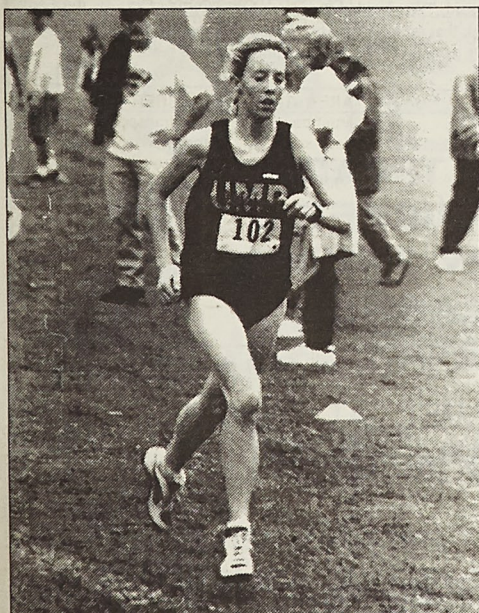

competition.

"None of the girls felt like they ran a good race. They just didn't respond well to the conditions of the race or the course. We're definitely looking forward to doing better at regionals. We usually bring out our best when we have more people to compete against. There's always someone to run with that way. There's about three times more teams present, and our times usually peak at the regional competition," Preston said.

The Lady Miner's top runner, Sheri Lentz, finished first for the team, placing 25th in the race with a time of 20:13. The next finisher for the team was sophomore Kim Hoffman completing the course in a time of 21:16 and placing 43rd overall. Close behind was senior Sheryl Ziccardi placing 45th with a time of 21:38, and sophomore Tera McCallum finishing in 22 minutes flat and 47th place.

Junior Debbie Leonard placed 50th in the race and completed the course with a time of 22:15. Rounding out for the Lady Miners was freshman Jennie Garrison, placing 55th overall with a time of 23:08, and junior Julie Nowakowski, finishing in 58th place with a time of 25:28.

Miner golf finishes fall season

by Erin Gifford
Staff Writer

The University of Missouri-Rolla men's golf team wrapped up its fall season this past week in Springfield, Mo. The Drury Classic, hosted by Drury College, was held on Monday and Tuesday, Oct. 19 and 20. Out of the 17 teams present at the event, the Miners placed 15th.

The Miners' coach, Ray Leuell, had a few key points to note.

"The tournament didn't mean very much, because it wasn't a conference meet, but all of the teams from our conference and district were there. The guys definitely didn't put in their best effort. They knew the outcome didn't count for much, and they played like it."

The Miners competed on two different courses over the span of the tournament. Hickory Hills was played on the first day, and Highland Springs golf course was played on the second day. The Miners felt the two courses were pretty challenging.

"The courses were pretty tough and unforgiving," Adam Hunt, a freshman golfer for the Miners, said.

Kevin Adlard agreed on the severity of the courses.

"The greens were extremely fast. I hadn't played on anything like that in a year or so, and it really took some getting used to. The course was also very tight. If you didn't hit the ball straight off the tee you were in big trouble, because there were trees and other obstacles on either side of the green."

The Miners' combined totals for the two days were fairly widespread, causing the poor outcome

for the Drury Classic. Andy Laegler shot the best for the team, placing 37th in the tournament with 162 strokes. Brad Neuville tied for 62nd place overall with a score of 167. Adlard was only a stroke behind, tying for 65th place and a score of 168. Mike Essenpreis shot 172 and tied for 73rd place. Rounding out for the Miners was Hunt, who placed 84th and completed the courses with a combined total of 176 strokes.

"We didn't play very well at all," Adlard said. "We didn't have our heads in the game. It wasn't a conference meet, so it didn't hurt our point total, but we should have showed up to play."

"They just didn't seem to be in it," Leuell agreed. "I think they are ready for the fall season to be over so they can get back to their classes. I'm really not that disappointed; we're in a better position than we were in last year at this time, and that's something to be proud of. I'm not upset with how the season went, but I am disappointed with their play in this tournament."

The team is looking for several minor changes that might help improve their play for the spring season.

"I'm looking for Hunt to improve his swing and for Essenpreis and Neuville to keep upping their scores," Leuell said. "We may move up a couple spots in conference in spring. There are definitely two teams we can beat; there's no way we'll end up in anything less than seventh place. It's something to look forward to for spring. I really think we'll do better. I think the guys are improving, and that's what they're striving for."

Hunt agreed that are several factors the Miners need to work on.

"There's all kinds of room to improve for spring. Personally, I'm still working on my swing change. It's becoming more consistent and hopefully I'll have better scores next spring and next year. As a team, we still need to find a way to get four scores together."

Adlard had several positive notes to make about the team's improvement this season.

"We're playing better as a team, but we still need to work on our scores. I've definitely played a lot better this semester compared to last year. I've competed in almost every tournament this year, whereas last year I played in virtually none. I think as a team we're looking forward to shooting better scores and show the other teams that we can play and compete at their level. We have the ability to shoot low scores, but we just aren't able to keep our focus during the tournaments."

The Miners currently stand in 7th place among their nine conference peers. Central Missouri State University, who has come in first in every conference tournament this season, tops the schools with 27 points. Truman State is a close second with 23 points, followed by Lincoln University and Washburn University with 21.5 and 17.5 points, respectively. The two schools the Miners are hoping to overtake in spring competition, Missouri Western and Missouri Southern, currently have 16 points and 11.5 points, respectively, versus the Miners' 9.5.

Pittsburg State (6 points) and Southern Baptist University (3 points) take the last spots in conference.

The men's golf team will have four more MIAA sanctioned events in the spring, the first being held April third and fourth in Warrensburg, Missouri, with Central Missouri State hosting the tournament.

Soccer teams have a good weekend playing at home

by Marci Medley
Staff Writer

The University of Missouri - Rolla men's soccer team got back on track with two shutouts at home this past weekend. The Miners lost their first game since Sep. 6 to Baker University on Sunday, October 18. This ended the Miners nine game winning streak.

"We worked really hard during practice this past week," UMR's Scott Vogelsang said. "We have realized that we are going to have to play well and win for the rest of the season if we want a chance to make it to the tournament at the end of the year. This has been one of our goals since we started the season."

On Friday, the Miners shut out Missouri Baptist at home. UMR's Nathan Wojciekiewicz scored at 29:06 with the assist by Brian Koscielski. At 50:44, UMR's B.J. Stuhlsatz scored an unassisted goal. This brought the score to the final 2-0.

The Miners had 25 shots on goal during the game. MBC goalie Matt Kastner saved 10 of those shots.

"We got our winning streak back because things went our way this weekend," UMR's Ben Cunningham said. "We played good soccer Friday but again we couldn't put lots of goals on the scoreboard."

On Sunday, the Miners were out to win again playing William Woods. UMR's Brian Koscielski scored the only goal of the game at 89:30 with assists by B.J. Stuhlsatz and Matt Long.

Despite the low scoring of the game, UMR had 15 shots on goal, with William Woods only having two. William Woods goalie Jeff Strange saved four of UMR's shots. UMR goalie Jeff Hougland saved one of William Woods' shots.

Vogelsang said, "We decided in practice this week that in order for us to win, we need to control the ball

more and just knock it around. That is basically what we did in the two games. We just tried to play keep away and score when we had the opportunity."

This week the Miners play McKendree at home on Wednesday, October 28 at 7:00.

UMR's BJ Stuhlsatz said, "I'm not too sure what to expect. But it is a home game and its on Wednesday so the team will be ready to go."

On Saturday Oct. 31, the Miners play Quincy at Quincy, Illinois at 7 p.m.

"Both games will be tough," Cunningham said. "We have to win if we want to prove anything to the other soccer teams. These are two quality teams that we can beat, and we need to prove it."

Vogelsang also agreed with Cunningham, "These are going to be very tough games. They will make or break our season. In order to win, we are going to have to play our game and we will have to play much better than what we did over the weekend."

The University of Missouri - Rolla women's soccer team won two games this weekend to bring their record to 8-6-1.

The Lady Miners battled Missouri Baptist College on Friday at home. MBC's JoAnna St. Gemme scored at :58. The Lady Miners were not phased by this and UMR's Lori Douglas scored at 21:31 with an assist by Jen Splaingard. UMR's Sara Rudy also scored at 45:41 with the assist by Lizz Szkyrbalo.

On Sunday, the Lady Miners shut out William Woods. Of UMR's 13 shots, 4 of those were goals. UMR's Jen Splaingard and Sara Rudy each put in a shot for the Lady Miners. UMR's Denise McMillan had two goals.

On Saturday Oct. 31, the Lady Miners take on Quincy at Quincy, Illinois, at 4:30 p.m.

Conference

from page 5

"The team didn't perform to its potential. We should have run better and our times should have been a lot faster," Garrison said.

"Part of it might have been from [academic] stress from the week before. Our pack time needs to be better, anyway, and we need to work on our mental preparation. We've improved over the course of the season, though. Everyone's overall times have dropped. Personally, I've worked on improving my endurance and speed when reaching the second and third mile markers," Garrison added.

The Miners felt they got better through out the season, but still see room for improvement before the next race.

"We still need to work on running together and improving our pack time," McGuire said. "I think I've personally gotten better at running longer races and made the transition from running in high school to college."

Anyan agreed, "We need to work as a team and race with each other more. We've gotten in better shape as the season's progressed, and I think several of the younger guys have learned what it means to really race. We know how to compete now rather than just go out and run."

The UMR cross-country teams will have two more weeks to prepare before heading to regional competition in Hillsdale, Michigan. The National Collegiate Athletic Association Great Lakes Regional will be held Saturday, Nov. 7, with Hillsdale College hosting the event.

McGuire is hopeful of the outcome for the Miners in the upcoming races. "I think we should do well at regionals. If we run strong I think we can beat some of the teams we lost to at conference," McGuire said.

Qualifying at regionals to go on to the NCAA Division II Championships is tough, Preston noted.

"Only the top five men's teams and the top three women's teams are chosen to go, and there are about 25 teams present. Also, the top two individuals outside of the team competition are selected. I think Hagen has the potential to make it to the Championships, but you need to run the race of your life on that day. Ben Mulvaney made the cut a couple of years ago. Hagen is in good physical shape and should be ready to put up a good race," Preston said.

The Miners are looking to place among the top ten teams at the meet in Hillsdale.

Emporia State will host the NCAA Division II Championships in less than a month. The final meet will be held Saturday, November 21st, in Lawrence, Kansas.

NFL UPDATE

Week 8

New Orleans 9
Tampa Bay 3

Fast Fact: Doug Brien kicked three field goals, including a 50-yarder as the Saints stopped the struggling Buccaneers offense yet again. Neither offense was very good with the teams combining for a total of only 23 first downs on the day.

San Francisco 28
St. Louis 10

Fast Fact: The 49er defense was in Rams' quarterback Tony Banks face all day. The 49ers had eight sacks but racked up an amazing 40+ blitzes on the young quarterback. Despite playing well most of the game a tired St. Louis defense gave up several big plays to the 49er offense.

N.Y. Jets 28
Atlanta 3

Fast Fact: The Jets' offense was efficient with Curtis Martin rushing for 101 yards. But the defense held Atlanta and 44-year old backup quarterback Steve DeBerg to a mere 202 yards of total offense.

Minnesota 34
Detroit 13

Fast Fact: A 13-10 halftime Lions lead quickly disappeared as the Vikings rattled off 17 unanswered points in the third quarter.

Miami 12
New England 9

Fast Fact: Olindo Mare was this week's hero for the Dolphins as he booted four field goals including a 44-yarder in overtime to give the Dolphins a victory against their staunch rivals the Patriots. The Dolphins took over the top spot in the AFC East with the victory.

Green Bay 28
Baltimore 10

Fast Fact: Packer quarterback Brett Favre broke out of a three week slump by throwing for two touchdowns and running for another in what was otherwise a sloppy Packer victory.

Chicago 23
Tennessee 20

Fast Fact: Jeff Jaeger won the game for the Bears for the second straight week, this time on a 33 yard field goal with a minute left. The story of the game, however, was turnovers as the Oilers had four which the Bears turned into 17 points.

Oakland 27
Cincinnati 10

Fast Fact: After starting the season 1-2 the Raiders, under new head coach John Gruden, have rattled off four straight victories this one on the unlikely arm of backup quarterback Donald Hollas.

Seattle 27
San Diego 20

Fast Fact: This game came down to the wire as Ryan Leaf and the Chargers had three opportunities at the end zone in the closing seconds, each of which a pass that fell incomplete.

Denver 37
Jacksonville 7

Fast Fact: Denver's Jason Elam tied a 28-year-old NFL record held by Tom Dempsey when he kicked a mammoth 63-yard field goal at the end of the first half.

Buffalo 30
Carolina 13

Fast Fact: After an atrocious 0-3 start the Bills have won four straight and the diminutive Doug Flutie has been the catalyst. Flutie was 9-for-12 for 184 yards and two touchdowns in the first half alone.

Miner football suffers tough loss to Missouri Western

by Randal Burd
Assistant Sports Editor

The University of Missouri-Rolla's football team lost their eighth straight game last Saturday. Missouri Western shut out the Miners 39-0, making this the second game this season in which the Miners have been scoreless.

Despite a valiant performance by the Miners' defense, Missouri Western scored once late in the first quarter, Brandon Burnside receiving a 19-yard pass from Kasey Waterman to score with 3:08 left in the first quarter. Mike Connaker followed up with a second touchdown on a five yard run early in the second quarter. Missouri Western scored again late in the second quarter when Charles Spenser ran a 12-yard touchdown.

UMR received the ball in the second half but, unable to advance, returned possession to Missouri Western, allowing Charles Spenser to score another touchdown on a six-yard run and Regi Trotter on a five-yard pass from Kasey Waterman.

One final touchdown was made by Missouri Western in the fourth quarter, Brandon Burnside returning a 57-yard punt to put the finishing touch on Missouri Western's 39-0

victory.

This is the first time the Griffons have had a shut-out since September 30, 1995 when they shut out Southwest Baptist.

It was a fairly large crowd witnessing the game, recording an attendance of 4402 spectators in Spratt Stadium. Despite their victory, Missouri Western made a few mistakes they would have liked not to show their supportive home crowd.

They had problems with their kicking, missing three out of six extra points with two different kickers, fumbled the ball twice, and allowed UMR three interceptions. The first was a pass by Kasey Waterman intercepted by UMR's Dean DeSherlia for a return of six yards.

Matt Weber replaced MWSC's Kasey Waterman in the third quarter and had his pass intercepted by UMR's John Foster for a 25-yard return.

Matt Weber had a pass intercepted once again in the fourth quarter, this time by UMR's Jeff Fuls for a one-yard return.

UMR once again had trouble moving the ball, gaining 76 yards in 57 offensive plays, compared to Missouri Western's 463 yards in 77 offensive plays.

They were also successfully sacked four times by Missouri Western. Matt Brueckner was sacked in the third quarter, first by Josh Oyler for a loss of thirteen yards, then again by Hamilton Crowder for a loss of five yards.

Sam Petty went in for Matt Brueckner late in the third quarter and was sacked by Rick Moeckel for a loss of five yards, then was sacked again in the fourth quarter by Andrew Pinegar for a loss of ten yards.

UMR is now 0-8 for the season and 0-6 in the MIAA, holding last place in the MIAA rankings. So far this season, they have scored only 54 points and allowed their opponents 247 points. So far, UMR leads its opponents only in penalties, yards lost rushing, and number of punts.

Attendance also reflects the negative turns of this season for the Miners. While opponents have been averaging an attendance of 5078 per game, the Miners are averaging only 1200 people for game—a low, even for UMR.

UMR has three games left to play this season, against Missouri Southern, Emporia State, and Southwest Baptist. The Miners next game is Saturday, Oct. 31 against Missouri Southern in Rolla at 1p.m.

Cycling competes in St. Louis

by Dan Fuhrman
UMR Cycling Club

Three members of the UMR Cycling Club competed in a cross-country mountain bike race on Sunday, October 25 at Castlewood Park in St. Louis.

The race was a NORBA (National Off Road Bicycling Association) sanctioned event that featured a 3.5-mile course.

The beginner class race was two laps long, and the sport class race was four laps around the course. Racing in the beginner class, Ian Hoffman placed 14th out of 39 entrants.

In the sport class, Chris Deck finished 10th out of 16 riders. Dan Fuhrmann managed to place 12th in the same race despite having one flat tire, two crashes, and a broken suspension fork.

This week, I've break from the we offer you some fre your vehicle.

Have you ever ticketed at UMR? W your ticket costs half? I suggest ha ing your car regi tered with the UM parking lot oper tions (located in t same building as st dent health). Ma students don't kn that it is illegal f them not to ha their car register with the Universi What this means receives a ticket (without a permit meter), you will ad fine of \$10 every et. The main rea registration is to be recreation center registration sticker a permit for only only UMR student Other studen ously had parking or silver lots assu still registered expired. This as Registering your takes maybe a mi paperwork. After car, you will get sticker to attach to your car. Hopefu your registration money.

Verve

The virtue of friendliness when dealing with people

by Walter Rader

Verve Writer

I dislike working retail with a passion. Two summers ago, I was a cashier at a large sporting goods store. It was always very busy: \$12,000 would pass through my drawer in a single shift. Countless people from all over the country came through my line.

At first I hated my job because I didn't know what I was doing, and that was very stressful. But after I caught on, I began hating it for an entirely different reason. I noticed a disturbing pattern of behavior in the majority of the customers I serviced. I would greet them with a smile; they would grunt or mumble unintelligibly and do their best to avoid eye contact.

When I told them the total cost of their purchase, they would throw their money on the counter. When I thanked them for coming and wished them a good day, they would turn around and walk off silently.

"What could be wrong with me?" I asked. I tried to be even more friendly. They acted the same. I tried using a southern accent and found no change. I smelled myself. That wasn't it, I

smelled fine. I tried a British accent and just got funny looks. I realized that I was doing everything I could, but that people were simply

unfriendly. That angered me. Every day I had to use my lunch break to cool off.

I thought about what I could do. At first I considered bringing a handgun to work and unloading a round into the legs of all customers who didn't smile at me. Though personally gratifying, I decided that route wouldn't

be very socially acceptable. And I probably wouldn't get to shoot many people before I'd either lose my job or be arrested.

I began devising subtle ways to enact my revenge and came upon a perfect idea: when I stapled the customer's receipts onto their bags

(as was store policy) I would staple those of the people I didn't like upside down! It was brilliant! I bet hundreds of people wondered why I was smiling demonically when I loaded up their carts.

Fortunately, there was a small group of people that helped preserve what remained of my sanity.

Some customers would speak to me as they came through! They would ask me how my day was going. Some customers would thank me

after I loaded their cart. Some customers would wish me a good day! And some customers would only smile, but that was all it took.

Those few blessed people made some effort, no matter how small, to treat like they would have liked to have been treated.

After they passed through, I would be happy once more. And then the next batch of customers would drain me again. I was walking back from class last week, talking to a friend about school.

"After being at UMR for a year, I've decided that I fit in with the people that go to school here. You know, they stay in their rooms, sort of anti-social. I mean [he laughs] on other campuses you can meet people on the way to and from class."

Boys and girls, I'm afraid to admit it, but we've got a reputation. And we've got one besides being the school with the largest per-capita consumption of green beer. People think we're unfriendly, and that's not something to be proud of.

TO BE CONTINUED NEXT WEEK...

The Broke College Student:

Auto tips that may save you money

by Holly Hawkins

Verve Writer

This week, I've decided to take a break from the web sites in order to offer you some free advice regarding your vehicle.

Have you ever gotten a parking ticket at UMR? Would you like to cut

your ticket costs in half? I suggest having your car registered with the UMR parking lot operations (located in the same building as student health). Many students don't know that it is illegal for them not to have their car registered with the University.

What this means is if your vehicle receives a ticket (ex. Parking in a lot without a permit or not paying a meter), you will additionally receive a fine of \$10 every time you get a ticket. The main reason that cars need registration is to be able to park in the recreation center parking lot. The registration sticker acts somewhat like a permit for only that lot, allowing only UMR students to park there.

Other students who have previously had parking permits in red, gold or silver lots assume that their car is still registered after their permit expired. This assumption is false. Registering your car is free and only takes maybe a minute to fill out the paperwork. After you register your car, you will get a black and white sticker to attach to the rear outside of your car. Hopefully, in the long run your registration will save you some money.

Have you ever gotten pulled over by a cop for speeding? (I know I have.) Have you ever gotten a ticket? (I sure haven't.) Several tips exist that will help you if you are put in this situation. First and foremost, if the officer asks you how fast you were going, never answer him. I know it sounds like common sense, however many

people truthfully answer the question and when they try to appeal the ticket, they have inadvertently testified for the opposing side.

The following tidbit is for females: if you have any expensive jewelry on, take it off and hide it. The poorer

you look, the more likely the cop is to have sympathy for you (trust me—cops like to stick tickets to people they think will be easily able to afford them). Crying or acting nervous/stupid can also work if you're a girl. One time, on my lunch hour, I was pulled over. I started crying to the officer, giving him the sob story of how I had numerous errands to run in only thirty minutes (I really had an hour), and if I didn't get back in time, I'd lose my job...etc. Needless to say, I got off with only a warning.

If your car is a piece of junk, like my first car was, play that fact up especially if it has something wrong with it. Cops tend to feel guilty when stopping people only to find various colors of smoke coming up from under the hood, or a temperature indicator located at "H" as in hotter than

see Tickets, page 22

Missy's Music Review:

Vanilla Ice tries to revive himself

by Missy McLean

Verve Writer

This week's reviews include: Morrissey, Reel Big Fish and Vanilla Ice. Geez...talk about a wide range of music. Yes, Vanilla Ice has come back from the dead. If you're wondering what he's done with himself, read on.

As always, I recommend suggestions from anyone regarding music to review. If you have found a new album that you really like, let me know. If it's that good, I might appreciate knowing about it. Honestly, word of mouth is the best way to find out about great music.

In the cd player this week: Morrissey "My Early Burglary Years"; Reel Big Fish, "Why Do They Rock So Hard?"; and Vanilla Ice, "Hard to Swallow".

Ratings: ***** — Excellent; **** — Good; *** — Buy It Used; ** — Tolerable; * — Microwave It!

"My Early Burglary Years,"

Morrissey

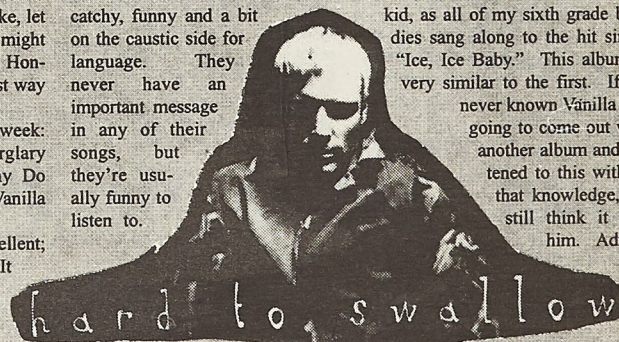

As a self-proclaimed Morrissey hater, I was extremely surprised by this album. A few of my good friends are huge fans of the Smiths and Morrissey, and they were really excited when I told them this album was out. Anyway, I listened. I listened again, and again...I didn't get bored. It is a beautiful album by a guy that has been producing music for over a decade. The first track, "Sunny" was great, as was the unre-

leased version of "Cosmic Dancer." My favorite track on the album was "I've Changed My Plea to Guilty," a very passionate song about how freedom is often wasted. It really made me think. I almost cried...okay, maybe I didn't. It is still a beautiful album. Rating: ****

"Why Do They Rock So Hard?"

Reel Big Fish

Reel Big Fish's second album is much like their first: catchy, funny and a bit on the caustic side for language. They never have an important message in any of their songs, but they're usually funny to listen to.

Pit." "I Want Your Girlfriend to Be My Girlfriend Too" is really funny, although it sounds a lot like "She Has a Girlfriend Now" from the first album. Anyway, they're an entertaining, talented group. I just didn't really like this album as much as I had hoped. Rating: ***

"Hard to Swallow," Vanilla Ice

I giggled at the prospect of reviewing this album. I remember how much I hated Vanilla Ice as a kid, as all of my sixth grade buddies sang along to the hit single "Ice, Ice Baby." This album is very similar to the first. If I'd never known Vanilla was going to come out with another album and listened to this without that knowledge, I'd still think it was him. Admit-

tedly, he's gotten a little more creative, as he has decided to dabble in industrial and metal. Like Reel Big Fish, he's gotten a little more profane. It sounds a little like a cross between Marilyn Manson and Beastie Boys with a lot less talent. I sort of liked one track, "Prozac," because it had a nice starting beat. If nothing else, it was entertaining. I got to have a trip down memory lane. At least his hair looks a lot better... Review: **

Organizational Update

Student Council to vote on activity fees

by Julie Crow

Student Council

At the November 10 meeting, Student Council will be discussing and voting on Student Activity Fees for the 1999-2000 school year.

Student Activity Fees pay for everything from the programs SUB puts on to the operation of the University Center and the Golf Course.

If you are interested in having a

say in how much your fees will be for the upcoming year, please come to the meeting and voice your opinion.

As many of you know, Student Council passed a resolution to get more student input on the tenure process. This has become a system-wide issue and is being discussed at the other three University of Missouri Schools. The issue is being taken to the system administration in an effort to make the student

input a university policy.

Stuco will be offering an income tax assistance program next semester. If you are interested in being trained to help with this, contact the Student Council office for more information.

Stuco will be offering the service free to students, and we are looking for a service organization to have members trained to help underprivileged members of the Rolla community.

SUB brings forth horror films and hypnotists

by Steve Truemper

SUB

Scream is a rarity: a horror movie spoof that succeeds almost as well at provoking scares as it does at provoking laughs. Complete with a large-breasted, female protagonist who does some incredibly dumb things while most of her friends end up getting killed before the final reel.

That's because director Wes Craven (*A Nightmare on Elm Street*), in addition to having a genuine affection for the genre, understands how wildly improbable and easy to lampoon horror movies are.

I Know What You Did Last

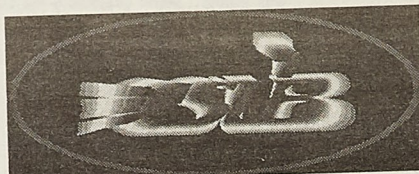

Summer tells the story of four friends who venture off to college to pursue their respective dreams, they're out celebrating the July 4th holiday on the beach.

Along the way home they accidentally hit a passer-by while quickly cruising up a windy mountain road. They decide to dump the body off a nearby pier. A year later someone knows and the four are stalked by a psycho clad in Gorton's Fisherman getup — a rain slicker and hat that mask his identity.

Both of these movies SUB will be showing this Friday

and Saturday in ME 104. *Scream* Starts at 7 p.m. with *I Know What You Did Last Summer* following at 9 p.m.

This Saturday in Centennial Hall at 8:00 p.m., SUB presents Christopher Carter, a Hypnotist and Mentalist that will know how much change you have in your pocket before you do. Bring your parents and see if he can hypnotize them.

Fraternities and Sororities helping the community

by Nathan Frasier

IFC

This year, the philanthropy efforts of the University of Missouri-Rolla's Greek system are well under way. On October 20, the Interfraternity Council and Panhellenic Council donated \$3000 to local Rolla charities.

These two organizations are the governing bodies of the Greek system and are responsible for hosting this year's Greek Week celebration in September.

The money was raised through

events coordinated by the IFC, with every fraternity and sorority doing their part to help raise the funds.

The largest two events were the Aluminum Drive and the Greek Carnival. The Aluminum Drive was held in conjunction with Ransdal Recycling and raised over \$2000.

The Greek Carnival was at Lion's Club Park. Each house constructed a carnival booth for the event. The carnival raised close to \$1000 and was open to the public.

This year's donation from the Greek community was split between four local charities. Big

Brothers/Big Sisters of Rolla and the Russell House for Battered Women and Children. Each received checks for \$1000.

The Gingerbread House and the local chapter of Special Olympics each received checks for \$500. Also notable this year was the canned food drive during Greek Week.

On the Thursday of Greek Week, UMR students donated over 7000 cans to the Salvation Army. The cans will be distributed over the course of the next year to needy families in the Rolla area.

UMR TECHS: You got game?

by Ginny Heaton

UMR TECHS

Hot Shots, the annual late night sports tournament organized by the UMR TECHS, is coming your way October 30. This event provides a fun alternative to alcohol use on a Friday night. Running from 10pm to 3 a.m., Hot Shots is the culmination of the IMPACT month events of October.

During the night, you can participate in co-ed volleyball, 3-person basketball, racquetball, or ping-pong tournaments. Come for free pizza! Hebbeler Bottling Company has graciously provided us with their annu-

al donation of soda. SUB will be providing the music.

Throughout the night, TECHS give away prizes to participants who can answer healthy lifestyle trivia questions. Many local business have donated these prizes in their support

of the Hot Shots tournament.

Tournament champions receive T-shirts provided by TECHS. We challenge you to get a team together

and join us for one of hottest events of the year!

Applications are available at Student Health Services, Student Affairs, or on the web at <http://www.umar.edu/~techs>. Faculty and staff are welcome to join the students. There is no application fee. Deadlines for teams are October 29. On the night of the tournament, check-in will begin at 9:45 p.m. and end at 10:15 p.m. Game time will be determined by a double elimination tournament. If you have further questions, please contact Ginny Heaton at 341-3560 or e-mail vheaton@umar.edu.

ROTC: Arnold Air Society

by Nicholas E. Delcour

Air Force ROTC

Arnold Air Society is a service organization designed to provide a valuable service of hard work and selflessness to the community. It is composed of Air Force ROTC members, but is not a requirement for ROTC cadets.

Arnold Air Society participates in and performs several projects every semester to help out the community and better the individuals in the society.

For instance, this semester we are planning a POW/MIA vigil.

In honor of all the POWs and MIAs we will keep a candle lit for 24 hours out at the puck, look for us on Veterans' Day.

We have also done completed many projects with the students at Choices for People. This is a school for the mentally handicapped.

They are always so eager to see us and we have made many friends there as well as jack-o-lanterns, Valentine's Day cards, and Easter eggs.

We have heard courageous stories of war time heroism from veter-

ans over a game of bingo at the local Veteran's home.

The missions for Arnold Air Society are formally defined as:

- To create a more efficient relationship among Air Force officer candidates.
- To aid in the development of effective Air Force officers.

To further the purpose, traditions, and concepts of the USAF.

To accomplish these through serving the community.

If any group, organization, or individuals have any information that might help us to perform our missions please phone at 341-6438 or e-mail

pawling@umar.edu.

Silver Wings Society is a civilian counterpart to our organization.

We currently do not have a unit here at UMR, but the Arnold Air Society would like to aid in the establishment of a local unit, which would be designed specifically to help the community. For information please phone or email the above number or address.

Arnold Air Society motto: "The warrior who cultivates his mind polishes his arms."

Blue Key introduces the "Miner of the Month"

by Joe Morton

Blue Key

The Blue Key Miner of the Month for September is Amy Young. The Miner of the Month Award is

awarded to individuals on campus that make outstanding individual service contributions on the UMR campus or the Rolla community. Amy is a junior and is a member of Chi Omega Sorority.

Amy visits the Rolla Animal Shelter five or six times a week and volunteers her help to care for the animals. Each visit, she spends approximately an hour giving the displaced pets the attention they deserve and treats to eat.

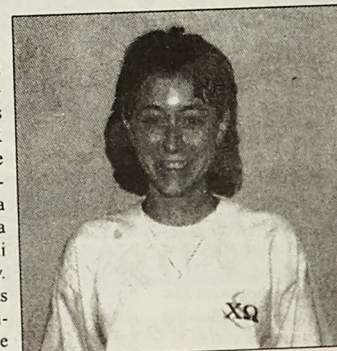

In addition, Amy attempts to find homes for the animals in the Rolla area. Her many hours of work are greatly appreciated by the Animal

Shelter since they cannot always spend time with individual pets.

Blue Key National Honor Fraternity is proud to sponsor the Miner of the Month Award.

UMR organizations and individuals volunteer hundreds of service hours per semester in the Rolla community. Although many organizations receive recognition for their work, Blue Key aims to recognize individuals who go the extra mile to help tutor elementary students, work in scouting-based organizations,

care for animals or volunteer in the many local service opportunities. Every organization on campus receives a copy of the Miner of the Month application each month. If you participate in individual service work in October, be sure to fill out an application.

Groovin' to the music (in my head)

by Nick Skupnik, G.I.T.

Verve Writer

All the greats have theme songs. Why don't I have a theme song? What better than a characteristic song to announce my entrance every time I enter a room? What better than a theme song to set the tone for me?

Everyone knows a hero by his/her theme song. Everyone remembers the jingle that announces a television show. Who can't tell that MASH is coming on when "Suicide is Painless" starts playing? Who won't look for Batman (and Robin) when their song comes on? Who can forget the classy and mysterious beat that plays in the background when James Bond is on the prowl? Who won't

laugh and think it groovy when Austin Powers is running from a crowd during "Soul Bossa Nova?"

I need a theme song. Just imagine it. I could walk around with it on a cassette or compact disc in a portable player. I would have small speakers strapped to my sides (about the size of headphones). So all this preparation wouldn't be that noticeable. Then, I'd just hit play. And walk — no, I'd groove down the street or hallway. And everyone with a certain distance would see me grooving to my theme song. I'm almost positive it would become a classic.

Until I can get that little arrangement hooked up, I am forced to rely on my own musical talent. I can hum my theme song while I walk. But that

gets old after a while. I could sing, but people would start disliking my theme song then. It would be neat if I had a full marching band of sorts to follow me, playing my theme song. But that would get expensive. So, the best arrangement I can come up with now is to just go about my business as usual ... grooving to the music in my head.

It's not too bad, really. This way, I can be the only one who knows my theme song until I plan to reveal it to the world at once with loud speakers. Plus, it doesn't get overplayed. It can be updated. It can keep me groovin'. I just walk down the street, groovin' to my tunes, with a big ol' smile on my face, having a grand ol' time ... just me and my theme song.

Free Fall Film Fest: La Cérémonie

Sandrine Bonnaire, Isabella Huppert. Directed by Claude Chabrol. With his 45th film in nearly four decades of filmmaking, Claude Chabrol returns to form with a vengeance. This riveting drama of secrets and lies is based on A Judgment in Stone by English mystery writer Ruth Rendell. *La Cérémonie* is a euphemism for capital punishment. 1996-R. French with English subtitles.

This film will be shown on Tuesday, November 3 in Miles Auditorium (ME 104) of the Mechanical Engineering Building. This film is free of charge.

Where did Halloween come from?

by Jonathan Erdman
Managing Vampire

When and where did Halloween originate?

The name Halloween came from the name "All Hallows Eve" meaning, the day before All Saints Day. All Saints Day, Nov. 1, is a day in which many Christian denominations honor saints in the church. The name Halloween evolved from a contraction for "All Hallows Eve."

This still doesn't explain why people wear costumes and masks on Oct. 31. That tradition began in Ireland in the fifth century BC. The

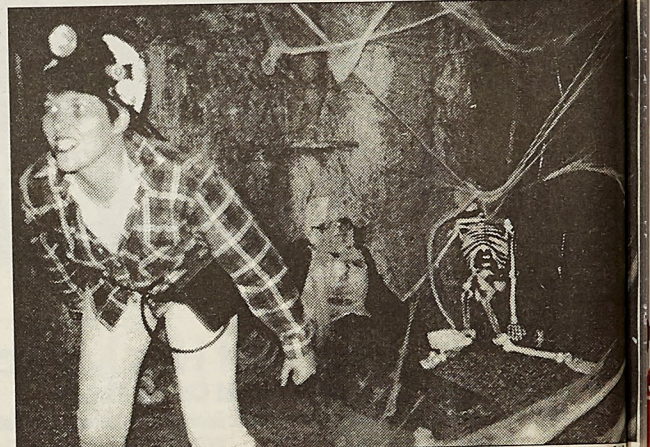

beginning of the Celtic new year was celebrated on Oct. 31 and was known as Samhain (pronounced sow-en). It was believed the spirits of the dead could come back to earth on this night to find a body to possess. Those living under this belief did not want to be possessed, so they dressed up in scary costumes and masks and made a great deal of noise to scare away the spirits. Therefore, they would avoid being possessed.

Now to the candy... Why do many children in this country parade themselves around neighborhoods looking for sweets. Some believe this tradition dates back to an early Euro-

pean tradition called "souling." People went door to door begging for cakes called "soul cakes," in return for these cakes the person promised to say a prayer for one of the giver's relatives believed to be in limbo, and thus help them on their way to heaven.

The holiday Halloween was brought to the United States with Irish immigrants in the 1800's because of the potato famine in their country.

So, now that you know where it originated, go out, dress like a ghost, goblin or whatever you wish, beg for candy and eat more than you should and have a Happy Halloween.

Stephanie Marlin ('98 Min E) tries to scare us all to death with grin and her dead friends.

With writer's block comes the writer's head

by Nick Skupnik, G.I.T
Verve Demon

It was a dark and stormy night... the writer couldn't think about anything to write on for the newspaper. He stayed up all night thinking ... thinking ... thinking.

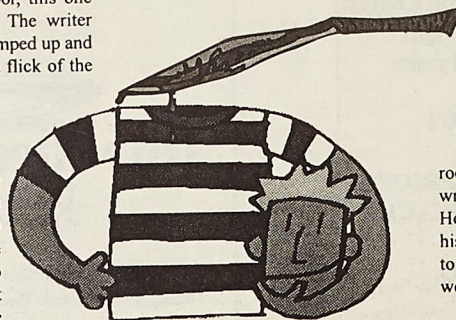

The deadline was approaching. The writer didn't realize the full stakes placed on this deadline. He thought all he had to do was write an article. Little did he know, a psycho fan had placed more than an article on this deadline. There was a knock at the door...

The writer, consumed in his own thought, didn't notice. Another knock. The writer still didn't notice. Lightning struck outside the window, startling the writer. He jumped up, but failed to notice the shadowy figure in

the bushes. The writer calmed himself down, and attempted to get back to writing his article again. Another knock came from the door, this one louder than the others. The writer was startled again. He jumped up and went to the door. With a flick of the switch, the porch light was on, and no one was there.

Slightly perturbed, the writer slipped off the light and went back to his desk. He had to finish the article soon. As he collapsed his head into his hands, frustrated at his writer's block, he noticed a piece of paper on top of his memo pad. On the paper was written "WRITER'S BLOCK?" in unrefined letters. The writer suspected the

author had better handwriting than this. Maybe it was the fact that it was written in blood accounted for the

sloppiness. The writer threw away the paper and got back to thinking ... thinking ... thinking.

The phone rang. The writer fell

back in his chair in surprise. Quickly recovering, the writer got up and answered the phone. No answer.

Then, before he hung up, he heard the sound of a click - as if the lines had just gone down. Shrugging it off, the writer turned back to concentrate on his article. To his surprise, his papers (which were still blank) were being blown across the room. The window was open! The writer decided this would not do! How was he supposed to work when his floor was getting rained on? Not to mention the fact that his papers were now all over the room.

The writer walked over to the window to close it. After struggling with the stupid latch (as he affectionately called it), he finally forced it closed. But the water on the floor! He

had to clean it up he decided. But he forgot about getting the mop when he saw the knife in his table. "Great!" he thought. "That was oak!" He went over to the table and pruned the knife from the top. The writer was surprised to see carved into the table the words "SEE PAPER" followed by an evil-looking eye. "What an artist!" exclaimed the writer at seeing the eye. And for good reason, the eye was carved remarkably well. Next to it was another paper. The paper had the words "DEADLINE COMING SOON," again scripted in blood. After having thrown the knife and the paper into the trash, the writer got back to thinking about his article. After all, the paper was correct. His deadline was coming soon. So he sat

is some to help you celebrate your special terrifying day...

fall to scream and howl!

St. Louis and Columbia can have some scary fun too

by Holly Hawkins

Verve Cat

If you are like many students who want a break from Rolla before the third round of being reamed by tests come around, Halloween offers the perfect remedy. Granted, getting out of this town is fun enough for most people, a few of you out there are looking for something unique to do during this macabre weekend. The suggestions that follow will ensure that you make the most of the holiday.

Saturday, October 31- Halloween Masquerade Ball at The Blue Note (Columbia). Attention witches, werewolves, vampires and all you other creatures of the night, the only place to be this Halloween is The Boo Note. Come wake the dead with the best in ghoulish dance music and a cryptic Costume Contest. During this event, the place is jam packed. I went last year and saw people dressed as everything from Austin Powers to Playboy Bunnies. The party usually goes until the wee hours of the morning.

Halloween- Haunted Lemp Brewery caverns (St. Louis). Nightly tours are from 7pm-Midnight. Many

believe that this is the one true haunted area in St. Louis because of the tragic history of the Lemp family. Across the street, you can visit an insane asylum that was recreated to model one that existed in St. Louis in the 1890's, complete with crazy people ranting and raving throughout the halls. Tickets for both attractions cost \$19 (\$14 for brewery alone) and more information can be obtained by calling (314) 664-6668.

Six Flags Fright Fest (Eureka). On Halloween, for the price of regular admission, you can experience 40 ft spiders, giant apes and more Halloween scenery. To find out more, call (314) 938-4800.

November 3rd- Silo X Haunted house in St. Louis. Silo X is a chain of haunted houses. Features for this year include "nuclear nightmare," "major missile warhead meltdown" and "mutants abound." Although I don't have specific directions, I do know that it is located off of I-44 and Missouri 141 in the Valley Park area and costs \$13 to get in. I've heard mixed reviews about Silo X; some people really liked it, while others didn't. You'll have to judge for yourself.

Rocko's Review:

Scary Halloween Flicks

by Justin Sutherland

Reviewer-at-Large

You say you want to get into the Halloween spirit? What better way than to watch one of an assortment of horror movies? It all depends on what you are in the mood for: something old, something new, something scary, something askew. There is a little something for everybody within the genre of horror movies.

I must concede, though, horror movies are not my specialty. Whereas I enjoy them as any other movie I watch, it sometimes takes a more sinister element to delve a little deeper into the "horror" of the genre. For this I sought the expertise of an authority on horror movies, new and old.

To love such a genre, a person would have to be demented, psychotic, or just plain weird. Nevertheless, Rocko's twisted half-sister, Grace (really she's not that twisted), knows what she is talking about when it comes to horror movies. So I picked her brain as to what made some of the great horror movies great. With that in mind, here are her impressions of some of the top horror movies (I am sure there are some great horror flicks missing from the list, but one can only put so much in a newspaper article). And I hope this helps you when picking out just the right movie for Halloween night.

Horror/classics

**Psycho* (1960): This is one of the best horror movies of all time. What makes it so fabulous is the fact that you don't see everything. Hitchcock seems to know that nothing he could put into a movie could scare each individual person, so instead he offers suggestions and lets the individual mind and imagination run with it, creating an individualized horror experience.

**Dracula* (1931): This movie is a classic for a reason. No, it is not scary at all, but the glimpse into the way movies used to be made (i.e., before special effects became such a hot commodity) is certainly worth any movie buff's time. The lighting and overly dramatic gestures and facial expressions make for an amusing and entertaining experience. Incidentally, I have always enjoyed this movie more for the brilliant performance of Dwight Frye as Renfield rather than the Lugosi Dracula.

**The Body Snatcher* (1945): This offers another glimpse into "the way things were." Personally, I don't find it to be as entertaining as *Dracula* or as suspenseful as *Psycho*, but it was made in an era of good old-fashioned horror flicks, and so remains a classic for that reason.

**Bride of Frankenstein* (1935): Held by many authorities to be the best horror movie of all time (I don't agree, but it is quite entertaining)

**Plan Nine From Outer Space* (1958): Ed Wood's film that was voted the worst film of all time. This has resulted in its becoming a cult classic and a guaranteed side splitter.

Horror/"New classics"

**The Shining* (1980): Stephen King remains to this day the master of horror literature, and this is one movie that truly does his writing credit. Though certainly not as good as the book, it is a chilling movie. Jack Nicholson portrays to a tee the cabin-fever-struck man gradually losing his mind. What makes the movie so accessible is the fact that he is an everyday man, and the movie illustrates what could easily happen to any of us cooped up for long enough.

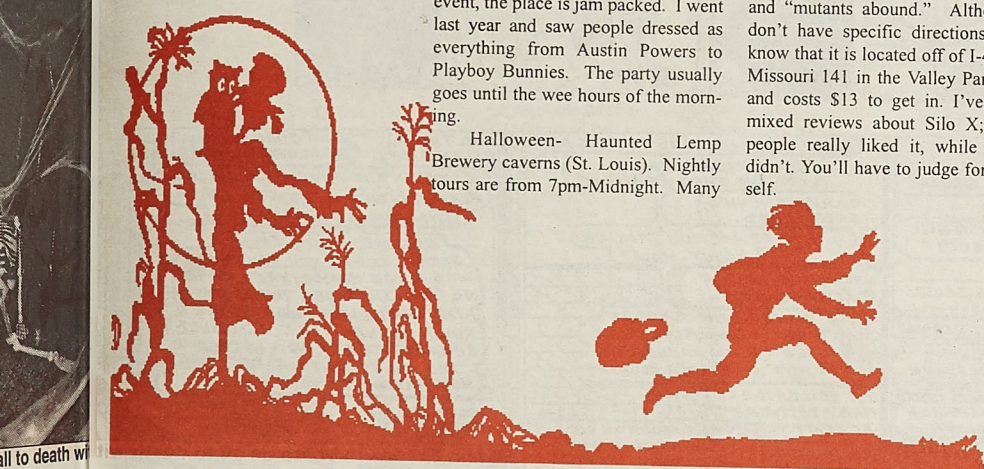

**Poltergeist* (1982): This movie is a "new classic" because it was one of the first to include what we think of today as the stock horror movie special effects. Though they look cheesy now, the movie provides an interesting glimpse into the history of special effects.

**The Omen* (1976): This is a must see for any new parents. The horror of realizing that one has raised the spawn of Satan is a perfect premise for a horror movie. What really makes this movie great is the soundtrack of

see Movies, page 22

a break in the UMR Haunted ME Haunted Mine. Robertson, Mining Eng. Dept.

UMR students unite in Trick-or-Treating efforts

by Brian Seidlitz

Verve Ogre

It's that time of year again. The time of year when people dress up as their favorite sports star or perhaps a scary monster, all for the glory of getting some candy. Yes, Halloween is an oddity of a holiday where kids are encouraged to go knocking on neighbors' doors. It is also a time of concern for parents, when kids roam the streets, some with less good-willed intentions than others. Faced with the possibility of such individuals, two student groups from UMR strived to make a safe environment for the little ones during this year's candy scavenger hunt.

The Thomas Jefferson Hall Association (TJHA) will be holding their annual Haunted House and Trick or Treat Night, Friday October 30. This affair will be held in TJ starting at 7 p.m. and will run until midnight. Parents and children from Rolla can

bring their bags and load up on the candy being handed out by residents on several residence floors. After traversing through the halls of the upper floors, it's down to the basement where a haunted house will be set up. It is advertised as one of the best haunted houses in Rolla. Despite being an annual event, which can sometimes become mundane, TJHA boasts a new addition to this year's activities: a maze covering 2100 square. ft. The evening's adventure is free and open to the public, which is encouraged to attend.

While on the streets of Rolla, children and their parents can have the ease of mind that participants of Project Halloween are on hand. UMR's Panhellenic Council is organizing Project Halloween, a neighborhood watch with approximately 150 participants. The list of expected participants includes members of Greek Life, Residential Life, various UMR service organizations and the Rolla

Police. The participants will be split into groups and will roam the streets on designated routes in high volume trick-or-treating areas. These friendly people, who can be identified by the St. Pat's sweatshirts they'll be wearing, will be passing out candy and glow sticks. Their operation will run from 5:30 to 11:00 p.m. on Halloween. Project Halloween is in its second year, and its organizers have solved the few problems that were encountered during the first year. All of those involved hope for a successful night of fun and safe trick or treating.

As the days count down, the anticipation grows. With the activities of TJHA and Panhellenic Council and friends, the children will only have to worry about how much candy they will get, while their parents only have to worry about how much candy their children are going to consume. Have a fun, safe trick-or-treating night.

by Boris and Natasha

ARIES (March 21 - April 19): You use the word "groovy" too much. Vary your vocabulary and vary your life. People have started to resent you. Change your ways.

TAURUS (April 20 - May 20): Watch out for beached whales in the road. Obstacles are blocking your way, don't let them. Blow that whale up!!

GEMINI (May 21 - June 20): Get lost in your own little world today. The sky's a prettier color and that special Libra is always naked. It's a beautiful place.

CANCER (June 21 - July 22): Many members of the opposite sex have been desiring you. Follow your instincts and reap the benefits. (I said **reap**, you sick thing.)

LEO (July 23 - August 22): Pay attention when others are talking. You're in your own little world, and no one wants to be in there with you.

VIRGO (August 23 - September 22): Be a monkey. Be a monkey all the time. Your weekend attitude is much more positive than during the week. Draw from that. Be a monkey.

LIBRA (September 23 - October 22): Don't worry about your grades taking a plummet. If you flunk out of school, you can always become trailer trash. They have the most comfortable couches.

SCORPIO (October 23 - November 21): Join Libra on the couch. You need to relax about your problems. Prop your feet up on that cooler and watch the breeze blow by.

SAGITTARIUS (November 22 - December 21): Meditate. Float to class on your own special cloud. Your aura will lift you up and guide you to true happiness. Watch out for that lamp post in the way.

CAPRICORN (December 22 - January 19): Calm down. You're a little too wired lately. Stop drinking coffee, and let yourself sleep in class. Pay attention to those creepy dreams.

AQUARIUS (January 20 - February 18): There are many fish in the sea. Swim around, bump into others. Live it up, but avoid things with spikes.

PISCES (February 19 - March 20): Are you licking people like we told you to? It will work. You'll make new friends. Trust us.

Halloween will be good to all signs. Go out and party. Enjoy the benefits of your mask.

Head

from page 12

there, thinking.

He wondered about what he would write about. Halloween was coming soon. Maybe he would write about that. His thinking was interrupted by a drop of blood correctly punctuating his first line. "Wow," he said. "This must mean I am on the right train of thought." He quickly disabbed that thought when an axe fell, nearly missing his head. "What an unfortunate page break." He'd have to start all over now. He leaned back in his chair, thinking.

Due to his lack of coordination and balance, the writer fell back in his chair, slamming against the ground. He didn't notice the razor-sharp arrows missing him because of his fall. He got back up, dusted himself off, and got back to writing. He had to

get this done soon. He started hating himself for his work ethic. He started breaking his pencils in frustration. He was too busy to notice the shadowy figure sneaking up behind him...

Lightning struck a tree outside. The writer jumped up from his seat, kicking the chair back. The chair flew back into the knees of the approaching figure. Hearing the "ummp!" from the figure being hit by a chair, the writer quickly turned around. The figure lunged for him with a knife. The writer tried to dodge, but was not very physically apt, and took a blow to the chest. He was bleeding now. He reeled around, thrashing for his life, battling his opponent. He reached for something to help him. He found his pen. And what a nice pen it was! It was a Cross forty-two dollar pen, hunter green, guaranteed for life. He so dearly like that pen. But drastic times called for drastic measures! He lunged with the pen as the figure

lunged with a knife. The writer was fortunate, and made the strike first. He drew a mustache on the figure! The figure reeled about in contempt and frustration, missing with the knife. The writer then followed through with the pen. The figure tried to attack as well. The figure's attack thrust him into the path of the pen, impaling himself.

The writer looked at the figure with disgust. He had ruined his pen! Now how was he supposed to write his article? The figure fell limp. The writer wanted his pen back, and so called the police to handle it legally. The police were shocked to see the writer, complaining about his pen, when he had just neutralized the town's mass murderer. And so, the writer had escaped losing his head. He now also had an exciting story to write about. For, as it came to be known, the pen was mightier than the knife.

Movies

from page 13

chilling Latin chanting in the background and the horror of the power of the dark forces in this world.

***The Exorcist (1973):** This is scary for many of the same reasons as *The Omen*. Fun fact about *The Exorcist*: one of the first signs that the girl has been possessed is a shaking of her bed. Several people have told me that right after this movie came out, there was a rash of people thinking that their beds were moving at night. That just goes to show how well this film draws viewers in.

Horror/Gore

***Texas Chainsaw Massacre (1974):** Lots of good gore. Not a fantastic movie (I am definitely biased to the older more suspense, less gore films), but a good one for a group of people interested in jumping on each other's laps for comfort.

***A Nightmare on Elm Street (1984):** The beauty of these movies, much like the *Exorcist*, is their ability to make people afraid to go to sleep. We all have or have had nightmares and have long comforted ourselves by telling ourselves that they are only dreams. This movie makes viewers quite a bit less sure about their logical reasoning.

***Friday the 13th (1980):** These movies are also good for the group of people needing to cling. I enjoyed them in Junior High...now, not so much.

***Halloween (1978):** Halloween became an instant hit because it was the first movie where the protagonist (super-screamer Jamie Lee Curtis — daughter of Janet Leigh of *Psycho*) really fought back hard. Truly scary for people home alone who just might have seen something out of the corner of their eye...

Horror/Sci-fi

***Alien (1979):** Truly horrific because of the uncontrollable nature of the alien and the isolation of the crew...but, because of the specific (and out of the ordinary setting), viewers don't get a long term scare (i.e., everything is fine once they leave the theater or turn the TV off).

Horror/Thriller

Candyman (1992): Terrifically scary movie. A lot of fun to watch because you're never sure what is coming next. Also, the Candyman has a haunting voice, the kind that shows up in your imagination just when you're about to fall asleep. This is one of those myth movies about looking into the mirror and calling out his name five times. I would recommend to the braver among any group to try this out. It's quite amusing to see reactions from the more anxious people.

Horror/Comedy

Scream (1996): Not scary at all, but fabulous for its self-awareness and humor. It doesn't take itself too seriously.

Beetlejuice (1988): A good movie for lots of laughs. Certainly not scary, but fun to watch — for the shrunken heads if nothing else.

Army of Darkness: Evil Dead 3 (1993): I've seen this and talked with other people about it. I don't get the interest, but I think it is geared towards a more male audience. I didn't like it, but I knew other people that did — though they couldn't really articulate why.

Horror/ Coming to theaters October 30

John Carpenter's Vampires (1998): John Carpenter is a master. This is a must-see.

Tickets

from page 9

hell. I was fortunate that when stopped, I had oil leaking on my manifold, causing heavy smoke to appear. Not only did I get out of a ticket, but the officer apologized for potentially aiding to my car trouble and offered me an escort to my destination.

If you know that you are getting a ticket, there are ways that you can successfully appeal it. Always ask for the calibration date on the radar gun. Missouri mandates that these guns be calibrated either every six months or every year. If the gun wasn't calibrated in the acceptable time period, it is a reputable defense that the gun was not only acting illegally in accordance to guidelines, but also could very well have displaced inaccurate readings. It

never hurts to ask to see the radar gun as a testament to the speed that was clocked. If the officer has cleared the gun, you can also use that fact in your defense. In addition, make sure that you get the officers name and badge number for future reference. Also, check the ticket information to make sure that it is filled out accurately. I got out of a parking ticket in high school because the officer had switched the information in the time and license categories. Since my car license was not "12:30," the ticket was invalid.

One final thought is to acquire the knowledge of a lawyer. Student council hosts monthly free legal advice from a local attorney. He or she can help you address your individual situation and help you take the steps necessary to eradicate your tickets.

Concert

from page 2

me, it makes me automatically not want to go."

Justin Wylam, freshman, thought that SUB should have chosen a different band if they wanted a larger response. "The e-mail didn't help. It wasn't that people didn't know about the concert, it's just that people didn't like Blues Traveler enough to spend \$12.00 on it."

However, the e-mail did have an effect on Scott Resnik, senior. "The e-mail made me want to buy a ticket and not go, just to make it possible to have future concerts this year."

IT'S THE GIFT OF A LIFETIME.

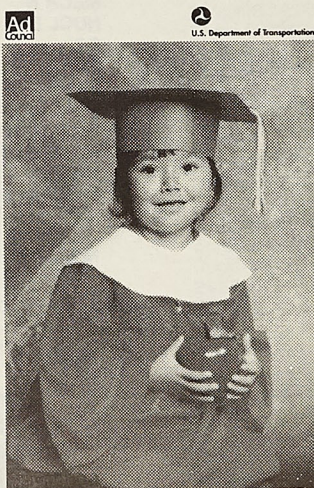

Making a bequest to the American Heart Association says something special about you. It's a gift of health for the future generations — an unselfish act of caring.

Your gift will fund research and educational programs to fight heart attack, stroke, high blood pressure and other cardiovascular diseases. And

bring others the joy and freedom of good health.

To learn more about how you can leave a legacy for the future, call 1-800-AHA-USA1. Do it today.

CHRYSLER ANNOUNCES NEW SCHOLARSHIP PROGRAM

With an eye toward assisting outstanding college bound students, Chrysler Corporation recently awarded 1,000 grants to 40 recipients through its new Junior Golf Scholarship Program. Even though the majority of the winners play golf, all selections were made based upon their academic and extracurricular effort. For more information on this exciting program call 1-800-856-0764.

DEPARTMENT OF THE ARMY U.S. ARMY HEALTH PROFESSIONAL SUPPORT AGENCY

Let the Army pay your way through Medical, Dental Optometry School, or a Doctoral level degree in Clinical/Research Psychology. Scholarship includes: full educational fees, required books, lab fees, required equipment rental, \$865.00 monthly stipend.

FOR MORE INFORMATION ON ARMY SCHOLARSHIP OPPORTUNITIES CONTACT: CAPTAIN DINO L. MURPHY OR MRS. SHARON MACKENZIE AT 1-800-829-0924.

KIDS' CHANCE INC. OF MISSOURI

What is Kids' Chance? It is a nonprofit corporation developed by interested employers, attorneys, laborers, insurers, third party administrators, government officials, health care representatives and rehabilitation providers. The purpose of Kids' Chance is to provide educational scholarships to financially assist the education of children of workers who have been seriously injured or killed in Missouri work related injuries.

Which Children are Eligible for the Scholarship? To be eligible for the scholarship the child's parent must have sustained a serious injury or fatality in a Missouri work related accident covered by workers compensation. The parent's injury or death must be compensable under Missouri Workers' Compensation Law, Chapter 287 RSMo. The child must be between the ages of 16 and 25.

When do you apply? Applications are accepted at any time. KIDS' CHANCE Scholarships are awarded on basis of need throughout the year as funds are available. The deadline for accepting applications for a one year scholarship (fall and spring semesters) is May 15th. The deadline for accepting applications for the spring semester only is October 30th.

Applications available in the Student Financial Assistance Office, G-1 Parker Hall, Rolla, MO 65409-0250 or by calling 1-800-484-5733 - code 5437 (KIDS).

THE JOHN GYLES EDUCATION FUND

The John Gyles Education Fund is a private, benevolent endeavor established eight years ago with the help of a Canadian/American benefac-

tor. Each year financial assistance is available to full-time students in both Canada and the United States. Full Canadian or American citizenship is a requirement. Awards are available to both male and female students for all areas of post secondary study. A minimum GPA of 2.7 is required. Criteria other than strictly academic ability and financial need are considered in the selection process. Selected students will receive up to \$3,000. Filing dates for mailing applications in 1998 are April 1st, June 1st, and November 15th.

To receive an application please send only a stamped *** (US 32 cent), self-addressed, standard letter size (No. 10) envelope to the following address: The John Gyles Education Fund, Attention: R. James Cogle, Administrator, P. O. Box 4808, 712 Riverside Drive, Fredericton, New Brunswick, Canada E3B 5G4.

AMERICORPS EDUCATION AWARDS

The AmeriCorps Education Awards Program offers members the standard AmeriCorps education stipend of over \$4,700 for one year of community service, but unlike AmeriCorps USA, it does not provide a living allowance or other benefits. For information on this program contact the Student Financial Assistance Office, G-1 Parker Hall.

CARAT SCHOLARSHIP FOUNDATION

To receive current information packets and applications for The Carat Scholarship, please have interested students send a stamped self addressed envelope to: Carat Scholarship Foundation, Attn: Carol McAuliffe-Director, 5 Magnolia Parkway, Hawthorn Woods, IL 60047. The schedule for the Carat Scholarship Foundation Awards is as follows: Academic semester Spring 1999, Applications Postmarked by: November 1, 1998, Awards Distributed by: December 15, 1998. Carat Scholarship Foundations is funded by the contributions of civic minded individuals, businesses and various fund raisers. The Foundation offers \$500 - \$1000 scholarships semiannually to graduate and undergraduate students who are United States citizens. The scholarships are awarded on the basis of career goals, financial need and academic record.

AIR FORCE SCHOLARSHIPS FOR MEDICAL STUDENTS

Applicants must be U.S. citizens, of good moral character, physically qualified for an Air Force commission, currently enrolled or accepted for the next enrolling class of an accredited allopathic or osteopathic school within the United or Puerto Rico, and not contractually obligated to serve a state or other party upon graduation.

Interested persons should contact their

Air Medical Recruiter for more information and/or and interview and application. (573-446-6750)

ROTARY CLUB OF FLORISSANT LOAN PROGRAM

The Florissant Rotary Club wishes to inform students of a loan program which is available for eligible students through the Flo-Ro Trust. This program is part of an overall effort by the Florissant Rotary Club to assist in the education of qualified students within the Florissant Rotary's service area. ELIGIBILITY CRITERIA: A candidate must reside in the Florissant Rotary Club service area. (North St. Louis County, north of Highway 270) A candidate must have completed a minimum of 60 semester hours at an accredited college or university. A candidate must complete the Flo-Ro

Trust Loan application and provide all required materials. A candidate must be enrolled for a minimum of 12 semester credit hours during the semester of the loan period for a bachelor's degree, or 10 semester credit hours for a graduate degree. Interested students contact: Mr. Ronald Schmidt, 801 St. Francois Street, Florissant, MO 63031 or call (314) 921-5100.

STATE SPONSORED MISSOURI NATIONAL GUARD EDUCATIONAL ASSISTANCE PROGRAM

Any member of the Missouri National Guard who is serving in the Missouri National Guard satisfactorily, and who possesses the qualifications set forth in application may be awarded educational assistance to an approved public institution or an approved private institution, as those terms are defined in RSMO Section 173.205, of his/her choice while he/she is a member of the Missouri National Guard.

ELIGIBILITY CRITERIA: Is a member of the Missouri National Guard Is certified by the Unit commander that the soldier/airman is participating satisfactorily in required training of the Missouri National Guard Has not previously received a bachelor's degree from an accredited post secondary institution. Has achieved and maintains a cumulative grade point average (GPA) of at least a 2.5, grade point on a 4.0 scale, or the equivalent on other scale approved by the program administrator, while in a secondary school. Is enrolled, or has been accepted for enrollment, as a full or part-time undergraduate student in an approved private or public institution. Has never been convicted in any court of an offense which involved the use of force, disruption, or seizure of property under the control of an institution of higher education to prevent officials or students in such institutions from engaging in their duties or pursuing their studies. Has not enrolled or who intends to use the award to enroll, in a course of study leading to a degree

in theology or divinity. Has not received Educational Assistance under the MONGEAP which exceeds or will exceed financial assistance for more than a total of ten (10) semesters or their equivalent. Application deadlines: Summer Semester taking applications from January 1 - April 30. Applications available in the Student Financial Assistance Office, G-1 Parker Hall.

AMERICAN SOCIETY OF HEATING, REFRIGERATING AND AIR-CONDITIONING ENGINEERS, INC. GRANT-IN-AID PROGRAM FOR GRADUATE STUDENTS.

Applicants should be involved in the heating, ventilation, air conditioning or refrigeration (HVAC&R) fields or in related areas. These areas many include indoor air quality, energy conservation, human comfort or HVAC system design, operation or maintenance. Applications available in the Student Financial Assistance Office, G-1 Parker Hall or by ASHRAE Home Page (www.ashrae.org). Click on "Student Activities and Scholarships" and then on "ASHRAE Research Grants for Graduate Students."

Application must be received at ASHRAE Headquarters by December 15 to be considered.

NATIONAL SECURITY EDUCATION PROGRAM FOR STUDY ABROAD

As an undergraduate student, you are eligible to apply for an NSEP scholarship if you meet the following conditions:

- U.S. citizenship at the time of application.
- Matriculated as a freshmen, sophomore, junior, or senior in a U.S. post-secondary institution, including universities, colleges and community colleges accredited by an accrediting body recognized by the U.S. Department of Education.
- Applying to engage in a study abroad experience that meets home institution standards.
- Planning to use the scholarship for study abroad. NSEP undergraduate scholarships are not for study in the U.S.
- Your study abroad program ends before you graduate.

Application available in the Student Financial Assistance office, G-1 Parker Hall. Deadline must be to NSEP by: FEBRUARY 8, 1999

SOCIETY OF FIRE PROTECTION ENGINEERS GREATER ST. LOUIS CHAPTER (3 \$1,500.00 Scholarships awarded)

The Greater St. Louis Chapter of the Society of Fire Protection Engineers (SFPE) is happy to announce its Fifth Annual Engineering Scholarship Program. Our intent is to promote the study of all engineering disciplines to

help develop individuals with the knowledge and ability to meet the future technical needs of our country and the world.

BASIC CRITERIA:

Native St. Louisian, or be interested in working in St. Louis after graduation. Full-time student with minimum 60 credit hours in an engineering curriculum at a BS or MS level. Financial need, past academic achievements, community involvement, and interest in Fire Protection Engineering will be considered in the scholarship selection process.

The goal of this scholarship fund is to provide educational assistance to students who are seeking a degree in engineering and show an interest in the Fire Protection field. In addition, to promote the fire protection industry by encouraging students who are inclined to become a Registered Professional Engineer and practice in the St. Louis area.

Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Applications deadline: February 26, 1999.

CONCRETE RESEARCH AND EDUCATION FOUNDATION OF ACI INTERNATIONAL 1999-2000

\$3,000 (U.S.) awards are now available through the ACI International Concrete Research and Education Foundation (ConREF) for graduate study in the field of concrete for the 1999-2000 academic year. The awards include the Katharine and Bryant Mather Fellowship, ACI - W.R. Grace Fellowship, V. Mohan Malhotra Fellowship, Stewart C. Watson Fellowship and ACI Fellowship REQUIREMENTS

Must have possession of a bachelor degree from an accredited program by the summer of 1999. At the time of acceptance of the fellowship (but not necessarily at the time of application) the applicant must have been accepted for graduate study. This graduate study must be in an engineering, architectural, or materials science program at an accredited college or university in the USA or Canada which offers a graduate program in concrete design, materials, or construction, with the exception of the V. Mohan Malhotra Fellowship which is available only to an applicant majoring in concrete materials science research and the Stewart C. Watson Fellowship which is available to an applicant with a special interest in joints and bearings for concrete structures. Must be full-time first or second year graduate student during the entire fellowship year. Must be proficient in the English language (or French as required in Province of Quebec or Spanish in Puerto Rico).

Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Application must be received by: January 11, 1999.

PETER D. COURTOIS CONCRETE CONSTRUCTION SCHOLARSHIPS (TWO \$1,000 AWARDS)

REQUIREMENTS: These awards are open to any undergraduate student in the United States or Canada. The student shall have achieved senior status in a four-year or longer undergraduate program in engineering, construction, or technology during the year for which the awards are presented. The awards will be made on the basis of demonstrated interest and ability to work in the field of concrete construction.

The student must have a course load of 6 or more credit hours each semester during the period for which the award is made. The student must be a senior during the year for which the award is made (not necessarily at the time of application). Transcript, recommendations, and an essay must be submitted as outlined on the application form. Application forms may be obtained from: ACI ConREF, P. O. Box 9094, Farmington Hills, MI 48333. NOT AVAILABLE IN THE Student Financial Aid Office. January 11, 1999.

DEPARTMENT OF ELEMENTARY AND SECONDARY EDUCATION MISSOURI MINORITY TEACHING SCHOLARSHIP

REQUIREMENTS:

Be a Missouri resident Be African American, Asian American, Hispanic American, or Native American Be a high school senior, college student, or returning adult (without a degree) who ranks in the top 25 percent of their high school class and scores at or above the 75th percentile on the ACT or SAT examination. OR, individuals who have completed 30 college hours and have a cumulative G.P.A. of 3.0 OR, individuals with a baccalaureate degree who are returning to an approved math or science teacher education program. Application available in the Student Financial Assistance Office, G-1 Parker Hall. Submit a complete application packet by: February 16, 1999.

DEPARTMENT OF ELEMENTARY & SECONDARY EDUCATION MISSOURI TEACHER EDUCATION SCHOLARSHIP

REQUIREMENTS:

Be a Missouri resident Be a high school senior, freshmen or sophomore at a community or four year college or university in Missouri (with not more than 60 college credit hours). Rank in the top 15% of their high school class or score in the top 15 national percentile on an ACT or SAT examination. Submit a completed application packet by: February 16, 1999. Application packets available in the Student Financial Assistance Office, G-1 Parker Hall.

NATIONAL SCIENCE FOUNDATION GRADUATE RESEARCH

FELLOWSHIP PROGRAM

The National Science Foundation (NSF) will award 1,000 new Graduate research Fellowships to support graduate study in science, mathematics, and engineering. **REQUIREMENTS:** Applicants must be United States citizens or national, or permanent residents of the United States. Those eligible to apply in fall 1998 are college seniors, first year graduate students, and other who have completed a limited amount of graduate study in science, mathematics, or engineering. Fields supported: Fellowships are awarded for study and research leading to master's or doctoral degrees in the mathematical, physical, biological, engineering, and behavioral and social sciences, including the history of science and the philosophy of science, and for research based PhD degrees in science education. Women in engineering and Computer and Information Science: Additional Awards will be offered to encourage women to undertake graduate study in engineering and computer and information science. Applications can be obtained by: NSF Home Pages URL: <http://www.ehr.nsf.gov/ehrg/grfp.htm> or submit applications electronically using NSF's FastLane URL: <http://www.fastlane.nsf.gov/Applications> also available in the Student Financial Assistance Office, G-1 Parker Hall. Application deadline: November 5, 1998.

ALPHA IOTA EDUCATIONAL FOUNDATION

The Alpha Iota Educational Foundation (AIEF) was created in 1993 to provide scholastic support to students at the University of Missouri-Rolla. The Scholarship program consists of a \$500 scholarship award during each school year. Applications are submitted during the Fall semester and the scholarship is awarded during the Spring semester. To be eligible for the AIEF scholarship program applicants must be enrolled as full time undergraduate students at the University of Missouri-Rolla during the semester in which the scholarship is awarded. Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Applications must be postmarked on or before January 15 for the Spring semester scholarship award.

GLAMOUR'S 1999 TOP TEN COLLEGE WOMEN COMPETITION

Glamour is pleased to invite your students to apply to our 1999 Top Ten College Women Competition. This competition recognized the exceptional achievements and academic excellence of female college juniors from across the country. It's an ideal opportunity for talented students to be rewarded for their leadership roles on campus and in the greater community.

REQUIREMENT:

Any woman who is a full-time junior (third year of undergraduate study) at an accredited college or university for the 1998-1999 academic year is eligible to enter. Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Application deadline must be returned by: January 31, 1999.

JAMES MADISON MEMORIAL FELLOWSHIP FOUNDATION

The Foundation is seeking applicants with a demonstrated commitment to a career in teaching American history, American government, or social studies at the secondary level. Applicants for a fellowship, must be: A U.S. citizen or U.S. national; and A teacher, or planning to be a teacher, of American history, American government, or social studies at the secondary school level. **JUNIOR FELLOWSHIPS**, awarded to students who are about to complete, or have recently completed, their undergraduate course of study and intend to pursue full-time graduate work. **SENIOR FELLOWSHIPS**, awarded to experienced teachers who want to pursue graduate studies on a part-time basis through summer and evening classes. For additional information and detailed regulations about the Foundation and the fellowship program, or to receive an application packet, please visit the Foundation's web site: <http://www.jamesmadison.com> or call Toll-free at: 1-800-525-6928.
